

MODERN FRENCH GRAMMAR

A Practical Guide

Margaret Lang and Isabelle Perez

ROUTLEDGE GRAMMARS

Modern FRENCH Grammar

Modern French Grammar: A Practical Guide is an innovative reference guide to French, combining traditional and function-based grammar in a single volume.

The *Grammar* is divided into two parts. The shorter section covers traditional grammatical categories such as word order, nouns, verbs and adjectives. The larger section is carefully organized around language functions and notions such as:

- giving and seeking information
- putting actions into context
- expressing likes, dislikes and preferences
- comparing objects and actions

All grammar points and functions are richly illustrated and information is provided on register and relevant cultural background. Written by experienced teachers and academics, the *Grammar* has a strong emphasis on contemporary usage. Particular attention is paid to indexing and cross-referencing across the two sections.

This is the ideal reference grammar for intermediate and advanced learners at A-level and above. It will prove invaluable to those with little experience of formal grammar, as no prior knowledge of grammatical terminology is assumed and a glossary of terms is provided. The book will also be useful to teachers seeking back-up to functional syllabuses and designers of French courses.

Margaret Lang is Senior Lecturer and **Isabelle Perez** is Lecturer in French at Heriot-Watt University, Edinburgh.

Section A Structures

I The sounds of French	11
1 Vowels	11
2 Nasal vowels	11
3 Semi-vowels/semi-consonants	11
4 Consonants	11
5 Accents, cedilla, diaeresis	12
6 Liaison	13
7 Elision	13
II The noun group	16
8 Articles	16
9 The definite article	16
10 The indefinite article	22
11 The partitive article	23
12 Demonstrative adjectives	27
13 Demonstrative pronouns	29
14 Possessive adjectives	31
15 Possessive pronouns	34
16 Nouns	35
17 Adjectives	42
18 Indefinite adjectives, pronouns and adverbs	51
19 Personal pronouns	62
20 Reflexive pronouns	67
21 Emphatic pronouns; position and order of pronouns	68
22 Relative pronouns	73
23 Interrogative pronouns, adjectives and adverbs	78
24 Cardinal and ordinal numbers	83
25 Fractions	88
26 Approximate quantities	88
27 Dimensions	89
28 Adverbs of quantity	91

III The verb group	92
29 Agreement of verb and subject	92
30 Formation of tenses	95
31 The indicative tenses; the present tense	96

70.1	Agreeing	248
70.2	Disagreeing	250
70.3	Agreeing to differ	253
71	Asserting and confirming	254
71.1	Asserting	254
71.2	Confirming	255
72	Admitting and conceding	256
72.1	Admitting	256
72.2	Conceding	257
73	Correcting and protesting	258
74	Contradicting and criticizing	261
75	Suggesting and persuading	263

75.1 Suggesting	263
75.2 Persuading someone to think the way you do	265
75.3 Persuading someone to do/not to do something	267
75.4 Other ways of persuading and dissuading	267
76 Expressing volition	270
76.1 Verbs expressing volition	270
76.2 Wishing and intending	272
76.3 Asking what someone intends	273
76.4 Asking someone for something	274
76.5 Expressing (un)willingness to act upon request	276
76.6 Deliberate or non-deliberate actions	277
76.7 Saying what you do not want	278
77 Expressing permission and obligation	280
77.1 Permission	280
77.2 Prohibition	282
77.3 Obligation	283
77.4 Exemption	287
78 Expressing doubt and certainty	289
78.1 Doubt and certainty	289
78.2 Possibility and probability	294
78.3 Condition and hypothesis	299
79 Expressing logical relations	304
79.1 Cause – explicit	304
79.2 Cause – implicit	308
79.3 Consequence – explicit	309
79.4 Consequence – implicit	312
79.5 Aim	313
80 Expressing opposition	316
81 Structuring	322
81.1 Beginning	322
81.2 Continuing	327
81.3 Ending	329
82 Verb tables	334
Index of grammar structures and functions	348

Introduction

This book is designed to provide the essential elements of French grammar, for students in the final year of school and in the first and later years of higher education. Advanced learners will find much that is useful for extending their knowledge of French, and for revision. The book is organized in two major sections: a reference section containing the structures of grammar and a section containing functional grammar. Each section includes cross-references to the other.

The reference grammar, which is as comprehensive as possible, has been structured around the noun phrase – dealing with all the elements related to the noun: articles, pronouns, adjectives and numbers – and the verb phrase – dealing with all the elements related to the verb: tenses, mood, participles and adverbs.

The functional grammar is composed of three parts, each demonstrating how to do things with language in order to communicate. The three principal functions identified are exposition, attitude and argumentation. Each of these is divided into smaller function areas related to the principal function.

The functions

Exposition

Communication involves both giving and obtaining information: we make statements and we ask questions about someone or something. This involves

- (a) referring to people, things and places
- (b) narrating events in some sort of sequence
- (c) reporting what we or other people say or think.

In other words, we are giving or obtaining information about who, what, when, how, where and why. Exposition includes three groups of functions identified, very broadly, as *referring, narrating and reporting*.

Referring to people, things and places involves giving and obtaining information about physical characteristics, personality, relationships, age, ownership, dimensions, quantity and number, quality or distinguishing characteristics, comparison, direction, location and manner.

Narrating involves talking about events or actions in terms of present, past and future time, dates and time, and sequence.

Reporting describes what we or other people say and write. Reporting is usually clearly indicated by the presence of an introductory verb. There are many verbs which can introduce reported speech of which the commonest is 'say'. Some of the others are 'think, remind, ask, hope, believe, want, suggest, answer, admit, forget'. Interrogative structures are included in this section because we need to know how to obtain information, and to do this we ask questions, and negation is included because, of course, sometimes we need to say that something is not the case.

Attitude

Expressing an attitude towards someone or something usually means that we are introducing a personal, subjective element into communication: we are indicating our reaction to someone or something, we are evaluating, and making judgements – in a non-detached way. And we may do so spontaneously or intentionally.

Closely related to attitudes are the emotions and feelings which most of us experience and express from time to time. These, too, are personal and subjective, and, on occasion, they may in fact be attitudes. The focus of this section is, then, on the communication of attitudes, emotions and feelings and how we express them. We look first at the ways in which we *greet* or *take leave of* people when we are speaking or writing to them. Then we turn to the ways in which we express *congratulations* and *appreciation, apologies and sympathy*, and *surprise* and *disgust*. Finally, we consider ways in which we express contrasting attitudes, emotions and feelings: *likes, dislikes and preference, love and hate, enthusiasm and indifference, hopes and fears, approval and disapproval*.

Argumentation

Effective communication usually requires a certain amount of planning, and this involves the need to

- (a) structure what we want to say or write
- (b) determine the best strategies to employ
- (c) select the means of expression most suited to the structure, to the strategies, and, above all, to a specific context or situation.

The structure is the *plan* in what we are saying or writing, the strategy is the *function* we are employing, and the means of expression is the *grammatical or lexical* structure (for example, verb construction, noun phrase) which is most appropriate for the plan and the function.

It may be that a single word is enough to achieve what we want, but more

frequently we are involved in a discussion or explaining something or arguing a case and so on. Often, there is simply not enough time to plan carefully what we want to say – though there is more time when we are writing. Also, it would be virtually impossible to try to learn every function and every means of expression. However, if we are familiar with some kinds of plan, with various types of function, and with some of the means for expressing them, then we can not only use them ourselves, but recognize them when we are listening to or reading what other people are saying or writing.

There are many kinds of plan in what is said and written, and these plans vary in complexity. Examples of plans, or planning, are the following:

- (a) creating a clear overall structure with an introduction, middle section and conclusion
- (b) listing a series of points
- (c) putting another point of view and defending it
- (d) proceeding from cause to effect, or vice versa.

In some situations, parts of plans may be enough and indeed appropriate for achieving what we want, for example, only part of (c). At other times we may need to put into action a fully developed plan, for example, a combination of (a)–(d). Finally, we must remember that there is no single, perfect plan suitable for every situation or context.

The functions available to us when we want to achieve something in argumentation are many. We may, for example, want to agree, indicate doubt, reject, criticize. We may wish to emphasize, persuade, influence, express obligation. Whatever it may be, whether we are initiating a discussion, making a speech, contributing to a conversation, reacting to a comment, broadcast or report, we have at our disposal a wide range of possible moves. We cannot, of course, know how someone is going to react to what we are saying or writing, so we need to have access to a range of responses in order to adapt to an unforeseen reaction, and respond appropriately.

The section on argumentation provides a comprehensive range of functions – and the means of expressing them – which are in fairly common use. You will recognize them when people are speaking and writing. It is recommended that you try to put them into practice in speech and writing whenever appropriate. The functions are presented as follows – *agreeing and disagreeing, asserting and confirming, admitting and conceding, correcting and protesting, contradicting and criticizing, suggesting and persuading, expressing volition, permission and obligation, doubt and certainty, logical relations, opposition, and structuring*.

The examples

The examples in the reference section are simple illustrations of the grammar structure in question. In the functional section the examples are selected from contemporary spoken and written French to demonstrate the function in question. They are actual examples which have been used in our own experience, and they are quoted within as much context as possible to illustrate the function and the related grammar structure.

The translations

The examples in both the reference and the functional sections are translated into English. In the reference section, translations are kept as close as possible to the French; in the functional section, on the other hand, where there is usually a substantial amount of context, the English equivalent is provided, rather than a direct and possibly, therefore, stilted version of the original.

Forms and functions

The forms in any living language are flexible and changing. At any one time they can vary according to the individual speaker or writer, to the part of the country he/she comes from or lives in, and indeed to fashion. There is seldom only one way of saying or writing something, and not very often a one-to-one equivalence of form and function.

This is clearly illustrated in the section on the imperative (A.51) where this one grammar structure is shown to have a variety of functions: the imperative form can be used to express an order, an instruction, an invitation, etc. It is also illustrated in the many functions of each of the tenses. Similarly, in the functional section, many forms are suggested for expressing one function: giving directions (B.56.10), for example, can be expressed through the imperative, the future tense, a combination of the two, etc.

Just as there is a network of relations between forms and functions, so there is a network of functions related to each single function. Agreeing (B.70.1), for example, is naturally associated with its opposite – disagreeing (B.70.2), and then also with a combination of the two – agreeing to differ (B.70.3).

How to use this book

This book brings together two sets of guidelines on the French language:

A – A reference grammar covering the major points which need to be mastered so that you get things right.

B – A functional grammar covering the major types of communication you may want or need to carry out.

At your disposal, then, you have the essentials of grammar (section A) and applications of the grammar in a wide selection of functions (section B). When we were preparing this book, we kept in mind the frequent changes which any living language undergoes, and we have, therefore, included comments on exceptions to the guidelines. And, wherever appropriate, we have included informal ways of saying or writing something. The majority of examples have cross-references to information concerning one or more grammar points or concerning additional details on the function.

How, then, will you use the book? If, for example, you want to greet someone, you look up B.61.1. In this section you will find a number of suggestions on different ways of saying 'Hi!' or 'Good morning!', for example. It's not very difficult to know how to say hello, of course, but, are you aware of the difference between **Bonjour!** and **Bonsoir!**? On the other hand, you might want to persuade someone to do something. To find a suitable way of doing this you look up B.75.3 and you will again find a number of suggestions for persuading, and cross-references to the appropriate grammar guideline. When you are looking at the functions, we suggest that you also consider the much longer context that is provided to see what happens to a grammatical form when it is in use.

There are other ways of saying and writing the same things – the examples given here are only suggestions, and you are bound to come across other means of expression the more you come into contact with French either at university or in your professional life. We recommend that you consider the suggestions provided here, select the form, or forms, that suit you best and learn them; when you meet alternative ways of saying or writing something, add them to your repertoire.

Just before the reference grammar we have included a section with the sounds of French, and several words for you to practise the sounds. Your teacher will be able to help you with them.

Glossary

Many of the terms used in this grammar are explained at the beginning of the section in which they are used, but there are some terms which are not explained in a specific section because they occur in several sections, and there are some which always cause difficulty for students. The short list which follows includes the terms which we think need special attention. We have assumed that most students using this grammar are familiar with most of the traditional grammar terms such as noun, verb, adjective.

adverb: a word or phrase which gives information about how, where and/or when something occurs. There are adverbs of manner, place, time, degree, duration and frequency. Adverbs can modify a verb (**faire avec soin**), an adjective (**très difficile**), or another adverb (**beaucoup trop**). Adverbs are always invariable, unlike some other parts of speech, that is, they never change their spelling to agree with another part of speech.

antecedent: a word or group of words which precedes another word or group of words. Relative pronouns, or words such as **ce**, **voilà**, have antecedents to which they refer back (*L'homme qui a donné un pourboire n'a pas beaucoup d'argent*).

apposition: the placing of a word or phrase directly beside another word or phrase in order to provide more information about the other one (*Jacques Chirac, Président de la République*).

cohesion: the linking of words, phrases, sentences and paragraphs by means of **cohesive devices**, which may be clauses, adverbs, pronouns, negatives, etc. (the adverbs include **et**, **mais**, **par contre**, **d'abord**).

complement: a word or phrase which completes the meaning of, or gives more information about, something. The complement may be a word in apposition (see above), a direct object (**Elle a mangé la pomme**), an indirect object (**Il le leur a vendu**), the agent in a passive sentence (**La tarte a été volée par le petit garçon**) . . .

conjugation: this refers to all the endings of a verb. Verbs are usually classified according to one of four main conjugations in French: **-er**, **-ir**, **-re**, **-oir**. Each of the conjugations has its own set of six endings for each tense. Regular verbs have the set of endings which belong to a particular conjugation, so grammar books are able to give a model verb for each conjugation which all the regular verbs of that conjugation will follow (regular **-er** verbs follow **donner**, for

example). Irregular verbs are those which do not follow either the stem or the endings of a conjugation. The most useful irregular verbs are included in verb tables in grammar books. They are often easy to remember because they are odd.

determiners: these are words which are part of the noun group. There are many of them in French – all the articles (**le, un, du** . . .); the possessive adjectives (**mon, ton, son** . . .); the demonstrative adjectives (**ce, cet, cette** . . .); the interrogative and exclamatory adjective **quel** (as in *Quelle maison?/!*); indefinite adjectives (**certain, chaque, différents, divers, maint, plusieurs, quelque, tout**); **aucun**, normally in the singular (*Elle n'a aucun talent.*); the cardinal numbers used as adjectives (as in **deux journaux**).

direct and indirect objects: the direct object is a noun or pronoun referring to a person or thing directly affected in some way by an action. The direct object is never introduced by a preposition (*Il a lu le livre.*) The object is indirect when it is introduced by a preposition, usually **à** or **de** (*Nous le donnons à nos parents. Ça dépend de nos parents.*). Indirect object pronouns are **me, te, lui, nous, vous, leur**. These pronouns are not preceded by **à** – it is built into the pronoun (*Nous le leur donnons.*). Following **de**, and other prepositions, the emphatic pronouns are used (*Ça dépend de toi.*).

finite: refers to the many parts of verbs which have endings. These endings indicate whether the subject is singular or plural, the tense and the mood. The **infinitive** is the part of the verb which ends in **-er, -ir, -re, -oir**, and in this case there is no finite ending giving information about whether the subject is singular or plural, or the tense.

gender and number: these are very important grammar concepts in French. If you forget to make adjectives agree with nouns or verbs with subjects, then you have simply made mistakes, and that can cost you marks! Gender in French is either masculine (**le, il** . . .), or feminine (**la, elle** . . .), and all nouns are masculine or feminine, and adjectives have to agree with their noun. Number refers to whether a noun or pronoun is singular (just one person, thing or action), or plural (two or more people, things or actions). Verbs have to agree with their noun or pronoun subject.

gerund: this is the part of a verb which behaves like a noun. It is, in fact, sometimes called a verbal noun (**mangeant, finissant** . . .).

impersonal verb: a verb of which the subject is **il** 'it' (**Il faut** 'it is necessary'). The impersonal verb can sometimes become personal by the addition of a personal pronoun (**Il me faut** 'I must').

to modulate: to change or influence the meaning of a word or phrase in some way. There are various ways of doing this, using nouns, adjectives, verbs or adverbs which have specific nuances. You can also, for example, in greeting and

leave-taking – merely by altering the intonation you use – make what you say courteous or courteous, friendly or aggressive. A slight change of meaning is called a *nuance* (of meaning). You can achieve a different nuance simply by adding, or changing, the intonation you use.

mood: this refers to the different forms in the conjugation of a verb which indicate the functions for which the verb is used. So, you have the indicative mood (fact), the subjunctive mood (non-fact), the interrogative mood (questions), the conditional mood (conditions and hypothesis), the imperative mood (orders). The mood of the verb can be changed according to what you want to express; for example, fact, non-fact, questions.

transitive and intransitive verbs: verbs can be directly transitive – followed by a direct object without any preposition between the verb and the object (**Il a lu le livre.**), or indirectly transitive – followed by an object introduced by a preposition (**Il se sert d'un couteau.**). Some verbs may be either directly transitive (**Elle a manqué le train.** 'She missed the train.'), or indirectly transitive (**Elle a manqué à sa parole.** 'She broke her word.'), but the meaning usually changes. Intransitive verbs are verbs which do not have an object (**Il dort.**). Some verbs may be transitive or intransitive (**Il boit une bière.** – transitive or **Il boit.** – intransitive). Note that in the vast majority of cases, only directly transitive verbs can become passive.

Abbreviations used in this book

f – feminine, m – masculine, s – singular, pl – plural

qn – quelqu'un, qch – quelque chose

SECTION A

Structures

I The sounds of French

Sections 1–4 contain guidelines on the sounds of French: vowels, semi-vowels and consonants. The international phonetic alphabet, in square brackets, is used to represent the sounds, each of which is followed by examples for practice. Sections 5–7 contain guidelines on the use of accents, liaison and elision. Dictionaries, such as the *Collins Robert French Dictionary* (1993) and the *Oxford Hachette French Dictionary* (1994) describe sounds using these conventions.

1 Vowels

[i]	physique, il, si	[o]	le nôtre, aux, eau
[e]	et, donner, été, j'ai	[u]	tout, pourtant, genou
[ɛ]	mais, père, fête, faisait	[y]	rue, voulu, plus
[ɑ]	part, patte, plat	[ø]	bleu, deux, creuse
[ɑ̃]	pâtre, passe, bas	[œ̃]	neuf, preuve, immeuble
[ɔ̃]	fort, notre, donner	[ə̃]	le, premier, de

2 Nasal vowels

[ã]	an, cent, temps	[õ]	son, ronde, ombre
[ɛ̃]	vin, main, plein	[œ̃]	un, humble, brun

3 Semi-vowels/semi-consonants

[w]	oui, noir, nouer	[ɥ]	pied, ail, famille
[ɥ]	puits, lui, muet		

4 Consonants

[b]	bon, robe, ruban	[ʒ]	je, gilet, gêne
[d]	dur, demande, aide	[k]	qui, sac, corps
[f]	phrase, affaire, fraude		archéologue
[g]	gant, second, bague		

[l]	seul, lent, elle	[t]	théâtre, vite, patte
[m]	femme, mon, dame	[v]	vous, rêve, vivre
[n]	ni, automne, tonne	[z]	zéro, disons, dixième
[p]	soupe, pour, obtenir		
[R]	rouge, Paris, dire	[ʃ]	chat, architecte, lâche
[s]	leçon, dix, se, ce, nation	[ʒ]	agneau, vigne, peigne

4.1

The letters k, w, h

The letters **k** and **w** occur only in imported words: **kilo**, **wagon**. The letter **h** is not pronounced, but a distinction is made between a mute **h**, as in **homme** [ɔm] in which **h** is treated as a vowel, and an aspirate **h**, as in **haricot** [ariko] in which **h** is treated as a consonant. This important distinction has implications for liaison and elision (see 6 and 7).

5

Accents, cedilla, diaeresis

5.1

There are three accents in French: the acute (**accent aigu**), the grave (**accent grave**), and the circumflex (**accent circonflexe**).

5.2

The acute ` is used only over an é as in **été, école**. Often, it indicates that an 's' may occur in the English equivalent: **échapper** 'escape'.

5.3

The grave ` is used over è, à and also ù in the word **où** 'where'. The grave may indicate that the letter è is in a stressed syllable: **j'espère**, 'I hope', **elles regardèrent** 'they looked at', **poète** 'poet', **manège** 'merry-go-round'. Over an à or ù the grave is used to distinguish different words: à (preposition), a (verb); là (adverb), la (definite article or pronoun); où (adverb or pronoun), ou (conjunction). It is also used in **çà et là** 'here and there', **voilà** 'there it is', **au delà de** 'beyond', **déjà** 'already'.

5.4

The circumflex ^ can be used over any vowel: **âme** 'soul', **frêle** 'frail', **fraîche** 'fresh', **prôner** 'to advocate', **dûment** 'duly'. It may indicate that the vowel is long: **extrême** 'extreme', **grâce** 'grace'. Often it indicates the disappearance of an 's': **maître** 'master', **pâté** 'paste'. It may indicate a contraction from a Latin source word: **âme** (*anima*) 'soul', **sûr** (*securus*) 'sure, safe'. It may be used to distinguish different words: **dû** (past participle – masculine singular only – of **devoir**), **du** (partitive article), **crû** (past participle of **croître**), **cru** (past participle of **croire**). Note that the circumflex over î replaces the dot: **croître** 'to grow', **vînmes** 'came'.

5.5

The cedilla (**cétille**) ç shows that c is pronounced [s] before a, o, u: **commençâmes** [kɔmãsa:m] 'began', **garçon** [garsɔ̃] 'boy', **déçu** [desy] 'disappointed'. Compare these with the following three words where there is no

cedilla: **capable** [kapabl] 'capable', **commencer** [kɔməsɛ] 'begin', **cube** [kyb] 'cube'. The cedilla is never used before e or i.

5.6

The diaeresis (tréma), used over è, ì, ù indicates that the vowel must be given full and separate pronunciation: **Noël** [nœ̂l] 'Christmas', **astéroïde** [asterɔ̂id] 'asteroid'. The feminine form of adjectives ending in -gu (aigu 'sharp', ambigu 'ambiguous') has a diaeresis: **aiguë** to indicate that the ending should be pronounced like the masculine form: **aigu**, **aiguë** [egy]. Without the diaeresis the last two letters of the feminine forms would be silent, as in **fatigue** [fatig] 'fatigue', **intrigue** [ētrig] 'intrigue'. The diaeresis replaces the dot over an i: **haïr** 'to hate'.

6 Liaison

6.1

Liaison is the linking of words to facilitate pronunciation. It occurs when a word begins with a vowel or a mute h. The final consonant of the preceding word – not normally pronounced in French – is pronounced and may be slightly modified in its new function of easing pronunciation: **elle est allée** [elētale] 'she has gone'. Liaison is used only where words are closely linked in meaning and the words are spoken as a unit. It is therefore likely to occur between a pronoun and verb, adjective and noun, article and noun.

Some examples: **les enfants** [lezāfā] 'the children', **trois hommes** [trwazɔ̂m] 'three men', **beaux arts** [bozar] 'arts', **grand amour** [grātamur] 'great love', **long escalier** [lɔ̂kescalje] 'long staircase', **allez-vous-en** [alevuzā] 'go away'.

6.2

Aucun, bien, combien, en, on, rien keep their nasal sound: **on aime** [ɔ̂nem] 'we like', **un homme** (ẽnɔ̂m) 'a man'. But, in other cases, the final nasal n is pronounced as an ordinary n: **bon enfant** [bɔ̂nāfā] 'good little child', **ancien élève** [ãsjenelev] 'former pupil'. Note that the nasal vowel is also pronounced as an ordinary vowel in such cases.

6.3

There is usually no liaison with an aspirate h: **un homard** [ẽ̂mar] 'a lobster', **les haricots** [leariko] 'haricot beans'.

6.4

Some exceptions: there is no liaison in **vous et elle** [vuêl] 'you and she', or in **mais oui** [mewil] 'yes', or in certain numbers: **les onze** [leɔ̂z] '11', **les huit** [leɥit] '8', **cent un** [sā̂œ] '101', **quatre-vingt-un** [katrəvēœ] '81', and note **il est onze heures** [ileɔ̂zœr] 'it's 11 o'clock', **dix-huit** [dizɥit] '18'.

7 Elision

7.1

In written French e or a are elided, or dropped, before a word beginning with a vowel or a mute h, and are replaced by an apostrophe: e is dropped from the

pronouns **je**, **me**, **te**, **se** and the article or pronoun **le**, and from **ce**, **de**, **ne**, **que**; a is dropped from the article or pronoun **la**.

Some examples: **j'écoute** 'I am listening', **il m'aime** 'he loves me', **va-t'en** 'go away', **il s'habille** 'he is getting dressed', **c'est moi** 'it's me', **l'homme** 'the man', **la nuit d'avant** 'the night before', **elles n'entendent jamais** 'they never hear', **la femme qu'il adore** 'the woman he loves', **l'habitude** 'the habit', **l'amie** 'the friend'. Note the exception **le onze** '11'.

7.2

The **e** is also dropped from **lorsque**, **puisque** and **quoique** before **il(s)**, **elle(s)**, **en**, **on**, **un(e)**: **lorsqu'on lui écrit** 'when we write to him/her', **quoiqu'elle y aille** 'although she goes there often'. It is also dropped from **jusque** before **a**, **au**, **en**, **ici**, **où** and **alors**: **jusqu'ici** 'until now', **jusqu'à quelle heure** 'until when'.

7.3

There is no elision when **je**, **ce**, **le**, **la** follow a verb:

Aurai-je assez de temps pour le faire?	Will I have enough time to do it?
Est-ce important de le faire?	Is it important to do it?
Offrez-le à la dame!	Offer it to the lady.

Descendez-la (la valise) avant de sortir!	Bring it down before you go out.
--	----------------------------------

7.4

The **i** of **si** is dropped in **s'il(s)** only: **s'il est là** 'if he is here', **s'ils nous voient** 'if they see us'.

7.5

Other words where elision occurs: **quelqu'un** 'someone', **grand-mère** 'grandmother', **presqu'ile** 'peninsula'.

II *The noun group*

8 *Articles*

French has three articles: the definite article, the indefinite article and the partitive article. They agree with nouns in gender and number. In general, they are used in a similar way to English articles, but there are several important differences.

8.1

Forms

	Definite	Indefinite	Partitive
Masculine singular	le (l')	un	du (de l')
Feminine singular	la (l')	une	de la (de l')
Plural	les	des + de/d'	des + de/d'

9 *The definite article*

The definite articles are **le**, **la**, **les** 'the'. Contracted forms are used when the prepositions **de** 'of', from' or **à** 'to' (and sometimes 'from': **emprunter à** 'to borrow from') precede the articles **le**, **les**: **de + le > du**, **de + les > des**, **à + le > au**, **à + les > aux**.

C'est le livre *du* professeur.

It's the teacher's book.

Ce sont les copies *des* étudiants.

They are the students' papers.

English frequently uses 's (singular) or s' (plural) to indicate possession, rather than 'of the'. It would sound odd to say: 'It is the book of the teacher'.

Elle parle *au* président.

She is speaking to the president/chairman.

Nous avons donné *les* billets *aux* enfants.

We have given the tickets to the children.

But there is no change when **de** or **à** precede **la** or **l'**:

La porte de l'école est fermée. The school door is shut.
Elle va à la maison. She is going home.

9.1

When they precede words beginning with a vowel or a mute **h**, **le** and **la** are shortened to **l'** (see 7.1):

<i>l'issue</i>	the exit	<i>l'accident</i>	the accident
<i>l'histoire</i>	history, the story	<i>l'homme</i>	man, the man

Note that the articles are not necessarily translated into English.

9.2

The article precedes nouns, and adjectives which precede nouns:

<i>la petite table</i>	the little table	<i>le grand garçon</i>	the big boy
-------------------------------	------------------	-------------------------------	-------------

but note that they *follow* **tout**, **tous**, **toute(s)** 'all, every, the whole' (see 18.1):

<i>tout le vin</i>	all the wine	<i>toute la famille</i>	the whole family
<i>tout l'argent</i>	all the money	<i>toutes les filles</i>	all the girls
<i>tous les mois</i>	every month		

9.3

How the definite articles are used

The definite article refers to specific people or things:

<i>Le livre est sur la table.</i>	The book is on the table.
--	---------------------------

In lists of nouns, the article is usually repeated before each noun:

<i>Il aime les chats, les chiens et les chevaux.</i>	He likes cats, dogs and horses.
---	---------------------------------

but increasingly today, in written French, the article is omitted from lists:

<i>Chats, chiens, chevaux, il les aime tous.</i>	Cats, dogs and horses – he loves them all.
---	--

9.4

In certain contexts French and English articles are used differently.

(a) where the noun is used in a general sense:

<i>L'herbe est verte.</i>	Grass is green.
<i>Aime-t-il le vin?</i>	Does he like wine?
<i>Elle aime les maths.</i>	She loves maths.
<i>Les ordinateurs deviennent de moins en moins chers.</i>	Computers are becoming less and less expensive.

(b) with parts of the body, or mind, where English uses the possessive adjective ('my, your ...') French uses the definite article (see 56.1):

Il secoua <i>la tête</i>.	He shook his head.
Ouvre <i>les yeux</i>.	Open your eyes.
Il a froid <i>aux pieds</i>.	He has cold feet.
Elle a mal <i>à la tête</i>.	She has a headache.
Elle a perdu <i>la mémoire</i>.	She has lost her memory.
Il souffre <i>du dos</i>.	He has back problems.

and with reflexive verbs (see 47.2 for agreement of participle, 56.5e) referring to the owner:

Elle s'est lavé <i>les cheveux</i>.	She washed her hair.
--	----------------------

When something is done to someone else, that person is indicated by the use of a dative pronoun (see 56.5e):

Elle <i>lui</i> a saisi <i>la main</i>.	She took his/her hand.
Elle <i>lui</i> a lavé <i>les cheveux</i>.	She washed his/her hair.

The definite article is also used with parts of the body in description following *avoir* (see 56.1):

Le bébé <i>a les mains dodues</i>.	The baby has chubby hands.
Elle <i>a les cheveux longs</i>.	She has long hair.

Note the use of the possessive adjective **mon, ton ...** 'my, your ...' with verbs other than *avoir*:

Il caressa <i>sa longue barbe noire</i>.	He stroked his long black beard.
---	----------------------------------

And note the following descriptive phrases where English uses 'with' (see 56.1):

la femme <i>aux yeux verts</i>	the woman with the green eyes
la maison <i>aux fenêtres ouvertes</i>	the house with the open windows
Il marchait <i>les mains derrière le dos</i>.	He was walking with his hands behind his back.

French normally uses the singular form of nouns if they refer to something of which we have only one, e.g. **la vie** 'life', **la tête** 'head/face', **le cou** 'neck':

Elle leur a sauvé <i>la vie</i>.	She saved their lives.
---	------------------------

(c) in many expressions of time, and with seasons, dates and festivals (see 57.4):

à trois heures *du matin/de l'après-midi*
Il arrivera vers *les sept heures.*
Elle le fera pendant *la semaine.*

at three in the morning/afternoon
 He'll arrive about seven o'clock.
 She will do it during the week.

Note the English equivalent with the use or omission of the articles:

<i>la semaine</i>	last/next week
<i>dernière/prochaine</i>	
<i>au jour le jour</i>	from day to day
<i>Elle travaille le matin.</i>	She works in the morning(s).
<i>Ils viennent le jour.</i>	They come during the day.
<i>tous les vendredis</i>	every Friday
<i>toutes les semaines</i>	every week
<i>tous les deux jours</i>	every second/other day

but

Elle le rencontre trois fois par semaine.

She meets him three times a week.

Some examples with the seasons:

L'hiver est merveilleux.
On y va l'été prochain.

Winter is wonderful.
 We are going there next summer.

The article is omitted with *en*: *en hiver*, *en été*, *en automne* 'in winter, summer, autumn', but not in *au printemps* 'in spring'.

Some examples with dates:

Nous sommes *le mardi 11 décembre.*
le 26 mai 1968
Le jeudi on va au marché.
On se voit le 7.

It's Tuesday, 11th December.
 26th May 1968
 On Thursdays we go to (the) market.
 See you on the 7th.

but

Il me le donnera jeudi.

He'll give it to me on Thursday.

Some examples with festivals, which are usually feminine:

à *la Toussaint*
à *la Pentecôte*

at Hallowe'en/on All Saints' Day
 at Whitsun

but

à Noël
à Pâques

at Christmas
at Easter

(d) in certain expressions of price, pay, quantity and speed:

Cela se vend à 30 francs le kilo.

That costs 30 francs a kilo.

Cela se vend à 2 francs cinquante les 100 grammes.
Ce tissu coûte 500 francs le mètre.

That costs 2 francs fifty (for)
a hundred grammes.
This material is 500 francs a
metre.

but

Il est payé à l'heure.

He is paid by the hour.

La voiture roulait à 100 km/h.
(you would say 100
kilomètres heure)

The car was travelling at 60
mph.

or

Elle roulait à 80 à l'heure.

It was going at 50 mph.

(e) with names of towns and cities 'from, to/in' are expressed by **de**, **à**: 'from Paris' **de Paris**, 'to/in Paris' **à Paris**. But if the town or city is qualified by an adjective, the article is used: **le vieux Paris** 'the old part(s) of Paris' (see 56.10, 56.11). The names of some towns and cities include the article as part of the name. In such cases the rules for **de**, **à** and the article (see 9) are followed:

Il revient du Mans, de La Rochelle, des Echelles.

He is just back from Le Mans, La Rochelle, Les Echelles.

Elle habite Le Havre.

She lives in Le Havre.

Elle va au Havre.

She is going to Le Havre.

Il est à La Rochelle.

He is in La Rochelle.

With countries and regions the article is usually included if the name of the country is masculine singular, or masculine or feminine plural:

Il revient des Philippines.

He is just back from the Philippines.

Elle va au Portugal.

She is going to Portugal.

But when names of countries and regions are feminine and singular – and most of them are – **en** is used for 'to/in' and there is no article: **aller/demeurer en Allemagne, en Ecosse, en Charente** 'to go to/live in Germany, Scotland, the Charente'. **De** is used for 'from' and there is no article: **revenir de Russie, d'Espagne, de Provence**, 'to return from Russia, Spain, Provence'.

Note that if the town or country is qualified by an adjective, the article is used: ***la Chine moderne*** 'modern China'. The article is also used when expressing north, south, east and west: ***le nord de la France*** 'the north of France', ***le sud de l'Angleterre*** 'the south of England'.

There is no precise pattern in some expressions. They simply have to be learned. Some examples:

les vins *de* France

the wines of France/French wines

l'histoire *de* France

the history of France/French history

(Many phrases have the pattern **de + noun** which is very similar to an adjective: **une écharpe *de soie blanche*** 'a white silk scarf', **une maison *de campagne*** 'a house in the country').

but

la géographie *de la* France

the geography of France/French geography

la capitale *de la* France

the capital of France/the French capital

and

le président *de la* République

the president of France/the French president

There is a rule of thumb for a few phrases: feminine countries – *no* article, masculine countries – *include* an article:

la reine *d'Angleterre*

the Queen of England

l'ambassade *d'Autriche*

the Austrian embassy

but

l'empereur *du* Japon

the Emperor of Japan

l'ambassade *du* Sénégal

the Senegalese embassy

(f) in titles, forms of address, and qualified proper nouns:

le général de Gaulle

General de Gaulle

As-tu connu *le Président*

Did you know President

Mitterrand?

Mitterrand?

Voilà *le docteur Knock.*

Here/there is Doctor Knock.

M. *le Président* ...

(Mr) President, ...

Messieurs *les délégués* ...

Delegates, ...

le vieux M. Guiat

old Mr Guiat

la petite Isabelle

little Isabelle

But the article is normally omitted before a noun in apposition:

le général de Gaulle, Président de la république	General de Gaulle, President of France
Paris, capitale de la France	Paris, the capital of France

Articles are not used in titles such as **Elizabeth II** 'Elizabeth the Second', **Henri IV** 'Henry the Fourth': in French you would say **Elizabeth deux, Henri quatre**.

- (g) with names of languages, use of the article is also variable, but it is normally omitted after **parler**:

Parlez-vous italien?	Do you speak Italian?
Il ne parle pas français.	He doesn't speak French.
Il est difficile de trouver un équivalent en anglais.	It is difficult to find an equivalent in English/an English equivalent.

but

Apprenez-vous l'espagnol à l'école?	Are you learning Spanish at school?
L'allemand est une langue compliquée.	German is a complicated language.

Note the use of capital letters in English, but not in French, for names of languages. Capitals are used in French *only* if referring to a human being – whatever his/her nationality:

le Français, la Française	the Frenchman, the Frenchwoman (the person)
le français	(the) French (language)

français, française(s)

French (adjective)

- (h) with meals, games and musical instruments:

pendant le dîner	during dinner
jouer au tennis	to play tennis
jouer du violon	to play the violin

- (i) with other parts of speech to form nouns:

les pauvres	the poor (people)
le manger et le boire	food and drink
les blessés	the injured
les dires	statements, sayings
le savoir	knowledge
le rouge	red (colour), red wine
le primaire, le secondaire	the primary, secondary level of education

10 The indefinite article

The indefinite articles are **un(e)**, **des**, **de/d'** 'a, an, some, any'. Indefinite articles are repeated in lists; their English equivalents are often omitted.

J'ai un hérisson et un chat à la maison.

I have a hedgehog and a cat at home.

Il y a des livres intéressants dans ce magasin.

There are some interesting books in this shop.

Une femme m'a téléphoné ce soir.

A woman telephoned me this evening.

Y a-t-il des voitures devant la mairie?

Are there (any) cars in front of the town hall?

10.1

In certain contexts French and English articles are used differently.

(a) the article is used with abstract nouns qualified by an adjective:

**un équilibre parfait
avec une grande émotion**

perfect balance/equilibrium
full of emotion

(b) the article is not used when talking about occupations, religions, nationality:

**Il est professeur.
J'ai été nommé ministre.**

He is a teacher.
I've been appointed minister.

**Son fils est protestant.
Sa femme est écossaise.**

His/her son is a Protestant.
His wife is Scottish.

but when the noun is qualified, the article *is* used:

Son cousin est un peintre célèbre.

His/her cousin is a famous painter.

Note the alternative possibilities:

Il est député./C'est un député.

He is a member of the National Assembly.

Elle est italienne./C'est une Italienne.

She's (an) Italian.

(c) the article is also omitted when two nouns are in apposition:

Le gouvernement, représentant du peuple, n'a pas le droit de lui refuser un référendum.

The government, which is the representative of the people, does not have the right to refuse them a referendum.

- (d) the article is omitted after the exclamatory **quel!** 'what (a/an)!':

Quel imbécile!	What an idiot!
Quelle coïncidence!	What a coincidence!
Quelles drôles d'histoires!	What strange tales!
Quels hommes distingués!	What distinguished men!

- (e) the article is used for emphasis:

Elle a <i>des</i> pieds!	What feet she's got!
Il fait <i>un</i> temps!	What amazing weather!

- (f) the singular forms **un** and **une** are the same as the number 'one' – as opposed to another number:

Il a bu <i>un</i> verre de vin.	He drank a/one glass of wine.
--	-------------------------------

11

The partitive article

The partitive articles are **du**, **de la**, **des**, **de/d'** 'some, any'. Before a word beginning with a vowel or a mute **h**, **du** and **de la** > **de l'**: **de l'honneur** 'honour', **de l'ail** 'garlic', **de l'herbe** 'grass', **de l'eau** 'water'. The article may be omitted in English, but not in French. The article is repeated in lists.

Il a demandé <i>du</i> sucre et <i>du</i> lait.	He asked for (some) sugar and milk.
Tu veux <i>de la</i> moutarde et <i>du</i> sel?	You want (some, any) mustard and salt?

How the indefinite and partitive articles are used

- (a) in a negative context **un**, **une**, **du**, **de la**, **des** > **de/d'** when the noun they precede is made negative, and their meaning is 'no, not a, not any':

pas <i>de</i> monnaie, plus <i>d'eau</i>	no change, no more water
Il n'a pas <i>d'argent</i>.	He hasn't any money.
Elle n'a plus <i>de patience</i>, <i>d'humour</i>, <i>de tendresse</i>.	She has no patience, humour or affection left.

But if the speaker or writer intends the negative to focus on something in the sentence other than the noun, the articles remain unchanged:

Il ne m'a pas donné <i>de</i> conseils.	He didn't give me any advice.
Il ne m'a pas donné <i>des</i> conseils, il me les a vendus!	He didn't <i>give</i> me any advice, he <i>sold</i> it to me!

- (b) the articles also remain unchanged when expressing a contrast:

Elle n'achète pas *du* vin mais *de la* bière.
She doesn't buy wine, she buys beer.

Elle n'a pas donné *des* livres mais *des* CD pour l'anniversaire de son neveu.
She didn't give books, she gave CDs to her nephew for his birthday.

- (c) when the article **un(e)** expresses a number, there is no change:

Le gouvernement n'avait pas *un* député honnête.
The government did not have one honest member.

Il n'y avait pas *une* femme au gouvernement.
There was not a single woman in the government.

Note the meanings in the following examples:

Elle n'a pas *une* paire de chaussures. Elle en a trente.
She doesn't have one pair of shoes. She has thirty.

Elle n'a pas *de* chaussures. Elle n'a que des pantoufles.
She hasn't any shoes. She only has slippers.

- (d) the articles are not changed when the negative form used is **ne...que 'only'**:

Elle n'a *qu'un* mouchoir. She has only one handkerchief.

Elle ne vend *que des* chapeaux. She only sells hats.

Il ne boit *que du* vin. He only drinks wine.

- (e) after **ni...ni** 'neither...nor' or **sans** 'without' the partitive articles are omitted (see 60a):

Elle ne prend *ni sel, ni poivre, ni moutarde.* She doesn't take salt, pepper or mustard.

Il boit *du thé sans lait.* He drinks tea without milk./He doesn't take milk in his tea.

Il est sorti *sans* chapeau. He has gone out without a hat.

But if the noun is qualified in some way the articles are included:

Elle est sortie sans un chapeau qui pourrait la protéger.

She has gone out without a hat which could give her some protection.

Nous n'avons ni le temps ni l'argent pour le faire.

We have neither the time nor the money to do it.

If the verb is **être**, the articles remain unchanged:

Ce n'est pas un désastre.

It's not a disaster.

Ce ne sont pas des chaussures.

They're not shoes.

(f) note that when the definite articles **le**, **la**, **les** are preceded by **de** in verb constructions such as **se souvenir de** 'to remember', **parler de** 'to speak about', they are changed to **du**, **de la**, **de l'**, **des** and they remain in these forms in a negative context:

Nous ne parlions pas des victimes de la guerre.

We were not speaking about the victims of the war.

Elle n'a pas peur des chiens.

She is not afraid of dogs.

11.2

The indefinite and partitive articles **des** > **de/d'** when an adjective precedes a noun:

Elle a de grands yeux bleus.

She has big blue eyes.

Il nous raconte toujours d'intéressantes histoires.

He always tells us interesting stories.

J'ai eu de ses nouvelles.

I've had some news about him/her.

Note that there are some exceptions to this rule:

C'est du bon café!

It's good coffee!

If the adjective follows the noun, or is virtually part of it, **des** remains unchanged.

Il nous raconte toujours des histoires incroyables.

He always tells us unbelievable stories.

and **des** always > **d'** before **autre(s)**:

On a d'autres devoirs à faire.

We have (more) other homework.

Il en a d'autres.

He has others/more of them.

11.3

The partitive articles > **de/d'** in expressions of quantity (see 28, 54.8, 56.7).

- (a) with adverbs such as **assez de** 'enough', **autant de** 'as much, as many', **beaucoup de** 'a lot of, many', **combien de?** 'how much, how many?', **moins de** 'less', **(un) peu de** '(a) little', **plus de** 'more', **tant de** 'as much/many, so much/many', **trop de** 'too much/many':

<i>Combien de gens?</i>	How many people?
<i>peu de gens</i>	few people

Note that **bien** 'a lot of, many' is followed by the full partitive:

Il a bien du mal à suivre les cours d'allemand.
He is having a lot of difficulty following the German classes.

- (b) with adjectives which express an amount, or lack, of something, such as **entouré de** 'surrounded by', **couvert de** 'covered in/with', **vide de** 'empty of, lacking in':

<i>vide de sens</i>	meaningless
<i>rempli de livres</i>	full of books

- (c) with nouns such as **une bouteille de** 'a bottle of', **un manque de** 'a lack of':

<i>une bouteille de (vin) rouge</i>	a bottle of red wine
<i>un manque de ressources</i>	a lack of resources

Note that if the nouns are qualified, by a relative clause for example, the full partitive is used:

Il a bu une carafe du vin qu'on a acheté en Australie.
He drank a carafe of the wine we bought in Australia.

Un ciel couvert des nuages qui annoncent une tempête.
A sky full of storm clouds.

11.4

De/d' is also used after indefinite, neuter and negative pronouns: **quelqu'un** 'someone', **quelque chose** 'something', **ceci/ce cela** 'this/that', **ce qui/ce que** 'what', **que** 'what', **quoi?** 'what?', **personne** 'nobody', **rien** 'nothing':

<i>quelqu'un d'intéressant</i>	someone interesting
<i>quelque chose d'acceptable</i>	something acceptable
<i>rien d'urgent</i>	nothing urgent
<i>Quoi de neuf?</i>	What's new?
<i>Tout ce qu'il avait de valable a été volé.</i>	Everything valuable he had has been stolen.

Note the expression **la plupart de** 'most of' which is followed by the full partitive (the verb is plural) (see 29.4):

La plupart des étudiants ont réussi dans les trois matières.

Most of the students have passed in the three subjects.

And note the preposition **d'après** 'according to':

D'après la météo il va pleuvoir.

According to the weather forecast it's going to rain.

Articles are omitted from many expressions in French, of which the following represent a very small selection:

rendre service à	to help	tomber par terre	to fall down
faire signe de	to indicate	avoir envie de	to want to
mettre fin à	to end	en auto	by car
en vélo/à bicyclette	by bicycle	sous prétexte de	on the pretext of
par hasard	by chance	sans gêne	without embarrassment
<i>soit indifférence, soit ressentiment</i>		either indifference or resentment	
<i>Plus il crie, moins elle écoute.</i>		The more he shouts, the less she listens.	
<i>Plus elle travaille, plus elle gagne.</i>		The more she works, the more she earns.	

12 Demonstrative adjectives

There are three singular forms but only one plural form of the demonstrative adjective. They agree in gender and number with the noun, and the English equivalent is 'this, these, that, those', or simply 'the'.

Forms

	Singular	Plural
Masculine	ce (cet)	ces
Feminine	cette	ces

The form **cet** is used before masculine singular nouns beginning with a vowel or a mute h: **cet enfant** 'this child', **cet hommage** 'this tribute', **cette addition** 'this addition', **cette habitation** 'this house', **ces amis** 'these friends', **ces activités** 'these activities', **ces hommes** 'these men', **ces histoires** 'these stories'.

Il a lu ce livre.

Hé has read this book.

Elle n'aime pas cet homme.

She does not like the man.

Cette jeune étudiante n'a pas travaillé cette année.

That young student has not done any work this year.

On a vu trop de ces films dont vous avez parlé.

We've seen too many of those films you spoke about.

12.2

By adding **-ci** to the noun it is possible to emphasize *proximity* in space or time, and by adding **-là** to the noun it is possible to emphasize *distance* in space or time. Addition of **-ci** or **-là** also helps to distinguish between two or more people or things.

Il est entré par cette fenêtre-ci.

He entered by this window.

Elle est venue ce matin-là.

She came that morning.

Laquelle préfères-tu? Cette robe-ci ou cette robe-là?

Which do you prefer? This dress or that one?

12.3

The demonstrative adjective, or the demonstrative adjective + noun + **-là** often carry a pejorative, obsequious or contemptuous overtone.

**Ce Jean est un peu insolent,
n'est-ce pas?**

That John is a bit rude, isn't he?

Ces dames sont servies?

You are being served, ladies?

**Elle ne pouvait tolérer cet
homme-là.**

She couldn't stand that man.

12.4

-ci and **-là** are present in *voici*, *voilà*, *ici*, *là* 'here, there' denoting proximity or distance. But increasingly today the forms *voilà* and *là* are used in preference to *voici* and *ici*:

Voilà ton livre.

Here/there is your book.

Je ne sais pas quand il va arriver. Il est là maintenant.

I don't know when he'll arrive. He's here now.

12.5

Like the definite article (see 9.3) the demonstrative adjective is usually repeated in lists.

Cette maison et ce beau jardin me plaisent beaucoup.

I like this house and the lovely garden very much.

13 Demonstrative pronouns

Demonstrative pronouns are simple or compound. Unlike demonstrative adjectives there are separate forms for the masculine and feminine plurals (see 12.1). They agree in gender and number with the noun, and the English equivalent is 'this one, these, that one, those'. There is also a small group of neuter demonstrative pronouns meaning 'this, it, that'.

13.1

Simple forms

	Singular	Plural
Masculine	celui	ceux
Feminine	celle	celles

13.2

The simple forms are followed by a relative pronoun **qui**, **que**, **dont**... (see 22) or by a preposition **de**, **pour**...:

On a visité beaucoup d'appartements dans cet immeuble mais on préfère ceux qui ne donnent pas sur la rue.

We have seen a lot of flats in that building but we prefer those/the ones which don't overlook the street.

Il y a deux écoles. Celle des filles et celle des garçons.

There are two schools. The girls' (one) and the boys' (one).

Note that there is no need to translate 'one(s)' into French.

13.3

Compound forms

	Singular	Plural
Masculine	celui-ci/-là	ceux-ci/-là
Feminine	celle-ci/-là	celles-ci/-là

13.4

The compound forms usually express a contrast or distinguish between two people or things 'this (one), these/that (one), those'.

J'ai apporté deux romans policiers. Veux-tu celui-ci ou celui-là?

I've brought two detective novels. Do you want this one or that one?

Le frère ou la sœur? Celle-ci est charmante, celui-là pas du tout!

The brother or the sister? She's delightful, he's just awful!

Note that **celui-là/-ci** may mean 'the former, the latter'. In sentences where only 'the latter' is used, **ce dernier** sometimes replaces **celui-ci**.

13.5

The neuter pronouns *ce/c'*; *ceci, cela; ça*(a) *Ce/c'*

Ce/c' is normally combined with *être* to form *c'est* or *ce sont*, which are often followed by a relative pronoun (*ce qui*, *ce que*, *ce dont*) or by an emphatic pronoun (see 21.2c).

C'est une belle maison!

It's a lovely house!

Ce sera ce que tu veux.

It will be what you want.

C'est moi. C'est nous.

It's me. It's us.

With a third person plural pronoun *ce/c'* is normally followed by a third person plural verb:

Ce sont eux. C'étaient elles.

It's them. It was them.

and

C'est à moi. C'était à elles.

It's mine. It was theirs.

Ce/c' also occurs in a few set phrases:

Ce me semble ...

It seems to me ...

Sur ce ...

And at that point ...

Ce disant ...

And saying this/that ...

Ce faisant ...

And as he/she did this/that ...

(b) *c'est* and *il* (impersonal) *est* 'it is, that is'

C'est usually refers *back* to a previously mentioned idea or matter.

Il parle bien français.

He speaks French well.

Oui, c'est vrai.

Yes, that's true.

Note that there are many expressions of the type *c'est* + adjective – all referring back to something:

C'est possible.

It's possible.

C'est difficile.

That's difficult.

If *être* + adjective are followed by an infinitive, the preposition *à* links the adjective and the infinitive.

C'était facile à faire.

It was easy to do.

Il est usually refers *forward* to a new idea. The preposition linking **être** + adjective to an infinitive is **de**.

Il sera intéressant de le faire.

It will be interesting to do it.

Il n'est pas facile de parler allemand.

It's not easy to speak German.

Note that these are only guidelines. When they are speaking, French people do not always observe the differences between the two types of expression.

(c) **ceci, cela**

Ceci, like **-ci**, refers to something near in time or space, and **cela**, like **-là**, refers to something more distant in time or space.

Regardez ceci!

Look at this!

Cela ne m'appartient pas.

That does not belong to me.

Note the spelling of **cela**: there is *no* accent. And note also that **ceci** refers forward to something about to be said, whereas **cela** refers back to something which has been said:

Ecoutez ceci ...

Listen to this ...

Avez-vous entendu cela?

Did you hear that?

(d) **ça**

Ça (= cela) is used informally, mainly when speaking. It may have a pejorative meaning.

Ça ne se dit pas.

You don't say that kind of thing.

Ça va? Comment ça va?

You OK? How're things?

Ça c'est impossible!

That's impossible!

Pourquoi ça?

Why's that?

Ça sent mauvais!

That smells awful!

and the very informal

Ça se croit capable de le faire!

And he/she thinks he/she can do it!

14 Possessive adjectives

These adjectives denote ownership or relationship. They are always placed before the noun they qualify, and they always agree with that noun. They also indicate the number (singular or plural) of the owner. The English equivalents are 'my, your, his, her, its, our, your, their'.

14.1

Forms and functions

(a) When there is only *one* owner the forms are:

mon, ton, son	before a masculine singular noun	
ma, ta, sa	before a feminine singular noun	
mes, tes, ses	before a plural noun (masculine or feminine)	
mon livre my book	ma voiture my car	mes gants my gloves
ton billet your ticket	ta main your hand	tes frères your brothers
son dos his/her/its back	sa his/her/its	ses fleurs his/her/its flowers
	nourriture food	

When the possessive adjective is followed by a feminine noun, or adjective, beginning with a vowel or a mute h, **ma, ta, sa** are replaced by **mon, ton, son**.

mon (ton, son) amie	my (your, his, her, its) friend
mon (ton, son) horloge	my (your, his, her) clock
mon (ton, son) ancienne institutrice	my (your, his, her) old teacher
mon (ton, son) horrible maison	my (your, his, her) horrible house

Ton, ta, tes are the familiar forms of the adjective and correspond to the personal pronoun **tu**.

(b) When there is *more than one* owner the forms are:

notre, votre, leur	before a singular noun (masculine or feminine)	
nos, vos, leurs	before a plural noun (masculine or feminine)	
notre cousin(e) our cousin	votre père your father	leur oncle their uncle
nos voitures our cars	vos livres your books	leurs amies their friends

Votre, vos are the polite and plural forms and correspond to the personal pronoun **vous**. They can therefore refer to *one* owner (politely) or to *several* owners.

(c) Like the articles (see 9.3), possessive adjectives are usually repeated before nouns in lists, unless the nouns refer to almost identical people and things.

<i>son oncle et sa tante</i>	his/her uncle and aunt
<i>mon auto et ma bicyclette</i>	my car and my bicycle
<i>leur table et leurs chaises</i>	their table and chairs

In a few expressions the possessive adjective covers both nouns:

<i>leurs allées et venues</i>	their comings and goings
<i>vos nom et prénoms</i>	your surname and first names/your full name

(d) Some points to remember:

In French, possessive adjectives agree with the noun qualified, whereas in English they agree with the owner:

<i>Il a trouvé sa montre.</i>	He has found his watch.
<i>Elles ont perdu leur clé.</i>	They have lost their key.

Each of the third persons singular (*son*, *sa*, *ses*) has three English equivalents: *son* 'his, her, its'; *sa* 'his, her, its'; *ses* 'his, her, its'.

<i>son bol</i>	his/her/its bowl
<i>sa mère</i>	his/her/its mother
<i>ses jouets</i>	his/her/its toys

If it is felt necessary to identify exactly who or what the owner is, a French speaker will add à and the appropriate emphatic pronoun (see 21.2b):

<i>son bol à elle</i>	her/its bowl
<i>ses jouets à lui</i>	his/its toys

Remember the French equivalent of phrases such as 'with his hands behind his back' *les mains derrière le dos* (see 9.4b), and certain other phrases in which French and English do not correspond:

<i>Que sait-elle à mon sujet?</i>	What does she know about me?
<i>Il a reçu de leurs nouvelles.</i>	He has had news of them.
<i>Non, mon vieux.</i>	No, mate/old chap.
<i>Peut-être, mon colonel.</i>	Perhaps, Colonel.

In the last two examples, the first person possessives express affection and/or respect and are used when talking directly to someone.

Finally, note the two possible English translations of the following:

<i>un de mes amis</i>	a friend of mine/one of my friends
<i>un de leurs amis</i>	a friend of theirs/one of their friends

un médecin de leurs amis

a doctor friend of theirs/one of their doctor friends

15

Possessive pronouns

Like the possessive adjectives, the possessive pronouns indicate who the owner is, but they must agree with the gender and number of the object owned (see 14). The English equivalents are 'mine, yours, his, hers, its, ours, yours, theirs'.

15.1

Forms

(a) When there is only *one* owner the forms are:

le mien, la mienne, les miens,	mine
les miennes	
le tien, la tienne, les tiens, les	yours
tiennes	
le sien, la sienne, les siens, les	his/hers/its
siennes	

Le tien ... corresponds to the personal pronoun **tu**.

(b) When there is *more than one* owner the forms are:

le nôtre, la nôtre, les nôtres	ours
le vôtre, la vôtre, les vôtres	yours
le leur, la leur, les leurs	theirs

Le vôtre ... corresponds to the personal pronoun **vous**. Note the accents on the pronouns **nôtre(s)**, **vôtre(s)**, but not on the adjectives **notre**, **votre**.

Voilà ma voiture. Où est la tienne?

Here is my car. Where is yours (your one)?

Il adore son petit frère. Je déteste le mien.

He loves his little brother. I hate mine.

Elle a réussi son examen, mais nos amis ont raté les leurs.

She has passed her exam, but our friends have failed theirs.

Note that there is no need to translate the English 'one'.

(c) The possessive pronouns may follow **à** or **de**, in which case the contracted forms **au/aux**, **du/des** must be used.

Nous pensons souvent à nos amis. Pensent-ils aux leurs?

We often think of our friends. Do they think of theirs?

Elle ne craint pas son chien, mais elle a peur des vôtres.

She is not frightened of his/her dog, but she is of yours (your dogs).

15.2

Usually, following **être**, ownership or possession is expressed by **à + emphatic pronoun or à + article + noun**. For other ways of expressing ownership see 56.5.

C'est à elle.

It's hers.

Les journaux sont à eux.

The papers are theirs.

Le livre est au professeur.

It's the teacher's book.

16 Nouns

French nouns are masculine or feminine in gender. There are guidelines which help to identify the gender of the majority of nouns, but there are many exceptions and therefore, unless you are absolutely sure, it is always better to check genders and to learn a noun and its definite article (see 16.1–16.14) together.

16.1

How to identify masculine nouns according to meaning

(a) nouns referring to the male sex:

le père 'father', **le garçon** 'boy', **le facteur** 'postman'

but la victime 'victim', **la sentinelle** 'sentry', **la personne** 'person', **la recrue** 'recruit' – all of which can refer to men or women (see 16.5).

(b) male animals:

le chien 'dog', **l'âne** 'donkey', **le veau** 'calf'

(c) days, months, seasons, points of the compass, parts of the world:

jeudi 'Thursday', **octobre** 'October', **automne** 'autumn', **le sud** 'south', **l'orient** 'the East(ern world)'

(d) metals, languages, trees and shrubs, weights, measures, currencies, letters, numbers:

l'or 'gold', **le français** 'French', **le cerisier** 'cherry-tree', **le kilo** 'kilo', **le millimètre** 'millimetre', **le franc** 'franc', **le b** 'b', **le 10** '10'

but la vigne 'vine', **la tonne** 'ton', **la moitié** 'half', **la livre** 'pound sterling/pound in weight' ...

(e) other parts of speech used as nouns:

le noir 'black', **le pour et le contre** 'pros and cons', **le savoir-faire** 'know-how', **le déjeuner** 'lunch', **le pourboire** 'tip'

16.2

How to identify masculine nouns according to ending

- (a) most nouns ending in a consonant:

le bec 'beak', **le mot** 'word', **le canard** 'duck', **le bras** 'arm', **l'étang** 'pond', **le foin** 'hay', **le nez** 'nose', **le choix** 'choice', **le billet** 'ticket', **le procès** 'trial', **le coup** 'blow', **le changement** 'change', **le reporter** 'reporter'

but la faim 'hunger', **la boisson** 'drink', **la largeur** 'width', **la mer** 'sea'. See also 16.4a.

- (b) most nouns ending in **-age**, **-au**, **-é**, **-ède**, **-ège**, **-ème**, **-eu**, **-i**, **-il**, **-isme**, **-ou**:

le courage 'courage', **le bureau** 'office', **le comité** 'committee', **le remède** 'remedy', **le collège** 'college', **le problème** 'problem', **le feu** 'fire', **le parti** '(political) party', **le détail** 'detail', **le socialisme** 'socialism', **le hibou** 'owl'

but la plage 'beach', **la cage** 'cage', **la page** 'page', **l'image** 'picture', **la rage** 'anger', **la peau** 'skin', **l'eau** 'water', **la crème** 'cream', **la clé** 'key', **la fourmi** 'ant' ...

16.3

How to identify feminine nouns according to meaning

- (a) nouns referring to the feminine sex:

la mère 'mother', **la fille** 'girl/daughter', **la grand-mère** 'grandmother'

- (b) female animals:

la chèvre 'goat', **la lionne** 'lioness', **la vache** 'cow', **la jument** 'mare'

- (c) names of festivals:

la Pentecôte 'Whitsun', **la Toussaint** 'All Saints' Day', **la Noël** 'Christmas', **Pâques** (f pl) 'Easter'

but Noël is masculine in **Joyeux Noël!** 'Merry Christmas', as is **Pâques** in **Pâques est tombé au mois de mars** 'Easter was in March this year'.

- (d) academic subjects at school or university:

l'histoire 'history', **les sciences naturelles** 'biology', **les mathématiques** 'maths', **la lecture** 'reading'

but le calcul 'arithmetic', **le dessin** 'drawing', **le droit** 'law' ...

— 16.4 —

How to identify feminine nouns according to ending

- (a) most nouns ending in **-ion, -on**:

la commission 'commission', **la nation** 'nation', **la guérison** 'cure',
la maison 'house'

but le camion 'lorry', *le crayon* 'pencil' ...

- (b) many nouns ending in a silent **e**:

la parole 'the (spoken) word', **la mémoire** 'memory/dissertation',
la rivière 'the river/necklace', **la tasse** 'the cup', **la visite** 'the visit',
la rentrée 'return to school/university', **la mine** 'expression/mine',
la défense 'defence', **la monnaie** 'change'

but le manque 'lack', *l'incendie* 'fire', *le lycée* 'secondary school/lycée', **le musée** 'museum', **le légume** 'vegetable', **le silence** 'silence', **le fleuve** '(big) river', **le territoire** 'the country/France', **le genre** 'kind', **le groupe** 'group', **le service** 'service', **le contrôle** 'control' ...

This group is perhaps the most difficult to classify since there are many exceptions which are masculine and they are words which are used frequently. Extra care must, therefore, be taken with all nouns ending in a silent **e**.

- (c) geographical names ending in a silent **e**:

la France 'France', **l'Angleterre** 'England', **la Bretagne** 'Brittany', **la Loire** 'the Loire', **la Tamise** 'the Thames'

but le Mexique 'Mexico', *le Cambodge* 'Cambodia', **le Rhône** 'the Rhone', **le Danube** 'the Danube' ...

Those which do not end in **e** are usually masculine:

le Canada 'Canada', **le Danemark** 'Denmark', **le Japon** 'Japan', **le Hainaut** 'Hainaut', **le Var** 'Var'

Towns are often masculine: **le vieux Paris**, but the preferred form is **la ville de Bruxelles** 'Brussels'.

— 16.5 — Some nouns which can refer to either sex are masculine:

un ange 'angel', **un auteur** 'author', **le professeur** 'teacher', **le témoin** 'witness', **le médecin** 'doctor'

but sometimes **une femme médecin** 'a woman doctor', and usually **un écrivain** 'writer' but also **une écrivaine**, and **la prof** 'the (female) teacher' ...

16.6

Some nouns have a feminine form and, therefore, feminine gender for referring to the female counterpart:

un acteur/une actrice 'actor', **un époux/une épouse**
 'husband/wife', **un Français/une Française**
 'Frenchman/Frenchwoman', **un écolier/une écolière**
 'schoolboy/schoolgirl'

16.7

Note the formation of feminine nouns from masculine nouns:

-en -enne	un Italien/une Italienne	an Italian
-an -anne	un paysan/une paysanne	a small farmer
-on -onne	le patron/la patronne	manager, boss
-eur -euse	le vendeur/la vendeuse	shop assistant
-teur -trice	le lecteur/la lectrice	language assistant
-ier -ière	le pâtissier/la pâtissière	pastry-cook

16.8

Some nouns add **-sse** to form the feminine counterpart:

un hôte/une hôtesse 'host/hostess', **le maître/la maîtresse**
 'master/mistress'

16.9

Some nouns have a different form for the opposite sex:

le fils, la fille	son, daughter
l'homme, la femme	man, woman
le monsieur, la dame	gentleman, lady
l'oncle, la tante	uncle, aunt
le speaker, la speakerine	announcer/broadcaster
le compagnon, la compagne	companion

16.10

Some nouns may have either gender, whichever is appropriate:

un/une enfant 'child', **un/une propriétaire** 'owner', **un/une élève**
 'pupil'

16.11

There are a few nouns which may be masculine or feminine, but today they are usually given masculine gender:

un/une après-midi 'an afternoon'

16.12

Some nouns may be either masculine or feminine, but the meaning changes according to the gender:

le livre	the book	la livre	the pound
le mode	the method	la mode	fashion
le tour	the turn	la tour	the tower

le critique	the critic	la critique	criticism
le poste	the radio/job	la poste	the post office
le physique	physique	la physique	physics

16.13

Special care should be taken with the plural noun **gens** 'people', which may be accompanied by masculine or feminine adjectives:

- (a) when adjectives *follow* **gens** they are masculine:

les gens bons et courageux	good, courageous people
-----------------------------------	-------------------------

- (b) when adjectives *precede* **gens** they are feminine:

toutes ces bonnes gens	all these good people
-------------------------------	-----------------------

- (c) if adjectives *precede* and *follow* **gens** they are feminine and masculine:

les vieilles gens peu intéressants	old, boring people
---	--------------------

16.14**Gender of compound nouns**

- (a) If one element is equivalent to an adjective, the compound noun takes the gender of the main noun: **le chef-d'œuvre** 'work of art', **la main-d'œuvre** 'workforce', **le timbre-poste** 'postage stamp'.
- (b) If one element is an adjective or an adverb, the compound noun takes the gender of the noun: **la belle-fille** 'daughter-in-law' (but note **le rouge-gorge** 'robin'), **le non-paiement** 'non-payment', **la non-aggression** 'non-aggression'.
- (c) If one element is a preposition, the compound noun is normally masculine: **l'en-tête** 'heading'.
- (d) If the first element is verbal, the compound noun is masculine: **le parapluie** 'umbrella', **le tire-bouchon** 'corkscrew'.

16.15**Plural forms of nouns and adjectives**

The plural forms in most cases simply add **s** to the singular noun or adjective. The final **s** is rarely heard – unless liaison is required, but it *must* be used in writing: **des trous** 'holes', **des hommes** 'men', **les ennemis** 'enemies', **bons/bonnes** 'good', **fous/folles** 'mad'. Special attention should be given to the following groups:

- (a) a small group of nouns ending in **-ou** add **x**: **bijoux** 'jewels', **cailloux**

'pebbles', **choux** 'cabbages', **genoux** 'knees', **hiboux** 'owls', **joujoux** 'toys', **poux** 'lice'.

- (b) nouns and adjectives ending in **-au**, **-eu**, **-eau** add **x**: **des tuyaux** 'pipes/tips', **des cheveux** 'hair', **nouveaux** 'new'. (But note **pneus** 'tyres', **bleus** 'blue/bruises').
- (c) if nouns and adjectives end in **s**, **x**, **z** there is no change in the plural: **souris** 'mouse/mice', **prix** 'price(s)', **nez** 'nose(s)', **gris** 'grey', **heureux** 'happy'.
- (d) the majority of nouns and adjectives ending in **-al** change to **-aux**:

cheval/chevaux 'horse(s)', **moral/moraux** 'moral', **légal/légaux** 'legal', **international/internationaux** 'international'

but there are a few exceptions to this important rule, such as:

bal/bals 'ball(s)', **festival/festivals** 'festival(s)', **naval/navals** 'naval',
fatal/fatals 'fatal', **final/finals** or **finaux** 'final' ...

The *only* way to be sure is to check in a dictionary.

- (e) nouns ending in **-ail** add **s**:

chandail(s) 'sweater(s)'

but a few change to **-aux**:

travail/travaux 'work, roadworks', **vitrail/vitraux** 'stained-glass window/s' ...

and adjectives ending in **-eill** add **s**:

pareil(s) 'alike, similar'

- (f) note **l'œil/les yeux** 'eye(s)', and **le ciel/les ciels** 'sky, skies', **les cieux** 'skies = firmament, climate, paradise'.

- (g) some nouns are used only in the singular:

l'électricité 'electricity', **le Moyen Age** 'the Middle Ages'

and some nouns are used only in the plural:

les mœurs 'customs, behaviour', **les environs** 'outskirts, vicinity',
les frais 'expenses', **les vivres** 'foodstuffs', **les alentours** 'surrounding areas'

- (h) family names do not normally change:

Les Dupont n'aiment pas les Régnier.

The Duponts don't like the Régnier family.

Names important in history or art can be used in the plural:

J'ai plusieurs Monets.

I have several paintings by
Monet.

(i) and some special cases:

monsieur/messieurs

Sir, Mr/Gentlemen

madame/mesdames

Madam, Mrs/Ladies

mademoiselle/mesdemoiselles

Miss, Ms/Misses, Young
Ladies

bonhomme/bonshommes

fellow/fellows

16.16

The plural of compound nouns

(a) If the noun is written as a single word, the plural is formed according to the rules above:

les portefeuilles 'wallets', **les portemanteaux** 'coat pegs/coat stands', **les passeports** 'passports'

(b) Some guidelines for compound nouns formed with a hyphen:

noun + noun (both + s): **les chefs-lieux** 'administrative centres'

noun + adjective (both + s): **les coffres-forts** 'safes'

adjective + noun (both + s): **les rouges-gorges** 'robins'

adjective + adjective (both + s): **les sourds-muets** 'deaf-mutes'

noun + preposition + noun (main noun + s): **les chefs-d'œuvre** 'works of art'

verb + noun (noun + s): **les bouche-trous** 'stand-ins' (but see 16.16e)

verb + verb (no change): **les laissez-passer** 'passes'

verb + adverb (no change): **les passe-partout** 'master keys'

adverb + noun (noun + s): **les haut-parleurs** 'loudspeakers'

Note 1 – Only nouns and adjectives used to form compound nouns can be made plural.

Note 2 – Where both nouns are of equal value, both become plural (see above) but if the second noun is equivalent to a prepositional phrase, the *first noun only* is made plural: **les timbres-poste** 'stamps' (= *de poste*).

(c) some compound nouns are variable: e.g., **les après-midi/les après-midis** 'afternoons', **les grand-mères/les grands-mères** 'grandmothers'.

(d) some have an s even in the singular: e.g., **le porte-clés, les porte-clés** 'keyring(s)', **le pare-chocs, les pare-chocs** 'bumper(s)'.

- (e) for some there is no change in the plural: e.g., **les abat-jour** 'lightshades', **les pare-brise** 'windscreens', **les pour et les contre** 'the pros and cons'.

— 16.17 —

Plural forms of imported words

- (a) generally imported words form their plural by adding **s**: **les référendums**, **les meetings**, **les biftecks**, **les panoramas**, **les médias**.
- (b) some do not change: e.g., **les veto**, **les post-scriptum**.
- (c) some keep the plural form of their language of origin: e.g. **les sportsmen**, **les graffiti**.
- (d) some words of Latin origin have both French and Latin plurals: e.g. **les maximums/maxima**, **les minimums/minima**.
- (e) and the English word **baby** becomes **babies** or **babys**, **whisky** becomes **whiskies** or **whiskys**, **sandwich** becomes **sandwiches** or **sandwichs** ...

— 16.18 —

Certain nouns may have a change of meaning in the plural form: **les lettres** 'letters, arts subjects, literature', **les affaires** 'business, affairs' ...

— 16.19 —

Some nouns which are singular in French have a plural English equivalent: **un pantalon** 'trousers', **un maillot** 'swimming trunks', **un collant** 'tights', **un pyjama** 'pyjamas' ... and, conversely, some singular English nouns have a plural French equivalent: 'funeral' **les funérailles**, 'darkness' **les ténèbres**, 'the Treasury' **les Finances**, 'information' **les informations** ...

17 Adjectives

Adjectives normally follow the noun if they express a distinguishing feature of the person or thing referred to, although some very common adjectives precede the noun. But, for stylistic reasons or for emphasis, they may be located in a place that is different from their normal one. Adjectives must agree with their noun in gender and number.

— 17.1 —

Adjectives which normally *follow* the noun:

- (a) adjectives of nationality, religion, politics:

La langue espagnole est difficile.

Spanish is difficult.

Ils se sont mariés à l'église protestante.

They got married in the Protestant church.

Elle a la carte du parti socialiste.

She's a card-carrying member of the Socialist Party.

- (b) adjectives expressing a physical characteristic, form, colour:

C'est un enfant très maigre.

He/She is a very thin child.

C'est une maison blanche.

It's a white house.

- (c) participles used as adjectives:

un ouvrier fatigué

a tired worker

une histoire connue

a well-known story

la page précédante

the previous page

l'eau courante

running water

- (d) adjectives qualified by an adverb ending in
- ment**
- :

un homme extrêmement laid

an extremely ugly man

un enfant incroyablement stupide

an unbelievably stupid child

17.2

Some adjectives are usually placed *before* the noun:

- (a)
- beau**
- 'handsome',
- bon**
- 'good',
- bref**
- 'short',
- dernier**
- 'last',
- gentil**
- 'nice',
- grand**
- 'great',
- gros**
- 'big',
- haut**
- 'high',
- jeune**
- 'young',
- joli**
- 'pretty',
- long**
- 'long',
- mauvais**
- 'bad',
- meilleur**
- 'better',
- moindre**
- 'lesser',
- nombreux**
- 'many',
- nouveau**
- 'new',
- petit**
- 'little',
- premier**
- 'first',
- vaste**
- 'huge',
- vieux**
- 'old',
- vrai**
- 'real',
- vilain**
- 'ugly' ...

une belle femme

a lovely woman

de gros pieds

big feet

un long voyage

a long journey

la première page

the first page

- (b) some of these, in certain contexts, follow the noun:

la marée haute

high tide

d'un ton bref

curtly

and with days of the week, seasons, parts of the year:

l'été prochain

next summer

la semaine dernière

last week

otherwise, they precede the noun:

le prochain arrêt	the next stop
la première/dernière semaine des vacances	the first/last week of the holidays

17.3

Some adjectives change their meaning according to their position:

ancien:	une maison ancienne/une ancienne maison a (very) old house/a former house
cher:	un livre cher/mes chers amis an expensive book/my dear friends
dernier:	lundi dernier/la dernière page last Monday/the last (of a series) page
nouveau:	un mot nouveau/une nouvelle voiture a new (original) word/a new (could be second-hand) car
pauvre:	une fille pauvre/une pauvre fille a poor (not rich) girl/a poor girl (pity her)
propre:	les mains propres/tes propres paroles clean hands/your own words
seul:	une femme seule/le seul candidat a lonely woman/the only candidate

17.4

If more than one adjective follows the noun, and each refers to a distinct and equal characteristic, they are linked by *et*. But if they form a unit of meaning *with* the noun there is no need for *et*. Usually, the longest adjective is placed last:

une vue triste et sans intérêt a sad, boring view

but

la scène politique anglaise	the British political scene
le parti démocrate américain	the American democratic party

Note the different order in French and English when a number is used with an adjective preceding a noun:

Les trois premiers étudiants recevront les bourses.
The first three students will receive the grants.

17.5

Feminine forms of adjectives

For demonstrative (see 12), possessive (see 14), indefinite (see 18), interrogative (see 23), numeral (24), verbal (see 49.1, 50.3) and exclamatory (see 10.1d) adjectives – see the section references in brackets.

17.6

There are usually some exceptions to the feminine forms of adjectives, so it is always advisable to check in a dictionary.

(a) feminine adjectives are mostly formed by adding **e** to the masculine form:

fort/forte 'strong', **éossais/éossaise** 'Scottish', **direct/directe**
'direct', noir/noire 'black'

If the masculine form ends in an **e**, there is no need for change in the feminine form:

jeune (m and f) 'young', **aimable** (m and f) 'pleasant'

But if the masculine form ends in **é** an **e** *must* be added to make the adjective feminine:

nominé/nominée 'nominated, shortlisted', **énervé/énervée**
'bored, irritated'

(b) if the masculine adjective ends in **-as**, **-el-**, **-eil**, **-en**, **-et**, **-on** double the last consonant and add **e**:

bas/basse 'low', **traditionnel/traditionnelle** 'traditional',
pareil/pareille 'like', **italien/italienne** 'Italian', **cadet/cadette**
'younger (brother/sister)', **bon/bonne** 'good'

Note the exceptions **-et** > **-ète**: **complet/complète** 'full, complete', **inquiet/inquiète** 'worried', **concret/concrète** 'concrete' ...

(c) some feminine adjectives require specific changes:

-er > -ère	premier/première	first
-f > -ve	attentif/attentive	attentive
-eux > -euse	heureux/heureuse	happy
-teur > -trice	consolateur/consolatrice	comforting
-eur > -euse	menteur/menteuse	deceitful

Note that a small group of comparative adjectives ending in **-eur** form the feminine by adding **e**:

meilleur(e) 'better', **supérieur(e)** 'superior, upper', **inférieur(e)**
'inferior, lower', **extérieur(e)** 'exterior, external', **intérieur(e)**
'interior', **antérieur(e)** 'prior, previous', **postérieur(e)** 'later,
subsequent', **ultérieur(e)** 'further', **majeur(e)** 'major', **mineur(e)**
'minor'

(d) adjectives ending in **-at**, **-ot** add **e** to form the feminine: **délicat(e)** 'delicate'. Note the exceptions: **sot/sotte** 'stupid', **vieillot/vieillotte** 'quaint', **boulot/boulotte** 'tubby', **pâlot/pâlotte** 'rather pale'.

(e) adjectives ending in **-in**, **-ain**, **-ein**, **-un** add **e** (they do *not* double the last consonant): **voisin/voisine** 'neighbouring', **hautain/hautaine** 'haughty', **plein/pleine** 'full', **commun/commune** 'common' ...

(f) adjectives ending in **-gu** > **-guë**: **aigu/aiguë** 'sharp'. (See also 5.6)

(g) some special forms:

blanc/blanche 'white', **doux/douce** 'soft, gentle', **favori/favorite** 'favourite', **frais/fraîche** 'fresh, cool', **franc/franche** 'frank, open', **long/longue** 'long', **public/publique** 'public', **sec/sèche** 'dry' ...

(h) There are five adjectives which have two masculine singular forms – the second is used before a masculine singular noun beginning with a vowel or a mute **h**. It is from the second form that the feminine adjective is formed by doubling the last consonant and adding **e**:

un beau garçon	un bel arbre	une belle dame
a handsome boy	a fine tree	a beautiful lady
un homme fou	un fol espoir	une folle amie
a crazy man	a silly hope	a foolish friend
un coussin mou	un mol abandon	une molle résistance
a soft cushion	listlessness	feeble resistance
un nouveau directeur	un nouvel habit	une nouvelle robe
a new manager	a new coat	a new dress
un vieux soulier	un vieil homme	une vieille femme
an old shoe	an old man	an old woman

The two masculine singular forms have only *one* plural form: **beaux, fous, mous, nouveaux, vieux**.

The adjectives **grand, demi, nu** do not always follow the above guidelines:

(a) **grand** does not add an **e** in feminine compound nouns: **grand-mère** 'grandmother', **grand-route** 'highway', **grand-rue** 'main street', **grand-place** 'main square', **grand-faim** 'very hungry', **grand-soif** 'very thirsty', **ne ... grand-chose** 'not very much'.

J'ai **grand-faim**.
C'est où la **grand-place**?
Il n'a pas dit **grand-chose**.

I'm very hungry.
Where is the main square?
He didn't say much.

The plural forms of the first three in the list can be written with or without an s: **grand(s)-mères, grand(s)-routes, grand(s)-rues.**

- (b) The adjectives **grand, large, frais, premier, dernier** followed by a past participle agree with their noun:

une fenêtre grande ouverte	a wide open window
les fleurs fraîches cueillies	freshly cut flowers

Note that in the case of **mort** 'dead', **nouveau** 'new', **court** 'short', **haut** 'high' followed by a past participle there is *no* agreement, whatever the gender and number of the noun:

une enfant mort-née	a still-born child
leurs fils nouveau-nés	their new-born sons

- (c) **demi** 'half', preceding and linked to a noun by a hyphen, does not agree with its noun, but when it follows a noun and is linked to it by **et**, it agrees in gender only:

une demi-heure	a half hour
trois demi-kilos	three half kilos
une heure et demie	an hour and a half/1.30
dix litres et demi	ten and a half litres

- (d) **nu** 'bare', preceding and linked to a noun by a hyphen, does not agree with its noun, but when it follows a noun it agrees with it in gender and number:

nu-tête	bareheaded	nu-pieds	barefoot
----------------	------------	-----------------	----------

Elles sont tête nue, pieds nus.	They are bareheaded, barefoot.
--	-----------------------------------

Agreement of adjectives of colour

- (a) adjectives of colour normally agree in gender and number with their noun:

une fleur blanche	a white flower
des fleurs blanches	white flowers

- (b) compound adjectives do not agree with their noun:

une jupe bleu foncé	a dark blue skirt
des jupes bleu foncé	dark blue skirts

- (c) if the adjective of colour is also a noun, there is no agreement:

une robe citron	a lemon dress
des robes citron	lemon dresses

Note the exceptions: **des nuages roses** 'pink clouds' and also **mauve, fauve, écarlate**:

Fleurs mauves et blanches	mauve and white flowers
----------------------------------	-------------------------

- (d) if two or more colours are involved, the adjectives may agree, or not, with the noun:

une chemise blanc(he) et vert(e)	a white and green shirt
des chemises blanc(hes) et vert(es)	white and green shirts

— 17.9 — Sometimes adjectives may be used as adverbs and in such cases there is no agreement:

Il parle haut.	He is speaking loudly.
Ellé verra clair désormais.	She will see clearly from now on.
On travaille dur en ce moment.	We are working hard just now.

Other adjectives which do not agree when they are used as adverbs include: **bon/mauvais** 'good/bad', **fort** 'loud', **juste** 'exactly right', **droit** 'straight ahead'.

— 17.10 — For plural forms of adjectives see 16.15. Note the following rules for plural agreement:

- (a) an adjective qualifying two or more nouns is in the plural after the last noun. If one of the nouns is masculine the adjective is in the masculine plural:

Il a un oncle et une tante généreux.	He has a generous uncle and aunt.
une revue et un journal mensuels	a monthly magazine and newspaper

- (b) when compound adjectives are used with a plural noun, both adjectives are plural:

une pomme aigre-douce / des pommes aigres-douces
a bittersweet apple/bittersweet apples

17.11

Comparison of adjectives (see 56.9)

(a) to compare people, or things, English adds '-er' to the adjective: 'bigger than, prettier than'. With longer adjectives English uses 'more/less ... than': 'more difficult than'. In French, comparatives are usually formed by using **plus ... que** 'more ... than', **moins ... que** 'less ... than', **aussi ... que** 'as ... as', **d'autant plus ... que** 'all the more ... as/because' and in a negative comparison **ne ... pas aussi (or si) ... que** 'not as ... as':

Elle est plus grande que vous.

She is bigger than you.

Elles ne sont pas aussi (or si) petites que leur mère.

They are not as small as their mother.

Ce vin est d'autant plus recherché qu'il est rare.

This wine is all the more sought after because it is rare.

Note that in comparisons **ne** may be added when **que** is followed by a verb.

Il est moins stupide qu'on ne (le) pensait.

He is less stupid than (not as stupid as) we thought.

(b) the adverbs **plus**, **moins** may be qualified by **beaucoup**, **un peu**:

Elle est un peu plus intelligente que son frère.

She is a little more intelligent than her brother.

Ce livre-ci est beaucoup moins cher que celui-là.

This book is much cheaper than that one.

(c) the expressions **de plus en plus/de moins en moins** 'increasingly/less and less' may modify an adjective, often with **devenir**:

Les négociations sont devenues de plus en plus compliquées.

The negotiations have become more and more complicated.

(d) **comme** 'like' is used in similes:

blanc(he) comme neige

as white as snow

lisse comme de la soie

as smooth as silk

fort comme un bœuf

as strong as an ox

Note the small changes in each phrase – the use of an article in some. They have to be learned individually.

17.12

Superlative forms of adjectives

To form the superlative in English ‘-est’ is added to the adjective, which is preceded by ‘the’: ‘the longest, the commonest’. With longer adjectives English uses ‘most/least’: ‘the most/least spectacular’. In French, the structure is as follows:

le (la, les) + plus/moins + adjective (+ noun) (+ de)

or

le (la, les) + noun + le (la, les) + plus/moins + adjective (+ de)

Sa maison est *la plus belle de la ville*.

His house is the most beautiful (one) in the town.

Elle a mis son chapeau *le plus chic*.

She put on her smartest hat.

C'est un *des plus intéressants* bâtiments *de la ville médiévale*.

It's one of the most interesting buildings in the medieval city.

Note that the possessive adjective (**mon, ma, mes ...**) can replace the definite article, and that **de (du, de la, de l', des)** is used where English uses ‘in, of’.

17.13

Comparative and superlative forms of *bon, mauvais, petit*

(a) The comparative and superlative forms of **bon** are **meilleur(e)(s)** ‘better’ and **le, la, les** (or **mon, ma, mes ...**) **meilleur(e)(s)** ‘best’.

Ses résultats sont *meilleurs que les miens*.

Her/His results are better than mine.

Elles sont *nos meilleures amies*.

They are our best friends.

C'est *la meilleure qualité qu'on puisse acheter*.

It's the best you can buy.

(b) **mauvais** has two different comparative and superlative forms – with different meanings:

- **plus mauvais(e)(s)** ‘worse’ and **le, la, les** (or **mon, ma, mes ...**) **plus mauvais(e)(s)** ‘worst’ (in terms of quality)
- **pire(s)** ‘worse’ and **le, la, les** (or **mon, ma, mes ...**) **pire(s)** ‘worst’ (in a moral sense)

Le vin était *plus mauvais que le repas*.

The wine was worse than the meal.

C'est *le plus mauvais restaurant du quartier*.

It's the worst restaurant in the area.

Un escroc *de la pire espèce!*

The worst kind of cheat!

Ça sera *ton pire ennemi.*

He'll be your worst enemy.

- (c) **petit** has two different comparative and superlative forms – with different meanings:

- **plus petit(e)(s)** 'smaller' and **le, la, les** (or **mon, ma, mes ...**) **plus petit(e)(s)** 'smallest' (in terms of size)
- **moindre(s)** 'less, smaller' and **le, la, les** (or **mon, ma, mes ...**) **moindre(s)** 'least, smallest' (in a moral sense)

Elles sont *plus petites que les autres.*

They are smaller than the others.

Il est *le plus petit des enfants.*

He is the smallest of the children.

Je le considère comme *un moindre mal.*

I consider it to be a lesser evil.

Elle n'a pas *le moindre doute.*

She hasn't the least doubt about it.

and note:

Dernier point à souligner et non *des moindres.*

Last but not least.

18 Indefinite adjectives, pronouns and adverbs

This section includes a large group of words and phrases which function as adjectives, or pronouns, or both. Some also function as adverbs. For negative adjectives and pronouns see 54.12, 54.24.

tout

- (a) adjective: **tout, tous** (ms/pl); **toute, toutes** (fs/pl) 'all, every, whole, any' followed by:

- an article **le ... , un ...**
- a possessive adjective **mon, ton, son ...**
- a demonstrative adjective **ce ...**
- the adjective **autre**

Elle a posé *toute une série de questions.*

She asked a whole series of questions.

J'ai fait tout mon possible.

I've done all I could.

Tu dois ramasser tous ces livres.

You must pick up all these books.

Toute autre solution me paraît impossible.

Any other solution seems impossible to me.

Tout, toute can precede the noun directly:

Toute femme est belle à mon avis.

Every woman is beautiful in my opinion.

In some expressions the article is omitted:

à tout prix

at any price

à toute heure

at any time

de tous côtés

on (from) all sides

(b) pronoun: **tous, toutes, tout le monde, tout ce qui/que, tous/toutes les deux** 'all (of you), everyone, everything, both (of you)':

Tous sont arrivés à temps.

They all arrived on/in time.

Vous pouvez les manger toutes.

You can eat all of them.

Tout le monde connaît ses défauts.

Everyone is aware of his/her faults.

Je t'ai raconté tout ce que je sais.

I've told you all I know.

The pronoun **tout** (ms only) often precedes past participles and infinitives:

Nous vous avons tout raconté.

We have told you everything.

On veut tout préparer avant son arrivée.

We want everything ready before he/she arrives.

Tout may also be the subject of the verb:

Tout est prêt.

Everything is ready.

(c) **Tout** followed by **autre** may be either an adjective or an adverb. When **tout autre** = 'any other', **tout** is an adjective and agrees with the following noun:

Toute autre réaction m'aurait étonné(e).

Any other reaction (other than this) would have surprised me.

When **tout autre** = 'quite different', **tout** is an adverb and modifies the adjective **autre**. It is normally invariable.

Elle a eu une tout autre réaction.

She had quite a different reaction.

- (d) The adverb **tout** 'completely, quite' adopts the feminine gender and number when it precedes a feminine adjective beginning with a consonant or an aspirate **h** (see 6.3).

C'est une voiture tout extraordinaire.

It's quite an extraordinary car.

Elle est arrivé toute seule.

She arrived by herself.

Leurs chaussures étaient toutes mouillées.

Their shoes were soaking wet.

Elles sont tout heureuses d'entendre vos nouvelles.

They are quite delighted to hear your news.

Elle est toute honteuse.

She's completely ashamed.

18.2

différent(e)s, divers(es) 'several/various, different'

When these adjectives *precede* a noun they mean 'several, various' and when they *follow* a noun they mean 'different'. They do not require an article.

Elles achètent différentes choses.

They are buying several things.

Il a divers livres à ce sujet.

He has various books on the subject.

On a goûté des vins différents.

We tried different wines.

Elles ont des opinions très diverses à son sujet.

They have very different opinions about him.

18.3

plusieurs (pl invariable) 'several, a number of, some'

Plusieurs does not require an article. It may be followed by **autres**.

(a) adjective

Plusieurs étudiantes manifestaient devant l'ambassade.

Several students were demonstrating in front of the embassy.

Il y a plusieurs autres raisons à la crise.

There are several other reasons for the (economic) crisis.

(b) pronoun

Plusieurs décidèrent de partir.

A number of them decided to leave.

J'en ai vu plusieurs.

I saw several (of them).

18.4

chaque; chacun(e)

(a) adjective: **chaque** (s invariable) 'each, every'

Chaque enfant portait un chapeau.

Each child was wearing a hat.

A chaque fenêtre il y avait des rideaux.

At every window there were curtains.

(b) pronoun: **chacun(e)** 'each (one), every (one)'

Il a répondu à chacune des femmes.

He answered each of the women.

Chacun te l'expliquera.

Each one will explain it to you.

18.5

certain(e)(s) 'certain, some, definite, sure'

(a) adjective

When **certain** precedes the noun it means 'certain, a certain, some', and when it follows the noun it means 'definite, sure'. **Certain(e)** may be preceded by **un(e)**.

C'est une dame d'un certain âge.

She's a lady of advanced years.

Certains étudiants n'ont pas remis leurs mémoires.

Some students have not submitted their dissertations.

Elles ont sur les jeunes élèves une influence certaine.
They have a definite influence on young pupils.

(b) pronoun

certains, certaines 'certain, some (people)'

Certains sont toujours prêts à la croire.

Some are always ready to believe her.

Certaines des amies de votre mère sont capables de le dire.

Some of your mother's friends are capable of saying it.

18.6

autre(s) 'other, new, another, different'

(a) adjective

Elle a donné le cadeau à son autre tante.

She gave the present to her other aunt.

Nous avons vu d'autres films.

We have seen (some) other films.

Elle a trouvé un autre ami.

She has found a new/another friend.

Son opinion est tout autre.

His/her opinion is quite different.

(b) pronoun

The pronoun **autre(s)** 'someone else, others' may be preceded by the indefinite or definite articles **un(e), d', l', les**.

Une autre aurait accepté.

Someone else would have accepted.

Elle n'en a pas d'autres.

She hasn't any others/more.

Où sont les autres?

Where are the others?

(c) **autre chose** 'something else'

Il n'aime pas ce cadeau. Il veut autre chose.

He doesn't like this present. He wants something else.

(d) **d'autrui** 'of others, other people, someone else' – used only in formal written French.

Sans l'aide *d'autrui* on n'aurait pas su le faire.

Without someone else's help we could not have done it.

Ne prenez jamais les biens *d'autrui*.

Never take other people's property.

18.7

l'un(e) ... l'autre, les un(e)s ... les autres 'the one ... the other, some ... (the) others, both, each other'

These pronouns are used to link, contrast or compare people or things. If a preposition is required to link, contrast or compare, it is inserted before the second pronoun.

Je distinguais mal les jumelles *l'une de l'autre*.

I had difficulty telling one twin from the other.

Ils parlaient doucement *les uns aux autres*.

They were speaking quietly to each other.

Ils se tenaient serrés *les uns contre les autres*.

They were standing close together.

Les uns buvaient, les autres fumaient.

Some were drinking, the others were smoking.

Les uns parlent français mieux que les autres.

Some (of them) speak French better than (the) others.

18.8

l'un(e) l'autre; l'un(e) et/ou l'autre; ni l'un(e) ni l'autre 'each other; both/one or the other; neither'

L'un l'autre expresses reciprocity – frequently emphasizing a reflexive pronoun.

Ils s'aiment *l'un l'autre*.

They love each other.

Elle a invité Patrick et Laurent. *L'un et l'autre* viendront.

She has invited Patrick and Lawrence. They'll both come.

Je les ai invitées toutes les deux. *L'une ou l'autre* va venir.

I have invited both of them. One or the other will come.

On a posé la question aux deux frères. *Ni l'un ni l'autre* n'a répondu.

We asked both brothers. Neither replied.

Each set of pronouns has plural forms:

***Ni les un(e)s ni les autres* n'ont voulu commencer.**

Neither group wanted to begin.

Je l'ai communiqué aux uns et aux autres.

I've informed both groups.

18.9

on

On is a subject pronoun, usually accepted as masculine singular in contexts where agreement is required. **On** can be translated by most of the English personal pronouns 'I, you (s/pl), he, she, we, they, one', or by general nouns such as 'people'. **On** is *always* used with a third person singular verb; its corresponding possessive adjectives are **son**, **sa**, **ses**; its emphatic pronoun is **soi**; its reflexive pronoun is **se**; and its direct *and* indirect object pronoun is **vous**.

On le ferait volontiers.

We'd do it willingly.

On verra.

We'll see.

On y va, nous?

Shall we go?

On a des amis autour de soi.

They have friends round them (for support).

If **on** clearly refers to a feminine and/or plural noun, adjectives or past participles referring to the noun must agree with the noun. The verb remains singular.

Alors, on est contentes, les petites?

Well, are we happy now, girls?

On est devenus bon copains.

We became good friends.

On is also used to form the passive (see 48.4, 48.6).

On a refait le toit.

The roof has been repaired.

The form **l'on** may occur instead of **on**, especially following **et**, **ou**, **où**, **si** 'and, or, where, if'. This is probably simply to improve the sound:

Ou l'on écoute, ou l'on se tait.

Either you listen or be quiet.

18.10 **même(s) (m/fpl)**

- (a) adjective 'same, very'

When **même** means 'same' it *precedes* the noun and is itself preceded by a definite article:

Elle a mis la même robe que moi.
She's wearing the same dress as me.

J'ai toujours les mêmes cours.
I still have the same classes.

When **même** means 'very' it *follows* the noun:

Ce sont les paroles mêmes du professeur.
They are the teacher's very words.

When **même** is joined by a hyphen to an emphatic pronoun it means 'self' (see 21.2i):

Il le fera lui-même.
He will do it himself.

Nous avons trouvé la maison nous-mêmes.
We found the house ourselves.

(b) pronoun

le, la, les + même(s) 'the same'

J'aime ton chapeau; moi, j'ai le même.
I like your hat; I've got one the same.

Pour lui un café; pour elle le même.
A coffee for him; the same for her.

Ce sont toujours les mêmes qui sont les derniers.
It's always the same (ones) who are last.

(c) adverb

Même (invariable) 'even' usually *follows* the verb, but *precedes* the past participle. **Même** may be followed by an emphatic pronoun.

On pourrait refuser même d'y aller.
We could even refuse to go.

Il ne l'a même pas vue.
He did not even see her.

Même lui ne s'en souvient plus.
Even he does not remember it any more.

(d) some expressions using **même**:

quand même/tout de même	all the same/nevertheless
de même	similarly
même pas	not even (that)

tel(le)(s)

(a) adjective

Tel 'such' is usually preceded by **un(e)**, **de: un tel, une telle** ... 'such a'. Note the different word order in French and English.

Une telle réponse est parfaite.

Such a reply is perfect.

On n'a jamais vu de tels films.

We've never seen such films.

If one wants to use an expression such as 'such a lovely day!' or 'such expensive presents!', one has to say:

Une si belle journée!

Des cadeaux tellement coûteux!

This is because **tel** cannot be used to qualify another adjective. It is replaced by **si** or **tellement**.

Tel may also be followed by **que** 'such as, like':

Les problèmes sont tels que vous nous les avez racontés.

The problems are as you told us.

Une solution telle que celle que vous proposez est impossible.

A solution such as you suggest is impossible.

(b) pronoun

Tel occurs as a pronoun in a few expressions:

M. un tel

Mr So and So

Mme une telle

Mrs So and So

N'importe si tel et tel ne l'aiment pas.

It doesn't matter if some people don't like it.

(c) some expressions using **tel**:

de telle façon/manière/sorte	so that, in such a way that
que (see 46.4)	

à tel jour

on such and such a day

en tant que tel

as such

en telle ou telle circonstance

in such and such a situation

18.12

quelque

- (a) adjective: **quelque(s)** (mf/pl) 'some, a few'

Nous avons quelques difficultés à parler allemand.
We have some difficulties speaking German.

Attends quelques instants!

Wait a few minutes!

- (b) adverb: **quelque** (invariable) 'some, approximately'

Il y a quelque trente ans qu'elle a quitté la France.
She left France some thirty years ago.

Quelque stupides qu'ils soient ils s'en tireront.
However stupid they are, they'll manage.

Quelqu'un (ms) pronoun 'someone, somebody'. If **quelqu'un** is qualified by an adjective, the adjective is preceded by **de, d'**:

Quelqu'un est à la porte.
Someone is at the door.

Il faut quelqu'un de sérieux.
We need someone serious.

Quelque chose (ms) pronoun 'something' – always *two words* in French, *one* in English. If **quelque chose** is qualified by an adjective, the adjective is preceded by **de, d'**:

Tu veux boire quelque chose?
You want something to drink?

C'est quelque chose d'incroyable.
It's something unbelievable.

Quelques-un(e)s (pl) pronoun 'some, a few' formed of **quelques** (adjective) + **un(e)s**. **Quelques-un(e)s** agrees in gender with the noun it refers to:

Quelques-uns lisait leurs journaux.
Some (of them) were reading their papers.

Quelques-unes de ces femmes sont très belles.
Some of these women are very beautiful.

— 18.13 —

qui que, quoi qui/que 'whoever, whatever' – always used with the subjunctive (see 46.4)

Qui que ce soit qui appelle, je ne suis pas là.
Whoever calls, I'm not in.

Quoi qu'elle t'offre, prends-le.
Whatever she offers you, take it.

Be very careful not to confuse **quoi que** 'whatever' with **quoique** 'although'.

— 18.14 —

n'importe + quel; lequel, qui, quoi; combien, comment, où, quand

(a) **adjective**

n'importe quel(le)(s) 'any'

Elle écoute n'importe quelle histoire.
She listens to any (old) story.

Il arrivera à n'importe quel moment.
He'll arrive at any time.

(b) **pronoun**

n'importe + lequel, laquelle, lesquel(le)s 'any one'

Il m'a donné trois boîtes de chocolats. Tu peux avoir n'importe laquelle.

He has given me three boxes of chocolates. You can have any (of them).

Il y a trop de livres: prenez donc n'importe lesquels.
There are too many books, so take any (of them).

n'importe + qui 'anyone, anybody' (**n'importe qui** can be replaced by **quiconque**)

N'importe qui peut venir.
Anyone can come.

Parle à n'importe qui/quiconque.
Speak to anyone.

n'importe + quoi 'anything'

Il dit n'importe quoi.
He (just) says anything.

(c) **adverb**

n'importe + combien, comment, où, quand 'however much, somehow, wherever, whenever'

Tu fais ça *n'importe comment*.

You're making a real mess of this.

N'importe comment, j'y arriverai.

I'll manage somehow.

18.15 **maint(e)(s)** adjective 'many, many a, several'

Maint(e)(s) is usually reserved for written French. In spoken French it is normally replaced by **plus d'un(e), plusieurs, de nombreux/nombreuses:**

Elle y est allée *maintes fois.*/Elle y est allée *plus d'une fois.*

She went there many times.

Pour *maints étudiants la vie est dure.*/Pour *beaucoup d'étudiants la vie est dure.*

Life is hard for many students.

19 Personal pronouns

19.1

Subject, direct object, indirect object pronouns

	Subject		Direct Object		Indirect Object	
1st person singular	je	I	me (m')	me	me (m')	to/for me
2nd person singular	tu	you	te (t')	you	te (t')	to/for you
3rd person singular	il	he, it	le (l')	him, it	lui	to/for him, it
	elle	she, it	la (l')	her, it	lui	to/for her, it
1st person plural	nous	we	nous	us	nous	to/for us
2nd person plural	vous	you	vous	you	vous	to/for you
3rd person plural	ils	they	les	them	leur	to/for them
	elles	they	les	them	leur	to/for them

19.2

Use of the subject pronouns

- (a) **Tu** is the informal, singular pronoun used when the person addressed is well-known to the speaker or writer, or is a child.

Tu veux venir ou non?

You want to come or not?

Vous is used both as the formal, singular pronoun – usually when the person addressed is not so well-known to the speaker or writer – and as the plural pronoun.

Vous voulez venir, Madame?

Do you want to come, (Mrs Smith)?

Jean et Isabelle, où étiez-vous ce matin?

Jean and Isabelle, where were you this morning?

- (b) When there are two or more subjects care must be taken to ensure that the correct plural forms of the pronoun and verb are used (see 29). If a first person subject is involved, then the plural pronoun is **nous** and the verb agrees with **nous**. If second and third person subjects are combined, then the plural pronoun is **vous** and the verb agrees with **vous**.

Moi et mon frère, nous irons au cinéma.

My brother and I will go to the cinema.

Vous et Madame Guiat, vous allez nous représenter à la réunion.

You and Mme Guiat will represent us at the meeting.

Véronique et toi, vous viendrez demain?

Will you and Véronique come tomorrow?

- (c) **Il(s)** and **elle(s)** refer to masculine and feminine nouns, singular and plural – whether the nouns are people or things.

C'est une ville magnifique! Elle attire de nombreux visiteurs chaque année.

It's a wonderful city! It attracts many visitors every year.

Il(s), elle(s) are frequently replaced by the demonstrative pronoun **ce/c'** if the verb is **être**.

L'homme qui m'attendait tous les soirs au coin de la rue? C'était mon père.

The man who waited for me every evening at the street corner? It was my father.

Qui faisait ce bruit affreux? C'était la police.

Who was making that awful noise? It was the police.

- (d) **Il** is used as the impersonal, or neuter, subject in impersonal verb phrases, and with **être** and **avoir** (see 53):

il importe de + infinitive	it is important to
il reste à + infinitive	it remains to
il est nécessaire de + infinitive	it is necessary to
il y a	there is/are

Il y a des gens qui n'ont jamais fumé.

There are people who have never smoked.

Il est, il était ... il y a, il y avait ... are invariably singular, whereas **c'est, c'était** can become plural if the subject referred to is third person plural (see 13.5a).

19.3

Position and use of the direct object pronouns

- (a) The direct object pronouns normally precede the verb, or the auxiliary verb **avoir**.

Il me voit.

He/It can see me.

Elle t'a vu(e) hier au cinéma.

She saw you at the cinema yesterday.

Cette élève, je la connais.

I know that pupil.

On les a entendu(e)s chanter.

We heard them singing.

- (b) The pronouns **le** and **les** are *never* combined with **à** or **de** – unlike the articles **le, les (au, aux, du, des)** (see 9).

Il s'est décidé à le faire.

He has decided to do it.

- (c) The impersonal direct object pronoun **le/l'** may replace, or refer back to, an entire idea or sentence, or **cela**. It is frequently used to finish off a sentence, and it is frequently used in comparative constructions.

Il aura bientôt terminé. Il l'a dit.

He'll have finished soon. He said so.

Elle n'est pas heureuse. Je le vois.

She isn't happy. I can tell.

A-t-il entendu cela? Il l'a entendu.

Did he hear that? He heard it.

Elle est beaucoup plus intelligente qu'on ne le croyait.

She is much more intelligent than we thought.

English does not always require the addition of 'it' in equivalent contexts. But, in some cases where English *does* include 'it', French does not. This occurs with verbs such as **considérer, trouver**:

Elle considère inutile de répéter la phrase.
She considers *it* pointless to repeat the sentence.

In certain verb phrases **le/l'** is actually part of the phrase and *must* be included: e.g. **l'emporter sur** 'to get the better of', **l'échapper belle** 'to have a narrow escape'.

Ils l'emportaient sur leurs ennemis.
They were getting the better of their enemies.

19.4

Use of the indirect object pronouns

These pronouns include 'to' and/or 'for' in their meaning. So when verbs have à in their construction, the pronoun form used is the indirect object.

Mais elle lui a écrit. (écrire à qn)
But she has written to him.

Vous allez nous permettre de partir? (permettre à qn)
You will allow us to leave?

Some French verbs carry the meaning 'to/for someone': e.g. **payer, chercher**. Such verbs use the indirect object pronoun form.

Je vais te chercher un mouchoir.
I'm going to get a handkerchief for you.

On va lui payer un café.
We're going to buy him a coffee.

19.5

Y is an adverbial pronoun which refers to a place or location, but *never* to a person in formal use.

(a) adverb: **y** 'there' may replace several prepositions or prepositional phrases, but *not de*.

Je vais à Paris. (J'y vais.)
I'm going to Paris.

Il va au lycée. (Il y va.)
He is going to the lycée.

La reine est arrivée à la mairie à midi. (Elle y est arrivée à midi.)
The queen arrived at the town hall at noon.

Son manteau est dans l'armoire. (Son manteau y est.)
His/Her coat is in the wardrobe.

Elle s'est tenue près de la porte. (Elle s'y est tenue.)
She stood by the door.

- (b) pronoun: **y** 'it' replaces à + noun.

On répondra à ta lettre. (On y répondra.)

They'll reply to your letter.

Nous pensons à ton anniversaire. (Nous y pensons.)

We are thinking about your birthday.

Il faut réfléchir à cette solution. (Il faut y réfléchir.)

We'll have to give some thought to that solution.

Note that **y** can occasionally refer to a person in informal use:

A-t-elle pensé à son frère? Oui, elle a pensé à lui/elle y a pensé.

Has she thought about her/his brother? Yes, she has (thought about him).

Parles-y.

Talk to him/her.

19.6

En is an adverbial pronoun meaning 'from there, some, of them'.

- (a) adverb: **en** refers to a place or location and always replaces a phrase introduced by **de**.

Nous n'allons pas à Paris. Nous en revenons. (revenir de)

We're not going to Paris. We're just back from there.

Elles sortent de l'école. Elles en sortent. (sortir de)

They are (just) coming out of school. They are coming out (of it).

- (b) pronoun: **en** replaces the preposition **de** (usually part of a verb construction) + noun.

Quel est son nom? Hélas, je ne m'en souviens plus. (se souvenir de)

What is his name? I'm sorry, I can't remember (it).

Tu prends un pot? Merci, je n'en ai pas envie. (avoir envie de)

Would you like a drink? No thanks, I don't want one.

Connaît-elle ce roman? Oui, elle en a lu plusieurs chapitres. (lire plusieurs chapitres de)

Does she know the novel? Yes, she has read several chapters (of it).

En may refer to a quantity or number of things *or* people. The actual quantity or number may be specified.

A-t-elle un frère? Oui, elle en a un.

Does she have a brother? Yes, she does/she has one (brother).

Prends encore du vin. Non, merci, j'en ai eu assez.

Have some more wine. No thanks, I've had enough (of it).

De quelle amie parles-tu? J'en connais trois.

Which friend were you talking about? I know three (of them).

Je ne veux pas d'argent. J'en ai trop.

I don't want any money. I have too much (of it).

- (c) **En** may replace, or be substituted for, or refer to, an entire statement or idea.

Avez-vous besoin de sommeil? Non, je n'en ai plus besoin.

Do you need some sleep? No, I don't any more.

Tu ne m'aimes plus? J'en suis bouleversé!

You don't love me any more? I'm terribly upset!

- (d) **En** also occurs in certain expressions: e.g. **en vouloir à qn** 'to bear a grudge against someone', **s'en prendre à qn** 'to take it out on someone'.

Je lui en veux.

I have a grudge against him/her.

20

Reflexive pronouns

20.1

Reflexive pronouns occur with verbs – making them reflexive verbs – and always agree in person and number with the subject:

Singular Plural

1st person **je me**

nous nous

2nd person **tu te**

vous vous (also polite singular)

3rd person **il/elle se**

ils/elles se

Elle se lave. (se laver)

She is getting washed.

Nous allons nous lever bientôt. (se lever)

We're going to get up soon.

Après t'être reposé(e) un peu, viens manger avec nous. (se reposer)

After you've had a rest come and eat with us.

Note that these verbs are not normally reflexive in English.

21 Emphatic pronouns; position and order of pronouns

21.1

The emphatic (stressed) pronouns have separate forms in the third person for masculine and feminine genders, in both singular and plural. There is also a third person singular form **soi** which corresponds to the indefinite pronouns **chacun, on, personne, tout le monde** (see 18.4b, 18.9, 54.16, 18.1b).

	Singular	Plural
1st person	moi	nous
2nd person	toi, vous	vous
3rd person	lui/elle and soi	eux/elles

21.2

The emphatic pronouns are used in a variety of contexts.

(a) after a preposition or prepositional phrase, such as **de, au lieu de, pour, chez**:

Elle est arrivée *chez moi*.

She arrived at my house.

On veut partir *avant lui*.

We want to leave before him.

Vous pourrez le faire *sans eux*.

You can do it without them.

(b) after the preposition **à**:

Indirect object pronouns **me, te, lui, nous, vous, leur** are used with verbs such as **donner, obéir, promettre** and mean 'to me, to you, to him/her...'

Elle *lui* a permis de sortir.

She allowed him/her to go out.

On *nous* a donné le livre.

They gave the book to us.

If **me, te, nous, vous** acting as *direct* objects are present these pronouns cannot co-occur with the *indirect* object pronouns. To express 'to me, to you, to him/her...' in such cases **à moi, à toi, à lui, à elle ...** are used.

Tu *me* présenteras à *elle*.

You will introduce me to her.

Il *nous* a recommandé(e)s à *eux*.

He recommended us to them.

Certain verbs such as **venir, courir**, involving actual movement towards someone, are followed by **à + emphatic pronoun**.

Elle est venue à nous.

She came to us.

Les enfants sont allés à lui.

The children went to him.

A few fairly common verbs are also followed by **à + emphatic pronoun**. These verbs do not involve any movement towards a person: **penser à, avoir recours à, être à, s'intéresser à**:

Il pense à elle.

He is thinking about her.

Ils ont souvent recours à nous.

They often consult us.

C'est à toi.

It's yours.

Ils s'intéressent à nous.

They are interested in us.

(c) after **c'est** and **ce sont**:

C'est moi.

It's me.

C'est toi, vous.

It's you (informal, formal).

Ce ne sera pas lui/elle.

It won't be him/her.

Ce sera nous.

It'll be us.

C'est vous.

It's you (pl.).

but for the third person plural:

Ce sont eux/elles.

It's them.

(d) to emphasize the subject:

Lui, il n'en sait rien.

He knows nothing about it.

Moi, j'irai sans toi.

I'll go without you.

Aussi, seul(e)(s) 'too, alone', or a cardinal number, may be included for additional emphasis, and **autres** may be added to **nous, vous** for additional emphasis.

Lui aussi pourra le faire.

He will be able to do it as well.

C'est pour la vie, nous deux.

We'll be together, the two of us, for always.

Nous en sommes ravi(e)s, nous autres.
As for us, we are delighted with/about it.

- (e) in expressions without verbs:

Qui l'a fait? Nous. Pas elle.
Who did it? Us./We did. Not her.

Tu ne veux pas y aller? Moi non plus.
You don't want to go (there)? Neither do I.

- (f) in comparative phrases:

Elle est plus intéressante que lui.
She is more interesting than he is/him.

Il a la même voiture que moi.
He has the same car as me/I have.

- (g) in the negative phrase **ni ... ni ... ne ... :**

Ni toi ni nous n'avons accepté de répondre à la question.
Neither you nor we agreed to answer the question.

- (h) in double subjects:

Son père et lui sont allés en ville.
His father and he went into town. (See 29.2, 29.5)

- (i) with **-même(s)** 'self/selves':

moi-même	nous-mêmes
toi-même/vous-même	vous-mêmes
lui-même	eux-mêmes
elle-même	elles-mêmes

Je le ferai moi-même.
I'll do it myself.

- (j) **Soi** is used with indefinite pronouns (see 18), and with the impersonal **il** (see 19.2d).

Tout le monde doit rentrer chez soi.
Everyone must go home.

On a souvent des amis plus intelligents que soi.
We often have friends who are more intelligent than we are.

Chacun pour soi.

Every man for himself.

21.3

Position of pronouns

- (a) Pronouns are normally placed immediately before the verb, the auxiliary verb, or an infinitive to which they are linked in meaning – in statements, questions and negative forms:

Il l'adore.	He adores her/him/it.
J'y vais.	I'm going.
J'en ai vu(e)s.	I've seen some (of them).
Elle ne l'a pas lu.	She hasn't read it.
Je vais lui envoyer un mot.	I'll write him a note.
Va leur dire au revoir.	Go and say goodbye to them.
On peut en trouver plusieurs.	You may find several.

- (b) Pronouns *precede* a negative imperative, but *follow* a positive imperative and are linked to it by a hyphen.

Ne me parlez pas comme ça!	Don't speak to me like that!
N'en parlons pas!	Let's forget about it!
Dites-lui de revenir bientôt!	Tell him/her to come back soon!
Bois-en un peu!	Drink a little (of it)!
Prends-le mais ne le donne pas à ton frère!	Take it but don't give it to your brother!

With the positive imperative **me** and **te** are replaced by **moi** and **toi**.

Donnez-moi votre billet!	Give me your ticket!
---------------------------------	----------------------

An **s** is added to the singular positive imperative of -er verbs before **y** and **en**.

Vas-y!	Come on!/Get on with it!
N'y va pas!	Don't go (there)!
Manges-en!	Eat some!
N'en mange plus!	Don't eat any more!

- (c) There are two small groups of verbs, each followed by an infinitive, and with them the pronoun is placed before the *principal* verb: **faire**, **laisser**, **envoyer** and **regarder**, **voir**, **écouter**, **entendre**, **sentir**.

On y fera installer un placard.	We'll have a cupboard installed.
--	----------------------------------

Il va la laisser partir.	He's going to let her leave.
Ne les laissez pas tomber!	Don't drop them!

Le professeur l'a envoyé(e)
chercher ses clés.

Elle nous regarde travailler.

Je le sens brûler.

The teacher sent him/her
to fetch his keys.

She is watching us work.

I smell it burning.

When the principal verb is in the positive imperative form, the pronoun is placed after the imperative and linked to it by a hyphen.

Faites-les entrer!

Show them in!

Laissez-nous dormir!

Let us sleep!

Regarde-la pleurer!

Look at her crying!

21.4 Order of pronouns

When more than one of the pronouns occur in a verb phrase, there is a special order in which they are placed. The following table is a useful guide:

me				
te	le/l'		lui	
se	before la/l'	before	before y	before en
nous	les		leur	
vous				

(a) examples with **me, te, se, nous, vous, le/l', la/l', les:**

Il me l'a donné(e).

He has given it to me.

Ne nous les montre pas!

Don't show them to us!

Elle se le gardera.

She'll keep it for herself.

**Nous vous l'enverrons
chercher.**

We'll send you to get it.

(b) examples including **lui, leur:**

Ne les lui donnez pas!

Don't give them to him/her!

Il la leur a montrée.

He showed it to them.

(c) examples including **y and en:**

Elle m'y a vu(e).

She saw me there.

Nous vous y attendrons.

We'll wait for you there.

Il les y a laissé(e)s tomber.

He dropped them there.

Elle ne s'en souvient jamais.

She never remembers it.

Je vais leur en parler.

I'm going to speak to them about it.

On lui en donne tous les jours.

We give him/her some every day.

Il n'y en a plus.

There's none left.

(d) The exception to the above guidelines has to do with the positive imperative. The pronouns *follow* the positive imperative and are linked to it by hyphens (see 21.3b).

Donne-le-lui!	Give it to him!
Montrez-le-nous!	Show it to us!
Cherchez-les-y!	Look for them there!
Offrez-leur-en!	Offer them some!
Demande-lui-en!	Ask him for some!

With the positive imperative *moi* and *toi* are used instead of *me* and *te*, and are moved right to the end of the group:

Rends-la-moi!	Give it back to me!
----------------------	---------------------

These two changes are not required if *y* and *en* are involved:

Donne-m'en!	Give me some!
Va-t'en!	Go away!

22 Relative pronouns

The relative pronouns link the information contained in a relative clause to a preceding noun, pronoun, or noun phrase (antecedents). The gender and number of verbs and adjectives in the relative clause agree with the antecedent.

22.1

qui (invariable) 'who, which, that' is the subject in the relative clause. It is used for people, animals or things:

L'homme qui attendait au coin de la rue était son père.

The man who was waiting at the corner of the street was his/her father.

Toi, qui as l'air content, dis-moi pourquoi.

You look happy. Tell me why.

Ce sont un étudiant et une lectrice qui vont nous représenter.

It's a student and an assistant who are going to represent us.

Le chat qui est toujours dans mon jardin n'est pas à moi.

The cat that's always in my garden is not mine.

and in some set expressions and proverbs:

Qui plus est ...	And what's more ...
Voilà qui est agréable!	That's super!
Qui se ressemble s'assemblé.	Birds of a feather flock together.

22.2

que/qu' (invariable) 'who(m), which, that' is the direct object in the relative clause. It is used for people, animals or things:

Voilà le livre que tu as cherché partout.

There/Here is the book you looked/have been looking for everywhere.

Les étudiants qu'elle a invités sont ses amis.

The students she invited are her friends.

English does not need the pronouns 'who, who(m), which, that' in the relative clause. But in French, in contrast, the relative pronouns *must* be used.

22.3

preposition + **qui** refers only to people:

La femme chez qui j'habitais était française.

The woman whose house I was living in was French.

Le jeune homme à qui elle a donné les clés de la voiture était un voleur.

The young man she gave the car keys to was a thief.

C'est un professeur en qui tu peux avoir confiance.

He's/She's a teacher you can have confidence in.

22.4

lequel, lesquels, laquelle, lesquelles 'who, which' are used as the subject in a relative clause, instead of **qui**, only in administrative or literary language:

Cette femme, laquelle était fort élégante, était en réalité des services de police.

That woman, who was extremely elegant, was in fact a police officer.

22.5

preposition + **lequel** ... refers to people, animals or things:

C'est la jeune femme avec laquelle (or avec qui) il est allé à l'école.

It's the young woman he went to school with.

Où est le sac dans lequel j'ai mis l'argent?

Where is the bag I put the money in?

22.6

de, à are combined with **lequel** to form the pronouns:

duquel, desquels, de laquelle, desquelles
auquel, auxquels, à laquelle, auxquelles

These changes are similar to changes made with the articles (see 9). The contracted forms are used whenever **de** or **à** form part of a prepositional phrase or the construction following a verb:

Sa mère, grâce à laquelle (or à qui) il s'en est tiré, est très malade.
His mother, thanks to whom he was able to cope, is very ill.

Un garçon d'accord, mais duquel (or de qui) s'agit-il?
A boy, yes, but which one?

22.7

when referring to people, and following a preposition, either **lequel** or **qui** can be used. The exception to this rule occurs with the prepositions **parmi**, **au nombre de** and **entre**. Following these prepositions the appropriate form of **lequel** is always used:

Les otages, parmi lesquels se trouvaient les trois religieuses, étaient morts.

The hostages, amongst whom were the three nuns, were dead.

22.8

dont 'of/about whom, which; whose' is used for people, animals or things, and can be used instead of **de qui**, **duquel**, **desquels**, **de laquelle**, **desquelles**:

Voici l'argent dont (or duquel) il a besoin.

Here's the money he needs.

C'est la fille dont (or de qui, de laquelle) il parle.

It's the girl he's talking about.

C'est la maison dont (or de laquelle) je me souviens.

It was the house I remember.

22.9

the order of words following **dont** is important – subject, verb (+ object):

Voilà la maison dont les volets sont verts.

This/That is the house whose shutters are green.

Les étudiants dont le nom figure ci-dessous sont priés de passer à mon bureau dès que possible. Merci.

Would the students whose names are below call at my office as soon as possible. Thank you.

22.10

dont always follows its antecedent directly. From the examples at 22.8 above: **l'argent dont ..., la fille dont ..., la maison dont ...**

22.11

dont cannot be used instead of **de qui**, **duquel**... if the relative 'whose' is dependent on a noun governed by a preposition: **sous la présidence de** 'during whose ...', **avec l'aide de** 'with whose ...', **à la fenêtre de** 'at whose ...':

On a vu la maison à la porte de laquelle (not dont) la jeune fille a frappé.

We saw the house where the girl knocked at the door.

C'est l'homme *sous la présidence duquel/ de qui (not dont)* la Communauté a fait le plus de progrès.

He's the man during whose presidency the Community has made most progress.

Voici l'étudiante avec l'aide de laquelle/ de qui (not dont) vous allez compléter vos recherches.

This is the student with whose help you will complete your research.

The English translations indicate that these are formal structures. Informally, in spoken French, these complex structures would probably be divided into two sentences:

Ton ami ... je ne me souviens jamais de son adresse ...

— 22.12 —
où 'where, in which, when' is a relative adverb which can express place or time. It refers only to things. Où can be used with several prepositions: *d'où* 'from where/which', *par où* 'by which', *jusqu'où* 'how far, to what extent'. Où can replace relatives such as *dans lequel ...*, *duquel ...*, *par lequel ...*.

Restez où vous êtes!

Stay where you are!

Voilà la maison où (or dans laquelle) je suis né(e).

That's the house where I was born.

C'est le pays d'où il vient.

It's the country he comes from.

Je connais les sentiers par où (or par lesquels) on arrive à l'église.

I know the paths to the church.

On verra jusqu'où il peut aller.

We'll see how far he'll go.

Some examples where où expresses time:

le mois où

the month when

l'année où

the year when

le moment où

the moment when

C'était le jour où elle est arrivée.

It was the day she arrived.

If the antecedent is not specified, là is often added to où:

Là où elle va, elle trouve des amis.

Wherever she goes she makes friends.

22.13

preposition + **quoi** refers only to things. It is also used to refer to neuter pronouns such as **ce**, **cela**, **quelque chose**, **rien**:

On sait de quoi il s'agissait.

We know what it was about.

Il a écouté le discours après quoi il est allé prendre un verre.

He listened to the speech and afterwards went for a drink.

Il n'y a vraiment pas de quoi s'inquiéter.

There's nothing to worry about.

Ce à quoi nous pensons ce sont nos examens.

What we are thinking about is our exams.

22.14

ce qui, **ce que/qu'**, **ce dont** 'which, what' are compound relative pronouns. **Ce** (invariable) refers back to information which may be contained in an entire sentence, or paragraph. The pronouns **qui**, **que/qu'**, **dont** function exactly as if they were being used on their own (see above):

Elle a toujours refusé de se soumettre, ce qui ne lui plaît pas. (**qui** is the subject of the relative clause)

She's always refused to obey, which doesn't please him/her.

Elle fera ce qu'elle veut. (**que** is the object of the relative clause)
She will do what she wants.

Ils ne se souviennent jamais de ce dont nous leur parlons. (**dont** < **parler de**)

They never remember what we talk to them about.

22.15

tout can precede **ce qui** ... 'everything (that, which)':

Elle adore tout ce qui est écossais.

She loves everything Scottish.

Je ferai tout ce qu'elle me demande.

I'll do everything she asks me to do.

Nous avions appris tout ce dont nous avions besoin.

We'd learned everything we needed to.

22.16

c'est (ce sont) ... qui, que (qu'), **dont** 'it's ... who, that, which' is used to emphasize someone or something. **C'est** is used for all persons, singular and plural. **Ce sont** is used for the third persons plural in formal spoken and written contexts.

C'est Isabelle qui va comme d'habitude assurer le cours.

It's Isabelle who will take the class as usual.

C'est/ Ce sont nos amis qui posent des questions.

It's our friends asking questions.

C'est demain qu'on va partir.

It's tomorrow we're leaving.

C'est avec toute la famille qu'on partira en vacances.

It's with the whole family that we'll be going on holiday.

The relative pronouns function exactly as if they were being used on their own, without the *ce*. The verb in the relative clause agrees with the subject, that is, with whoever or whatever is introduced by *c'est* or *ce sont*. Normally the present tense of *être* is used, but other tenses are also possible:

Ce sera avec sa mère qu'il ira en Italie.

It's/It will be his mother he'll go to Italy with.

If the subject emphasized is in the pronominal form, the emphatic pronoun is used (see 21.2c).

Ce n'est pas moi qui sera responsable.

It's not me who'll be responsible.

C'est grâce à elle qu'il s'en est tiré.

It's thanks to her he succeeded.

23

Interrogative pronouns, adjectives and adverbs

There are different sets of interrogative pronouns for people and for things, and some of the pronouns have two forms: a short form, and a longer compound form which includes the interrogative inversion *est-ce?* The longer forms are more likely to be used in contexts which are less formal such as spoken French, or informal letters. Some of the forms are also different depending on whether the pronoun is the subject or object of the interrogative clause, or whether it follows a preposition. The interrogative pronouns are usually accepted as masculine singular – for adjective and verb agreement – unless the pronouns clearly refer to feminine and/or plural nouns.

23.1

Forms for people

Subject	<i>qui?</i> or <i>qui est-ce qui?</i>	who?
Object	<i>qui?</i> or <i>qui est-ce que/qu?</i>	who(m)?
Following a preposition	<i>de, à, avec ... qui?</i> or <i>qui est-ce que/qu?</i>	of, to, with ... who(m)?

In the following examples, note the use – or not – of inversion.

Qui est à la porte? / Qui est-ce qui est à la porte?

Who is at the door?

Qui vous a vu(e/s)? / Qui est-ce qui vous a vu(e/s)?

Who saw you?

Qui as-tu trouvé? / Qui est-ce que tu as trouvé?

Who did you find?

Qui a-t-on entendu pleurer? / Qui est-ce qu'on a entendu pleurer?

Who did we hear crying?

A qui parle-t-elle? / A qui est-ce qu'elle parle?

Who is she talking to?

Près de qui est-il assis? / Près de qui est-ce qu'il est assis?

Who is he sitting beside?

23.2

Forms for animals and things

Subject	qu'est-ce qui?	what?
---------	-----------------------	-------

Object	que/qu? or qu'est-ce que/qu?	what?
--------	--	-------

Following a preposition	de, à ... quoi? or quoi est-ce que/qu?	of, to ... what?
-------------------------	--	------------------

Once again, in the examples, note the use – or not – of inversion.

Qu'est-ce qui t'intéresse?

What are you interested in?

Qu'est-ce qu'il dit?

What is he saying?

Que veux-tu? / Qu'est-ce que tu veux?

What do you want?

Que pense-t-il de la maison? / Qu'est-ce qu'il pense de la maison?

What does he think of the house?

En quoi consiste-t-il? / En quoi est-ce qu'il consiste?

What does it consist of?

Avec quoi va-t-elle payer les billets? / Avec quoi est-ce qu'elle va

payer les billets?

What is she going to pay for the tickets with?

23.3

Guidelines on the use of inversion

(a) **qui?** (subject pronoun, used for people) – no inversion.

(b) compound forms already include **est-ce?**, so additional inversion is *not* needed.

- (c) **que/qu?** (object pronoun, used for things) – inversion needed.
- (d) **quoi?** (pronoun following prepositions, used for things) – inversion needed.

23.4

Qui? and **quoi?** can occur in phrases without verbs – usually in spoken French.

M. Martin est à la porte. Qui?
Mr Martin is at the door. Who?

Je n'ai pas entendu. Quoi?
I didn't hear. What?

Quoi de neuf?
What's new?

Quoi de plus joli que l'Ecosse?
What is lovelier than Scotland?

23.5

The interrogative pronoun **lequel?** 'who, which, what?'

Lequel implies that a choice is being made from a limited number of known people or things.

	Singular	Plural
Masculine	lequel?	lesquels?
Feminine	laquelle?	lesquelles?

There are also contracted forms following **de** and **à**:

	Singular	Plural
Masculine	duquel?	desquels?
Feminine	de laquelle?	desquelles?
Masculine	auquel?	auxquels?
Feminine	à laquelle?	auxquelles?

Laquelle des étudiantes cherchez-vous?
Which of the students are you looking for?

De tous les cours à la fac, lequel préfères-tu?
Which of all the classes at university do you prefer?

Il m'a dit qu'il a besoin d'un de ces livres. Mais duquel?
He told me he needs one of these books. But which (one)?

Auxquelles de vos amies avez-vous écrit?
Which of your friends did you write to?

23.6

The interrogative adjective **quel?** 'who, which, what?'

Quel has four forms:

	Singular	Plural
--	----------	--------

Masculine

quel?

quels?

Feminine

quelle?

quelles?

Quelle réponse?

What/which answer?

Quelle réponse a-t-elle donnée?

Which answer did she give?

Note the inversion when **quel?** modifies the subject of the sentence, as in the first two of the following examples:

Quels professeurs seront là?

Which teachers will be there?

Quelle était la femme qui t'a donné le pourboire?

Which woman gave you the tip?

Quelle heure est-il?

What time is it?

Quel jour sommes-nous?

What is the date?

Dans quelle poche a-t-elle mis la clé?

Which pocket did she put the key in?

23.7

The interrogative adverbs **combien de/d?** 'how many?', **comment?** 'how?', **où?** 'where?', **quand?** 'when?'

In spoken French, simply by using interrogative intonation, a statement can become a question:

Il est là?

He's here?

When any interrogative words are included in this kind of question, they are placed at the end of the sentence:

Elle attend depuis combien de mois?

She has been waiting how many months?

Vous l'avez fait comment?

How did you do it?

Ils vont où?

Where are they going?

Elle fait quoi?

She's doing what?

Ils aiment quel programme?

They like what (which) programme?

When an interrogative word *starts* the question there are various ways of dealing with the interrogative inversion:

- (a) if the subject is a noun, simple inversion:

Où habite la vieille dame?

Where does the old lady live?

Quand partira le train?

When does the train leave?

Comment va le malade?

How is the patient?

Combien coûte cette bouteille de vin?

How much is this bottle of wine?

- (b) if the subject is a pronoun, it is linked to the verb by a hyphen:

Où habite-t-elle?

Where does she live?

Quand partira-t-il?

When will it leave?

Comment va-t-il?

How is he?

Combien coûte-t-elle?

How much is it?

Another way of asking the same questions is to change the order of words, with the noun subject placed before or after the interrogative word – usually in spoken French.

La vieille dame, elle habite où?

Où la vieille dame habite-t-elle?

Le train, il partira quand?

Quand le train partira-t-il?

Le malade, il va comment?

Comment le malade va-t-il?

Cette bouteille de vin, combien elle coûte?

Combien cette bouteille de vin coûte-t-elle?

The questions may also be asked by inserting **est-ce que?** after the question word. There is no additional inversion. This way of asking questions is much more common in spoken French.

Où est-ce que la vieille dame habite?

Quand est-ce que le train partira/va partir?

The interrogative adverb **pourquoi?** 'why?'

There are three possibilities with **pourquoi**:

- (a) if the subject is a noun:

Pourquoi l'étudiant va-t-il à la fac? or L'étudiant, pourquoi va-t-il à la fac?

Why is the student going to the university?

- (b) the informal version:

Pourquoi est-ce que l'étudiant va à fac?

(c) if the subject is a pronoun:

Pourquoi êtes-vous là?

Why are you here?

Note that inversion of the verb and a noun subject is often avoided with interrogative words of more than one syllable: **comment?**, **combien?**

— 23.9 —

There is no inversion of the verb and a noun subject if the verb has a direct object or is closely linked to an adverbial phrase. In this case, you make inversion by adding a pronoun which agrees with the subject, and, in fact, you have a double subject.

Quand les enfants mangent-ils leur petit déjeuner?

When do the children have their breakfast?

Comment le premier ministre va-t-il expliquer cela?

How is the prime minister going to explain that?

Comment le professeur l'a-t-il traduit en anglais?

How did the teacher translate it into English?

— 23.10 —

Some of the interrogative adverbs may be preceded by a preposition:

D'où viennent-ils?

Where have they come from?

Jusqu'où compte-t-elle aller?

How far does she intend going?

Depuis quand les enfants attendent-ils?

How long have the children been waiting?

Pendant combien de temps êtes-vous resté(e/s)?

How long did you stay?

24

Cardinal and ordinal numbers (see 56.4, 56.7)

Cardinal numbers are adjectives and precede their noun. They can be grouped according to their form: simple or compound.

— 24.1 —

Simple forms

0	zéro	6	six	12	douze	30	trente
1	un, une	7	sept	13	treize	40	quarante
2	deux	8	huit	14	quatorze	50	cinquante
3	trois	9	neuf	15	quinze	60	soixante
4	quatre	10	dix	16	seize	100	cent
5	cinq	11	onze	20	vingt	1000	mille

24.2

Compound forms

Units are linked to tens by a hyphen – with the exception of the six numbers linked by *et* (24.3).

17	dix-sept	18	dix-huit	19	dix-neuf
22–29	vingt-deux to vingt-neuf				
32–39	trente-deux to trente-neuf				
42–49	quarante-deux to quarante-neuf				
52–59	cinquante-deux to cinquante-neuf				
62–99	soixante-deux to quatre-vingt-dix-neuf				

In Belgium, Canada and Switzerland the old forms of 70, 80 and 90 are sometimes used:

70	septante	80	octante or huitante	90	nonante
----	-----------------	----	----------------------------	----	----------------

24.3

Compound forms linked by *et*, *no* hyphens.

21	vingt et un	31	trente et un
41	quarante et un	51	cinquante et un
61	soixante et un	71	soixante et onze

24.4

Compound forms without *et* and without hyphens.

101	cent un	1,001	mille un
-----	----------------	-------	-----------------

24.5

Numbers are invariable, but there are four exceptions to this rule – **un**, **zéro**, **vingt**, **cent**.

- (a) **un, une: un** is used in counting, and with masculine nouns; **une** is used with feminine nouns.

un, deux, trois ...	one, two, three ...
un verre de vin	a/one glass of wine
Vingt et une étudiantes sont venues.	Twenty-one students came.

- (b) **zéro, vingt, cent**: these numbers add **s** in the plural.

sept zéros	seven zeros/nothings
quatre-vingts	80
cinq cents	500

but the **s** is dropped whenever they are followed by another number:

quatre-vingt-douze	92
trois cent soixante-sept	367

— 24.6 —

Mille is invariable.

7,000 **sept mille** 9,021 **neuf mille vingt et un**

In dates **mille** may be shortened to **mil** – but this is a bit old-fashioned:

1941 **mille (or mil) neuf cent quarante et un**

When dates are spoken, as opposed to written, **dix-neuf cent** may be used instead of **mille neuf cent**:

dix-neuf cent quarante et un

Note that **cent** *must* be included in the date, whereas in English 'hundred' is usually omitted.

Mille and **cent** are *never* preceded by **un**, whereas in English 'thousand' and 'hundred' may be preceded by 'one' or 'a':

mille one/a thousand **cent** one/a hundred

— 24.7 —

Cardinal numbers are used in the following:

(a) dates:

le 15 (quinze) mars	the 15th (of) March
le 3 (trois) janvier	the 3rd (of) January
Quel jour sommes-nous?	What's the date?
Nous sommes le 7 (sept).	It's the 7th.

but, exceptionally, the ordinal number is used for the first of the month:

le 1er (premier) avril the 1st (of) April

Note that months (and days of the week) begin with *small letters* in French.

(b) names of kings and queens:

Henri IV (quatre), Louis XIV (quatorze) but François 1er (premier)

(c) chapter and page numbers:

chapitre deux, trois, quatre... but chapitre premier or chapitre un à la page 18 (dix-huit)

(d) time:

à cinq heures	at five o'clock (a.m.)
à quatorze heures	at two o'clock (p.m.)

24.8

Care should be taken with the following series (see 56.7d):
mille (invariable, and *never* followed by **de**) 'thousand'

dix mille personnes ten thousand people

un millier (de/d'), **des milliers (de/d')** 'about a thousand, thousands'

Il y a des milliers d'étudiants dans les rues.
There are thousands of students in the streets.

un million (de/d'), **cinq millions (de/d')** 'a million, five million'

un million d'habitants a million inhabitants

un milliard (de/d'), **douze milliards (de/')** 'a billion, twelve billions'

La banque lui a prêté cinquante milliards de francs.
The bank has lent him/her fifty billion francs.

24.9

Punctuation in numbers

French	English
1 000 or 1.000	1,000 or 1000
15 294 or 15.294	15,294
8,5	8.5 (decimal point)

24.10

Ordinal numbers

Ordinal numbers are adjectives, but may be used as nouns.

24.11

le premier, la première 'first'; **le second, la seconde** or **le/la deuxième** 'second':

Elle est la première de la classe.	She is top of the class.
Ils étaient les premiers à partir.	They were the first to leave.
Voilà un billet de seconde classe.	Here is a second class ticket.
C'est un politicien de second plan.	He's a minor politician.
C'est la deuxième fois qu'il est en retard.	It's the second time he's been late.

— 24.12 —

For most ordinal numbers **ième** is added to the cardinal.

trois > troisième	third
dix-sept > dix-septième	seventeenth
vingt et un > vingt et unième	twenty-first
cent > centième	hundredth

but there are some exceptions:

un > premier (see 24.11)	first
deux > second, deuxième (see 24.11)	second
cinq > cinquième (adds u)	fifth
neuf > neuvième (f > v)	ninth

and there is a small group where the final e of the cardinal number is dropped:

quatre > quatrième	fourth
trente > trentième	thirtieth
mille > millième	thousandth

and in two cases the final s of the cardinal number is dropped:

quatre-vingts >	eighthieth
quatre-vingtième	
six cents > six centième	six hundredth
neuf cents > neuf centième	nine hundredth

The abbreviated forms are the number + **-ème** (note that **-ème** is sometimes further shortened to a superscript e):

la 33ème étage	the 33rd floor
le 57ème livre	the 57th book

but

Jean-Paul Ier

John-Paul I

Some examples with numbers used as nouns and adjectives:

Je suis en première (année).	I'm in the sixth form.
Qui est le onzième? (no elision)	Who is eleventh?
C'est le quinzième siècle.	It's the fifteenth century.
Pour la énième fois!	For the umpteenth time!

25 Fractions (see 56.7)

$\frac{1}{2}$ un demi but when 'half' is not a fraction use **la moitié (de)**

$\frac{1}{3}$ un tiers $\frac{2}{3}$ deux tiers

$\frac{1}{4}$ un quart $\frac{3}{4}$ trois quarts

and for all the rest, the ordinal forms are used:

$\frac{1}{10}$	un dixième	$\frac{1}{11}$	un onzième	$\frac{1}{5}$	deux cinquièmes
$1\frac{1}{2}$	un et demi	$1\frac{1}{3}$	un et un tiers	$6\frac{3}{4}$	six (et) trois quarts
$\frac{1}{100}$	un centième	$\frac{1}{1000}$	un millième		

Some examples:

une demi -bouteille	a half bottle
trois kilos et demi	3½ kilos
une demi -heure	a half hour
une heure et demie	1.30 (a.m.)

Note that **demi** is invariable, but **et demi(e)** agrees in gender (*not* number) with its noun (see 17.7c).

Je serai là dans un quart d'heure.	I'll be there in quarter of an hour.
On a bu les trois quarts de la bouteille.	We've drunk three-quarters of the bottle.

26 Approximate quantities (see 56.7)

Approximate quantities are all followed by **de/d'** if a noun is specified.

une dizaine	about ten
une (demi-)/ douzaine	(half) a dozen
une vingtaine	about twenty
une centaine	about a hundred
un millier	about a thousand

and

plus de/d'	more than	moins de/d'	less than
-------------------	-----------	--------------------	-----------

Some examples:

Je voudrais une demi-douzaine d'œufs.	I'd like half a dozen eggs.
Il y avait des centaines de cafards.	There were hundreds of cockroaches.
Elles étaient plus de/moins de trente.	There were more/less than thirty (of them).

27

Dimensions (see 56.6)

There are various ways of expressing length, breadth, height, depth, etc., some of which are given below. Perhaps the best way to deal with them is to select the form that you find easiest to remember.

27.1

Length

for things and animals:

Quelle est la longueur de la corde?	How long is the rope?
Quelle est la largeur de la rue?	How wide is the street?
Quelle est la hauteur de l'immeuble?	How high is the building?
Quelle est la profondeur de l'étang?	How deep is the pond?

and for people:

Combien mesure-t-il?	How tall is he?
-----------------------------	-----------------

27.2

long de, large de, haut de, profond de

une corde longue de 5 mètres	a rope 5 metres long
une rue large de 3 mètres	a street 3 metres wide
un immeuble haut de quatre étages	a building four storeys high
un étang profond d'un mètre	a pond one metre deep

and if a verb is required: **avoir/faire + size + de long or être + long de + size:**

Cette corde a 5 mètres de long.	This rope is 5 metres long.
Cette rue fait 3 mètres de large.	This street is 3 metres wide.
Cette corde est longue de 5 mètres.	This rope is 5 metres long.
Cet étang est profond d'un mètre.	This pond is one metre deep.

Different verbs are required for expressing the height of *people*:

C'est un homme d'un mètre quatre-vingts.

He's 6 feet tall.

Elle mesure à peu près un mètre quatre-vingts.

She's almost 6 feet tall.

Il est plus grand qu'elle.

He's bigger than she is.

Elle est plus petite que lui.

She's smaller than him.

Ils n'ont pas la même taille.

They're not the same height.

C'est vrai, elle n'a pas la même taille que lui.

That's right, she isn't the same height as him.

27.3

Weight

for things and animals:

Combien pèse l'éléphant?

What does the elephant weigh?

or

Quel poids fait-il?

What does it weigh?

Il pèse environ ... je ne sais pas.

It weighs about ... I don't know.

Il pèse plus lourd que toi.

It's heavier than you.

Il est moins lourd (or plus léger) qu'elle.

It's lighter than her.

and for people:

Combien pèse-t-il?

What is his weight?

Il pèse plus de 127 kilos.

He's over 127 kilos/20 stone.

C'est une femme de 60 kilogrammes 500.

She's 60½ kilos/10 stone.

and when shopping:

Je voudrais 500 grammes de fromage.

I'd like 500g of cheese.

Environ 250 grammes de cerises, s'il vous plaît.

About 250g of cherries, please.

Et un kilo de tomates.

And a kilo of tomatoes.

Et enfin une demi-livre de sucre. Merci!

And finally 250g of sugar. Thank you!

Note the different order in English and French in the following:

a two kilo packet

un paquet de deux kilos

28 Adverbs of quantity (see 11.3, 56.7)

These adverbs can introduce a noun, or modify a verb. If they introduce a noun they are followed by **de/d'** (see 11.3). Some may also be followed by **que** in comparisons.

assez (de)	enough	autant (de/que)	so/as much/many
un peu (de)	a little, some	beaucoup (de)	a lot of, many
peu (de)	little, few	plus (de/que)	more
tant (de)	so much/many	combien (de)?	how much?
trop (de)	too much/many	moins (de/que)	fewer, less

Il a assez d'argent.	He has enough money.
Elle a assez entendu.	She has heard enough.
Nous avons beaucoup de travail.	We have a lot of work.
Moi aussi, j'ai beaucoup travaillé.	I've worked hard too.
Combien d'influence a-t-il?	How much influence does he have?
Ce livre vaut combien?	How much is this book?
Il y a moins de gens ce soir.	There are fewer people tonight.
Il gagne moins que son frère.	He earns less than his brother.

Note that **un peu de** has a more positive meaning than **peu de**.

J'ai un peu d'argent.	I have a little money.
J'ai peu d'argent.	I haven't much money.

trop (de) can be modified by **beaucoup** or **un peu**

Il a beaucoup trop d'argent.	He has far too much money.
Elle a bu un peu trop.	She has drunk a bit too much.

beaucoup is *never* preceded by **très**

Merci beaucoup!	Thank you very much.
------------------------	----------------------

III *The verb group*

29 *Agreement of verb and subject*

The verb is formed of the stem, and an ending. For example in the infinitive **donner**, the stem is **donn-** and the ending is **-er**. Most verbs are listed in a dictionary in their infinitive form, which is the part of the verb which does not indicate a subject (first, second or third person) or number (singular or plural). The English equivalent of the infinitive is 'to' + verb. There are three main groups, or conjugations, of verbs, identified according to their infinitive ending: **-er**, **-ir**, **-re**.

donner	(donn- + -er)	to give
finir	(fin- + -ir)	to finish
vendre	(vend- + -re)	to sell

There are also verbs which have an infinitive ending **-oir**: **recevoir** 'to receive', **s'asseoir** 'to sit down'. Verb endings – in contrast to the infinitive – indicate the person, the number, time (tenses) and mood (indicative, subjunctive). With these endings the verb is called a finite verb.

29.1

The verb ending *always* agrees with the subject: singular subject + singular verb ending, plural subject + plural verb ending.

<i>Elle chante bien.</i>	She sings well.
<i>Nous parlons français.</i>	We speak French.

29.2

Guidelines for verb/subject agreement

Normally, it is clear whether the subject is singular or plural, but there are some subjects which cause difficulty. When the subject of the verb is **qui**, the verb agrees with the antecedent (see 22.1).

Toi et ton frère, qui avez été tous les deux très paresseux, vous allez redoubler cette année.

You and your brother, who have both been very lazy, are going to repeat this year.

C'est nous qui serons responsables.
We'll be responsible.

C'est is used with all the singular emphatic pronouns, and also, in informal contexts, for all the plural emphatic pronouns. In more formal written and spoken French the third person plural form is **ce sont** (see 13.5a, 21.2c).

C'est elles qui font toujours la vaisselle.

They always do the washing-up.

Ce sont eux qui vont donner la réponse au ministre.

They are going to reply to the Minister.

and note the expression **si ce n'est** 'unless, except for, if not' (invariable):

Si ce n'est (pas) eux, qui est-ce?

If it's not *them*, who is it?

29.3

Compound subjects + singular and/or plural verb

Un des films qui lui a/ont beaucoup plu, c'est 'La liste de Schindler'.

One of the films he liked very much was 'Schindler's List'.

Plus d'un de mes amis va/vont en France cet été.

Several of my friends are going to France this summer.

A singular noun referring to a group, or a quantity, has a singular verb: **la famille** 'family', **le comité** 'committee', **le parti socialiste** 'the socialist party', **la foule** 'crowd'...:

Le parti socialiste a trop de candidats.

The socialist party has too many candidates.

In the case of singular nouns expressing quantity followed by a plural noun, the verb can be singular *or* plural: **le manque de** 'lack of', **le reste de** 'remainder of, other, rest of', **la foule de** 'crowd of'...:

Le manque d'argent est un problème peu supportable.

The lack of money is a major problem.

Le manque d'auditeurs est vraiment décevant.

The lack of an audience is really disappointing.

But the speaker or writer may want to focus firmly on the plural part of the compound subject, and in this case, the verb agrees with that plural subject.

Une foule de gens manifestaient dans les rues.

A crowd of people were demonstrating in the streets.

29.4

Beaucoup de, combien de?, peu de, la plupart de are followed by plural verbs when they are used as subjects.

Beaucoup d'étudiants n'ont pas de bourse.

Many students don't have a grant.

Combien d'Anglais sont allés au match?

How many English people went to the match?

Peu de gens ont aimé la pièce.

Few people liked the play.

La plupart des étudiants travaillent avec enthousiasme.

Most students work enthusiastically.

If **combien de?** and **la plupart de** are followed by a singular noun, the verb is also in the singular.

Combien de la tarte reste-t-il?

How much of the tart is left?

La plupart est déjà mangée.

Most of it has already been eaten.

29.5

Compound subjects linked by **et**: the verb is always plural.

Pierre et Marie iront ensemble.

Peter and Mary will go together.

L'un et l'autre sont fatigués.

They are both tired.

Isabelle et moi allons prendre un café.

Isabelle and I are going for a coffee.

29.6

Compound subjects linked by **ou** or **ni**: the verb is usually plural – unless the subject is, in fact, really singular.

Michel ou Marc viendront te chercher.

Michel or Marc will come and pick you up.

Vous ou elles devez rester à la maison.

You or they must stay at home.

Ni mon frère ni ma sœur n'aident ma mère.

Neither my brother nor my sister help(s) my mother.

Ni lui ni moi n'avons reçu un cadeau.

Neither he nor I received a present.

Ni l'un ni l'autre may be followed by a singular verb, but the plural is also possible (see 18.8):

Ni l'un ni l'autre n'est allé/ ne sont allés lui parler.

Neither of them went to talk to him/her.

Note that **l'un ou l'autre** always has a singular verb:

L'un ou l'autre pourra venir.

One or the other will be able to come.

The following rule of thumb for compound subjects and their verbs may prove useful:

- if the subjects are linked by **et** use a plural verb
 - if the subjects are linked by **ou** or **ni** a plural verb is preferred *unless*
 - 1 the subject is logically singular
 - 2 the speaker or writer is thinking of a singular subject
 - 3 the subject is **l'un ou l'autre**
- In these three cases the verb is singular.

29.7

Impersonal verbs, such as **il y a** 'there is/are', **il reste** 'there remain(s)', **il est arrivé** 'something happened/occurred' (see 53), usually remain singular, *whatever* the subject is.

Il y aura des manifestations si vous n'acceptez pas la décision du comité d'entreprise.

There will be demonstrations if you don't accept the decision of the works council.

Il est venu des gens d'affaires à l'aéroport comme prévu mais le vol avait été annulé.

Some business people arrived at the airport as arranged, but the flight had been cancelled.

30 Formation of tenses

Guidelines on the formation of tenses are given below, but unless and until you are absolutely sure of the forms and the irregularities – often very small irregularities – it is good practice to check in verb tables which include the most useful irregular verbs (see 82). The guidelines refer to verbs *and* their compounds e.g. **venir**, **devenir**, **revenir**, **convenir**.

In each of the conjugations there are irregular verbs, that is, verbs which have the infinitive endings **-er**, **-ir**, **-re**, **-oir** but whose stems change under certain conditions. Two of the irregular verbs – **avoir** and **être** – are the most important of all the irregular verbs because they are used to form the compound tenses.

30.1

All of the tenses have a basic meaning – they are used to refer to present, future or past time. Each of them is also used with additional meanings. These additional meanings are usually made clear in an adverbial phrase in the sentence which indicates exactly what the speaker or writer means. However, it is not always necessary to confirm the exact meaning – the tense, or context, may be enough. For example, the present tense alone may be enough to express a habit.

Elle se lève tôt.

She gets up early.

But the speaker or writer may feel it necessary to indicate quite clearly that the action is a habit.

Elle se lève tôt tous les jours.

She gets up early every day.

31

The indicative tenses; the present tense

31.1

There are two main groups of indicative tenses, and they can be divided according to their form: the *simple* tenses and the *compound* tenses. Each of the simple tenses has a corresponding compound tense, formed with **avoir** or **être**.

Simple tenses

present (présent) (see 31.2, 31.7)

future (futur) (see 32, 32.5)

imperfect (imparfait) (see 33, 33.1)

past historic (passé historique) (see 34, 34.2)

Compound tenses

perfect (passé composé) (see 35, 36)

future perfect (futur antérieur) (see 35, 37)

pluperfect (plus-que-parfait) (see 35, 38)

past anterior (passé antérieur) (see 35, 39)

The past historic is also called the *simple past (passé simple)* or the *preterite (prétérit)*.

The *conditional tense (conditionnel)* and its corresponding compound form, the *conditional perfect (conditionnel passé)* (see 40), are treated separately because they form a bridge, in terms of meaning, between the indicative and the subjunctive (see 41).

The present tense

(a) -er verbs: **donner** ‘to give’, composed of the stem **donn-** + the endings -e, -es, -e, -ons, -ez, -ent:

je	donne
tu	donnes
il/elle	donne

I give, am giving

nous	donnons
vous	donnez
ils/elles	donnent

All -er verbs have the same present tense forms as **donner** with the exception of **aller** 'to go': **je vais, tu vas, il/elle va, nous allons, vous allez, ils/elles vont**

(b) -ir verbs: **finir** 'to finish', composed of the stem **fin-** + the endings **-is, -is, -it, -issons, -issez, -issent**:

je	finis	nous	finissons
tu	finis	vous	finissez
il/elle	finit	ils/elles	finissent

Regular verbs in the -ir group have **-iss-** inserted in the plural forms of the present tense, throughout the imperfect tense: **je finissais** (see 33), in the present participle: **finissant** (see 50), and in the plural imperative forms: **finissons, finissez** (see 51).

Some verbs with an -ir infinitive have the endings of the -er group in the present tense:

ouvrir 'to open': **j'ouvre, tu ouvres, il/elle ouvre, nous ouvrons, vous ouvrez, ils/elles ouvrent**

Some verbs with an -ir infinitive have the endings of the -re group (see below) in the present tense. They may also have changes in the stem, for example **dormir** 'to sleep', **partir** 'to leave'.

(c) -re verbs: **vendre** 'to sell', composed of the stem **vend-** + the endings **-s, -s, -t or -d, -ons, -ez, -ent**:

je	vends	nous	vendons
tu	vends	vous	vendez
il/elle	vend	ils/elles	vendent

Verbs whose stem ends in **d** do not add **-t** or **-d** in the 3rd person singular: **il/elle vend; il/elle répond** 'he/she answers'; **il/elle se rend** 'he/she goes'; **il/elle prend** 'he/she takes' – the **d** of the infinitive stem is enough. Otherwise, the verbs have **-t**:

boire 'to drink'	il/elle boit
rompre 'to break'	il/elle rompt
faire 'to do, make'	il/elle fait

The one exception to this rule is **vaincre** 'to conquer' (and its compound **convaincre** 'to convince'). The third person singular ending is **-c**: **il/elle vainc (convainc)**

(d) -oir verbs: **recevoir** 'to receive':

These verbs all have the same endings as -re verbs: **-s, -s, -t, -ons, -ez, -ent**, but the stem may have changes.

je	reçois	nous	recevons
tu	reçois	vous	recevez
il/elle	reçoit	ils/elles	reçoivent

In most cases the 1st and 2nd persons plural keep the infinitive stem, with changes occurring in the singular and in the 3rd person plural.

devoir 'to owe; must, should': **je dois, tu dois, il/elle doit, nous devons, vous devez, ils/elles doivent**

pouvoir 'to be able to; can, may': **je peux, tu peux, il/elle peut, nous pouvons, vous pouvez, ils/elles peuvent.** (Note the interrogative form of **je peux**: **puis-je?**)

savoir 'to know; know how to': **je sais, tu sais, il/elle sait, nous savons, vous savez, ils/elles savent**

vouloir 'to want (to); wish': **je veux, tu veux, il/elle veut, nous voulons, vous voulez, ils/elles veulent**

falloir – always in the infinitive or the 3rd person singular: **il faut** 'it is necessary; must'

31.3

avoir 'to have' and **être** 'to be'

avoir:

j'ai	nous avons
tu as	vous avez
il/elle a	ils/elles ont

être:

je suis	nous sommes
tu es	vous êtes
il/elle est	ils/elles sont

31.4

Points to remember about some present tense forms:

- three verbs have the ending **-tes** (*not -ez*) with **vous**:

être 'to be'	vous êtes
dire 'to say'	vous dites
faire 'to do; make'	vous faites

- four verbs have the ending **-ont**, or form **ont** (*not -ent or ent*) with **ils/elles**:

aller	ils/elles vont	avoir	ils/elles ont
faire	ils/elles font	être	ils/elles sont

Some further guidelines on changes in the spelling and form of -er verbs – the changes may also occur in other parts of the verbs (see 82).

- verbs ending in -e- + consonant + -er

The following verbs are examples of verbs which strengthen the sound of the middle e when the following syllable is not pronounced:

renouveler 'to renew' doubles the l: **je renouvelle, tu renouvelles, il/elle renouvelle, ils/elles renouvellent but nous renouvelons, vous renouvelez**

jeter 'to throw' doubles the t: **je jette, tu jettes, il/elle jette, ils/elles jettent but nous jetons, vous jetez**

acheter 'to buy' changes the middle e to è: **j'achète, tu achètes, il/elle achète, ils/elles achètent but nous achetons, vous achetez**

- verbs ending in -cer

These verbs change the c to ç before a and o: **commencer** 'to begin' – **nous commençons**

- verbs ending in -ger

These verbs add e before a and o: **partager** 'to share' – **nous partageons**

- verbs ending in -oyer and -uyer

These verbs change the y to i before an e that is silent:

employer 'to employ': **j'emploie, tu emploies, il/elle emploie, ils/elles emploient but nous employons, vous employez**

- verbs ending in -ayer

These verbs may change the y to i before an e that is silent, but they can keep the y:

payer 'to pay (for)': **je paye (or paie), tu payes (or paies), il/elle paye (or paie), nous payons, vous payez, ils/elles payent (or paient)**

- verbs ending in -e- + consonant + -er

These verbs usually change the é to è before a final e that is not pronounced:

espérer 'to hope (for)': **j'espère, tu espères, il/elle espère, ils/elles espèrent but nous espérons, vous espérez**

Spelling changes in verbs ending in -dre

- verbs ending in -aindre, -eindre, -oindre change the -nd- of the stem to -gn-

craindre 'to be frightened of': **je crains, tu crains, il/elle craint but nous craignons, vous craignez, ils/elles craignent**

- verbs ending in **-oudre** change the **-ud-** of the stem to **-iv-** in the plural forms:

résoudre 'to resolve; solve': **je résous, tu résous, il/elle résout** but
nous résolvons, vous résolvez, ils/elles résolvent

These are *some* of the changes which occur in the stem or the endings of verbs. It is always advisable to check the forms in verb tables.

31.7

How the present tense is used

- to express any action that takes places, or is taking place, in the present:

Il répare son auto. He is repairing his car.

- to express facts, proverbs and general or universal truths:

Nous sommes le 15 mars.	It's the 15th of March.
Je ne fume pas.	I don't smoke.
3 et 4 font 7.	3 and 4 make 7.
Pierre qui roule n'amasse pas mousse.	A rolling stone gathers no moss.

- to narrate a story – the tense is then called the historic present and occurs in the informal narrating of a story, or in literature. In both contexts it is intended to make a story more vivid. The following extract is taken from *Un Jeune Homme Seul* by Roger Vailland, published in 1951. The main narrative tense of the novel is the past historic:

Il passe sans répondre, court à sa chambre et se jette sur le lit. Il garde les yeux fixés, au delà de la fenêtre, sur la Tour Eiffel, mais il ne la voit pas. Il répète à voix haute: 'Je suis l'homme le plus seul au monde, je suis ...'

He went past without answering, ran to his room and threw himself on the bed. He stared out of the window at the Eiffel Tower, but he didn't see it. He said over and over again, 'I am the loneliest man in the world, I am ...'

- to express the near, or very near, future or past, especially in a spoken, informal context:

J'y vais.	I'm off/leaving right now. (or I'll see to it.)
Elle sort dans un instant.	She's coming out in a minute.
Il part dimanche prochain.	He's leaving next Sunday.
Nous allons au cinéma ce soir.	We're going to the cinema tonight.
Je reviens tout de suite.	I'll be right back.

Le train arrive de Paris.

Il sort à l'instant.

The Paris train is (just) in.

He has just left.

and note the verb phrase **venir de** + infinitive 'to have just' + past participle (see 33.1).

Nous venons de commencer.

We have just begun.

- to express habit or repetition:

Il se couche tard.

He goes to bed late.

Il taille la haie toutes les trois semaines.

He cuts the hedge every three weeks.

- to express a condition, in the **si** clause (see 40.2):

S'il arrive bientôt, nous pourrons/pouvons partir.

If he arrives soon, we can leave.

31.8

It is important to remember that French has *one* present tense form but English has *two*: a simple present – 'I take, I listen, I write' – and a continuous (or progressive) present – 'I am taking, I am listening, I am writing'.

Il chante.

He sings. (or He is singing.)

The verb phrase **être en train de** + infinitive can be used to indicate that an action is in progress:

Il est en train d'écrire une lettre.

He is writing a letter. (at this very moment)

The verb phrase **aller + (en) + present participle** can also be used to express an action, or event, in progress at the present time:

Certains secteurs de l'économie britannique vont en s'améliorant.

Some sectors of the British economy are improving.

31.9

When a continuous and *continuing* action is expressed along with the time it began ('since ...') or along with the period of time it has been going on ('for ...'), French uses the present tense:

Il pleut depuis dimanche.

It has been raining since Sunday.

Ça/Cela fait un quart d'heure que je l'attends.

That's a quarter of an hour I've been waiting for him/her.

Depuis quand êtes-vous en Ecosse?

How long have you been in Scotland?

Depuis combien de temps est-elle étudiante?
How long has she been a student?

Il y a trois mois que nous sommes là.
We've been here for three months.

and

Voilà une heure que nous vous attendons!
We've been waiting for you for an hour!

In the previous example the phrase **voilà ... que** ... is used only with the present tense: **voilà** refers to the present moment.

In each of the examples, the continuous and *continuing* action is expressed by the present tense in French: the English equivalent is 'have/has been' (+ present participle).

32 The future tense

The future tense of most French verbs is composed of the infinitive + the endings -ai, -as, -a, -ons, -ez, -ont

(a) **donner:**

je	<i>donnerai</i>	I shall give	nous	<i>donnerons</i>
tu	<i>donneras</i>		vous	<i>donnerez</i>
il/elle	<i>donnera</i>		ils/elles	<i>donneront</i>

(b) **finir:**

je	<i>finirai</i>	I shall finish	nous	<i>finirons</i>
tu	<i>finiras</i>		vous	<i>finirez</i>
il/elle	<i>finira</i>		ils/elles	<i>finiront</i>

The -re infinitives drop the final -e: **j'écrirai** 'I shall write', **je prendrai** 'I shall take'

(c) **vendre:**

je	<i>vendrai</i>	I shall sell	nous	<i>vendrons</i>
tu	<i>vendras</i>		vous	<i>vendrez</i>
il/elle	<i>vendra</i>		ils/elles	<i>vendront</i>

Many of the -oir verbs, and the irregular verbs of the -er, -ir and -re conjugations, have changes in the stem, but they *all* have the same endings. Some examples of the stem changes are given here, but it is good practice, as always, to check in the verb tables for possible changes.

32.2

Examples of -oir verbs:

recevoir:	je recevrai	I shall receive
voir:	je verrai	I shall see

32.3

devoir, pouvoir, savoir, vouloir, falloir:

devoir:	je devrai	I shall have to; I must
pouvoir:	je pourrai	I shall be able to; I can
savoir:	je saurai	I shall know (how to)
vouloir:	je voudrai	I shall want/wish to
falloir:	il faudra	pronoun + will have to; must

32.4

Some of the irregular verbs of the other conjugations:

aller:	j'irai	I shall go
courir:	je courrai	I shall run
avoir:	j'aurai	I shall have
cueillir:	je cueillerai	I shall pick
être:	je serai	I shall be
venir:	je viendrai	I shall come
faire:	je ferai	I shall do; make
tenir:	je tiendrai	I shall hold

How the future tense is used

- to express an action or event in future time:

Il viendra.

He'll come.

Elle le fera demain.

She will do it tomorrow.

- to express habit, or repeated action (with an adverbial phrase):

Nous lirons un journal tous les jours.

We'll read a paper every day.

- to express conjecture, supposition or probability (see 37):

Quelqu'un vient d'arriver. Ce sera tes invités.

Someone has just arrived. It will be your guests.

- to express absolute refusal:

N'insiste pas, je n'irai pas.

Don't go on about it. I won't go.

- to indicate some distance from someone:

Voudrez-vous encore du thé?

Would you like some more tea?

J'avouerai que je préfère un verre d'eau.

I would prefer a glass of water.

- as a stylistic device, in a narrative in literature or in journalism:

C'était un jeune homme très timide, et il le restera toute sa vie.

He was a very shy young man, and remained so all his life.

- as the tense of the main verb, accompanying **si** + present tense expressing condition (see 40.2):

On fera la vaisselle, si on a le temps.

We'll do the washing-up, if we've time.

32.6

French and English usage are different in certain contexts:

- with **quand/lorsque** 'when': French uses the future tense; English uses the present tense.

Quand tu les rejoindras, tes parents seront vraiment ravis.

When you join your parents, they'll be really delighted.

- with reference to a future action French is much more precise than English.

Il fera ce qu'il voudra.

He'll do what he wants.

32.7

- to express a continuous action in the future:

Je serai en train de préparer un repas quand tu arriveras.

I'll be preparing a meal when you arrive.

L'économie ira (en) s'aggravant.

The economy will continue to get worse.

32.8

To express the near future (**le futur proche**): **aller** + infinitive, with **aller** normally in the present, or imperfect, tense. This verb phrase is used in spoken and written, formal and informal French, and often replaces the future tense.

Despite its name it can refer to an action in a remote future. It carries with it an idea of certainty about the action, which is not necessarily there in the future tense. It may express intention.

Elle va réussir/réussira.

She will succeed.

Les cours vont commencer/commenceront la semaine prochaine.
 Classes begin next week.

Le congrès va avoir lieu l'année prochaine.
 The conference will take place next year.

If an action is *really* immediate, the present tense is used (see 31.7):

Elle vient dans un instant. She will be here in a moment.

The near future is used to express certainty:

Si tu continues, tu vas m'ennuyer.
 If you continue, you'll bore me (stiff).

and to express an intention:

Tu vas voir!
 You'll see!

Il va nous montrer comment le faire.
 He'll show us how to do it.

33 The imperfect tense

The imperfect tense of most verbs is formed by using the stem of the first person plural of the present tense and adding the endings -ais, -ais, -ait, -ions, -iez, -aient. It is recommended that you use the first person plural of the present tense because the imperfect tense of every French verb, with the exception of *être*, can be composed with this form.

donner:

je	<i>donnais</i>	I was giving/gave	nous	<i>donnions</i>
tu	<i>donnais</i>		vous	<i>donniez</i>
il/elle	<i>donnait</i>		ils/elles	<i> donnaient</i>

and some more examples:

nous finissons: je finissais	nous faisons: je faisais
nous vendons: je vendais	nous pouvons: je pouvais
nous recevons: je recevais	nous avons: j'avais
nous mettons: je mettais	nous mangeons: je mangeais

but être:

nous sommes: j'étais

33.1

How the imperfect tense is used

- in description of people, animals, things, states, events (of any length) in the past:

Nous nous sommes retrouvés dans un camp dans le centre de la France. Nous logions dans des tentes. C'était en juillet, nous avions froid.

(*The Guardian* 14.2.95)

We found ourselves in a camp in the centre of France. We lived in tents. It was July, and we were cold.

- in description, as opposed to action:

J'étais l'aînée, je parlais parfaitement le français, je travaillais bien à l'école. Mes parents ont eu besoin de moi. Je leur ai servi d'interprète.

(*The Guardian* 14.2.95)

I was the eldest, I spoke perfect French, I worked well at school. My parents needed me. I was their interpreter.

- to express habit, or repeated action (frequently an adverbial phrase confirms the habit, or repeated action):

Nous attendions là tous les jours.

We waited there every day.

Chaque vendredi elle allait au marché.

Every Friday she went to market.

- to express suggestion:

Si je le faisais pour toi?

What if I were to do it for you?

- to express discretion (usually in the first person):

Je venais vous parler de son mari.

I came to talk to you about her husband.

- to express simultaneity of actions (usually combined with the perfect tense or the past historic):

Il traversait la rue quand il a entendu/entendit son cri.

He was crossing the street when he heard his/her shout.

The two actions occur at the same time; the imperfect expresses a continuous or prolonged action, the perfect or past historic express a sudden, completed action.

- as a stylistic device, replacing the perfect or past historic, when narrating a story (in literature or in journalism):

Son représentant dans l'ex-Yugoslavie se disait persuadé que le cessez-le-feu n'était pas encore définitivement enterré.

(*Le Monde* 23.3.95)

His/Her/Its representative in the former Yugoslavia said he was convinced that the cease-fire had not completely broken down.

- to express conjecture, supposition or probability, referring to a possible event in the past (see 40.6):

Un pas de plus et il tombait.

One more step, and he'd have fallen.

- to express the immediate past (see 31.7):

Le train arrivait de Paris.

The train had just arrived from Paris.

Elle sortait de la salle de classe.

She had just left the classroom.

These examples could also mean 'The train was arriving from Paris', 'She was leaving the classroom'. The imperfect tense of *venir* in the verb phrase *venir de + infinitive* may be used to express the immediate past (see 31.7).

Nous venions de commencer. We had just begun.

- to express a condition, in the *si* clause (see 40.2):

S'il travaillait, il réussirait.

If he worked, he would be successful.

33.2

When a continuous but *completed* action in the past is expressed along with the time it began ('since ...') or along with the period of time it lasted ('for ...'), French uses the imperfect tense (see 31.9):

Il neigeait depuis trois semaines.

It had been snowing for three weeks.

Ça/Cela faisait un mois que nous le savions.

We had known for a month.

Depuis combien de temps habitait-il en France?

How long had he been living in France?

Il y avait dix jours qu'il attendait la lettre.

He had been waiting for the letter for ten days.

In each of the examples, the continuous and *completed* action is expressed by the imperfect tense in French: the English equivalent is 'had been' + present or 'had' + past participle.

34 The past historic

The past historic (or simple past or preterite) of most verbs is formed by using the stem of the infinitive and adding the endings of the past historic (see 34.1). However, irregular verbs may not follow this rule, and it is advisable to check the stem in verb tables.

— 34.1 —
The following endings are added to -er verbs: -ai, -as, -a, -âmes, -âtes, -èrent.

donner:

je	<i>donnai</i>	I gave	nous	<i>donnâmes</i>
tu	<i>donnas</i>		vous	<i>donnâtes</i>
il/elle	<i>donna</i>		ils/elles	<i>donnèrent</i>

and the following endings to regular -ir verbs: -is, -is, -it, -îmes, -îtes, -irent.

finir:

je	<i>finis</i>	I finished	nous	<i>finîmes</i>
tu	<i>finis</i>		vous	<i>finîtes</i>
il/elle	<i>finit</i>		ils/elles	<i>finirent</i>

Some -oir verbs, and almost all -re verbs, also have the -ir group endings. Some examples with changes in the stem:

voir: je *vis*, tu *vis*, il/elle *vit*, nous *vîmes*, vous *vîtes*, ils/elles *virent*
 faire: je *fis*, tu *fis*, il/elle *fit*, nous *fîmes*, vous *fîtes*, ils/elles *firent*
 mettre: je *mis*, tu *mis*, il/elle *mit*, nous *mîmes*, vous *mîtes*, ils/elles *mirent*

Note the exceptions *venir* and *tenir*:

venir: je *vins*, tu *vins*, il/elle *vint*, nous *vînmes*, vous *vîntes*, ils/elles *vinrent*
 tenir: je *tins*, tu *tins*, il/elle *tint*, nous *tînmes*, vous *tîntes*, ils/elles *tinrent*

There is a third group of endings – identical to the -ir group except for the vowel. Instead of **i**, they have **u**: -us, -us, -ut, -ûmes, -ûtes, -urent. These endings are used with most -oir verbs, including *devoir*, *pouvoir*, *savoir*, *vouloir* and *falloir*.

recevoir: je *reçus*, tu *reçus*, il/elle *reçut*, nous *reçûmes*, vous *reçûtes*, ils/elles *reçurent*
 devoir: je *dus*, tu *dus*, il/elle *dut*, nous *dûmes*, vous *dûtes*, ils/elles *durent*

pouvoir: *je pus* vouloir: *je voulus* savoir: *je sus* falloir: *il fallut*
and

avoir: *j'eus*, *tu eus*, *il/elle eut*, *nous eûmes*, *vous eûtes*, *ils/elles eurent*

The **-us** ... endings are also used with a small group of **-re** verbs, including **être**:

être: je fus, tu fus, il/elle fut, nous fûmes, vous fûtes, ils/elles furent

and some other examples:

connaître 'to know': je connus

lire 'to read': je lus

vivre 'to live': je vécus

There are two irregular **-ir** verbs which have the **-us** ... endings:

courir 'to run': je courus

mourir 'to die': il/elle mourut

34.2

How the past historic is used

The past historic is not used very frequently, and is usually replaced in modern French by the perfect tense. However, it does occur in formal written or spoken contexts: in some newspapers and magazines, in literary works, in lectures and in public speeches. It is most commonly found in the third person singular and plural. The past historic is used to express:

- an event or action, of long or short duration, that is complete, and over, but not necessarily remote in time:

Le Général de Gaulle vécut 80 ans.

General de Gaulle lived for eighty years.

Le sport s'épanouit dans les démocraties: mais il fut à l'honneur sous le totalitarisme stalinien.

Sport was encouraged in democratic countries: but it was worshipped under Stalin's totalitarian régime.

En 1991, l'équipe de France de tennis gagna la coupe Davis.

In 1991, the French team won the Davis cup.

Note that the English equivalent in each of the examples is the past tense: 'lived, was encouraged (passive), was worshipped (passive), won'.

- a series of completed events, perceived as points in time:

The following examples are taken from an article in *Le Monde* (23.3.95), the day after a campaign meeting held by the Socialist candidate in the Presidential elections:

... l'image *fut* bonne ... cela *parut* pour son entourage l'essentiel
 ... on *sentit* tout de même ... son épouse lui *fit* signe de ...
 ... the impression was good ... that seemed to be the essential
 thing for his entourage ... they felt nevertheless ... his wife
 signalled to him to ...

- and in combination with and in contrast to the imperfect tense, which describes the background of the event or series of events (see 33.1):

Puis, il tourna le robinet de l'évier, se lava les mains, s'essuya au linge accroché sous le grêle tuyau. ... Et elle guettait ses moindres gestes ...

(Henri Troyat (1936) *Grandeur Nature*)

Then he turned on the tap, washed his hands, dried them on the towel hanging under the thin pipe. ... And she watched his slightest movement ...

In the following example the past historic is accompanied by a supporting adverbial phrase:

Il regardait passer toutes les voitures et tout à coup comprit pourquoi elle était partie.

He was watching all the cars going past and suddenly understood why she had left.

The description of what the man was doing (*regardait*) is interrupted suddenly by an event (*comprit*).

35 The compound tenses

The compound tenses of the indicative are formed by adding the past participle of a verb to one of the simple tenses of the auxiliary verbs **avoir** and **être**. The compound tenses of the majority of verbs are formed with **avoir**. Reflexive (pronominal) verbs (see 47), some intransitive verbs (see 49.2), and the passive (see 48) are formed with **être**.

35.1 avoir + past participle

the perfect tense

j'ai donné

I gave, I have given, I
have been giving

the future perfect tense

j'aurai donné

I shall have given

the pluperfect tense

j'avais donné

I had given, gave

the past anterior tense

j'eus donné

I had given, gave

35.2

The past participle in the compound tenses formed with **avoir** agrees with a preceding direct object in gender and number. The preceding direct object may be personal pronoun (see 19), a relative pronoun: **que/qui, lequel** (see 22); the interrogative adjective: **quel?** (see 23.6); or **combien de?** (see 23.7).

Je les ai vu(e)s.

I have seen them.

J'ai vu l'étudiante que vous avez mentionnée.

I have seen the student you mentioned.

Je ne sais pas laquelle des voitures il a achetée.

I don't know which of the cars he bought.

Quels conseils lui avez-vous donnés?

What advice did you give him/her?

Combien de lettres as-tu écrites?

How many letters did you write?

The past participle *never* agrees with **en**:

On disait que trente jeunes filles attendaient à la porte mais je n'en ai vu que dix.

They said that thirty girls were waiting at the door, but I only saw ten.

35.3

être + past participle

the perfect tense	je suis allé(e)	I went, have gone
the future perfect tense	je serai allé(e)	I shall have gone
the pluperfect tense	j'étais allé(e)	I had gone, went
the past anterior tense	je fus allé(e)	I had gone, went

The past participle in the compound tenses formed with **être** agrees with the **subject** in gender and number.

je suis allé, allée

tu es allé, allée

il est allé

elle est allée

nous sommes allés, allées

vous êtes allé, allés, allée, allées

ils sont allés

elles sont allées

36 How the perfect is used

The perfect tense is the most widely used of all the past tenses, in spoken, written, formal and informal contexts. It is used to express:

- completed actions or events, without any implication of duration:

J'ai vu le film. I saw the film.

Frequently a precise time is given:

Elle est arrivée à six heures. She arrived at six o'clock.

- a series of completed actions or events:

Il a voulu aller en vacances. Il a consulté une carte. Il a loué une voiture. Il est parti hier.

He wanted to go on holiday. He looked at a map. He hired a car.
He left yesterday.

Adverbs such as **d'abord**, **puis**, **ensuite**, **enfin** may be added to make it clear that one action or event follows another.

D'abord elle s'est levée, puis elle s'est lavée, ensuite elle s'est peignée, et enfin elle est sortie.

First she got up, then she got washed, then she combed her hair, and finally she went out.

Examples of the perfect in a formal context:

L'engagement du Ministre a alimenté l'opposition des Américains.
(Le Monde 23.3.95)

The Minister's commitment increased the Americans' opposition.

Dans le récent entretien qu'il a accordé au 'Monde' (18.3.95) Boris Eltsine a réaffirmé son opposition à une extension immédiate de l'OTAN.

(Le Monde 23.3.95)

In the recent interview with 'Le Monde', Boris Yeltsin reaffirmed his opposition to an immediate enlargement of NATO.

and in an informal context:

Tu vas faire tes devoirs maintenant! — Mais je les ai faits!
You're going to do your homework now! — But I've done it!

The action or event may be related to the present, but this is not always the case. Note how remote some of the following events are:

J'ai mangé, on peut sortir si tu veux.
I've had something to eat. We can go out, if you like.

In the following example the imperfect describes the background and the perfect expresses an event which cuts across the background. The adverbial indicates the suddenness of the event.

We got up early this morning. The weather was lovely and we left for a day in the country.
Nous nous sommes levé(e)s tôt ce matin. Il faisait beau et nous sommes partis(e)s passer la journée à la campagne.

The perfect is often found in close proximity to the imperfect. When this occurs, the perfect is expressing an action or event, the imperfect is describing the background, and/or giving an explanation (see 33.1).

We listened to the weather forecast every morning.
Nous avons écouté le bulletin météorologique tous les matins.

Cette phrase² je l'ai répétée cinquante fois!

That phrase? I've repeated it fifty times!

- the actions were completed in the past but were clearly repeated several times:
*I can smell it! It's awful! You've been smoking!
Je le sens! C'est affreux! Tu as fumé.*

the speaker feels the effects of the action as he/she is speaking. The context suggests a relation of cause and effect between the two actions. Note the English uses the past - probably of some duration - was completed in the past, but the action - probably of some duration - was completed in the present tense form:

We've shut (We shut) the windows.
On a fermé les fenêtres.

- the action is completed and in the past, but one could take it that the perfect:
In the following examples note how the context creates additional meanings for windows are still shut:
Le Général de Gaulle est né en 1890.

General de Gaulle was born in 1890.

Le Général de Gaulle est né en 1890.

She died fifty years ago.

Belle est morte il y a cinquante ans.

They saw the film a month ago.

Il s'est vu le film il y a un mois.

I saw the film this afternoon.

J'ai vu le film cet après-midi.

Il regardait passer toutes les voitures et tout à coup il a compris pourquoi ses amis préfèrent la bicyclette.

He was watching all the cars going past and suddenly he understood why his friends prefer to go by bike.

The immediate past is often expressed in French by **venir de** + infinitive (see 31.7, 33.1) where English has the perfect or pluperfect:

Je viens de le lui dire.

I've just told him/her.

Elle venait de partir.

She'd just left.

The perfect may be used to express a completed action or event in the near future. An adverbial would be required to confirm the future meaning.

J'ai fini dans une demi-heure.

I'll have finished in half an hour.

37 How the future perfect is used

The future perfect always refers to an action or event which takes place in the future. The tense may occur in a main clause or in a dependent clause. It is used

- in *main* clauses to express a completed action or event:

Elle aura bientôt fini.

She'll have finished soon.

Nous serons parti(e)s à cette heure-là.

We'll have left at/by that time.

Dans deux semaines ils auront terminé leurs études.

In two weeks they'll have finished their studies.

- in *dependent* clauses, which are always introduced by conjunctions such as **dès que, aussitôt que; quand, lorsque; après que**, or by a relative pronoun, to express completion of an action or event *before* another action or event in the future. The verb in the main clause is usually in a future tense (see 32.6):

Dès que nous aurons mangé nous irons les chercher.

As soon as we've eaten we'll go and look for them.

Elle pourra le faire quand tu auras tout expliqué.

She will be able to do it when you have explained everything.

Je te prêterai le livre que j'aurai lu avant la fin de la semaine.

I'll lend you the book which I'll have read before the end of the week.

Note the English equivalent of the future perfect:

dès que nous aurons mangé as soon as we *have eaten*
quand tu auras expliqué when you *have explained*
que j'aurai lu which I'll *have read*

- to express conjecture, supposition or possibility – just like the future tense (see 32.5):

Sa mère lui aura dit que nous sommes là.
 His mother will (probably) have told him that we are here.

Ils ne sont pas arrivés! Ils auront manqué le train.
 They haven't arrived! They (must) have missed the train.

- to express a mild imperative or warning:

Tu auras rangé ta chambre cet après-midi!
 You'll tidy your room this afternoon!

38 How the pluperfect is used

The pluperfect always refers to an action or event which takes place in the past. It may occur in a main clause or in a dependent clause. In both types of clause it expresses, or suggests, completion of an action or event *before* another event.

- in *main* clauses:

Elle avait terminé ses études.
 She had finished her studies.

Nous avions parlé au président avant sa démission.
 We had spoken/spoke to the president before he resigned.

Tu étais entré(e) au moment où elle commençait à chanter.
 You had (just) entered/entered at the moment she began to sing.

Note the English equivalent of the pluperfect:

avait terminé	had finished
avions parlé	had spoken/spoke
étais entré(e)	had entered/entered

- in *dependent* clauses, where it is frequently accompanied by a perfect or imperfect in the main clause. The dependent clause, containing the pluperfect, is always introduced by a conjunction such as **puisque; après que; depuis que; quand, lorsque; parce que** or by a relative pronoun.

C'était sans espoir puisqu'il n'avait pas eu le courage de poser la question.
 It was hopeless because he hadn't had the courage to ask the question.

Après qu'elle avait écrit sa lettre de démission, elle était tombée malade.

After she wrote her letter of resignation, she fell ill.

J'ai dépensé tout l'argent que j'avais reçu de mon père avant son départ.

I have spent all the money I received from my father before he left.

In the following example the pluperfect conveys a sense of diffidence or politeness or discretion. It may even imply mild criticism – just as it can in English, with the appropriate stress on the auxiliary verb:

Il était venu t'inviter dîner ce soir.

He *had* come to invite you to dinner tonight.

The pluperfect is also used to express a condition (see 40.2), but in this case the condition is unfulfilled – the action or event never took place:

On lui aurait donné l'argent dont il avait besoin, s'il l'avait demandé.

We would have given him the money if he had asked for it.

The pluperfect is used in indirect (or reported) speech if the verb in the main clause refers to an action or event in past time.

Ma mère ne savait pas/n'a pas su/n'avait jamais su quand nous étions rentré(e)s.

My mother didn't know/never knew when we got home.

39 How the past anterior is used

The past anterior belongs essentially to written, formal French. It can occur in a main clause or a dependent clause.

- when it is used in a *main* clause it is accompanied by an adverb of time and it usually indicates that the action or event is sudden or rapid. Verbs in other main tenses in the text will be in the past historic. The English equivalent is 'had' + past participle, or simply the past tense.

Il eut bientôt trop bu. On lui donna à manger.

He'd soon had too much to drink. We gave him something to eat.

A peine fut-elle arrivée qu'il commença à chanter la Marseillaise.

She had scarcely arrived when he began to sing the Marseillaise.

- in a *dependent* clause, the past anterior is *always* introduced by one of the following conjunctions: *après que*; *quand*, *lorsque*; *aussitôt que*, *dès que*; *à peine*, and the main verb is *always* in the past historic.

Il rougit dès qu'il eut dit le mot.

As soon as he had said/said the word, he blushed.

If the main verb is *not* in the past historic, the past anterior is *not* used.

Il a rougi dès qu'il a dit le mot.

40 The conditional and the conditional perfect

The conditional tense is composed of the stem of the future (see 32) + the endings of the imperfect: -ais, -ais, -ait, -ions, -iez, -aient.

donner:

je	donnerais	I would give	nous	donnerions
tu	donnerais		vous	donneriez
il/elle	donnerait		ils/elles	donneraient

finir:

je	finirais	I would finish	nous	finirions
tu	finirais		vous	finiriez
il/elle	finirait		ils/elles	finiraient

vendre:

je	vendrais	I would sell	nous	vendrions
tu	vendrais		vous	vendriez
il/elle	vendrait		ils/elles	vendraient

The conditional perfect is composed of the conditional of avoir or être + past participle:

avoir: *j'aurais, tu aurais, il/elle aurait, nous aurions, vous auriez, ils/elles auraient*

être: *je serais, tu serais, il/elle serait, nous serions, vous seriez, ils/elles seraient*

j'aurais donné I would have given
je serais allé(e) I would have gone

How the conditional and the conditional perfect are used

The conditional has three main functions. It is used to express time, mood and conditions. In an indirect (or reported) context, when the verb in the main

clause is in one of the past tenses, the conditional is used in the dependent clause to refer to a future action or event in the context of past time (see 57.5c, 58.b).

Elle m'a dit qu'elle me verrait tout à l'heure. ('Je te verrai...')
She said she would see me soon. ('I'll see you...')

Il m'écrivait qu'il n'arriverait pas avant la fin du mois.
He wrote (to say) that he would not be here before the end of the month.

Je savais qu'il pleurrait.
I knew it would rain.

The conditional perfect normally implies that the action or event is complete before another action or event:

Pierre a promis qu'il l'aurait terminé quand nous serions rentré(e)s.

Peter promised (that) he would have finished before we got back.

Le professeur a dit qu'il aurait rendu les copies avant les vacances.
The teacher said he would return the papers before the holidays.

Je savais qu'il n'aurait toujours pas reçu ta lettre.
I knew he would still not have received your letter.

The conditional and the conditional perfect often occur in dependent clauses introduced by **dès que, aussitôt que; quand, lorsque** (see 37). The main verb is in one of the past tenses. Note the tense in the English translation:

Il répondait que dès qu'il aurait assez d'argent il irait voir le film.
He replied that as soon as he had enough money he would go to see the film.

Je lui ai demandé d'allumer la télévision quand elle aurait fini ses devoirs.

I asked her to put on the television when she had finished her homework.

The conditional and the conditional perfect with **si** meaning 'if'.

There is a sequence of tenses which has to be used when conditions are expressed in French. The sequence is the same as the sequence of tenses in English conditional tenses. The dependent **si** clause can precede or follow the main clause.

Dependent verb		Main verb
si + present		future or imperative
S'il fait beau demain	–	j'irai à la plage.
If it's fine tomorrow	–	I'll go to the beach.
Si tu sors	–	branche le répondeur téléphonique.
If you go out	–	switch on the answering machine.
si + imperfect		conditional
Si vous aviez de l'argent	–	vous pourriez partir en vacances.
If you had some money	–	you could go on holiday.

In the following sequence, the action or event expressed in the conditional clause never actually took place – the condition was unfulfilled:

si + pluperfect		conditional perfect
Si mon réveil avait sonné	–	je serais arrivé(e) à temps.
If my alarm had rung	–	I would have arrived in time.

The following examples show how the order of the clauses in conditional sentences can be changed round:

Si tu n'avais pas donné la tarte aux cerises à ton frère ta sœur l'aurait mangée.

If you hadn't given the cherry tart to your brother your sister would have eaten it.

Ta sœur aurait mangé la tarte aux cerises si tu ne l'avais pas donnée à ton frère.

Your sister would have eaten the cherry tart if you hadn't given it to your brother.

When there is more than one condition in a sentence, **si** is used with the appropriate sequence of tenses for the first condition. For subsequent conditions **si** is replaced by **que** + subjunctive.

Si vous avez assez d'argent et que vous fassiez des économies, vous pourrez partir en vacances.

If you have enough money and you save a bit, you can go on holiday.

40.4

The conditional is used – especially with **aimer**, **préférer**, **devoir**, **pouvoir**, and **vouloir**:

- to express politeness:

Elle a très chaud, pourrais-tu ouvrir la fenêtre?
She is very hot, could you open the window.

Vous devriez lui dire merci.
You should say thank you to him/her.

Il voudrait un billet aller et retour Paris-Londres.
He'd like a return ticket Paris-London.

- to express a wish or desire to do something:

J'aimerais visiter les musées de Paris.
I'd like to visit the museums in Paris.

40.5

The conditional perfect is used with **aimer**, **préférer**, **devoir**, **pouvoir** and **vouloir**:

- to express regret:

Il aurait bien aimé voir la peinture de Picasso mais l'exposition s'est terminée la semaine dernière.
He would have liked to see the Picasso but the exhibition ended last week.

Le snack-bar est fermé. J'aurais bien voulu t'offrir un café.
The snack-bar's shut. I'd have liked to buy you a coffee.

40.6

The conditional and the conditional perfect are used:

- to give information that is doubtful, unconfirmed or alleged – especially in the media:

Est-ce vrai qu'il n'y aurait pas de réunion demain matin?
Is it true there won't be a meeting tomorrow morning?

L'accident ferroviaire d'hier aurait fait trente-trois victimes.
Thirty-three people are feared dead in yesterday's rail crash.

- to imply conjecture, supposition or probability (see 32.5, 37):

On dirait qu'il va pleuvoir.
You'd think it was going to rain.

Selon elle une foule énorme devrait attendre l'arrivée du Président.

According to her a huge crowd was waiting for the President to arrive.

Il n'est toujours pas là. Il aurait manqué l'autobus?
He's still not here. Could he have missed the bus?

Tu vas être en retard; tu *aurais dû* prendre un taxi.

You are going to be late. You should have taken a taxi.

41 The subjunctive

The essential difference between the indicative and the subjunctive has to do with meaning: whereas the indicative refers to actions and events in past, present or future time (see 31), the subjunctive is used to express feelings, possibilities, doubts, wishes, orders, etc. In other words, the subjunctive is used when an action or event is not a fact – or not *yet* a fact, or when there is some sort of doubt or reservation about a possible action or event.

The subjunctive is sometimes used as a main verb, but it usually occurs in dependent clauses following verbs such as *avoir peur que* ‘to fear’, *croire que* ‘to think’, *vouloir que* ‘to want, wish’ or conjunctions such as *avant que* ‘before’, *pourvu que* ‘provided that’, *supposé que* ‘supposing/assuming that’.

The subjunctive is not frequently used in English today, and translations of the French subjunctive tenses may be indistinguishable from the indicative tenses. However, sometimes it is appropriate to include ‘may, might, should ...’ in English translations.

41.1

The subjunctive tenses

There are four subjunctive tenses:

Simple tenses

present (*subjonctif présent*)

(see 42)

imperfect (*subjonctif*

imparfait) (see 43)

Compound tenses

perfect (*subjonctif passé*)

(see 44)

pluperfect (*subjonctif*

plus-que-parfait) (see 45)

42 The present subjunctive

The present subjunctive of most verbs is composed of the stem of the third person plural of the present indicative + the endings -e, -es, -e, -ions, -iez, -ent.

donner: que je *donne*, que tu *donnes*, qu'il/elle *donne*, que nous *donnions*, que vous *donniez*, qu'ils/elles *donnent*

finir: que je *finisse*, que tu *finisses*, qu'il/elle *finisse*, que nous *finissions*, que vous *finissiez*, qu'ils/elles *finissent*

vendre: que je *vende*, que tu *vendes*, qu'il/elle *vende*, que nous *vendions*, que vous *vendiez*, qu'ils/elles *vendent*

42.1

Some of the endings of the present subjunctive are the same as certain endings in indicative tenses:

- some verbs have the same forms for *all the singular* and the *third person plural* of the present indicative and the present subjunctive:

donner:

present indicative	je tu il/elle ils/elles	<i>donne</i> <i>donnes</i> <i>donne</i> <i>donnent</i>	present subjunctive	que je que tu qu'il/elle qu'ils/elles	<i>donne</i> <i>donnes</i> <i>donne</i> <i>donnent</i>
-----------------------	----------------------------------	---	------------------------	--	---

- some verbs have the same forms for the *third person plural* of the present indicative and the present subjunctive, for example:

finir:	ils/elles <i>finissent</i>	qu'ils/elles <i>finissent</i>
mettre:	ils/elles <i>mettent</i>	qu'ils/elles <i>mettent</i>
recevoir:	ils/elles <i>reçoivent</i>	qu'ils/elles <i>reçoivent</i>
venir:	ils/elles <i>vienennent</i>	qu'ils/elles <i>vienennent</i>

- most verbs have the same forms for the *first* and *second persons plural* of the imperfect indicative and the present subjunctive:

donner:	nous <i>donnions</i>	que nous <i>donnions</i>	vous <i>donniez</i>	que vous <i>donniez</i>
finir:	nous <i>finissions</i>	que nous <i>finissions</i>	vous <i>finissiez</i>	que vous <i>finissiez</i>
vendre:	nous <i>vendions</i>	que nous <i>vendions</i>	vous <i>vendiez</i>	que vous <i>vendiez</i>

The exceptions to this are *avoir*, *être*, *faire*, *pouvoir* and *savoir*:

avoir:	nous <i>avions</i>	que nous <i>ayons</i>	vous <i>aviez</i>	que vous <i>ayez</i>
être:	nous <i>étions</i>	que nous <i>soyons</i>	vous <i>étiez</i>	que vous <i>soyez</i>
faire:	nous <i>faisions</i>	que nous <i>fassions</i>	vous <i>faisiez</i>	que vous <i>fassiez</i>
pouvoir:	nous <i>pouvions</i>	que nous <i>puissions</i>	vous <i>pouviez</i>	que vous <i>puissiez</i>
savoir:	nous <i>savions</i>	que nous <i>sachions</i>	vous <i>saviez</i>	que vous <i>sachiez</i>

Verbs which have stem changes in the present indicative (see 31.2, 31.5, 31.6), have similar changes in the present subjunctive:

boire: que je *boive*, que tu *boives*, qu'il/elle *boive*, qu'ils/elles *boivent* – que nous *buvions*, que vous *buviez*

devoir: que je *doive*, que tu *doives*, qu'il/elle *doive*, qu'ils/elles *doivent* – que nous *devions*, que vous *deviez*
prendre: que je *prenne*, que tu *prennes*, qu'il/elle *prenne*, qu'ils/elles *prennent* – que nous *prenions*, que vous *preniez*
venir: que je *vienne*, que tu *viennes*, qu'il/elle *vienne*, qu'ils/elles *viennent* – que nous *venions*, que vous *veniez*

42.3

There is a small, but important, group of irregular verbs in which the present subjunctive has a completely different form from the present indicative:

faire: que je *fasse*, que tu *fasses*, qu'il/elle *fasse*, que nous *fassions*, que vous *fassiez*, qu'ils/elles *fassent*
pouvoir: que je *puisse*, que tu *puisses*, qu'il/elle *puisse*, que nous *puissions*, que vous *puissiez*, qu'ils/elles *puissent*
savoir: que je *sache*, que tu *saches*, qu'il/elle *sache*, que nous *sachions*, que vous *sachiez*, qu'ils/elles *sachent*
falloir: qu'il *faille*

42.4

A few verbs not only have a different form from the present indicative – they also have changes in the first and second persons plural:

aller: que *j'aille*, que tu *ailles*, qu'il/elle *aille*, qu'ils/elles *aillent* – que nous *allions*, que vous *alliez*
avoir: que *j'aie*, que tu *aies*, qu'il/elle *ait*, qu'ils/elles *aient* – que nous *ayons*, que vous *ayez*
être: que je *sois*, que tu *sois*, qu'il/elle *soit*, qu'ils/elles *soient* – que nous *soyons*, que vous *soyez*
vouloir: que je *veuille*, que tu *veuilles*, qu'il/elle *veuille*, qu'ils/elles *veuillent* – que nous *voulions*, que vous *voulez*

43

The imperfect subjunctive

The imperfect subjunctive is composed of the stem of the second person singular of the past historic minus the s + the endings -sse, -sses, -ât/-ît/-ût, -ssions, -ssiez, -ssent. The imperfect subjunctive keeps the vowel (a, i, u) of the past historic. The third persons singular and plural are the ones you are most likely to meet, so they are the forms given below.

donner: qu'il/elle *donnât*, qu'ils/elles *donnassent*
finir: qu'il/elle *finît*, qu'ils/elles *finissent*
vendre: qu'il/elle *vendît*, qu'ils/elles *vendissent*

There is a small group of verbs which keep the u of the past historic – most of the -oir verbs, including the **devoir** group, and a few -re verbs such as **boire**, **connaître**, **lire**.

recevoir: qu'il/elle *reçût*, qu'ils/elles *reçussent*
 devoir: qu'il/elle *dût*, qu'ils/elles *dussent*

Avoir and être also keep the u of their past historic form:

avoir: qu'il/elle *eût*, qu'ils/elles *eussent*
 être: qu'il/elle *fût*, qu'ils/elles *fussent*

44 The perfect subjunctive

The perfect subjunctive is composed of the present subjunctive of avoir or être + past participle.

donner: que j'ais donné
 finir: que j'ais fini
 vendre: que j'ais vendu

venir: que je sois venu(e)
 arriver: que je sois arrivé(e)
 se reposer: que je me sois reposé(e)

45 The pluperfect subjunctive

The pluperfect subjunctive is composed of the imperfect subjunctive of avoir or être + past participle.

donner: que j'eusse donné
 finir: que j'eusse fini
 vendre: que j'eusse vendu

venir: que je fusse venu(e)
 arriver: que je fusse arrivé(e)
 se reposer: que je me fusse reposé(e)

46 Sequence of tenses; uses of the subjunctive

There are rules governing the sequence of tenses used in the main clause and a dependent clause, when the main verb is in the indicative and the dependent verb is in the subjunctive.

Main clause (indicative)

present	J'attends
future	J'attendrai
future perfect	J'aurai attendu
perfect	J'ai attendu
imperative	Attends

Dependent clause (subjunctive)

either the present *qu'il finisse*
 or the perfect *qu'il ait fini*

imperfect	J'attendais	either the imperfect or the pluperfect	qu'il finit qu'il eût fini
past historic	J'attendis		
pluperfect	J'avais attendu		
conditional	J'attendrais		
conditional perfect	J'aurais attendu		

There is a tendency in contemporary French to avoid using the imperfect and pluperfect tenses of the subjunctive – frequently because the forms are difficult. The present and the perfect tenses take their place in written, spoken, and informal French. In formal written French and in *very* formal spoken French the imperfect and the pluperfect subjunctive still occur.

A guideline for the sequence of tenses in contemporary French: whether the tense of the main verb is present, future or past, use the present or perfect subjunctive in the dependent clause. Reference to present, future or past actions or events will help in deciding whether to use the present subjunctive (actions and events in the present or future), or the perfect subjunctive (actions and events in the past).

Elle veut que tu partes.

She wants you to go.

Elle voulait que tu sois couché(e) à 9 heures.

She wanted you to be in bed by 9 o'clock.

46.1

The subjunctive in main clauses

The subjunctive may occur in main clauses – frequently in exclamations, and usually in the third person singular or plural.

- to express a wish or desire that an action or event should happen:

(Que) Viennent les vacances! (note the inversion)

I wish it were (was) the holidays!

Pourvu qu'il fasse beau demain!

I hope it's fine tomorrow!

- as a form of imperative, or of encouragement, usually following **que**:

Qu'elles viennent à mon bureau!

Tell them to come to my office!

Que ces idées te soutiennent!

I hope these ideas help you!

- to express indignation, following **que**:

Que je t'offre un cadeau? Jamais de la vie!

Me give you a present? Not likely!

- to express possibility, or assumption. The subjunctive may follow **que**, and inversion may occur:

Qu'elle répondre et nous verrons bien si elle a appris sa leçon!
 Let her answer and we'll see if she has learned the lesson!

Soit un triangle ABC...

Let ABC be a triangle ...

Soit les deux hypothèses suivantes ...

Given the two hypotheses which follow ...

- to express concession, or admit a possibility (note the use of the third person singular of the imperfect subjunctive of *être*):

Fût-ce pour les encourager un peu!

If only to give them a little encouragement!

On a constaté les signes d'un changement, fût-ce d'un changement progressif!

There have been signs of change, even if it's only gradual!

- in certain idiomatic expressions:

Que Dieu te bénisse!

May God bless you!

Sauve qui peut!

Run for your life!/Every man for himself!

Vive la République!

Long live France!

- in the small group of expressions which indicate that it does not really matter which person, thing, place, cause or method is involved 'whoever, whatever, wherever ...' (see 18.13):

qui que tu sois ...

whoever you may be ...

quoi qui vous arrive ...

whatever happens to you ...

(subject pronoun)

quoi qu'elle veuille ... (object
pronoun)

whatever she wants ...

où qu'ils aillent ...

wherever they (may) go ...

quels que soient les prix ...
(adjective)

whatever the prices ...

The subjunctive in dependent clauses

The subjunctive *has to be used* following certain verbs or conjunctions (see 46.4). The lists which follow give the most common of the verbs and conjunctions which introduce the subjunctive: the lists are *not* exhaustive. One or two of the verbs may also be followed by an indicative, depending on the meaning, for example:

dire que 'to say' + indicative **but dire que** 'to tell someone to do something' + subjunctive

The subjunctive may also be used without any introductory verb or conjunction when a speaker or writer wants to suggest that he/she has some doubt or uncertainty about something (see 46.3).

46.3

The subjunctive must be used following verbs or verb phrases expressing

- doubt, uncertainty, possibility:

douter que

to doubt (that)

il est douteux que	it's doubtful (that)
il est improbable que	it's unlikely (that)
il est peu probable que	it's unlikely (that)
il est impossible que	it's impossible (that)
il est peu sûr que	it's not certain (that)
il est incertain que	it's not certain (that)

Il est peu probable qu'elle le sache.

It's unlikely that she knows.

Note that **ne pas douter que** means 'to have *no* doubt that' and is followed by the indicative:

Je doute que vous ayez raison.

I don't think you are right.

Je ne doute pas que vous avez raison.

I have no doubt that you're right.

Expressions such as **il est possible que/il se peut que** 'it is possible', **il semble que** 'it seems' are followed by the indicative or the subjunctive depending upon whether the speaker or writer feels certainty (indicative) or doubt (subjunctive) about what is said or written. When the expressions are interrogative or negative they are followed by the subjunctive. **Croire** and **penser** are also followed by the subjunctive if they are interrogative or negative. Today, however, this rule is not always observed, as in the fifth example below.

Il est possible qu'elle viendra.

It's possible (very likely) that she'll come.

Il est possible qu'elle vienne.

It's possible (not really likely) that she'll come.

Est-il possible qu'elle vienne?

Is it possible that she'll come?

Il n'est pas possible qu'elle vienne.

It is not possible that she'll come.

Je ne crois pas qu'elle sera là demain.

I don't think she'll be here tomorrow.

- necessity, obligation, restriction, advantage:

il faut que	necessary
il est utile que	worth it
il est essentiel que	essential
il convient que	should be
il importe que	important
il vaut mieux que	be better
Il faudra que tu sois là à midi.	You must be there at noon.
Il vaut mieux que tu y ailles.	You'd better go.

- wanting, wishing, agreeing, accepting:

vouloir que want	préférer que	permettre que
	prefer	allow
exiger que demand	éviter que + ne	s'attendre à ce que
	avoid	expect
tenir à ce que insist	ordonner que	dire que order
	order	

Que veux-tu que je fasse?

What do you want me to do?

(and note the very informal way of saying the same thing: **Qu'est-c' tu veux que j'y fasse?**)

Je ne supporte pas que tu me répondes comme ça!
I will not stand for you answering me like that!

- feelings, emotions, attitudes (whenever they carry an element of doubt). Note the expletive **ne** in certain cases (see 54.23):

croire que + ne believe	être content que pleased
avoir peur que + ne fear	être ravi que delighted
redouter que (+ ne) fear	être étonné que astonished
regretter que (+ ne) regret	être désolé que upset
se réjouir que be delighted	être satisfait que satisfied
s'étonner que be astonished	c'est dommage que it's a pity

J'ai peur qu'il ne soit en retard.

I'm afraid he may be late.

C'est dommage qu'elles ne puissent pas t'accompagner.

It's a pity they can't go with you.

46.4

The subjunctive must be used following conjunctions expressing

- time:

avant que (+ ne)	before
en attendant que	while
jusqu'à ce que	until

Il faut partir avant qu'il (ne) fasse nuit.

We must leave before it gets dark.

Elle est restée jusqu'à ce que l'enfant soit endormi(e).

She stayed until the child was asleep.

Note that in informal French, the subjunctive sometimes occurs following **après que** when the conjunction refers to an action or event in the past (see 39). This probably happens because the speaker or writer is associating **après que** with the rule for **avant que**.

Après qu'elle ait/ a annoncé les résultats nous sommes allé(e)s prendre un petit verre.

After she announced the results we went for a quick drink.

- concession:

bien que/quoique/malgré	although, even though
que/encore que	
quoi que (see 18.13)	whatever
quel que (usually with être)	whatever

and the adverbs **si/quelque/pour + adjective + que** 'however' + adjective:

Bien que je le sache, je n'arrive pas à y croire.

Although I know it, I can't believe it.

Quoi que tu fasses, tu ne vas pas changer sa décision.

Whatever you do, you won't change his/her mind.

Quelles que soient leurs raisons, ils n'auraient pas dû dire cela.

Whatever their reasons, they shouldn't have said that.

Si dur qu'elle travaille, elle ne réussit jamais.

However hard she works, she doesn't succeed.

- hypothesis, introduced by **que** and frequently followed by an alternative such as **ou non** 'or not':

Qu'il aille (ou non) avec moi, je vais au match.

Whether he goes with me or not, I'm going to the match.

- condition:

pourvu que/à condition que	provided that
supposé que	assuming that
à moins que + ne	unless

Ils t'aideront à condition que tu ne dises rien à tes amis.

They'll help you provided (that) you say nothing to your friends.

- aim/intended result; result/consequence:

pour que/afin que	in order to
trop/assez + adjective + pour que	too + adjective + to
de peur que + ne/de crainte que + ne	for fear that, so that... not
éviter que + ne	to avoid (something happening)
sans que	without

Les enfants sont assez grand(e)s pour qu'on puisse les laisser seul(e)s.

The children are old enough to be left on their own.

De crainte que vous ne manquiez l'avion, je vous ai réservé un taxi.
So that you don't miss the plane, I've called you a taxi.

Elles sont parties sans que leurs parents les aient entendues.
They left without their parents hearing them.

and some expressions such as **l'intention est que** 'the intention is to', **le fait que** 'the fact that'...:

L'intention est qu'il puisse travailler chez lui.

The intention is that he should be able to work at home.

Sometimes (especially in spoken and informal French, and usually following an imperative) **que** alone is enough to express an intended result:

Approchez que je vous voie!

Come closer so that I can see you!

Note the conjunction **au point que** 'to the extent that' which is followed by the subjunctive when it is used to express (unfulfilled) result, provided the main verb is negative or interrogative:

Ces paquets ne sont pas lourds au point que nous devions les porter à trois.

These parcels are not so heavy that it will need three of us to carry them.

And there are three conjunctions which are followed by the subjunctive or the indicative depending upon whether the aim was only intended, or hoped for, or merely a possibility (+ subjunctive), or whether in fact the result or consequence actually occurred (+ indicative).

de sorte que/de manière so that
que/de façon que

Lève-toi de façon que tu puisses voir le défilé.

Stand up so that (hopefully) you can see the procession.

Lève-toi de façon à voir le défilé. (same subject in both clauses, so use **à** + the infinitive)

Stand up and you'll (definitely) be able to see the procession.

Finally, there is the expression **non (pas) que** 'not that' which is used to deny, or dismiss, a cause or reason. The following clause frequently provides the real cause. In the example, note how the consequence precedes the cause:

Elle ne va pas venir. Non qu'elle n'en ait pas envie, mais elle sera à l'étranger.

She isn't coming. Not that she doesn't want to, but she'll be abroad.

● place:

où que	wherever
d'où que	from where
jusqu'où	how far

Où qu'elle aille, j'irai aussi.

Wherever she goes, I'll go too.

The subjunctive or indicative in a relative clause

The choice of subjunctive or indicative in a relative clause depends upon whether the information in the clause is merely a possibility (subjunctive), or whether it is a reality (indicative).

Je veux vivre dans un pays arabe qui aille avec mon prénom, ma couleur de peau, ma culture.

(*The Guardian* 16.2.95)

I want to live in an Arab country which suits my name, the colour of my skin, and my culture. (But *is there* such a country?)

Je veux vivre dans un pays arabe qui va avec mon prénom, ma couleur de peau, ma culture.

I want to live in an Arab country which suits my name ... (And there *is one!*)

Elle cherche une maison *qui soit* plus petite.

She is looking for a smaller house. (There *might* be one.)

Elle cherche une maison *qui est* plus petite.

She is looking for a smaller house. (And there *are* some on the market.)

And only the subjunctive is used following some negative clauses such as:

il n'y a rien qui

there is nothing that

il n'y a personne qui

there is nobody who

il n'y a aucun homme/livre

there isn't a man/book that

qui

Il n'y a rien qui puisse m'aider.

There is nothing that can help me.

46.6

The subjunctive following superlative adjectives and expressions such as:

premier/dernier

first/last

le meilleur/le pire

the best/worst

le plus grand/le moins grand

bigger or the biggest/smaller
or the smallest

seul

only

ne ... personne/ne ...

nobody/never/not one

jamais/ne ... aucun

These expressions are usually followed by a relative pronoun: **qui, que, dont**.

C'est/Ce sont les derniers qui aient répondu.

They were the last people who replied.

C'est la meilleure histoire que j'ai jamais entendue.

It's the best story I've ever heard.

Il est le seul élève qui ait compris la question.

He is the only pupil who understood the question.

Elle ne connaît personne qui soit aussi jolie qu'elle.

She doesn't know anyone as pretty as she is.

Note that the expressions **la première/dernière fois** 'the first/last time' are adverbial phrases and do not influence the use of the indicative or the subjunctive.

46.7

Ways of avoiding the subjunctive

It is sometimes possible to avoid the subjunctive. This usually depends upon the availability of alternative constructions following verbs and conjunctions, and on the main and dependent clauses having the *same* subject. Some examples:

● verbs and impersonal verbs:

avoir peur de + infinitive	instead of	avoir peur que + ne + subjunctive
éviter de + infinitive	instead of	éviter que + ne + subjunctive
vouloir + infinitive	instead of	vouloir que + subjunctive
il faut + infinitive	instead of	il faut que + subjunctive
il est possible de + infinitive	instead of	il est possible que + subjunctive
il convient de + infinitive	instead of	il convient que + subjunctive

● conjunctions:

sans + infinitive	instead of	sans que + subjunctive
pour + infinitive	instead of	pour que + subjunctive
avant de + infinitive	instead of	avant que (+ ne) subjunctive
afin de + indicative	instead of	afin que + subjunctive
à moins de + infinitive	instead of	à moins que + ne + subjunctive
de peur de + infinitive	instead of	de peur que + ne + subjunctive
de manière à + infinitive	instead of	de manière que + subjunctive
de façon à + infinitive	instead of	de façon que + subjunctive

Some conjunctions may also be used as prepositions and introduce nouns:

avant son arrivée, il/elle ... malgré leur départ, ils/elles ... jusqu'à ton retour, tu ...

Reflexive verbs (also called pronominal verbs) are verbs which are preceded by reflexive object pronouns: **me, te, se, nous, vous, se** (see 20). With the infinitive and with participles the reflexive pronoun used is always the one which corresponds to the subject of the clause or sentence. The position of the reflexive pronouns follows the same rules as those for other object pronouns (see 21.3). For past participle agreement see 49.3.

Je vais me reposer un peu.

I'm going to rest for a bit.

47.1

Tenses of reflexive verbs

(In the following examples only the masculine singular of the past participle is given.)

Infinitive

Present	se reposer 'to rest'	Perfect	s'être reposé 'to have rested'
---------	-----------------------------	---------	---------------------------------------

Indicative

Present	je me repose	Perfect	je me suis reposé
Future	je me reposeraï	Future perfect	je me serai reposé
Imperfect	je me reposais	Pluperfect	je m'étais reposé
Past historic	je me reposai	Past anterior	je me fus reposé
Conditional	je me reposerais	Conditional perfect	je me serais reposé

Subjunctive

Present	que je me repose	Perfect	que je me sois reposé
Imperfect	que je me reposasse	Pluperfect	que je me fusse reposé

47.2

How reflexive verbs are used

Some verbs are genuinely reflexive – their action *reflects back* to the subject. In the following example, in French *and* in English, the transitive verb **couper** 'to cut' is used reflexively:

Elle s'est coupée. She cut herself.

Remember that there is *no* agreement of the past participle when a reflexive verb is used with a part of the body (see 9.4b, 49.3).

Elle s'est lavé les cheveux. She washed her hair.

47.3

Some transitive verbs are used reflexively when the action they refer to is in fact reflexive. The corresponding English verb is *not* necessarily reflexive.

laver to wash **se laver** to get washed/wash

Il lave la vaisselle.

He is washing the dishes.

Il se lave avant de se coucher.

He gets washed before he goes to bed.

Examples of verbs which can be transitive or reflexive in French, but only transitive or intransitive in English.

coucher	to put (someone) to bed	se coucher	to go to bed
habiller	to dress (someone)	s'habiller	to get dressed/dress
promener	to take (someone/something) for a walk	se promener	to go for a walk

47.4

Some verbs are always reflexive in French – the English equivalent is *not*. Some examples:

s'asseoir	to sit down	s'approcher	to approach
se diriger vers	to go to/ towards	se servir de	to use

47.5

Some reflexive verbs have a reciprocal meaning: 'each other' (see 18.7, 18.8). Some examples:

se téléphoner:

Nous nous téléphonons le weekend.

We telephone each other at the weekend.

s'écrire:

Elles ne se sont jamais écrit.

They have never written to each other.

se rencontrer:

Ils se rencontrent sans dire un mot.

They meet but don't speak to each other.

se détester:

Il se détestent.

They hate each other.

47.6

Some verbs have a different meaning when they are used as reflexives:

agir	to act	s'agir de	to be a matter/question of
aller	to go	s'en aller	to go away

47.7

Reflexive verbs may have a passive meaning (see 48.4) – although **on** + an active verb is frequently used for the passive instead of a reflexive (see 48.4):

Cela ne se dit jamais en anglais! / On ne dit jamais cela en anglais!

That is never said in English!

47.8

The subject of impersonal reflexive verbs is always **il** (see 19.2d):

Il se trouve que nous sommes né(e)s dans la même ville.

We happen to have been born in the same city.

48 The passive

The passive in French is very similar to the passive in English: it is composed of the verb *être* (in the appropriate tense) + past participle, in English the verb 'to be' (in the appropriate tense) + past participle. The participle *always* agrees with the subject.

Active form:

Le directeur a reçu les nouveaux élèves.

The headmaster welcomed the new pupils.

Passive form:

Les nouveaux élèves ont été reçus par le directeur.

The new pupils were welcomed by the headmaster.

The object (**les nouveaux élèves**) of a directly transitive verb (*recevoir*) in an active clause > the subject in a passive clause. The subject (**le directeur**) in the active clause > the agent in the passive clause. The agent is introduced by **par** or by **de**. **Par** tends to be used more frequently than **de**, but, if in doubt, the following guidelines may help: use **par** for an action and for reference to specific people or things, and use **de** for a state of affairs, feelings or thoughts, habit, and for general reference to people or things.

Elle a été invitée au cinema par un ami.

She has been invited to the cinema by a friend.

Il sera accompagné de plusieurs amis.

He'll be accompanied by several friends.

— 48.1 —
The agent is *not* always present:

Si elles continuent à traverser la rue sans faire attention, elles vont être blessées.

If they go on crossing the street without looking, they're going to get hurt.

— 48.2 —
The passive is typically found with directly transitive verbs, that is, verbs which can have a direct object: e.g. **respecter**, **aimer**, **raconter**. Some verbs which are directly transitive in French may not be directly transitive in English – and vice versa:

écouter la radio

chercher la femme

to listen *to* the radio

to look *for* the woman

to enter the house **entrer dans la maison**
to remember her name **se souvenir de son nom**

48.3

Formation of the passive

(In the following examples only the masculine singular of the past participle is given.)

	Active	Passive	
<i>Infinitive</i>			
Present	<i>inviter</i> to invite	<i>être invité</i>	to be invited
Perfect	<i>avoir invité</i> to have invited	<i>avoir été invité</i>	to have been invited
<i>Indicative</i>			
Present	<i>j'invite</i>	<i>je suis invité</i>	was invited
Future	<i>j'inviterai</i>	<i>je serai invité</i>	shall be invited
Imperfect	<i>j'invitais</i>	<i>j'étais invité</i>	was invited
Past historic	<i>j'invitai</i>	<i>je fus invité</i>	was invited
Perfect	<i>j'ai invité</i>	<i>j'ai été invité</i>	have been invited
Future perfect	<i>j'aurai invité</i>	<i>j'aurai été invité</i>	shall have been invited
Pluperfect	<i>j'avais invité</i>	<i>j'avais été invité</i>	had been invited
Past anterior	<i>j'eus invité</i>	<i>j'eus été invité</i>	had been invited
Conditional	<i>j'inviterais</i>	<i>je serais invité</i>	should be invited
Conditional perfect	<i>j'aurais invité</i>	<i>j'aurais été invité</i>	should have been invited
<i>Subjunctive</i>			
Present	<i>que j'invite</i>	<i>que je sois invité</i>	am/may be invited
Imperfect	<i>que j'invitasse</i>	<i>que je fusse invité</i>	was/might be invited
Perfect	<i>que j'aie invité</i>	<i>que j'aie été invité</i>	(may) have been invited
Pluperfect	<i>que j'eusse invité</i>	<i>que j'eusse été invité</i>	had (might have) been invited

48.4

Other ways of expressing the passive:

- **on + third person singular of an active tense:**

Le terroriste a été interrogé./On a interrogé le terroriste.

The terrorist was interrogated.

Ils seront avertis du danger./On les avertira du danger.

They'll be warned of the danger.

- reflexive verbs (remember not all verbs can be used reflexively, see 47.3, 47.4, 47.5, 47.6):

Le champagne se boit très frais.

Champagne is drunk chilled.

Ces légumes se vendent partout.

These vegetables are sold everywhere.

In less formal French, **se faire**, **se voir**, **s'entendre** . . . + infinitive can also be used to express the passive:

Le garçon s'est fait renverser par un autobus.

The boy was knocked over by a bus.

Elle s'est vue exclure du parti.

She was excluded from party membership.

- impersonal verbs (which are always in the third person singular (see 53)), especially with **être** + past participle, or in the reflexive form:

Il a été dit des choses terribles.

Awful things were said.

Il se présente quelques problèmes.

There are some problems.

48.5

A few directly transitive verbs cannot be used in the passive, for example **avoir** when it means 'to possess'. The following example could not be passive in English either:

Elle a un très bel appartement.

She has a very beautiful flat.

48.6

It is important to remember that whereas in English a passive form is possible with an indirect object, it is *not* in French (see 48.7).

He gave me the book.

Il m'a donné le livre.

I was given the book./The book was given to me.

On m'a donné le livre.

48.7

There are three verbs with an indirect object which *can* be used in the passive – the indirect object > the subject of the passive clause. The verbs are **obéir à qn** 'to obey someone', **désobéir à qn** 'to disobey someone', **pardonner à qn** 'to forgive someone'.

Les élèves obéiront à l'institutrice.

The pupils will obey the teacher.

L'institutrice sera obéie de ses élèves.

The teacher will be obeyed by her pupils.

49

The past participle

Some guidelines on the formation of past participles:

Verbs whose infinitive ends in **-er**: the stem of the infinitive + **é**;
e.g. **donner**: **donné** 'given'

Verbs whose infinitive ends in **-ir**: the stem of the infinitive + **i**; e.g.
finir: **fini** 'finished'

Verbs whose infinitive ends in **-re**: the stem of the infinitive + **u**;
e.g. **vendre**: **vendu** 'sold'

But *many* verbs, including the **-oir** group, do not follow these guidelines, and the past participles simply have to be learned (see 82). Some examples:

être :	été	been	boire :	bu	drunk
avoir :	eu	had	convaincre :	convaincu	convinced
connaître :	connu	known	venir :	venu	come
prendre :	pris	taken	croire :	croit	feared
devoir :	dû (accent on ms only)				

49.1

Past participles may be used as nouns, adjectives, verbs, prepositions and conjunctions.

- nouns:

la prise de notes	notetaking
la mise en œuvre	implementation
le mort	the dead man
la vue	sight, view
l'arrivée	arrival
le reçu	receipt

- adjectives (agreeing with their nouns):

la porte fermée	the closed door
des films connus	well-known films

Frequently, the English equivalent of a past participle in French is a present participle:

agenouillé	kneeling	penché	leaning
assis	sitting	pendu	hanging

On l'a vu agenouillé(e) devant l'autel.

We saw him/her kneeling before the altar.

- verbs (agreeing with nouns or pronouns):

Some intransitive verbs (verbs which cannot have a direct object) and all reflexive verbs are conjugated with *être* in their compound tenses. Their past participle agrees in gender and number with the subject. Intransitive verbs which have *être* are conjugated with *être* in their compound tenses. Their past

The Past Participle with *être* (see 35.3)

Since it was so late, she left the meeting.

Vu qu'il était si tard, elle est partie de la réunion.

vu que	since	given	attenué que	supposé que
				assuming

● conjunctives (*no* agreement):

étant donné/donné	given	étant donné/donné	given	circumstances

Note *étant donné* *given* – agreement is variable with this prepositional phrase:

accepted the Social Contract.

Apart from Great Britain, all the member countries have

contract social.

La Grande Bretagne excepté, tous les pays membres ont accepté le

when they do, they agree with it in gender and number.

But some of them, such as *excepté*, *y compris*, *cl-joint*, may follow the noun and

The documents requested are enclosed.

Vous trouvez ci-joint les pièces demandées.

approuvé	agreed	vu	given	Y compris	including
exempt	apart from	supposé	assumingly	entendu	decided/agreed
except					

● prepositions (some of these are very useful in business correspondence): They normally precede the noun and there is no agreement.

You're going tomorrow? — OK!

Tu vas demander? — Entendu!

Although it had a new alarm system, the car had been stolen.
voilà.

Bien qu'équipée d'un nouveau système d'alarme, la voiture a été

When their homework was finished the pupils left.

Les élèves terminés, les élèves sont sortis.

aller	to go	partir	to leave
arriver	to arrive	rentrer	to return
demeurer	to stay, live	rester	to stay
descendre	to go down	retourner	to return
entrer	to enter	sortir	to go out
monter	to go up	tomber	to fall
mourir	to die	venir	to come
naître	to be born		

and all their compounds, for example: **venir**, **convenir**, **devenir**, **parrvenir**, **redevenir**. Some of these verbs can be used transitively, and then their compound tenses are formed with **avoir**: **descendre**, **monter**, **rentrer**, **retourner**, **sortir**. The meaning of the verbs changes when they are used transitively.

Elle est sortie avant leur arrivée.

She went out before they arrived.

Elle a sorti son argent.

She got her money out.

— 49.3 —

Agreement of the past participle with reflexive verbs

The past participle agrees with the subject of reflexive verbs:

Elles se sont rencontrées devant le cinéma.

They met at the cinema.

If the reflexive pronoun is equivalent to an *indirect object* – as it is with such verbs as **se dire** ‘to say to each other’, **s'écrire** ‘to write to each other’, **se téléphoner** ‘to telephone each other’ – there is *no agreement*.

Vous vous étiez dit bonjour au moins!

You said hello to each other at least!

Elles se sont téléphoné hier.

They phoned each other yesterday.

But, if there is a direct object in the sentence and it *precedes* the verb, the past participle agrees with that preceding direct object.

Voilà les gants qu'elle s'est achetés.

Here are the gloves she bought herself.

Combien d'actions s'est-il achetées?

How many shares did he buy himself?

If there is a direct object and it *follows* the verb, there is *no agreement*.

Elle s'est cassé le nez.

She broke her nose.

Pour préparer l'examen, ils s'étaient posé des questions très difficiles.

In preparation for the exam, they asked each other some very difficult questions.

49.4

Agreement of the past participle with *avoir*

The past participle *never* agrees with subject of verbs conjugated with *avoir*.

Elle avait travaillé toute la nuit.

She had worked all night.

Ils ont assisté à cette réunion.

They were present at that meeting.

If there is a direct object in the sentence which precedes the verb, the past participle agrees with that preceding direct object. The direct object may be a personal pronoun (**me, te, le ...**); the relative pronouns **que, lequel, laquelle, lesquels, lesquelles**; or a noun introduced by the interrogative or exclamatory adjective **quel(le)(s)** or the interrogative adverb **combien de**.

Ces lettres, je les ai déjà lues.

I've already read these letters.

Voilà la jeune femme qu'on a rencontrée hier.

There's the young woman we met yesterday.

Je ne savais pas lesquels des discours vous aviez enregistrés.

I didn't know which of the speeches you had recorded.

Quelles propositions aurait-il faites?

Which proposals will he have made, do you think?

Combien de cadeaux as-tu reçus pour ton anniversaire?

How many presents did you get for your birthday?

The past participle *never* agrees with **en**.

Des chocolats, elle en a mangé beaucoup trop!

She's eaten far too many chocolates!

49.5

The past participle with impersonal verbs

There is *no* agreement of the past participle with impersonal verbs.

Il avait manqué des détails importants.

Important details were missing.

Il a été trouvé toutes sortes d'objets sur les pistes de ski.

All kinds of things have been found on the ski slopes.

49.6

Past participles of verbs of the senses: **écouter**, **entendre**, **regarder**, **voir**, **sentir** + infinitive – there is agreement if the preceding direct object is the object of the verb of the senses, but not if it is the object of the infinitive.

Ce sont les jeunes filles qu'on a entendues chanter à la radio.

It's the girls we heard singing on the radio.

C'est la chanson que j'ai entendu chanter à la radio.

It's the song I heard sung on the radio.

and with *laisser* + infinitive, the past participle usually agrees with the preceding direct object.

Voilà la voiture qu'il a laissée passer hier.

There's the car he let through yesterday.

49.7

The past participle of *faire* + infinitive

There is *no* agreement of the past participle in this construction.

As-tu vu la maison que j'ai fait restaurer?

Have you seen the house I've had restored?

Elle les a fait sortir.

She made them leave.

50 The present participle

The present participle is usually formed of the stem of the first person plural present indicative + **-ant**:

donnant giving **finissant** finishing **vendant** selling

Some exceptions to the above guideline:

avoir: **ayant** having **être:** **étant** being **savoir:** **sachant** knowing

50.1

Present participles may be used as nouns, adjectives, verbs, gerunds, prepositions and conjunctions.

- nouns

le/la participant(e) participant, delegate

le/la représentant(e) representative

- adjectives

These participles, agreeing with the noun or pronoun in gender and number, are really verbal adjectives describing a quality or state.

C'était une question étonnante.

It was an astonishing question.

Ils ont des voisins charmants.

They have delightful neighbours.

- verbal adjectives may have a different spelling from the corresponding present participle. Some examples:

Verbal adjective	Participle
différent	differant
excellent	excellant
fatigant	fatiguant
précédent	précédant
négligent	négligeant

- verbs

In contrast to verbal adjectives, the present participle used as a verb is invariable.

C'était une décision intéressant tous les spectateurs.

It was a decision of interest to all the spectators.

Because the participles are functioning as verbs they may have objects, they may be used in the negative, they may be reflexive and they may be qualified by adverbs.

Relisant le texte, elle a trouvé beaucoup de fautes de frappe.

When she read the text again, she found many typing errors.

S'étant cassé le bras, il n'arrivait pas à écrire.

Because he'd broken his arm, he couldn't write.

- gerunds

The gerund is a verbal noun and follows *en* or *tout en*. The English equivalent is 'while, in, on by, if ...' + present participle. (*Tout*) *en* + present participle may have a variety of different meanings, some of which are given here.

En enlevant votre manteau, vous serez plus à l'aise. (condition)

If you take your coat off, you'll be more comfortable.

Elle a donné l'impression d'être plus calme, (tout) en cachant ses pleurs. (cause)

She appeared calmer because she was hiding her tears.

Ils perdront tout leur argent en le gaspillant comme ça.

(explanation)

They'll lose all their money wasting it like that.

Prenez un siège en attendant. (simultaneity)

Take a seat while you're waiting.

Nous avons rougi en entendant ces mots. (anteriority)

We blushed when we heard those words.

- prepositions

Examples include: **durant, pendant** ...

Il écoutait les CD pendant des heures.

He listened to CDs for hours on end.

- conjunctions

Examples include: **en attendant que** (see 46.4), **pendant que** ...

Je peux travailler pendant qu'il regarde la télé.

I can work while he is watching telly.

51 The imperative

There are three imperative forms in French. For the majority of verbs the present indicative tense provides the verb forms used – *without* the personal pronoun: the second person singular, and the first and second persons plural. In the case of -er verbs the second person singular drops the s. For the position of personal pronouns see 21.3.

donner: donne 'give', **donnons** 'let's give', **donnez** 'give'

finir: finis, finissons, finissez

vendre: vends, vendons, vendez

If the -er verb is *followed* by the pronouns **y**, **en** the second person singular imperative keeps the s:

Vas-y!

Go on!

N'y va pas!

Don't go there!

Donnes-en à la petite fille!

Give some to the little girl.

51.1

The imperative forms of some verbs, e.g. **être, avoir, savoir, vouloir**, are irregular. The forms should always be checked in verb tables.

être: sois, soyons, soyez

avoir: aie, ayons, ayez

savoir: sache, sachons, sachiez

vouloir: veuille, veuillons, veuillez

Veuillez agréer, Madame, l'expression de mes sentiments respectueux.

Yours faithfully, ...

51.2

Reflexive verbs use the emphatic pronoun in the second person singular imperative. The negative form and the plural forms keep the personal pronouns.

Repose-toi un peu!

Have a little rest!

Ne te hâte pas!

Don't hurry!

Habillez-vous vite!

Hurry up and get dressed!

Ne nous couchons pas avant minuit!

Let's not go to bed before midnight!

51.3

How the imperatives are used

The second persons singular and plural can be used to give an order, an instruction, advice, an invitation, make an appeal, or express an assumption, a concession, a wish, etc.:

Viens!

Come here! (order)

Ne recommencez pas!

Don't start again! (order)

Faites tout d'abord cuire les pommes de terre.

First cook the potatoes. (instruction)

Venez dîner ce soir!

Come to dinner tonight! (invitation)

Ne m'oubliez pas.

Don't forget me. (appeal)

Continue comme ça et tu vas à la catastrophe.

Go on like that and you're asking for trouble. (assumption)

Crie tant que tu veux, cela ne va rien changer.

Shout as much as you want, it won't change a thing. (concession)

Dors bien, ma petite!

Sleep well, dear! (wish)

The first person plural imperative is often used to give encouragement, advice:

Allons-y!

OK! Let's go!/Let's get started! (encouragement)

Restons tranquilles!

Let's take it easy! (advice)

51.4

The imperative may also be used as an exclamation:

Tiens! Prends-le!

Here! Take it/him!

Voyons! On peut partir immédiatement!

OK! We can leave right away!

51.5

There are various ways of giving an order instead of using the imperative (see 77.3).

- que + subjunctive (main verb):

Que tout le monde mette un casque de protection!

Everyone must wear a safety helmet!

- future tense:

Les hommes sortiront par la gauche!

Men leave by the left!

- infinitive:

Ne pas se pencher au-dehors!

Don't lean out!

- and for a polite imperative, use an interrogative form and/or the conditional tense:

Pouvez-vous/Pourriez-vous ouvrir la fenêtre (s'il vous plaît)?

Please open the window.

52

The infinitive

There are two infinitive forms – the present infinitive, e.g. **donner**, **finir**, **vendre**, and the perfect infinitive, composed of **avoir** or **être** + past participle:

avoir donné 'to have given', **avoir fini** 'to have finished', **avoir vendu** 'to have sold', **avoir reçu** 'to have received', **s'être reposé** 'to have rested', **être allé** 'to have gone', **avoir eu** 'to have had', **avoir été** 'to have been'

52.1

Infinitives can be used as nouns:

Nager est très agréable.

Swimming is very enjoyable.

Avoir fini ses devoirs est aussi très agréable.

Having finished one's homework is also very nice.

52.2

The infinitive can be used as an imperative, an exclamation, and as an interrogative:

<i>Prendre un billet à la porte.</i>	Take a ticket at the door.
<i>Ne laissez pas parler ce représentant.</i>	Don't let that representative speak.
<i>Croire à tes salades!</i>	Believe your rubbish!
<i>Que faire?</i>	What can we do?
<i>Où aller?</i>	Where can we go?
<i>Qui croire?</i>	Who can we believe?

52.3

The infinitive may be used – following **de** or **et de**, mainly in written French and replacing a tense – to add a little variety to a text:

'Le vin doit se déguster à table', a dit le jeune étudiant. Et d'ajouter: 'Lentement'

'Wine must be tasted at table,' the young student said. And he added, 'Slowly!'

52.4

The infinitive may follow the prepositions:

pour, **sans**, **avant de** + present (and sometimes perfect) infinitive,
après + perfect infinitive

These constructions can be used providing the subject of both parts of the sentence is the same, otherwise a different construction would have to be used – note the English equivalents:

Ces bottes sont faites pour marcher.

These boots are made for walking.

Elle est entrée sans avoir fait/faire de bruit.

She came in without making any noise.

Après avoir mangé, nous nous sommes reposé(e)s.

After eating we had a rest.

Avant de manger, nous nous sommes lavé les mains.

Before eating we washed our hands.

52.5

When the subject of both parts of the sentence is the same, some verbs are followed directly by the infinitive. Some examples: **aimer**, **aller**, **compter**, **devoir**, **entrer**, **espérer**, **falloir**, **manquer**, **penser**, **pouvoir**, **préférer**, **savoir**, **venir**, **vouloir**.

Nous comptons y aller demain.

We hope to go there tomorrow.

52.6

Faire + infinitive – note the English equivalent:

Elle a fait venir le médecin.

She called the doctor.

C'est bien! Ça fait dormir.

That's good. It makes you sleep.

Fais réparer la voiture, si tu veux.

Have the car repaired, if you like.

Il a fait travailler les étudiants.

He made the students work.

If there are two objects in this type of sentence and one of the objects is a person, that object is preceded by à:

Elle fait parler français à ses enfants.

She makes her children speak French.

If the infinitive is reflexive the reflexive pronoun is dropped:

Faites taire ces enfants!

Make the children shut up!

52.7

Verbs of the senses: **écouter, entendre, regarder, voir, sentir** + infinitive, and **laisser, envoyer** + infinitive – note the alternative relative clause, and the English equivalent:

Je l'entends pleurer. (Je l'entends qui pleure.)

I can hear him/her crying.

On a vu des étudiants faire du stop. (... qui faisaient ...)

We saw students hitch-hiking.

52.8

Verbs + preposition (**à, de, pour** ...) + infinitive – this type of construction is possible when the subject of both clauses is the same. It is very important to know the correct preposition to use, and to know if the meaning of the verb changes if a different preposition is used. The preposition and the meaning should be checked in a dictionary.

finir de + infinitive

Il a fini de

He has finished
eating.

**finir par +
infinitive**

**Il a fini par le/la
casser.**

He finished up
breaking it.

Some verbs may have different prepositions with *no* change in meaning:

commencer à or de + infinitive	to begin to do/doing
continuer à or de + infinitive	to continue to do/doing
s'efforcer à or de + infinitive	to try hard to do

52.9

Some examples of verbs + à + infinitive:

apprendre à, s'attacher à, avoir à, consentir à, s'habituer à, inviter à

and some examples of verbs + de + infinitive:

accepter de, cesser de, convenir de, détester de, s'empresser de, essayer de

Nous nous sommes mis à faire le ménage.

We began to do the housework.

Il a cessé de parler pendant le film.

He stopped talking during the film.

52.10

Nouns and adjectives may also be followed by a preposition + infinitive. Some examples:

l'aptitude à 'aptitude for', **la détermination à** 'determination to',
l'intérêt à 'interest in'

la raison de 'reason for', **le besoin de** 'need to', **les moyens de** 'means to'

(And note **une maison à vendre** 'a house for sale', **une femme à craindre** 'a woman to be feared', **une machine à coudre** 'a sewing machine'...)

dispose à 'willing to', **lent à** 'slow to', **préparé à** 'prepared to'
capable de 'capable of', **responsable de** 'responsible for', **certain de** 'certain to'

Note

Il est difficile de comprendre le grec.

It is difficult to understand Greek.

Celivre est difficile à lire.

This book is difficult to read. (See 13.5b)

And note **assez** and **trop** + adjective + **pour** + infinitive:

Ils sont trop petits pour sortir seuls.

They are too little to go out alone.

53 Impersonal verbs

Impersonal verbs are fairly common in French. The subject is either **il** or **ce, cela, ceci**, and the verb is always in the third person singular of the tense required, indicative or subjunctive. Past participles are invariable.

Il est venu plusieurs personnes.

Several people came.

Il n'est pas tombé beaucoup de pluie.

There wasn't a lot of rain.

53.1

Impersonal verbs are used for expressing dates, time and weather.

C'est aujourd'hui le 16 avril.

It's the 16th of April today.

Il était six heures.

It was six o'clock.

Il pleuvra demain.

It will rain tomorrow.

The weather may also be expressed by **il fait ...**:

Il fait beau, mais il ne fait pas chaud.

It's fine, but it's not warm.

53.2

Impersonal verbs have a range of meanings – depending, of course, on the verb itself.

il faut que + subjunctive 'must, need to, have to' or **il (me) faut** + infinitive (using indirect object pronouns: **me, te, lui ...**):

Il faudra que tu obéis à ton père.

You must do what your father tells you.

Il leur fallait montrer leur carte d'identité.

They had to show their identity cards.

Il y a 'there is/are' (note that the verb in this expression is **avoir** not **être**):

Y a-t-il quelqu'un à la porte? Non. Il n'y a personne à la porte.

Is there someone at the door? No. There's nobody.

Il s'agit de + noun or infinitive 'it is a matter/question of':

Il s'agit d'une grosse somme d'argent.

It's a matter of a large amount of money.

Il s'agira de la payer immédiatement.

It's a matter of paying it immediately.

Some more examples:

Il n'est venu personne.

Nobody came.

Il me manquera du temps pour faire cela.

I won't have enough time to do that.

Il a été convenu d'une date.

A date was agreed.

Note the passive form of the last example:

Une date a été convenue. (not an impersonal verb in this case)

— 53.3 —

il (me) semble 'it seems (to me) that'

il semble que + subjunctive:

Il semble qu'elle aille en France cet été.

It seems she's going to France this summer.

il semble que + indicative occurs in spoken French, and when the verb in the dependent clause is in the imperfect:

Il semble qu'elle ne pouvait pas y aller.

It seems she couldn't go.

and when **il semble que** adds a pronoun (indirect object pronoun):

Il me semble que je l'ai entendu chanter.

I think I've heard him sing.

il ne + indirect object pronoun + **semble pas que** + subjunctive:

Il ne leur semble pas qu'elle puisse le faire avant jeudi.

They don't think she can do it before Thursday.

il (me . . .) semble + infinitive (same subject in both clauses) *or* + adjective:

Il me semble l'avoir vue quelque part.

I think I may have seen her somewhere.

Cela ne nous semblait pas très intéressant.

That didn't seem very interesting to us.

Adverbs are generally formed from adjectives, but unlike adjectives, adverbs are *invariable*. They are used with verbs – **travailler dur** 'to work hard', with adjectives – **très facile** 'very easy', and with other adverbs – **assez bien** 'quite good/well'. There

are three main types of adverb: of manner – **vite** 'quick/quickly', place – **ici** 'here', and time – **demain** 'tomorrow'. To these should be added adverbs of quality – **bien** 'well' and negation – **jamais** 'never'. Adverbs may consist of one word – **difficilement** 'with difficulty', a compound word – **après-demain** 'the day after tomorrow', or of a phrase – **tout à fait** 'completely'.

54.1

Formation of adverbs of manner

In general adverbs of manner are composed of the feminine form of an adjective + **-ment**.

doux, douce, doucement 'quietly, gently'
premier, première, premièrement 'first of all, firstly'
complet, complète, complètement 'completely, totally'
sérieux, sérieuse, sérieusement 'seriously'

54.2

Adjectives ending in **-ent** or **-ant** drop the **-nt** of the masculine form and add **-mment**.

évident, évidemment 'evidently'
suffisant, suffisamment 'sufficiently, enough'

There are some exceptions to this rule:

lent, lente, lentement 'slowly'
présent, présente, présentement 'at present'

54.3

Adjectives which end in a vowel other than **e** normally simply add **-ment** to the masculine form:

poli, poliment 'politely'
absolu, absolument 'absolutely'
aisé, aisément 'easily'

54.4

Some adjectives are used as adverbs, without any change of form: **dur** 'hard', **bon** 'good', **net** 'short' (as in 'to stop short'):

refuser tout net to refuse point blank

In some cases different adverbial forms are available, but they are *not* interchangeable. They are used in different contexts and may have slightly different meanings.

dur; durement 'hard; deeply, badly'
fort; fortement 'extremely; strongly, highly'

C'est fort dommage.

It's a great pity.

Il est fortement recommandé de se munir d'un vêtement de pluie.
 It's strongly recommended that you/we take some waterproof clothing.

Some adverbial phrases of manner:

avec soin 'carefully', **d'un coup** 'suddenly', **côte à côté** 'side by side',
en danger 'in danger', **hors d'haleine** 'out of breath', **sous peu**
 'soon', **sur un ton triste** 'sadly'

— 54.5 — Comparative and superlative adverbs

These adverbs are formed by placing **plus**, **aussi**, **moins** before the adverb and, if appropriate, adding **que** in the comparative and **de** in the superlative: **plus vite** (**que**) 'quicker (than)', **aussi vite** (**que**) 'as quick as', **moins vite** (**que**) 'less quick (than)'; **le plus vite** (**de**) 'the quickest (of)', **le moins vite** (**de**) 'the slowest (of)'.

Elle parle plus vite (que lui).

She speaks more quickly (than he does).

Nous avons mangé aussi rapidement (que toi).

We ate as quickly (as you).

Ils voyagent moins (que leurs enfants).

They travel less (than their children).

Je suis venu(e) le plus vite possible.

I came as quickly as possible.

C'est le cheval blanc qui court le moins vite.

It's the white horse that's going slowest.

— 54.6 — Comparative and superlative forms of the irregular adverbs **bien**, **mal**, **beaucoup**, **peu**:

bien 'well'; **meilleur (que)** 'better (than)'; **le meilleur (de)** 'the best (of)'
mal 'badly'; **pis/plus mal (que)** 'worse (than)'; **le pis/le plus mal (de)** 'worst (of)'

beaucoup 'much'; **plus/autant (que)** 'more/as much (than/as)'; **le plus (de)** 'most (of)'

peu 'little'; **moins/aussi peu (que)** 'less/as little (than/as)'; **le moins (de)** 'least'

Tu aimes ce livre? — Non, je ne l'aime pas beaucoup.

You like this book? — No, not much.

J'aime mieux celui-ci (que celui-là).

I like this one better (than that one).

Moi, c'est ce livre-là que j'aime le mieux (de tous).

I like *that* book best (of all).

Eh bien! Tant pis!

Oh well! Too bad!

Some expressions using **plus** and **moins**:

de plus en plus increasingly

de mal en pis from bad to worse

de moins en moins intéressant less and less interesting

Plus elle travaille, **plus** elle gagne de l'argent.

The more she works, the more she earns.

Moins je mange, **plus** j'ai envie de manger.

The less I eat, the more I want to.

Note the **ne** before the verb in a dependent clause, following a positive comparison:

Johan travaille plus que je ne (le) croyais.

Johan works more than I thought.

54.7

Bien used with **vouloir**: the position of **bien** may indicate a level of formality or informality:

Elle veut bien répondre à la question. (formal/informal)

She will be pleased to answer the question.

Il voudrait bien que tu l'écoutes. (informal)

Il vous prie de vouloir bien l'écouter. (formal)

He would like you to listen to him/her.

54.8

Adverbs of quantity (see 11.3, 28)

Some examples:

assez 'enough', peu 'little, not much', autant 'as much', plus 'more', beaucoup 'much', moins 'less', combien? 'how much?', trop 'too much', davantage 'more', très 'very', tellement 'so much', tant 'so much'

Some adverbial phrases of quantity:

à peine 'hardly', tout à fait 'completely', à peu près 'almost'

54.9

Adverbs of time

Some examples:

alors 'then', après 'after', aujourd'hui 'today', auparavant 'before', aussitôt 'immediately', bientôt 'soon', déjà 'already', demain 'tomorrow', désormais '(from) now (on)', enfin 'at last, finally'

hier 'yesterday', **longtemps** 'for a long time', **maintenant** 'now',
puis 'then'

Some adverbial phrases of time:

à présent 'at present', **de temps en temps** 'from time to time', **tout à l'heure** 'soon, later'

54.10 Adverbs of place

Some examples:

autour 'round', **contre** 'against', **dedans** 'inside', **dehors** 'outside',
derrière 'behind', **dessous** 'underneath', **devant** 'before', **ici** 'here',
là 'here, there', **où** 'where'

Some adverbial phrases of place:

en arrière 'backwards', **en avant** 'forwards', **nulle part** 'nowhere'

54.11 Position of adverbs

With simple tenses, adverbs usually follow the verb, and with compound tenses they are usually placed between the auxiliary verb and the past participle.

Normally they precede an infinitive.

Elles travaillent beaucoup. They work a lot.

Elles ont beaucoup travaillé. They have worked a lot.

Il faut bientôt partir. We'll have to leave soon.

For emphasis, they are placed at the beginning – or at the end – of the sentence.

Vraiment, tu m'ennuies!

Really, you are annoying me!

They are placed before an adjective, a past participle or another adverb which they modify.

Elles sont toujours bien habillées.

They are always well dressed.

Cet Allemand parle assez mal le français.

That German speaks French rather badly.

But, these are only guidelines on the position of adverbs, and they may, for various reasons, be moved from their usual position. For example, if the adverb is quite long it is frequently placed at the end of the sentence.

Elle viendra nous voir tout à l'heure.

She'll come and see us later on.

If more than one adverb is being used in the sentence, the order they come in is

manner, then place, then time – just as in English.

Il est arrivé hors d'haleine chez nous à minuit.

He arrived out of breath at our house at midnight.

54.12

Adverbs of negation (see 60)

The forms are:

non	no	ne ... guère/(à peine)	hardly
pas	no	ne ... ni... ni...	neither ... nor ...
ne ... pas	not	ne ... que	only
ne ... plus	no more, longer	ne ... aucun(e)/nul(le)	not a, not one
ne ...	nobody, no-one	ne ... nullement	not at all, by no means
personne			
ne ... rien	nothing	ne ... aucunement	not at all, not in any way
ne ... jamais	never	ne ... nulle part	nowhere

54.13

Non and pas

Non is the main adverb of negation.

Tu veux du sucre? Non (or Merci).

Like some sugar? No.

Pas is used like **non** in some ways, but is less formal.

Il veut chanter mais pas moi!

He will sing but not me!

J'aime le français mais non/ pas l'italien.

I like French but not Italian.

Pourquoi pas?

Why not?

Pas possible!

That's not possible.

Some expressions with **non** and **pas**:

Mais non!/Absolument pas!/Pas du tout!	No!
Pas un seul!	Not one!
Jamais de la vie!	Never!
Moi je n'ai pas bu du tout!	I haven't been drinking!
Il n'y a même pas un verre d'eau!	There's not even a glass of water!

And more gently:

Je crois que non.	I don't think so.
Sans doute que non./Probablement pas.	Probably not. Probably not./Probably not.

— 54.14 — A positive answer, which contradicts a negative question or statement, is usually introduced by **si** (not **oui**).

Vous ne voulez pas m'accompagner? Mais si!
You don't want to come with me? Yes, I do!

— 54.15 — For the partitive article in a negative context see 11.1.

Position of negative adverbs

In simple tenses **ne** precedes the verb and **pas, plus, jamais** follow the verb. In compound tenses **ne** precedes the auxiliary verb and **pas, plus, jamais** follow the auxiliary verb.

Je ne vois rien.	I can't see anything.
Elles n'y sont jamais allées.	They have never been there.

But **personne, rien, aucun(e)** can follow the verb, the past participle, or a preposition.

Nous n'avons entendu personne.
We didn't hear anyone.

Elle ne poserait cette question pour rien au monde.
She wouldn't ask that question for anything (in the world).

Personne and **rien** may be used as subjects of the verb, but they *must* have their **ne**!

Personne n'est venu hier soir.
Nobody came last night.

Aucun(e) may be replaced by **nul(le)** in formal French, and by **pas un(e)** in informal French.

Nous n'avons aucun souci concernant cette étudiante.
We have no worries about this student.

Nulle réponse n'a été donnée au ministre.
No reply was given to the minister.

Il ne sait pas un mot de français.
He doesn't know a word of French.

manner, then place, then time – just as in English.

Il est arrivé hors d'haleine chez nous à minuit.

He arrived out of breath at our house at midnight.

54.12

Adverbs of negation (see 60)

The forms are:

non	no	ne ... guère/(à peine)	hardly
pas	no	ne ... ni ... ni ...	neither ... nor ...
ne ... pas	not	ne ... que	only
ne ... plus	no more, longer	ne ... aucun(e)/nul(le)	not a, not one
ne ...	nobody, no-one	ne ... nullement	not at all, by no means
personne			
ne ... rien	nothing	ne ... aucunement	not at all, not in any way
ne ... jamais	never	ne ... nulle part	nowhere

54.13

Non and pas

Non is the main adverb of negation.

Tu veux du sucre? Non (or Merci).

Like some sugar? No.

Pas is used like non in some ways, but is less formal.

Il veut chanter mais pas moi!

He will sing but not me!

J'aime le français mais non/pas l'italien.

I like French but not Italian.

Pourquoi pas?

Why not?

Pas possible!

That's not possible.

Some expressions with non and pas:

Mais non!/Absolument pas!/Pas du tout!	No!
Pas un seul!	Not one!
Jamais de la vie!	Never!
Moi je n'ai pas bu du tout!	I haven't been drinking!
Il n'y a même pas un verre d'eau!	There's not even a glass of water!

And more gently:

Je crois que non.	I don't think so.
Sans doute que	Probably not.
non./Probablement pas.	

— 54.14 — A positive answer, which contradicts a negative question or statement, is usually introduced by **si** (not **oui**).

Vous ne voulez pas m'accompagner? Mais si!
You don't want to come with me? Yes, I do!

— 54.15 — For the partitive article in a negative context see 11.1.

Position of negative adverbs

In simple tenses **ne** precedes the verb and **pas**, **plus**, **jamais** follow the verb. In compound tenses **ne** precedes the auxiliary verb and **pas**, **plus**, **jamais** follow the auxiliary verb.

Je ne vois rien.	I can't see anything.
Elles n'y sont jamais allées.	They have never been there.

But **personne**, **rien**, **aucun(e)** can follow the verb, the past participle, or a preposition.

Nous n'avons entendu personne.
We didn't hear anyone.

Elle ne poserait cette question pour rien au monde.
She wouldn't ask that question for anything (in the world).

Personne and **rien** may be used as subjects of the verb, but they *must* have their **ne**!

Personne n'est venu hier soir.
Nobody came last night.

Aucun(e) may be replaced by **nul(le)** in formal French, and by **pas un(e)** in informal French.

Nous n'avons aucun souci concernant cette étudiante.
We have no worries about this student.

Nulle réponse n'a été donnée au ministre.
No reply was given to the minister.

Il ne sait pas un mot de français.
He doesn't know a word of French.

Both parts of the negative precede an infinitive if they refer to that infinitive.

Je ne veux pas y aller. I don't want to go.

Il préfère ne jamais y aller. He prefers never to go there.

Note that personal pronouns are placed between the **ne** and the verb or the auxiliary (see 21.3a).

54.17

ne ... ni ... ni ...

Il n'a vu ni sa mère ni sa sœur.

He hasn't seen his mother or his sister.

Ni sa mère ni sa sœur ne viendra/viendront. (See 29.6)

Neither his mother nor his sister will come.

54.18

Nulle part always follows the verb or the auxiliary.

Je ne l'ai vu nulle part.

I haven't seen him/it anywhere.

54.19

Omission of **ne** and **pas**

Ne may be omitted in informal spoken French, and often in short phrases without a verb.

J'sais pas.

Don't know.

C'est pas vrai!

Not true!

Tu veux un chocolat? — Merci, pas de chocolat. Je suis au régime.

You want a chocolate? — No thanks, no chocolate. I'm on a diet.

Pas may be omitted after **cesser**, **oser**, **pouvoir**, **savoir**.

Elle ne cesse de parler.

She never stops talking.

54.20

Sans + negative adverbs (**not pas**): examples include **sans plus**, **sans rien**, **sans aucun(e)**.

Nous sommes parti(e)s sans rien dire.

We left without saying a word.

54.21

ne ... que

Que is always placed before the word it refers to. Note **ne ... que si** 'not unless'.

Il n'est sorti avec la jeune fille que le samedi.

He only went out with the girl on Saturdays.

Cette femme, elle *ne fait que faire des histoires!*

That woman! All she does is make a fuss!

Je *ne te donnerai une réponse que si j'ai des nouvelles.*

I won't give you an answer unless I have any news.

54.22

ne ... pas toujours 'not always'; **ne ... toujours pas** 'still not'

Elles *ne sont pas toujours à la maison.*

They're not always at home.

Elles *ne sont toujours pas à la maison.*

They're still not at home.

54.23

The expletive **ne**

This **ne** occurs in formal, or very correct French, but only in certain contexts. It is frequently omitted from informal French. It is used

- after verbs expressing feeling, and verbs expressing avoidance:

Il a peur qu'elle *ne soit malade.*

He's afraid (that) she may be ill.

- after verbs expressing doubt, when these verbs are negative:

On ne doute jamais qu'ils *ne seront là.*

We never doubt that they'll be there.

- following **à moins que** and **avant que**:

Je prendrai un imper *à moins qu'il ne fasse très chaud.*

I'll take a mac unless it's very warm.

- in comparisons:

C'est *plus difficile que je *ne* (le) croyais.*

It's more difficult than I thought.

54.24

Formation of negative adjectives

The negative prefixes **im-**, **in-**, **il-**, **ir-**, **mé-**, **mal-** are used to form these adjectives:

patient	impatient	legal	illégal	content	mécontent
correcte	incorrecte	régulier	irrégulier	honnête	malhonnête

Peu may be used instead of the prefixes:

Le livre est *peu intéressant.*

The book is not very interesting.

55 Prepositions

Prepositions may be single words, e.g. **à**, **devant**, or phrases, e.g. **au-dessous de**, **du côté de**. Some uses are very similar to English uses, but they do not always correspond to each other. Some examples are given here, but it is always good practice to check in a dictionary – unless you are absolutely sure about their use, *and* about which verb, noun, adjective, or adverb the preposition is used with. The examples given here are grouped according to their function(s).

55.1

Manner or means

Au moyen d'une échelle nous sommes entré(e)s dans la maison.

We got into the house by means of a ladder.

A force d'étudier, il a réussi ses examens.

By studying hard, he passed his exams.

en voiture by car **par le train** by train **par avion** by plane

55.2

Place

<i>à la campagne</i>	in the country
<i>à la télé</i>	on telly
<i>au bas de la page</i>	at the foot of the page
<i>auprès de la fenêtre</i>	near the window
<i>autour du feu</i>	around the fire
<i>chez moi</i>	at my place
<i>dans le train</i>	on the train
<i>en face de la gare</i>	opposite the station
<i>entre guillemets</i>	in inverted commas
<i>jusqu'à l'église</i>	as far as the church
<i>loin de l'école</i>	far from the school
<i>par terre</i>	on the ground
<i>parmi les étudiants</i>	among the students
<i>vers la banque</i>	towards the bank

55.3

Time

<i>à trois heures</i>	at three o'clock
<i>après ton anniversaire</i>	after your birthday
<i>avant le repas</i>	before the meal
<i>au printemps</i>	in spring
<i>depuis vendredi</i>	since Friday
<i>dès ce jour</i>	from today
<i>en 1996</i>	in 1996
<i>il y a huit jours</i>	a week ago
<i>jusqu'à minuit</i>	until midnight
<i>par jour</i>	by day
<i>pendant la nuit</i>	during the night
<i>vers cinq heures</i>	about five o'clock

55.4

CauseWhen the cause is *negative*:*à cause du travail*

because of the work

en raison d'un désaccord

because of a disagreement

When the cause is *positive*:*grâce à cette aimable jeune fille*

thanks to that friendly girl

à la faveur de sa compétence

on account of his/her efficiency

55.5

Restriction of some kind*excepté le boulanger**sauf l'ordre du jour**quant à nous**faute de temps**hors de prix**en dehors de vous trois*except for the baker
except for the agenda
as far as we are concerned
through lack of time
too expensive
apart from you three

55.6

Aim or purpose*afin de réussir**de façon à comprendre**de manière à clarifier**de peur de t'ennuyer**en vue de finir**pour terminer*in order to succeed
so as to understand
so as to clarify
so as not to bore you
with a view to finishing
in conclusion

SECTION

B

Functions

IV Exposition

56 Referring to people, things and places

56.1

Physical characteristics

The simplest way to describe someone or something is to use **être + adjective**:

Il est grand et beau comme au cinéma.

He's tall and handsome like a film star.

or **être + noun phrase introduced by de**.

Mais non! Il est de taille moyenne et d'une laideur indescriptible.

No! He's average height and indescribably ugly.

Many adjectives may be used to describe hair, eyes, etc. Note that compound adjectives of colour such as **châtain foncé** or **gris vert** and some nouns like **marron** are invariable in French:

Elle est grande, mince, aux yeux marron, aux cheveux bouclés châtain clair. (See 9.4b)

She's tall, thin, with brown eyes and light brown curly hair.

The definite article or **avoir + definite article** are used to refer to parts of the body:

Comme il est mignon ... tu crois qu'il va garder les yeux bleus?

(See 9.4b)

He's a little darling! Do you think he'll keep his blue eyes?

A la suite de sa chute, elle avait l'épaule démise et les deux jambes dans le plâtre.

After she fell she had a dislocated shoulder and both legs in plaster.

But note that the indefinite article is also used, in particular when the adjective precedes the noun:

T'as d'beaux yeux, tu sais! (See 11.2)

You've lovely eyes, you know!

Mère-grand, comme vous avez de grandes dents!
What big teeth you've got, Grandmother!

Prepositions such as **à** or **avec** may also be used:

Comme je voudrais avoir une petite fille à la peau blanche comme la neige, aux lèvres rouges comme le sang et aux cheveux noirs comme l'ébène! (See 9.4b)

How I would love a little girl with skin as white as snow, lips as red as blood, and hair as black as ebony!

La serveuse au teint blême et à la chevelure blonde lui rendit sa monnaie.

The waitress with the pale face and the blonde hair gave him his change.

In the following lines – featuring **avec** – from a well-known French song, note how physical characteristics are emphasized by the possessive adjectives **ma**, **mes** which are used to paint a complete portrait – body and soul!

*Avec ma gueule de métèque, de juif errant, de pâtre grec et mes cheveux aux quatre vents,
Avec mes yeux bleus délavés qui me donnent l'air de rêver moi qui ne rêve plus souvent,
Avec mes mains de maraudeur, de musicien et de rôdeur qui ont pillé tant de jardins,
Avec ma bouche qui a bu, qui a embrassé et mordu sans jamais assouvir sa faim ...*

(Moustaki)

With my foreign face – a wandering Jew and peasant Greek –
unruly hair
And pale blue eyes and dreamer's gaze – but I don't dream much
any more
My thieving hands – musician's hands – my plundering hands
My greedy mouth has tasted wine – and flesh – a thirst that's
never satisfied ...

When describing an object, use **c'est, il s'agit de** 'it's, it's for' with verbs such as **se servir de** 'to use' in relative clauses such as **qui sert à, qui est utilisé pour** 'which is used for', **dont on a besoin lorsque** 'which you need when', **que l'on utilise pour** 'which you use for':

C'est un petit outil, avec un manche, dont on se sert pour visser et dévisser.

It's a small tool with a handle (which you use) for tightening or loosening screws.

Il s'agit d'un ustensile de cuisine percé de petits trous qui permet par exemple d'écumer un bouillon.

It's a kitchen utensil with small holes which you can use for skimming stock, for example.

56.2

Personality

Once again, many adjectives or past participles are used following **avoir** + noun or **être** in order to describe someone's qualities:

Mademoiselle Frain a toujours été ponctuelle et conscientieuse dans son travail. Elle a une personnalité enjouée qui facilite le contact avec la clientèle.

Miss Frain has always been punctual and conscientious in her work. She has a cheerful personality which makes for good customer relations.

or defects:

Si vous voulez mon avis, il est prétentieux et a un comportement paternaliste avec les secrétaires qui ne me plaît pas du tout!

If you want my opinion, he's a pretentious man and behaves in a paternalistic manner towards the secretaries which I don't like one little bit.

Note how the article is sometimes omitted, for example before expressions involving **bon** or **mauvais**:

Il est bon vivant mais a aussi très très mauvais caractère.

He's a nice guy but he can also be very bad-tempered.

Avoir + air may be used in two ways:

(a) **avoir un air** + adjective 'to look' + adjective:

Elle a toujours un air condescendant, ça m'énerve!

She always looks condescending, it really annoys me!

(b) **avoir l'air** + adjective (**sembler** + adjective) 'to seem' + adjective:

Ils ont l'air plutôt sympathique(s) tes copains!

Your friends seem quite nice guys.

Note the agreement of the adjective in the previous example – with **air** or **Ils/copains**.

56.3

Relationships

When introducing yourself or someone else, you may want to refer to personal and social relationships, or professional relationships.

- (a) For personal and social relationships use **être** + adjective or past participle, or a noun phrase:

Mon frère est marié, ma sœur est divorcée et moi, je suis encore célibataire.

My brother's married, my sister's divorced, and I'm still single.

Elle est mère de famille depuis peu. (See 10.1b)

She recently became a mother.

Note that most of these adjectives and past participles may be used as nouns:

Lui, c'est un célibataire endurci, et elle une femme mariée.

He's a confirmed bachelor and she's a married woman.

Avoir may be combined with expressions such as **à charge** or **à + infinitive**:

J'ai deux enfants à charge.

I have two dependent children.

Il avait six enfants à nourrir.

He had six children to feed.

- (b) In order to state your identity, you may simply give your name, or give it following an appropriate verb:

Jean-Paul Murat.

Je m'appelle Alice Mirabeau et vous êtes ...?

My name is Alice Mirabeau and you are ...?

In order to introduce someone else, again simply state the name. In a fairly informal situation, you can add **c'est** or **voilà**:

Laurence, viens voir ... tiens, c'est Jacques et Cyrille. (See 13.5a)

Laurence, come and see ... look, it's Jacques and Cyrille.

Bernard, un vieux copain d'école ... et voilà Camille et Béatrice.

Bernard, an old school friend ... and this is Camille and Béatrice.

You can make clear exactly what the relationship is using a possessive adjective (see 14):

Ma fille, Bernadette.

My daughter, Bernadette.

Mon collègue, Frédéric Rolland.

My colleague, Frédéric Rolland.

In a more formal situation, introductions might be slightly more complex and include the verb **présenter** 'to introduce':

Madame Moreau, je vous présente Monsieur Detrait.

Madame Moreau, let me introduce Monsieur Detrait.

You may also use polite verbal expressions, combined with expressions in apposition or relative clauses in order to be more specific about occupation or circumstances . . .

J'ai le plaisir de vous présenter Mlle Lamie, journaliste au 'Monde'.

It is my pleasure to introduce Mlle Lamie, a reporter with 'Le Monde'.

Permettez-moi de vous présenter Luc Bessonier, du service relations publiques.

Allow me to introduce Luc Bessonier of Customer Relations.

Puis-je vous présenter mes parents, qui viennent d'arriver à Londres et ne parlent pas un mot d'anglais.

May I introduce my parents who have just arrived in London and don't speak any English.

(c) Occupations may be given by simply using **être** + noun without an article (see 10.1b):

Vous êtes avocat, n'est-ce pas?

You're a lawyer, aren't you?

Je suis directeur du marketing et ma femme est directrice des ressources humaines dans la même société.

I'm the marketing manager and my wife is director of personnel in the same company.

In the previous example, note how the definite article (**de + le > du, de + les > des**) has to be used after **directeur/directrice**. But keep in mind that a number of nouns used for professions have no feminine form (see 16.5).

J'ai deux sœurs, il y en a une qui est professeur et l'autre ingénieur.

I have two sisters. One's a teacher and the other's an engineer.

Many other verbs and verb phrases are available such as **travailler** 'to work', **être chargé de** + infinitive, **être responsable de** + noun 'to be responsible for', and many different prepositions (see 55) can be used – depending on what follows:

chez is used with proper names – of organizations or people:

Maintenant, il travaille chez Peugeot mais avant, il était chez Chaumont & Frères à Loches.

He works for Peugeot now but he used to be with Chaumont & Frères in Loches.

dans is used with sectors or organizations – when the name is not specified:

Elle aurait voulu entrer dans l'enseignement et voilà qu'elle se retrouvait employée dans une banque du centre-ville.

She would have liked to go into teaching, but she's working in a bank in the centre of town.

à is used with names involving a definite article, with institutions and also in order to be specific about departments within a company, for example:

Ma belle-sœur est responsable des achats à Marks & Spencer et mon frère travaille à la Mairie, au Département de l'Etat Civil.

My sister-in-law is head buyer for Marks & Spencer and my brother works for the local authority in the Registry Office.

Naturally, these prepositions are often combined in one statement:

Je suis chargée d'organiser les expéditions dans une grande société d'informatique, au service exportation.

I'm in charge of dispatching goods in a big computer company, in the export department.

Age

Avoir is used to give precise details of age. Do not forget **ans** after the number:

Catherine a deux ans et trois mois.

Catherine is 2 years and 3 months (old).

Il aura trente-cinq ans en l'an deux mille.

He'll be 35 in the year two thousand.

With other verb phrases you can be less precise:

Ma fille vient d'avoir quinze ans et mon fils va sur ses douze ans.

My daughter has just turned 15 (had her fifteenth birthday) and my son is almost 12.

Nouns may also be used to give an indication of age without being precise:

C'est un octogénaire très dynamique!

He's a very lively 80-year-old!

A mon avis, elle a une quarantaine d'années. — Tu plaisantes! Je dirais plutôt la cinquantaine bien tassée.

In my opinion, she's almost 40. — You must be joking! She's well past 50.

Verbs such as **être, paraître** may be combined with adjectives and past participles such as **jeune, âgé**:

Il paraît très jeune pour être PDG (Président-Directeur Général) de l'entreprise!

He seems very young to be Chairman and Managing Director of the company!

Note that the adjective or past participle is sometimes omitted, in particular in comparative expressions:

Entrée gratuite pour les enfants (âgés) de moins de cinq ans.

Admission free for children under 5.

It is useful to be able to talk or write about age groups, for example when analysing an age pyramid. There are various ways of doing it:

You can use **âgé de ... à**:

les générations 1915–1919, âgées de 68 à 72 ans au 1er janvier 1988

the generations born between 1915–1919, aged from 68 to 72 on 1st January 1988

or **avoir entre ... et**:

les générations ayant actuellement entre 15 et 35 ans.

the generations in the present age-band 15 to 35.

or **à** or **de** and a hyphen between the two age limits:

A 70–74 ans, il ne reste que 70 hommes pour 100 femmes et, à 80–84 ans, seulement 50.

In the age group 70–74, there are now 70 males for 100 females and in the age group 80–84, only 50.

19% pour les femmes de 21–24 ans et 17% pour les hommes de 24–29 ans

19% for females in the age group 21–24 and 17% for males in the age group 24–29

and use the definite and partitive articles with comparative forms or age bands:

Au recensement de 1954, les plus de dix ans forment une pyramide d'un genre nouveau, en forme de 'meule de paille' (l'effectif des

10–19 ans étant moins nombreux que celui des 20–29 ans), mais les moins de 10 ans, nés du baby boom, sont nettement plus nombreux. Au dernier recensement (1982), enfin, la pyramide tout entière a cette forme de meule de paille, *la part des 20–29 ans à peu près à égalité avec celle des 10–19 ans, est nettement supérieure à celle des 0–9 ans, marquée par la baisse récente de la fécondité.*

(Vallin, J. (1989) *La Population française*, Paris: La Découverte)
 In the 1954 census, the number of children over 10 influenced the profile of the age pyramid (the proportion of those between 10 and 19 was lower than the proportion of those between 20 and 29), but there was a significant increase in the number of those under 10, born during the baby boom. Finally, in the last census (1982), the age structure (pyramid) of the population had changed completely, with the proportion of those aged between 20 and 29 at almost the same level as those aged between 10 and 19, but significantly higher than the numbers of children under 9, caused by the recent downward trend in fertility rates.

56.5

Ownership

(a) A simple way to refer to what someone owns is to use a verb such as **avoir** or **posséder**:

Il a un appartement à Paris et une résidence secondaire en province.

He has a flat in Paris and a second home in the country (provinces).

La famille de Lisieux a perdu peu à peu tous les terrains qu'elle possédait autrefois.

The Lisieux family gradually lost all the land it used to own.

Note that sometimes you have to use **de** after the verb when the quantity is indefinite:

Son fiancé a de l'argent et pas mal de terrain dans la région. (See 11)

Her fiancé has (some) money and quite a bit of land in the area.

Mère-grand, comme vous avez de grandes oreilles! (See 11.2)
 What big ears you've got, Grandmother!

Other verb phrases, involving **être** in particular, may be used:

Elle est depuis peu possesseur d'une immense fortune.
 She's recently inherited a large fortune.

In the previous example, note that **possesseur** has no feminine form. (See 16.5):

L'antiquaire était détenteur de nombreux objets volés.

The antique dealer had a lot of stolen goods in his possession.

Monsieur le Procureur, ces documents sont désormais en notre possession.

Your Honour, the documents are now in our possession.

C'est is used to introduce a reference to ownership, followed by various phrases such as **à moi, à toi . . . , or de mes, de tes . . . , or mon propre, ton propre . . .** (see 14):

C'est à vous ces beaux yeux-là? (See 13.5a, 15.2)

Are they yours, those beautiful eyes?

Aussi incroyable que cela puisse paraître, c'est un de mes cadeaux de mariage!

Unbelievable though it may seem, it's one of my wedding presents!

Mais non! C'est ma propre brosse à dents!

No! It's my own toothbrush!

(b) In some of the above examples, the possessive adjectives **mon, ton . . .** are included (see 14). These and possessive pronouns **le mien, le tien . . .** 'mine, yours . . .' are frequently used to express ownership (see 15.1):

Il a vendu tous ses vieux disques.

He has sold all his old records.

Sur cette photo, vous voyez mon mari et moi-même, notre maison en arrière-plan, et ici nos chiens.

In this photo, you can see my husband and me, our house in the background, and here are our dogs.

C'est ma chambre à moi et je veux que tu enlèves tous tes jouets de là!

(See 13.5a)

It's *my* room and I want you to take all your toys out of it!

Après la réunion, les directeurs sont partis dîner avec leurs femmes (or leur femme).

After the meeting, the managers went for dinner with their wives.

Tu crois que son horloge est à l'heure?

Do you think his/her clock is right?

N'oublie pas ton bonnet et ton écharpe!

Don't forget your cap and your scarf!

Note that **son/ton**, and **not sa/ta**, are used with **horloge** and **écharpe** (feminine

nouns) because they begin with a mute h/vowel. (See 4.1, 14.1a).

The possessive adjective is not always repeated with a list of nouns (see 14.1c):

Veuillez indiquer vos nom, prénoms, titres et qualités sur ce formulaire.

Please enter your name, first names, titles and occupation on this form.

To avoid repetition a possessive pronoun may also be used:

Ton nouveau sac ne me plaît pas, le mien est beaucoup plus pratique.
I don't like your new bag. Mine is much more practical.

Le matin, je prends ma voiture et mon mari prend la sienne.
In the mornings, I take my car and my husband takes his (one).

Leur maison est plus grande que la sienne.
Their house is bigger than his/hers.

Nos enfants sont turbulents mais les leurs sont encore pires! (See 15.1b)
Our children are rowdy, but theirs are worse!

Note the difference between **les leurs** (possessive pronoun) in the previous example and **les leur** (personal pronouns) in the following one:

J'ai reçu les photos, tu les leur montreras? (See 19, 21.4)
I've got the photos. Will you show them to them?

In some expressions, the article may be dropped before the possessive pronoun:

C'était une petite maison sans cachet, elle la fit sienne en y disposant tous ses bibelots.

It was an ordinary little house, but she made it hers once she had arranged her own things in it.

(c) Within a noun phrase, ownership may be expressed using **de** (and **du**, **de la**, **des**, **d'**, **de l'**) (see 9):

Le manteau de Patrick est resté dans la classe.
Patrick's coat is still in the classroom.

L'instituteur a relevé les cahiers des élèves.
The teacher took in the pupils' notebooks.

Le passeport de l'immigré était en règle.
The immigrant's passport was in order.

On n'a pas retrouvé le permis de conduire de l'étudiante.
They/We haven't found the student's driving licence.

Note that in these four examples, the **de** structure could be replaced with a possessive adjective:

L'instituteur a relevé *leurs* cahiers.

Son passeport était en règle.

However, if the possessor is an inanimate object or thing as in the following example

Il est allé consulter le cadastre *de la Mairie*.

He went to check in the land register in the Town Hall.

then a change of structure will involve a change of personal pronoun:

Il est allé à la Mairie pour *en* consulter le cadastre.

He went to the Town Hall to check in the (its) land register.

The combination **de mon, de ton ...** is also used, in particular after an indication of quantity

Trois *de mes* fichiers ont disparu!

Three of my files have disappeared!

and the combination **de + possessive pronouns du mien, du tien ...** 'of mine, of yours ...':

Mon tracteur est en panne; les propriétaires de la ferme voisine m'ont prêté un *des leurs*.

My tractor has broken down; the owners of the neighbouring farm have lent me one of theirs.

(d) The preposition **à** has to be used with certain verbs such as **appartenir** 'to belong'

Cette voiture appartient à mon frère.

This car belongs to my brother.

or replaced, when appropriate, with a personal pronoun:

Cette voiture lui appartient.

This car belongs to him/her.

The preposition **à + emphatic pronoun** may also be used with **être** (see 13.5a, 15.2):

A qui est ce livre? — Pas à nous, Monsieur. Il est à Paul.

Whose is this book? — Not ours, Sir. It's Paul's.

Tout ce qui est à moi est à toi.

Everything that's mine is yours.

A qui sont ces vêtements? — Le manteau est à lui et les gants sont à elle.

Who do these clothes belong to? — The coat is his and the gloves are hers.

In the spoken, rather than written, language and to emphasize ownership or avoid any ambiguity, the following forms may be found:

Touche pas, c'est ma poupée à moi!

Don't touch, it's my doll!

Tu veux dire qu'il a pris sa Jaguar? — Non, il a pris sa voiture à elle, la Clio.

You mean he's taken his Jaguar? — No, he's taken her Clio.

- (e) Before parts of the body or items of clothing – where English uses the possessive adjective – French uses the definite article (see 9.4):

Je voudrais que tu te laves *le visage* et *les mains*, et que tu te brosses *les dents* et *les cheveux* avant de partir.

I'd like you to wash your face and hands, and brush your teeth and hair before you leave.

Levez *la main* droite et dites 'Je le jure ...'

Raise your right hand and repeat after me, 'I swear ...'

Il se tenait là, *les mains* dans *les poches*.

He was standing there with his hands in his pockets.

However, this is not a hard and fast rule and there are many exceptions to it, in particular when you want to emphasize possession or ownership:

J'ai posé *ma main* sur *mon cœur*.

I put my hand on my heart.

or when the part of the body is qualified:

Le bébé a ouvert *ses grands yeux bleus*.

The baby opened his/its big blue eyes.

or to avoid ambiguity. For example, compare:

Donne-moi *la main* pour traverser la route.

Give me your hand to cross the street.

and

Donnez-moi *votre main*, je vais examiner la blessure.

Give me your hand (the one that's hurt), I'm going to examine the injury.

It is worth noting the difference in the use of the reflexive pronoun in **se laver le visage et les mains, se brosser les dents ...** and also in the following example:

Rassurez-vous, vous ne *vous* êtes pas cassé *le poignet*. (See 20, 47)

Don't worry, you haven't broken your wrist.

and the use of the indirect object pronoun in the following example to indicate that an action affects someone other than the subject of the sentence:

Elle nous a serré la main en arrivant.

She shook our hands when she arrived.

Sa mère lui a brossé les cheveux avant qu'il parte.

His mother brushed his hair before he left.

(f) Finally, note that the meaning of some verbs and nouns allows you to refer more specifically to the action leading to ownership, for example:

La famille s'est approprié cette terre qui me revenait de droit.

The family took over this land which was rightfully mine.

Que penses-tu de ma dernière acquisition?

What do you think of my latest acquisition?

— 56.6 —

Dimensions (see 27)

Specific verbs may be used in order to refer to length, width, depth, height, thickness, size, surface area, capacity, etc., e.g. **mesurer, chausser, faire**.

Cette planche mesure 2 mètres.

This plank is 2 metres long.

Il mesure un mètre quatre-vingts et pèse quatre-vingt-quinze kilos.

He's 6 foot tall and weighs 13 stone.

Je chausse du 38.

I take a (size) 38 shoe.

The verb **faire** is often used to refer to dimensions and size:

La corde fait 3 mètres.

The rope is 3 metres long.

Ma cousine fait un mètre soixante-quinze.

My cousin is 5 foot 10.

En chaussures de ski, je fais du 40.

I take a 40 in ski boots.

La piscine fait 4 mètres.

The swimming-pool is 4 metres deep.

In the absence of context for the previous example, you might need to specify that you are referring to depth (as opposed to length, for example) and the structure used requires **de**:

La piscine fait 25 mètres de long(ueur) et 2 mètres de profondeur.

The swimming-pool is 25 metres long and 2 metres deep.

In the case of length, width and height (*not* depth), an adjective can be used instead of the noun, after **de**:

Cette pièce fait 3 mètres de haut(eur).

This room is 3 metres high.

After the object being described, you have to use **de** again:

C'est un petit chemin d'environ 2 kilomètres.

It's a small road about 1½ miles long.

Il a une cicatrice de 10 centimètres sur la jambe.

He has a 4-inch scar on his leg.

Similarly, when the noun expressing dimension is subject of the verb **être**, you need to use **de**:

Mesdames et messieurs, notre altitude est actuellement de 5000 mètres.

Ladies and gentlemen, we are flying at (an altitude of) 5,000 metres.

La profondeur de ce puits est d'environ 10 mètres.

This well is about 10 metres deep.

The same applies after using an adjective of dimension:

Le réseau routier danois est long d'environ 70 900 km.

The road network in Denmark totals some 70,900 km.

Different prepositions such as **à**, **de**, **par** + definite article can be used to refer to different methods of measurement (see 56.12):

Examples with **à**:

Les experts ont mesuré la profondeur du lac à la sonde.

The experts have measured the depth of the lake with a sounding line.

Le maçon vérifie son travail au niveau à bulle.

The mason checks his work with a level.

Note that if you use an alternative expression such as **à l'aide de**, the definite article becomes indefinite:

La profondeur a été mesurée à l'aide d'une sonde.

Il vérifie son travail à l'aide d'un niveau à bulle.

Examples with **de** and **par**:

L'ayant mesurée des yeux, il sut tout de suite qu'elle serait trop grande pour le rôle.

He looked her up and down and knew right away that she would be too tall for the part.

Les résultats ont été estimés par l'observation et vérifiés par le calcul.

The results were assessed by (further) observation and verified by calculation.

Finally, note the use of reflexive verbs combined with prepositions (*à* + singular, *en* + plural) to indicate the unit of measurement:

Chez nous, les pommes se vendent au kilo et le cidre au litre.

In our country, apples are sold by the kilo and cider by the litre.

Suivant leur importance, les terrains se mesurent en mètres carrés ou en hectares.

Depending on their size, areas of land are measured in square metres or hectares.

Quantity and number (see 28, 24)

When you want to be precise about quantity and number, you use cardinal numbers. In the following examples, note certain small changes, in particular in the spelling of *cent* and *vingt* (see 24.5b):

Il y a trois cent soixante-cinq jours dans l'année.

There are 365 days in the year.

Sur quatre cent cinquante étudiants inscrits en première année d'anglais, quatre-vingts passeront en deuxième année.

Of 450 students registered in first year English, 80 will go into second year.

Le chiffre d'affaires du Groupe est d'environ trois cents millions de francs, dont quatre-vingt-dix millions représentent les ventes à l'étranger. (See 24.8)

The Group's turnover is approximately 300 million francs, of which 90 million represent exports.

When you do not need to be so precise, nouns such as **dizaine**, **centaine**, **millier** may be used (see 26):

J'ai une vingtaine de livres de cuisine.

I've got about twenty cookery books.

Des amis? Il s'en fera des centaines.

Friends? He'll make hundreds of them.

Plusieurs milliers de personnes ont assisté au match.

Several thousand people were at the match.

If you want to rank things, or express fractions, use ordinal numbers – **premier, deuxième, dixième, centième** . . . (see 24.10–24.12).

(a) as adjectives:

Attention, les deux premiers barreaux de l'échelle sont cassés.

Careful, the first two rungs of the ladder are broken.

Note the order of numbers in the previous example.

C'est le cinquième pays le plus riche du monde.

It's the fifth richest country in the world.

Note the place of the superlative adjective in the previous example (see 17.12).

The following example illustrates the use of **premier** (*not un*) in dates:

Le congrès a lieu le premier ou le deux juin? (See 24.7a)

Will the conference take place on the first or second of June?

(b) as nouns, with an article (or a possessive adjective for riddles!):

C'est le quatrième à se plaindre au chef de rayon, nous devons intervenir! (See 24.12)

He's the fourth to complain to the departmental manager. We'll have to do something.

Mon premier est l'opposé de rien, mon second est un oiseau réputé voleur, mon tout est un jouet! (See 24.12)

My first is the opposite of nothing. My second is a bird that's a well-known thief. I'm a toy.

Je n'ai fait qu'un quart de mon travail. (See 25)

I've only done a quarter of my work.

Les îles représentent un cinquième de la superficie totale de la Grèce. (See 25)

The islands comprise about one fifth of the total land area of Greece.

(c) Difficulties can arise with collective expressions of quantity (for example, **la moitié** 'half') and with fractions (for example, **les deux tiers** 'two thirds') when they are part of the subject of a verb, because you have to decide whether the verb should be singular or plural (see 29.3–29.4):

Plus de la moitié des personnes interrogées se sont déclarées favorables au projet.

More than half of the people questioned said they were in favour of the project.

La moitié des élèves a opté pour le voyage en Angleterre, l'autre moitié pour le voyage en Allemagne.

Half of the pupils have chosen the trip to England, and the other half the trip to Germany.

In the previous example, the emphasis is on the quantity (**la moitié**) and therefore the verb agrees with the singular noun.

Les quatre cinquièmes du budget ont été absorbés.

Four-fifths of the budget have been spent.

Une bonne partie du budget a été absorbée (or absorbé).

A considerable part of the budget has been spent.

You often have the choice of focusing on the complement (here – **budget**) or on the quantity (**une bonne partie**) and have to make the verb agree with the subject. In this example the feminine past participle indicates focus on the quantity. This applies to many expressions such as **le plus grand nombre**, **un certain nombre**, **une partie**, **la majorité**, **la plupart**. The noun following them can often be considered as the subject in terms of gender and number (see 29.3, 29.4):

La plupart des Grecs appartenaient à l'Eglise chrétienne orthodoxe.

The majority of Greeks belong to the Greek Orthodox Church.

(d) Other ways of expressing fractions of a whole include the use of **sur** or **dont**:

Un Allemand sur quatre travaille pour l'exportation.

One in every four Germans is employed in the export sector.

Le Danemark comprend 483 îles, dont 100 environ sont habitées.

Denmark has approximately 483 islands of which about 100 are inhabited.

You may need to express quantity and numbers when referring to an illustrative document such as a table. The following table contains information from the 1982 census in France:

<i>Taille des unités urbaines</i>	<i>Nombre de communes</i>	<i>Nombre d'unités urbaines</i>	<i>Population (en milliers)</i>	<i>Part de la population totale (%)</i>
Unités urbaines				
Agglomération parisienne	335	1	8 707	16,0
Plus de 100 000 hab.	1 078	56	15 142	27,9
10 000 à 100 000 hab.	1 413	365	9 947	18,3
Moins de 10 000 hab.	2 062	1 360	6 079	11,2
Total unités urbaines	4 888	1 782	39 875	73,4
Communes rurales	31 545	—	14 460	26,6
TOTAL	36 433	(1 782)	54 335	100,0

You may simply want to draw attention to some of the numbers presented in the table:

Le nombre total de communes s'élève à 4888. (When reading this aloud, you say **quatre mille huit cent quatre-vingt-huit.**)
The total number of (urban) communities is 4,888.

Il y a 1413 communes de 10000 à 100000 habitants. (and you say **quatorze cent treize** or **mille quatre cent treize/dix mille à cent mille**)

There are 1,413 districts with a population of 10,000 to 100,000.

Note that you do not use a comma, but leave a space – except for dates, 1995 – in big numbers. However, you do use a comma before decimal points:

26,6% de la population totale vit dans des communes rurales.
(and you say **vingt-six virgule six pour cent**)
26.6% of the total population lives in rural communities.

In the above example, **population** is taken as the subject of the verb **vivre**, so the verb is singular. If you place the emphasis on the percentage, you have a plural verb:

26,6% de la population vivent dans des communes rurales.

When describing a table, one of the difficulties lies in transferring numbers from written to spoken form. Here, for example, when using the fourth column **Population en milliers**, you would write **8,707 millions** and you would say

Huit millions sept cent sept mille personnes vivent dans l'agglomération parisienne.

Eight million seven hundred and seven thousand people live in Paris and its suburbs.

Another way of dealing with the numbers, and less precisely than the version above, would be the following (note the addition of **de** in this case after the noun **millions**):

Près de neuf millions de personnes vivent dans l'agglomération parisienne.

Almost nine million people live in Paris and its suburbs.

An alternative adverb for **près de** is **environ**:

Environ huit millions et demi de personnes vivent dans l'agglomération parisienne.

Around eight and a half million people live in Paris and its suburbs.

Finally, if the unit indicated in brackets at the top of a column of four figure numbers were **en millions**, you would say the number in **milliards** 'billions':

Accroissement prévu de la population mondiale en l'an deux mille et en l'an deux mille vingt-cinq

		<i>Population (en millions)</i>
2000	6 000	
2025	8 000	

Expected increase in world population: *6 billion* in 2000 and *8 billion* in 2025.

Another useful way of expressing numbers consists of using brackets when writing:

Outre l'agglomération parisienne très peuplée (8 700 000 habitants), 56 agglomérations hébergent près de 20 millions de François.

In addition to the densely populated area of Paris and its suburbs (8,700,000 inhabitants), 56 other suburban areas have a population of 20 million.

56.8

Quality

- (a) When referring to the quality or distinguishing features of something, you can use the verb **être** + adjective or **être + de** + noun phrase:

En Allemagne, 43% des habitants sont protestants et 43,3% de confession catholique romaine.

In Germany, 43% of the population are Protestants and 43.3% are Roman Catholic.

or simply **être** + noun:

La France est une république.

France is a republic.

The verb **être** also features in a number of expressions where it is combined with past participles, e.g. **être marqué par**, or nouns, e.g. **être un exemple de**:

Le relief de L'Espagne est marqué par une alternance entre les chaînes de montagne et les vallées fluviales. (See 48)

The Spanish landscape is characterized by alternating mountain chains and river valleys.

Madrid est un exemple unique des différentes cultures qui ont laissé leurs traces en Espagne.

Madrid is a unique example of the different cultures which have left their mark on Spain.

Particulièrement riche, la peinture espagnole de l'époque baroque est exceptionnellement bien représentée au musée du Prado.

The glory of Spanish baroque painting is exceptionally well represented in the Prado.

Note how the pair adverb + adjective (**particulièrement riche**) in apposition to **la peinture espagnole** also contributes a distinguishing characteristic of Spanish baroque paintings. See also 56.2 to refer to a person's qualities.

- (b) A number of reflexive verbs are used with the preposition **par** such as **se caractériser par**, **se distinguer par**:

La Grèce se caractérise par le contraste entre de hautes montagnes et les eaux bleues de la Méditerranée. (See 48.4)

Greece is characterized by the contrast between high mountains and the blue waters of the Mediterranean.

- (c) Many transitive verbs, that is, verbs with a direct object, may be used such as **présenter**, **posséder**. Note the place of the adjectives in the following example:

La France présente une grande diversité de paysages et possède un riche patrimoine historique et culturel.

France has a wide diversity of landscapes and a rich historical and cultural heritage.

- (d) The passive form is often used when describing a system or a procedure and referring to quantity and quality (see 48):

En Grèce, le pouvoir législatif est exercé par le Parlement et par le président de la République. Les 300 membres du Parlement, sauf 12 d'entre eux, sont élus au suffrage universel direct [...]. Les 12 députés d'Etat sont désignés par les partis politiques.

In Greece, legislative power is exercised by the parliament and by the President of the Republic. The 300 members of parliament are elected by direct universal suffrage, except for 12 who are appointed by the political parties.

— 56.9 —

Comparison (see 17.11)

- (a) You can compare two different objects in terms of one quality:

La chaise est plus haute que le banc.

The chair is higher than the bench.

or two different qualities in one object:

Le jardin est plus long que large.

The garden is longer than it is wide.

The comparative forms **plus** or **moins**, which express inequality, are often used with adjectives, as in the two previous and the two following examples:

Je suis plus grande que lui.

I am taller than he is.

Il est plus petit que moi.

He is smaller than I am.

and with adverbs:

Paris est moins loin que Lyon.

Paris is not as far as Lyons. (or Paris is less distant than Lyons.)

Lyon est moins près que Paris.

Lyon is less near than Paris. (or Lyon is not as near as Paris.)

or with nouns:

Il a montré plus de culot que de talent.

He's demonstrated more cheek than talent.

Il a montré moins de talent que de culot.

He's demonstrated less talent than cheek.

In order to express total superiority or inferiority, you use superlative forms (see 17.12):

Ne va pas traîner par là, c'est un des quartiers les plus pourris de la ville.

Don't hang around there, it's one of the worst parts of the city.

Ne me provoquez pas, vous savez bien que de nous trois, je suis le plus fort et le moins bête!

Don't provoke me! You know very well I'm the strongest and the least stupid of the three of us.

C'est l'élève le moins assidu de tous.

He's the laziest pupil of the lot.

La France est le deuxième grand producteur de vin après l'Italie.

France is the second biggest producer of wine after Italy.

Je suis le meilleur en maths mais le dernier en anglais.

I'm top in maths but bottom in English.

In the previous example, note the use of the irregular form **meilleur** (see 17.13a) and also how you can compare or rank things using **le dernier**.

(b) Sometimes, you make a comparison to show equality, or similarity, using phrases such as **aussi ... que** with adjectives (see 17.11):

La chaise est aussi haute que le banc.

The seat is as high as the bench.

Le jardin est aussi large que long.

The garden is as broad as it's long.

or with adverbs:

Je cours aussi vite que lui.

I can run as fast as him.

or with nouns. Here, you can use a verb **être, avoir, faire ... + article + même + noun** (see 27.2):

Le banc et la chaise sont de la même hauteur.

The bench and the chair are the same height.

Ma mère et moi faisons la même taille.

My mother and I are the same size.

Ces deux supermarchés sont à la même distance de chez moi.

These two supermarkets are the same distance away from where I live.

Ils ont le même costume.

They've got the same suits.

When referring specifically to equal *quantity*, use **autant de ... que**:

Elle a autant de livres que son frère.

She has as many books as her brother.

(c) Other ways of comparing include:

- using prepositions in phrases such as **à la manière de**, **à la façon de** to emphasize similarity:

Elle traversa la pièce en ondulant, à la manière d'une lionne.

She went slinking across the room like a lioness.

or **contrairement à**, **à la différence de** to emphasize difference:

Contrairement à son frère, Jacques ne s'intéressait pas aux femmes.

Unlike his brother, Jacques was not interested in women.

- using conjunctions such as **comme**, **ainsi que**, **de même que** for straightforward comparison (see 17.11d):

Il est stupide, comme sa sœur d'ailleurs!

He's stupid, just like his sister!

Il travaille la terre ainsi que l'ont fait son père et son grand-père avant lui.

He works on the land, like his father and grandfather before him.

- using **d'autant plus/moins ... que** or **plus/moins ... plus/moins** in order to indicate proportional comparison (see 17.11):

Il semblait que plus son frère réussissait, moins elle consacrait de temps à ses propres études.

It seemed as if the more her brother succeeded, the less time she spent on her own studies.

Cet homme est d'autant plus détesté qu'il est riche.

They hate the man even more because he is rich.

Sa trahison le rendait d'autant moins fier qu'il savait combien elle avait foi en lui.

His betrayal (of her) made him all the more ashamed because he knew how much she trusted him.

- using comparative or superlative forms with two clauses (see 17.11):

La société n'a pas autant de dettes qu'on voudrait nous le faire croire.

The company does not have as many debts as we've been led to believe.

Le dernier film de Besson est le meilleur que j'aie jamais vu. (See 46.6)

Besson's last (latest) film is the best I've ever seen.

In the following example, note the use of the expletive **ne**, in particular when writing (see 54.23), and note the difference between:

Depuis huit jours, elle ne boit pas plus qu'elle ne mange. (= elle ne boit, ni ne mange)

She hasn't eaten or drunk anything for a week. (She doesn't eat anything.)

and

Alcoolique? Non! elle ne boit pas plus qu'elle mange.

An alcoholic? No! She drinks as moderately as she eats. (She does eat something.)

Note that after superlative forms, it is possible to use the subjunctive or the indicative – the subjunctive to indicate uniqueness, the indicative to emphasize a fact:

C'est la plus belle femme que j'aie jamais vue! (See 46.6)

She's the loveliest woman I've ever seen!

C'est le plus jeune des enfants dont j'ai la garde.

He's the youngest child I have in my care.

- using adjectives such as **tel** (or the conjunction **tel que**), **identique**, **pareil**:

Elle se jeta sur lui tel (or telle) un tigre. (See 18.11)

She threw herself at him like a tigress.

In the previous example, **tel** agrees with **tigre**, **telle** with **Elle**.

Les deux frères étaient restés tels qu'elle les avait connus dix ans plus tôt.

The two brothers had stayed just as she had known them ten years earlier.

Ils ont des costumes identiques.

They have identical suits.

Le propre d'une cité pavillonnaire, c'est qu'une habitation est pareille à toutes les autres.

What is peculiar to a housing estate is that one house is the same as all the others.

- using verbs or nouns which express comparison through explicit meaning:

Dans sa construction, ce roman s'apparente à un film.

In the way it's constructed, this novel is like a film.

Tu crois qu'il ressemble à son père? Moi, je vois plutôt la ressemblance avec sa mère et je trouve qu'on reconnaît aussi le grand-père.

You think he's like his father? As far as I'm concerned, I see more of a resemblance to his mother and I think you can see a bit of his grandfather too.

— 56.10 —

Directions

(a) Typically, you have to give directions orally when someone asks you the way. Imperatives are often used for this (see 51):

Après la sortie d'autoroute, continuez tout droit jusqu'à la place Duval. Traversez cette place puis prenez la deuxième rue à gauche après le feu ...

After leaving the motorway, go straight ahead to the Place Duval. Go across the Place, then take the second street on the left after the lights ...

You can also use the future tense with **vous** or **tu** in order to divide the explanation into several stages:

Après la sortie d'autoroute, continuez toujours tout droit. Vous déboucherez dans le boulevard Heurteloup. Prenez à gauche jusqu'au bout. Vous laisserez l'hôtel de ville et le tribunal sur votre gauche. En arrivant sur la place centrale au bout du boulevard, vous apercevrez une sorte de tour, juste derrière les fontaines ...

After leaving the motorway, keep straight on. You'll come out in the Boulevard Heurteloup. Turn left and go right to the end. You'll pass the Town Hall and the Law Courts on your left. When you get to the main square at the end of the Boulevard Heurteloup, you'll see a sort of tower, just behind the fountains ...

Alternatively, it is not unusual in *spoken* French to switch between tenses, for example the present and the future, and to use **tu** or **vous** forms instead of the imperative:

Alors, pour le théâtre, tu continues toujours tout droit. Tu vas arriver dans le boulevard Heurteloup. Là, tu prendras à gauche et tu vas tomber sur l'avenue Pompidou ...

So, for the theatre go straight on. You'll get to the Boulevard Heurteloup. Turn left and you'll be in the Avenue Pompidou ...

Markers are often given using **il y a**:

Là, vous verrez, il y a un Monoprix qui fait l'angle ...

There, you'll see, there's a Monoprix on the corner ...

Tu vas prendre la direction Armentières, il y a environ deux kilomètres de voie rapide ...

Follow the directions for Armentières, there's about two kilometres of expressway ...

Expressions in apposition can be used to give detailed descriptions:

Vous déboucherez dans le boulevard Heurteloup, une grande avenue avec des marronniers ...

You'll come out in the Boulevard Heurteloup, a wide avenue with chestnut trees ...

Au feu, à gauche, jusqu'à la Mairie, une bâtie blanche avec des massifs de fleurs devant et la piscine à côté ...

At the lights, on the left, as far as the Town Hall, a white building with flowerbeds in front of it and the swimming-pool beside it ...

Finally, people often sum up what they have said, particularly when the explanations have been quite long and detailed. In the following example, note the language shortcuts – there is no verb and **rue** is dropped after **première**:

Donc, en sortant ici à gauche, première à droite, tout droit, tout droit, et encore à droite au feu.

So, you'll come out here on the left, first right, straight on, and another right at the lights.

And, if you're really stuck and you can't find your way, you can resort to:

S'il vous plaît, où est la réception?

Where is the reception desk, please?

Pardon, pour aller au Musée d'Orsay?

Excuse me, where is the Musée d'Orsay?

- (b) In writing, for example in a tourist guide, directions are often given using verbs in the infinitive. The following examples are taken from an Edinburgh tourist guide:

Comment vous rendre au musée? En voiture: *suivre la direction de l'aéroport d'Edimbourg puis les panneaux indiquant le musée.* En autobus et à pied: *prendre le n° 16 de la Compagnie Eastern Scottish. Descendre à l'arrêt Airport Interchange. Descendre les escaliers et emprunter le passage souterrain ...*

How to get to the museum? By car: go in the direction of Edinburgh Airport, then follow the signs for the museum. By bus and on foot: take the No. 16 Eastern Scottish bus. Get off at the Airport Interchange stop. Go down the steps and through the subway...

Alternatively, the present or future tenses, and/or impersonal verbs (see 53) can be used:

Vous pouvez également prendre l'autobus assurant la navette entre Waverley Bridge et l'aéroport.

You can also take the shuttle bus between Waverley Bridge and the airport.

Il est également possible de descendre à l'arrêt Norton Cottages mais il vous faudra alors traverser la route directement, ce qui est dangereux.

It's also possible to get off at the Norton Cottages stop but then you have to cross the road, which is dangerous.

Location

(a) A noun phrase or emphatic pronoun introduced by a preposition (see 55) is often used to indicate location, origin or destination:

Les enfants jouent dans le jardin.

The children are playing in the garden.

La Grèce forme une péninsule au sud de l'Europe.

Greece is a peninsula in southern Europe.

Ce matin-là, elle s'était assise à côté de lui dans le compartiment.
That morning, she'd sat beside him in the compartment.

Votre père revient d'Espagne demain mais il ira d'abord en ville avant de rentrer chez nous.

Your father's coming back from Spain tomorrow but he'll go into town first before he comes home.

Comme la route nationale est barrée entre Tours et Le Mans, nous faudra passer par les petites routes.

Since the main road between Tours and Le Mans is closed, we'll have to use the minor roads.

Sometimes, the preposition is dropped, for example in an address:

J'habite rue des Lilas depuis dix ans.

I've been living in the Rue des Lilas for ten years.

Ils ont été obligés de se garer place Grécourt.

They have had to park in the Place Grécourt.

In the following examples, note the use of the pronouns **y** and **en** instead of the complements (**en Ecosse** and **de chez eux**) (see 19.5, 19.6):

Si je connais l'Ecosse?! J'y ai vécu pendant douze ans et je m'y plaisais beaucoup.

Do I know Scotland? I lived there for twelve years and I liked it very much.

Inutile d'essayer de les appeler, j'en reviens, il n'y a personne.

No point trying to call them. I've just tried and there's nobody there.

Informal or colloquial use may lead to *misuse* of prepositions:

Elle est où ta sœur? Au coiffeur! (instead of ***chez le coiffeur***)

Your sister's where? The hairdresser's!

(b) Many adverbs and adverbial phrases indicate location:

Elle s'était amusée à cacher tous les livres de son frère, ici et là, au-dessus de l'armoire, sous les lits, derrière les tableaux, auprès des bouteilles dans le cellier et même dehors, en dessous des haies qui bordaient le jardin.

She had a great time hiding all her brother's books, all over the place – on top of the wardrobe, under the beds, behind the pictures, beside bottles in the wine-cellars, and even outside under the hedges round the garden.

Va donc voir ailleurs si j'y suis!

Get lost!

Colloquial use may lead to redundancies, especially with verbs of movement:

Maman, je sors dehors faire un foot!

Mum, I'm going out to play football.

Je vais descendre en bas chercher une autre bouteille.

I'm going down to get another bottle.

(c) Relative clauses with no antecedent are sometimes used to refer to location:

Va où le vent te mène, val (from a song by Branduardi)
Go where the wind takes you, go!

Tu le vois, là-haut? D'où il est, la vue doit être extraordinaire.
D'you see him up there? From where he is, the view must be
extraordinary.

and the structure **c'est + ici, là... que** for particular emphasis:

C'est ici que nous nous sommes rencontrés il y a vingt ans.
It was here we met twenty years ago.

C'est en Belgique que l'on trouve les meilleurs chocolats. (See
17.13a)
It's in Belgium that you get the best chocolates.

(d) Place names are obvious indicators of location, whether they are used on their own, e.g. countries, cities, or in noun phrases such as **la mer Egée** 'the Aegean Sea', **l'éléphant d'Afrique** 'the African elephant'. Note that the preposition **à** is usually used with countries of masculine gender and **en** with countries of feminine gender. When there is no gender, for example, **Chypre** 'Cyprus', **à** is normally used (see 9.4e):

J'ai vécu deux ans au Brésil, un an à Madagascar, trois ans en Bolivie et je suis aux Etats-Unis depuis six mois.

I lived in Brazil for two years, Madagascar for one, Bolivia for three, and I've been in the United States for six months.

The preposition **à** is also used with towns and cities. Do not forget to make the necessary changes when an article is part of the name:

Il pleut plus souvent à Glasgow qu'à Edimbourg.
It rains more often in Glasgow than in Edinburgh.

J'ai décidé de partir (pour) une semaine au Caire.
I've decided to go to Cairo for a week.

However, remember that there are numerous exceptions concerning the use of prepositions and countries (**en Iran** 'in Iran'), islands (**en Sardaigne** 'in Sardinia', but **à La Réunion**), departments and regions, and that in some cases more than one preposition may be used – even with cities – but in such cases the meaning is usually affected.

Des fourgons de police ont patrouillé dans Paris durant tout le week-end.

Police vans patrolled Paris the whole weekend.

Note how the definite article is dropped in some noun phrases involving place names:

Les vins de France se vendent partout dans le monde.
French wines are sold all over the world.

L'éléphant d'Afrique est différent de l'éléphant d'Asie.
The African elephant is different from the Indian elephant.

Note the difference in meaning, and different preposition, between:

Allô Paris! Je me trouve actuellement *dans* le nord de la France.
(Alternatively, with a capital letter: **Je me trouve *dans le Nord*** –
the name of the region)
Hello, Paris! I'm in the north of France at the moment. (present
location)

and

La Manche se trouve *au* nord de la France.
The Channel is on the northern coast of France. (permanent
state)

(e). In the previous example, there is a good illustration of a verb (**se trouver**) used to introduce location. There are others such as **se situer**:

Copenhague se situe sur l'île d'Amager.
Copenhagen is on the island of Amager.

Passive forms of these verbs, e.g. **être situé, localisé, orienté**, are also frequently used (see 48):

L'île de Sardaigne est située à l'ouest de l'Italie.
Sardinia is situated to the west of Italy.

La pente que tu aperçois est orientée au sud.
The hillside you can see is south-facing.

Naturally, points of the compass are frequently used to refer to geographical location

Les Pays-Bas s'étendent *du nord au sud* sur environ 300 km et *d'est en ouest* sur environ 200 km.
The Netherlands are approximately 300 km from north to south and about 200 km from east to west.

and sometimes they are combined:

Il n'y a de collines que dans les régions *du sud-est*. (See 54.21)
The only hills are in the south-east.

La ville de Cherbourg se trouve *au nord-ouest* de la France.
Cherbourg is in the north-west of France.

- (f) Finally, there is a series of nouns, and corresponding adjectives, which may also be used to indicate geographical location:

Cette année, nous ne passerons pas nos vacances dans le Midi.
This year we will not be spending our holidays in the Midi.

Le versant méridional des Alpes descend de façon abrupte jusqu'à la plaine du Pô.

On their southern side the Alps drop steeply to the Po plain.

— 56.12 —

Manner (see 54.1–54.7)

When referring to manner, that is, broadly answering the question 'How?' in relation to an action or event, it is useful to distinguish between (a) the means used to do something, (b) the manner in which something is done and (c) the presence or absence of other people or things during the action or event.

- (a) You may use a noun phrase or pronoun introduced by a preposition such as **à, avec, sans, de, au moyen de, à l'aide de** (see 56.6):

Tu trices à la main ou à la machine?
Do you knit by hand or do you use a machine?

Il s'est hissé jusqu'au sommet au moyen d'une corde.
He pulled himself to the summit by a rope.

Sometimes these prepositions occur within more complex structures, for example, in relative clauses:

Voici la lime avec laquelle il a scié les barreaux de sa cellule. (See 22.5)

Here's the file he used to saw through the bars of his cell.

A number of verbs may be used to refer to the means or methods used such as **user de, employer, utiliser, se servir de**:

Elle a usé de son charme pour s'introduire dans l'organisation.
She used her charm to get into the organization.

En employant la langue du pays, vous gagnerez la faveur de la population locale.

If you use their language, local people will love you for it. (See 50.6)

- (b) Again, the manner in which something is done may be stated using a noun phrase or a pronoun introduced by a preposition such as **sans, de, en, à**:

C'est sans enthousiasme que les ouvriers ont accueilli l'ordre de grève. (See 11.4)

The workers greeted the strike call without enthusiasm.

L'écrire, c'est bien mais je veux te l'entendre dire *de vive voix*. (See 54.4)

Writing it, that's fine, but I want to hear you say it.

Sometimes, there is no preposition – the parts of the sentences are simply in apposition:

Les passants observaient la scène, l'*air médusé*.

The passers-by watched what was going on dumbfounded.

In the previous example, note the use of the definite article **l'**. In some expressions it is omitted, and to be certain whether it is used or not, it is best to check in a dictionary.

Il est interdit d'entrer *jambes nues* dans les églises italiennes. (See 53)

It is forbidden to go into an Italian church with bare legs.

Note that the preposition **sans** is sometimes followed by an infinitive:

Il prit son manteau et sortit *sans dire un mot*. (See 52.4)

He took his coat and left without a word.

The gerund and the present participle will also allow you to state the manner in which something is done, with or without **en** (see 50.6):

Les candidats posent souvent cette question *en rougissant*.

Candidates often blush when they ask that question.

Elle continuait à monter, ses pieds cherchant appui sur les aspérités de la roche.

She continued to climb, her feet searching for footholds in the uneven surface of the rock.

Haussant les épaules, il rétorqua qu'il n'en savait rien.

Shrugging his shoulders, he replied that he knew nothing about it.

In the previous example, note that the complement of manner is in apposition. Adjectives or relative clauses may also be used in this way:

Courtois mais direct, le commissaire l'interrogea sur sa vie privée et ses activités nocturnes.

Polite but firm, the superintendent questioned him about his private life and what he did at night.

Regarde bien cette image: un des jeunes manifestants, qui brandit un bâton, se précipite vers les CRS (Compagnie Républicaine de Sécurité). (See 22.1)

Look carefully at this picture: one of the young demonstrators, who is wielding a stick, is running towards the CRS (riot police).

Many adverbs are available for referring to the manner of doing something:

Il parlait vite en la regardant fixement. (See 54)

He spoke quickly and he stared at her as he did so.

and a number of adjectives may be used as adverbs – and therefore become invariable (see 54). This is the case in set verb phrases such as **parler fort** ‘to speak loudly’, **chanter juste** ‘to sing in tune’, **voir clair** ‘to see clearly’.

Il me semble qu'elles ont visé un peu haut.

I think they've aimed a bit high.

But remember that new phrases of this type are constantly being created for particular stylistic effect. Thus, advertising has given us:

Les lessives qui lavent plus blanc! (= mieux?)

Washing powders that wash whiter (= better?)!

(c) Naturally, **avec** and **sans** are the main prepositions used to introduce a noun phrase or pronoun to indicate the presence, or absence, of another person or thing:

Je prends l'avion demain avec mes deux collègues.

I'm taking the plane tomorrow with my two colleagues.

Puisque c'est comme ça, j'irai sans toi!

OK! If that's how it is, I'll go without you!

Note that the article is sometimes omitted before the noun:

Cela fait du bien de partir en week-end sans enfants! (See 11.4)

It does you good to go away for the weekend without the children!

Vous voulez faire la visite avec ou sans guide?

Do you want to do the visit with or without a guide?

Alternatively, an expression such as **en compagnie de** may be used:

Le comédien a célébré son succès en compagnie de toute la troupe.

The actor celebrated his success with the entire company.

Finally, verbs such as **se joindre à** or **accompagner** may be used:

Je descends prendre un verre, voulez-vous vous joindre à moi?

I'm going down for a drink. Do you want to come with me?

Lorsque les époux Duval se sont présentés au Commissariat, ils étaient accompagnés par de leurs deux enfants. (See 48)

When M. and Mme Duval went to the police station, they were accompanied by their two children.

Accompagne ton frère au magasin, s'il te plaît!
Go to the shop with your brother, please!

57

Narrating

This section is about how we use tenses. It focuses on the organization of a narrative in past, present and future time. There are many instances of uses of specific tenses in 'another time', for example, the use of the present tense to express past actions. By way of introduction, it is interesting to look at the various points of view which the speaker or writer – the narrator – may adopt.

You may envisage an action in its duration:

Les spectateurs lisait (lisent, liront) le programme en attendant que le rideau s'ouvre.

The audience were (are, will be) reading the programme while they were (are) waiting for the curtain to go up.

or as being completed and having occurred at a particular point in time:

Mes parents ont passé (passèrent) deux mois de vacances au bord de la mer.

My parents have had (had) two months' holiday at the seaside.

or as a repeated action or habit:

Elle prenait (prend, prendra) tous les matins le train de 8h30.

She caught (catches, will catch) the 8.30 train every morning.

or you may want to describe an action as being completed or not completed:

Il a (avait, aura) ouvert la fenêtre.

He has (had, will have) opened the window.

J'ai obtenu une bourse.

I've obtained a grant.

Ils recherchent les coupables.

They are looking for the culprits.

Les premières fleurs apparaissaient.

The first flowers were appearing.

57.1

Present time (see 31.2, 31.7)

- (a) In order to indicate that an action or event is taking place at the present moment, you can use the present tense – however long or short the actions or events may be:

La lune luit, un cri retentit dans la nuit.

The moon is shining and a cry rings out in the night.

Some verbs and verb phrases, such as **se mettre à + noun or infinitive**, **être en train de + infinitive**, **ne pas arrêter de + infinitive**, allow you to emphasize the start or development of an action in the present time:

Ah quand même, tu te mets au travail.

About time too! You're starting your work!

Rappelle tout à l'heure, il est en train de regarder son feuilleton à la télé.

Call back later, he's watching his serial (or soap opera) on telly.

The present tense can also convey the notion of repetition, which may be made more explicit through the use of expressions such as **tous les jours**, **chaque dimanche** . . ., or verbs with the prefix **re-** such as **redire**:

Il passe et repasse toutes les cinq minutes devant le magasin.

He walks up and down in front of the shop every five minutes.

- (b) Naturally, the present tense is used for direct speech:

'Il ne pleut plus, vous pouvez aller jouer dehors maintenant.'

'It isn't raining any more. You can go and play outside now.'

And when another tense, for example, the imperfect, is used with indirect speech, as in:

Il a dit qu'il faisait beau.

He said the weather was fine.

it refers to the present time of the corresponding direct speech:

Il a dit: 'Il fait beau.'

He said, 'It's fine weather.'

- (c) The present tense is also used to indicate that something, such as a proverb or a definition, has timeless universal value:

L'union fait la force.

Unity is strength.

Cinq fois trois égale quinze.

Five times three equals fifteen.

So the present tense may well occur in a past narrative. In the following example, the assumption is that there is one universal way one talks about one's children:

Les militants de ce mouvement ont parlé des animaux comme on parle de ses enfants.

The activists/militants in the movement spoke about animals as you speak about your children.

See 57.2 for other examples of the present tense in a past narrative.

- (d) Other tenses are sometimes used with actions or events or behaviour occurring in the present time. In speech, for example, the imperfect, future, conditional, or pluperfect tenses may be used as a way to be more polite:

'Vous désiriez? – Je voulais un kilo de tomates et une livre de haricots verts, s'il vous plaît.' (See 40.4)

'What would you like?' 'I'd like a kilo of tomatoes and a pound of French beans, please.'

'Voudriez-vous que je vous conduise à la gare? – J'accepterai volontiers.'

'Would you like me to drive you to the station?' 'I'd like it very much.'

J'étais venu vous demander un petit service. (See 38)

I've come to ask a little favour of you.

Note also the use of the imperfect for expressing endearment, in particular with pets and babies:

Il avait bobo à sa patte ce petit chien-là.

That little dog has hurt his paw.

- (e) Remember that each 'time' – past, present, or future – is defined in relation to the others and that therefore there are connections between them. For example, the perfect is often used for a past action when there is a connection with the present time (see 36):

Comme on n'a pas encore découvert l'assassin, l'enquête se poursuit.

Since they haven't found the murderer yet, the inquiry is continuing.

Il ne fait pas chaud ici! J'ai ouvert les fenêtres avant de partir pour aérer, tu peux les fermer maintenant.

It's not very warm in here! I opened the windows before I left to air the place – you can shut them now.

Past time

- (a) In order to focus on the duration of the action or event in the past, you should use the imperfect for description or to indicate a state of affairs (see 33.1):

La nuit tombait sur la ville et il faisait froid.

Night was falling over the city and it was cold.

The imperfect is also used for repeated actions or habits in the past (see 33.1):

Quand j'étais étudiante, je me levais tôt, je pouvais travailler toute la journée, sortir le soir, puis je recommençais le lendemain . . . , et je n'étais jamais fatiguée!

When I was a student, I used to get up early, I used to work all day, go out in the evening, then I started again the next day . . . , and I was never tired!

The imperfect also occurs in historical narratives for stylistic effect. In this case, it refers to an action which is completed, and presents it as a 'photograph' for the reader:

En mai 1981, François Mitterrand entrail dans l'histoire. (See 33.1)
In May 1981, François Mitterrand made history.

(b) When referring to one, or a series, of completed actions occurring at a particular point in the past, you use the past historic. Note, however, that the past historic is usually restricted to the written narrative (see 34.2):

Son véhicule, lancé à 120 km/h, manqua le virage, heurta la barrière, fut déporté et alla s'écraser contre un arbre de l'autre côté de la route.

His car, travelling at 75 mph, missed the bend, hit the barrier, swerved and crashed into a tree on the other side of the road.

When speaking, and increasingly when writing, the perfect is used instead of the past historic. The functions of the two tenses are, for the purpose of referring to one or a series of actions complete in the past, to all intents and purposes, identical (see 36).

Il a manqué le virage et heurté la barrière, puis la voiture a été déportée et il s'est écrasé contre l'arbre de l'autre côté de la route.

He missed the bend and hit the barrier, then the car swerved and he crashed into the tree on the other side of the road.

When combined with the imperfect in a complex sentence, the past historic allows you to emphasize the suddenness of an action (see 34.2):

Elle cheminait en chantonnant quand un loup surgit de derrière un fourré.

She was walking along humming to herself when a wolf came out from behind a thicket.

(c) Other tenses, namely the pluperfect (see 38) and the past anterior (see 39), will allow you to consider a completed action from the point of view of its duration:

Le professeur *avait* longuement *exposé* les raisons de sa démission.

The teacher had explained the reasons for his resignation at length.

from the point of view of its result:

Tous remarquèrent combien elle *avait* changé.

Everyone noticed how much she had changed.

or of its occurrence at a particular point in (past) time. Note that the past anterior is only used in specific written contexts:

Quand il eut terminé sa sieste au soleil, le lièvre *décida* de reprendre la course. (See 39)

When the hare had finished its siesta in the sun, it decided to continue the race.

(d) Note that other tenses 'intrude' into past time; for example, the present tense – especially in historical narratives:

Napoléon *entreprend* alors une nouvelle campagne qui *coûte* la vie à un grand nombre de soldats.

Then Napoleon undertook another campaign which cost the lives of many soldiers.

In the following extract the present and future tenses are used, for stylistic effect, in a narrative otherwise written in the past tense:

Dès 1957, ... les six membres *décidèrent* de construire une communauté économique.... Les droits de douane *seront* totalement éliminés le premier juillet 1968 et les politiques communes *seront mises en place* durant cette décennie.... En 1981 et en 1986, les adhésions de la Grèce, de l'Espagne et du Portugal *renforçèrent* le flanc sud de la Communauté.... Parallèlement, la Communauté *s'affirme* sur le plan international en renforçant les liens contractuels noués avec les pays du sud de la Méditerranée.

(Fontaine, P. (1992), 'Les Grandes Phases historiques', in *Dix leçons sur l'Europe*, Documentation européenne)

In 1957, ... the six member countries decided to create an economic community. ... Customs duties would be completely eliminated on 1st July 1968 and common policies would be put in place during that ten-year period ... In 1981 and 1986 the entry of Greece, Spain and Portugal would strengthen the southern flank of the Community. ... At the same time, the Community established itself internationally by strengthening contractual links with countries to the south of the Mediterranean.

Note some further 'intrusions' of the present tense in past time in the following narrative. The first one relates to the character's thoughts 'in real time', and the second is an intervention by the narrator:

Il avait pris le métro comme tous les matins à 7h30. Soudain, la rame s'immobilisa. Que se passe-t-il? Je vais être en retard... furent ses premières pensées. Puis voyant que personne ne réagissait et qu'un silence passif s'installait, il décida qu'après tout il n'y pouvait rien et que mieux valait attendre patiemment comme tous les autres. Y a-t-il un besoin plus irrésistible que celui de se conformer au groupe auquel on se trouve mêlé?
 He had taken the metro as he did every morning at 7.30. Suddenly, the train stopped. What's happening? I'm going to be late ... were his first thoughts. Then seeing that nobody was reacting and that a passive silence ensued, he decided that he could do nothing about it anyway and it would be better to wait patiently like the rest of them. Is there any more irresistible need than to conform to the group in which one finds oneself?

The present tense is also used, when speaking, to refer to an action in the near past (see 31.7):

Je sors de chez le coiffeur et tu n'as rien remarqué!
 I've just left the hairdresser's and you didn't even notice!

Allô oui? ... tu as de la chance, j'arrive à l'instant!
 Hello, yes? ... you're lucky! I'm just in!

Alternatively, you may use a verb phrase such as **venir de + infinitive** (see 31.7):

Vous avez de la chance de me trouver, je viens d'arriver!
 You're lucky to catch me, I've just arrived.

Future time (see 32.5)

- (a) With the future tenses, you can refer to actions which will occur at a later date or time. Note the equivalent English tenses.

Je prendrai rendez-vous chez le dentiste demain matin.
I'll make an appointment at the dentist's tomorrow morning.

You can also focus on the future result of an action:

Asseyez-vous, Monsieur Maillou sera là dans un instant.
Take a seat. M. Maillou will be here in a moment.

Nous attendons avec impatience les résultats des premières circonscriptions qui seront communiqués à partir de 20h30. (See 48)
We are waiting impatiently for the results from the first constituencies which will be announced from 8.30 onwards.

Tu verras, d'ici un mois tu auras reçu ton premier salaire et tu n'auras plus de problèmes d'argent. (See 37)
You'll see, in a month from now you'll have had your first salary and you'll have no more money problems.

When the realization of a future action depends on another action, you use future tenses in both clauses – the future perfect for the first action and the future for the second:

On ira où tu voudras, quand tu voudras, et l'on s'aimera encore lorsque l'amour sera mort. (from a song by Joe Dassin)
We'll go where you want, when you want, and still make love when our love has died:

Quand elle sera partie, nous serons plus tranquilles. (See 32.6, 37)
When she has gone, we'll be happier.

(b) In the following example in indirect speech, the conditional tense is used in the transfer from direct speech in the future tense (see 58.b):

Il a dit qu'il viendrait ce soir. = Il a dit: 'Je viendrai ce soir.'
He said he would come tonight. = He said, 'I'll come tonight.'

(c) The present tense (see 31.7), and the perfect (see 36), are often used for an action which will take place in the near future, especially when speaking:

Ne bougez pas, j'arrive tout de suite.
Don't move, I'll be right there.

Ils partent en Guadeloupe demain soir.
They are leaving for Guadeloupe tomorrow evening.

Un peu de patience les enfants, ce n'est plus très loin maintenant, encore quelques minutes et nous sommes arrivés.
Have patience, children, it's not very far now. Just a few more minutes and we'll be there.

Alternatively, verb phrases such as **aller + infinitive**, or **être sur le point de + infinitive**, or **devoir + infinitive**, may be used:

Attention, le train en provenance de Paris et à destination de Bordeaux va entrer en gare.

Attention. The train from Paris for Bordeaux is about to arrive at the station.

Je vous laisse les clés, nous sommes sur le point de partir.

Here are the keys, we're about to leave.

As-tu des nouvelles de Jacques? Non, mais j'en aurai demain, il doit m'appeler.

Any news of Jacques? No, but I'll have some tomorrow, he's supposed to call me.

57.4

Dates and time (see 9.4c)

- (a) In order to situate an event in time, you have to be able to give the date when it occurs, using **en** with years and **en** or **au mois de** with months:

La Communauté européenne du charbon et de l'acier a été créée en 1950. (See 48)

The European Coal and Steel Community was established in 1950.

Normalement, j'aurai terminé mes études en juin 99 (or au mois de juin 99).

If everything goes well, I'll have finished my studies in June '99.

or **le** with specific dates:

Les droits de douane industriels ont été totalement éliminés le 1er juillet 1968.

Customs tariffs for industry were abolished completely on 1st July 1968.

Le Conseil Européen de Brême a eu lieu les 6 et 7 juillet 1978.

The European Council in Bremen was on the 6th and 7th of July 1978.

Note that months, and days of the week, do not have a capital letter in French.

The definite article is also used with days of the week when referring to regular events:

Les enfants n'ont pas d'école le mercredi après-midi.

Children don't have school on Wednesday afternoon.

Les journaux du dimanche sont très lus en Grande-Bretagne. (See 48)

Sunday papers are widely read in Britain.

Les éboueurs passent tous les vendredis.

There is a refuse collection every Friday.

Mon salaire est viré sur mon compte le premier lundi de chaque mois. (See 48)

My salary is paid into my account on the first Monday in the month.

With specific days, there is no article:

Mercredi, je pars en vacances!

On Wednesday I'm going on holiday!

Il a sa photo dans le journal de mardi.

His photo is in Tuesday's paper.

Lundi soir? Non, je ne peux pas, plutôt un jeudi soir, je n'ai pas cours le lendemain.

Monday evening? No, I can't. Better on a Thursday evening, I haven't any lectures next day.

In correspondence, there are various ways of indicating a precise date. In letter headings, you may find:

Edimbourg, le 13 avril 1994 (or 13.4.1994)

Similarly, in the text of the letter, you may find:

Suite à votre lettre du 22 février, je ...

Further to your letter of 22nd February, I ...

or

Ayant reçu votre bon de commande daté du 22.2.94, je ...

I have received your order of 22.2.94 ...

(b) If the precise date is not known, you use prepositions such as **vers** + article, **autour de** + article:

Sa famille a dû émigrer vers la fin des années 40.

His/Her family must have emigrated at the end of the 1940.

Je compte rentrer de vacances autour du 10 août.

I intend to return from holiday about the 10th of August.

Note that **début**, **fin**, **mi-**, **vers le milieu de**, **au milieu de** can be used with or without an article:

Tu comptes te mettre en congé *fin juillet*? Non, plutôt *vers la mi-août*.

You intend to take some time off at the end of July? No, more towards the middle of August.

- (c) Approximate time of occurrence is usually introduced by **vers**:

Je vous attends *vers midi*.

I'll expect you about noon.

Note that the 24-hour clock is widely used in 'official' French. The English a.m./p.m. device is not available. Equivalent phrases would be **du matin** 'a.m.', **de l'après-midi, du soir** 'p.m.'. In less formal situations you would say:

Tu passes me prendre à *quatre heures et demie*?

Will you come for me at 4.30?

If you wanted to be a bit more formal, you could use **trente**:

Votre taxi est réservé pour *cinq heures trente*.

Your taxi is reserved for 5.30.

Similarly, **et quart** and **moins le quart** are less official than **quinze** and **quarante-cinq**:

Lève-toi, il est neuf heures *moins le quart*!

Get up, it's a quarter to nine!

Le train en provenance de Bordeaux entrera en gare à huit heures quarante-cinq.

The train from Bordeaux will arrive at the station at 8.45.

Although **heures** cannot usually be omitted, **minutes** often is except in very rare instances:

L'accident est arrivé devant chez moi à *huit heures vingt*.

The accident happened outside my house at 8.20.

RTL, il est quatorze heures (et) trois minutes.

This is Radio Television Luxembourg, it's three minutes past two.

- (d) You might also want to indicate the duration of an event, for example between two dates with **de ... à**:

Le magasin sera fermé *du 1er au 31 août*.

The shop will be shut from the 1st to the 31st of August.

Le parc de loisirs est ouvert *de juin à octobre*.

The fairground is open from June to October.

De 1954 à 1988, l'aide communautaire a permis la création de 180000 nouveaux emplois dans ce secteur.

From 1954 to 1988, Community funding enabled 180,000 new jobs to be created in this sector.

The same structure can be used with times:

Les banques sont généralement ouvertes de 9h00 à 17h00.

Banks are generally open from 9 to 5.

Alternatively, **entre ... et** may be used, for example if an event is likely to occur at a particular time between two times:

Il a dit qu'il passerait me prendre entre 8h00 et 8h30.

He said he'd pick me up between 8 and 8.30.

Indications of date(s) and time(s) can of course be combined:

La piscine est ouverte de 8h00 à 18h00 du lundi au vendredi, de 9h00 à 17h00 le samedi et de 10h00 à 17h00 le dimanche.

The swimming pool is open from 8 to 6 Monday to Friday, 9 to 5 on Saturday and 10 to 5 on Sunday.

(e) You may of course want to focus on the initial date or time with **depuis, dès** or **à partir de**:

Je travaille dans cette société depuis 1978.

I've been working in this company since 1978.

Dès 1957, les six membres décidèrent de construire une communauté économique.

In 1957, the six member countries decided to establish an economic community.

Le musée est ouvert tous les jours à partir de 9h30.

The museum is open every day from 9.30.

or on the final date or time with **jusqu'à**:

Le magasin reste ouvert jusqu'à 20h00 du lundi au vendredi.

The shop stays open till 8 p.m. Monday to Friday.

J'ai un contrat de travail jusqu'à juin 97.

I have a contract of employment until June '97.

In the following example, note the use of **d'ici** for a deadline:

D'ici l'an 2000, il aura terminé sa thèse.

He'll have finished his thesis by the year 2000.

and that a deadline may also be expressed as a period of time:

La troisième étape de l'UEM (Union économique et monétaire)
débutera au plus tôt le 1er janvier 1997 et au plus tard le 1er
janvier 1999.

The third stage of the EMU (Economic and Monetary Union) will begin at the earliest on 1st January 1997 and at the (very) latest on 1st January 1999.

57.5

Sequence

As already mentioned (see 57.1e), past, present and future actions or events are not considered in isolation but in relation to one another. The correct sequence of tenses has to be used in order to relate actions in time. This means that in a given sentence with at least two clauses, the main action takes place at a time we can call the 'reference' time and the other action occurs before, at the same time as, or after the main one.

- (a) Actions or events taking place before the main action, situated in its reference time:

Je pense qu'elle n'a pas suffisamment révisé.
 I don't think she has done enough revision.

Je pense qu'elle n'était pas prête pour cet examen.
 I don't think she was ready for this exam.

Ils croiront que nous nous sommes moqués d'eux.
 They'll think that we've been making fun of them.

Il saura que tu ne lui en voulais pas.
 He'll know you don't bear him a grudge.

Je ne savais pas que tu avais été opéré.
 I didn't know you had had an operation.

Nous avons entendu dire que vous aviez déjà eu des difficultés avec ce fournisseur.
 We heard that you'd already had problems with this supplier.

Ses parents sont déçus qu'elle ait échoué.
 Her parents are disappointed that she has failed.

Notre délégation a fort apprécié qu'un accueil aussi chaleureux lui soit (or fut) réservé à son arrivée.

Our delegation was delighted that they were given such a warm welcome.

In the previous two examples, note that past subjunctives have to be used after certain verbs and verb phrases. This is also the case in (b) and (c) below.

Nowadays, the imperfect and pluperfect subjunctives are rarely used, even in written French (see 46).

(b) Action(s) taking place at the same time as the main action:

Je crois qu'elle est prête.

I think she's ready.

Je lui dirai que tu ne veux plus venir.

I'll tell him/her you don't want to come any more.

En la voyant, il sut immédiatement qu'elle était en pleine dépression.

When he saw her he knew immediately that she was terribly depressed.

Nous sommes enchantés que vous soyez parmi nous aujourd'hui.

We are delighted you are with us today.

Elle aimait qu'il la fasse (or fit) rire.

She loved it when he made her laugh.

(c) Action(s) taking place after the main action:

Une bonne partie des électeurs ne savent pas pour qui ils voteront.

Many of the electors don't know who to vote for.

Je lui dirai que tu nous rejoindras après le cours.

I'll tell him/her that you'll join us after the lecture.

Elle comprit qu'il ne reviendrait plus.

She realized that he would never come back.

Nous savions que la facture serait envoyée le lendemain.

We knew that the invoice would be sent the next day.

Je ne veux pas que tu partes si tôt.

I don't want you to leave so early.

Elle demanda qu'on prenne (or prît) la peine de lui envoyer le document.

She told them/us to make an effort to send her the document.

(d) There may be more than two clauses in a sentence and the use of different tenses allows you to establish a sequence of actions and events. In the following examples, the sequence of actions is represented by numbers:

Comme elle a consciencieusement révisé (1), elle pense (2) qu'elle décrochera (3) son diplôme.

Since she has revised thoroughly, she thinks she will get her diploma.

Les grévistes qui jusque-là avaient manifesté (1) calmement, décidèrent (2) vers midi qu'ils attaqueraien (3) les fourgons de police.

The strikers demonstrated peacefully up until midday, when they decided to attack the police vans.

Etant donné que vous n'avez pas répondu (1) à ma réclamation, je me vois dans l'obligation (2) d'en aviser la direction qui prendra (3) les mesures nécessaires.

Since you have not answered my complaint, I am compelled to inform the management who will take the necessary action.

Quand vous aurez terminé ce travail (2), je souhaite (1) que vous veniez (3) dans mon bureau pour que toute l'équipe puisse préparer (4) le programme de la semaine prochaine.

When you have finished this work, I would like you to come to my office so that the whole team can prepare the programme for next week.

- (e) A strict sequence of tenses is not always observed, for example, when the 'universal' present tense is used (see 31.7, 57.1c):

Beaucoup de Français ne savaient pas que le Président est (instead of était) élu pour sept ans.

Many French people did not know that the President is elected for seven years.

or when there is a succession of short actions or events and in order to maintain the dramatic effect of the actions or events:

Dès qu'il toucha (instead of eut touché) la pierre, le ciel s'assombrit et le tonnerre retentit.

As soon as he touched the stone, the sky darkened and the thunder rolled.

or when you focus on the result of the actions or events:

Nous attendons qu'il ait obtenu (instead of obtienne) son permis de conduire avant de partir en vacances.

We are waiting for him to get his driving licence before going on holiday.

Quand le raisin de la rangée était coupé (instead of avait été coupé), il s'asseyait au bout pour fumer une cigarette.

When the grapes had been picked, he sat down at the end of the row to have a cigarette.

58 Reporting

- (a) Speech may be reported directly in the words actually used. Note the differences in punctuation in French and English:

Il m'a dit: 'On se voit ce soir?' – 'Ça m'étonnerait!', ai-je répondu.
He said to me, 'Are we meeting this evening?' 'I'd be surprised,' I answered.

Note how punctuation is used in French: a colon before reported speech, inverted commas to include all reported speech and a dash to introduce a new speaker. Instead of a colon, a verb such as **dire, affirmer, déclarer + que + indicative** may be used to introduce direct speech:

Et si, pour une fois, Jacques Chirac avait raison quand il affirme que 'le Premier ministre a un problème avec la jeunesse'?
And what if Jacques Chirac were right for once when he says that 'the Prime Minister has a problem with the young'?

Alternatively, the verb may follow the quotation:

'C'est agréable, le train', a dit Edouard Balladur dans le train qui l'emmenait à Montélimar. (See 22.1)
'It's nice travelling by train,' said Edouard Balladur in the train taking him to Montélimar.

(Note the English translation of the relative clause in the previous example.)

'Le gouvernement dévalorise nos diplômes': telle est l'antienne entendue dans les manifs.
'The government's devaluing our degrees' was the cry heard during the demos.

(Note the elliptical past participle **entendue**, instead of a relative clause **qu'on entendait**, in the previous example.)

or the verb may even be in the middle of the quotation:

'On ne rêve pas, on ne prétend pas obtenir l'abrogation des lois Pasqua, commente Charlie, mais on veut sensibiliser ...' (See 52.5)
'It's not a pipedream, we're not saying we'll get the Pasqua legislation overturned,' said Charlie, 'but we want to make the public aware ...'

When speaking *and* using a quotation, the convention is to use (*et*) **je cite** at the beginning and sometimes **fin de citation** at the end of the quotation:

Jacques Chirac a sans doute raison quand il affirme, et je cite, que 'le Premier Ministre a un problème avec la jeunesse.'

Jacques Chirac is probably right when he says, and I quote, 'the Prime Minister has a problem with the young.'

- (b) Sometimes, only part of the original speech is directly reported – in inverted commas below – while the rest is presented as indirect speech:

'Bien sûr', rétorque d'emblée le Premier Ministre à ceux qui osent lui demander s'il existe encore une place sur le marché de la presse économique.

'Of course', is the Prime Minister's retort to those who venture to ask him if there is room for another economic journal in the market.

In the previous example, a direct question: '**Existe-t-il encore une place sur le marché de la presse économique?**' is indirectly reported. Note that some features of the direct question have gone (inversion and the question mark) and that **si** has to be used after the verb (**demande**). For other types of indirect question, interrogative adverbs and adjectives are used and **que**? 'what?' (object) becomes **ce que** while **qui**? 'what?' (subject) becomes **ce qui**. Take the following example:

La secrétaire m'a dit: 'Vous voulez vous inscrire en deuxième année? Où avez-vous fait votre première année? Comment vous appelez-vous? Quelle est votre adresse? Que font vos parents?'
(direct)

The secretary said to me, 'You want to go into the second year? Where did you do your first year? What is your name? What is your address? What do your parents do?'

La secrétaire m'a demandé *si* je voulais m'inscrire en deuxième année, où j'avais fait ma première année, comment je m'appelais, quelle était mon adresse, ce que faisaient mes parents. (indirect)
The secretary asked me about my request to go into the second year, where I'd done my first year, what my name was, what my address was, and what my parents did.

In addition, some changes have to be made with tenses when the introductory verb is in the past (**m'a demandé**). However, when the introductory verb is in the present or future, the tenses used are the same as for direct speech:

Mon père dit qu'il votera si les candidats sont sérieux. ('Je voterai si...')

My father says he'll vote if the candidates are serious. ('I'll vote if...')

Mon père dit qu'il voterait si les candidats étaient sérieux. ('Je voterais si...')

My father says he would vote if the candidates were serious. ('I'd vote if...')

Both of these with an introductory verb in the past become:

Mon père a dit qu'il voterait si les candidats étaient sérieux. (See 40.1)

My father said he would vote if the candidates were serious.

In the previous example the sequence of tenses is invariable, and in the absence of context, there is a little ambiguity about what was actually said ('I will vote' or 'I would vote').

Sometimes, the introductory verb is followed by **que** + subjunctive, in particular when the corresponding direct speech is an order, a request, etc.:

Dis-lui qu'il le fasse tout de suite! ('Fais-le tout de suite!') (see 46.2)
Tell him to do it at once! ('Do it at once!')

L'agent a exigé que je lui remette mon permis de conduire.

('Donnez-moi votre permis de conduire, s'il vous plaît!')

The policeman told me to hand over my driving licence. ('Give me your driving licence, please!')

Alternatively, an infinitive may be used, sometimes introduced by **de**:

Dis-lui de le faire tout de suite.

Tell him to do it at once.

Elle m'a prié plusieurs fois de l'accompagner à la gare.

She asked me several times to accompany her to the station.

In the following example, there is no **de** because of the verb **estimer** + infinitive.

D'après l'interview que j'ai lue, il estime avoir fait tout ce qui était humainement possible pour réparer ses erreurs. (See 11.4, 22.15)

According to the interview I read, he thinks he has done everything humanly possible to make up for his mistakes.

Reflexive verbs such as **se déclarer**, **s'avouer** + adjective provide another way of reporting indirectly:

En conclusion, le Président du Conseil s'est déclaré satisfait des progrès réalisés durant la réunion.

In conclusion, the chairman of the board declared he was satisfied with the progress made at the meeting.

La déposition indique que le suspect s'est avoué coupable après une heure d'interrogatoire.

The evidence indicates that the suspect confessed after an hour of questioning.

Some changes need to be made with personal pronouns and possessive adjectives when using indirect speech:

Paul a promis qu'il viendrait avec son camion pour m'aider à déménager. ('Je viendrai t'aider avec mon camion.'

Paul promised to come with his lorry to help me move house.
(I'll come and help you with my lorry.)

Il a rappelé à Paul qu'il devait venir avec son camion.

He reminded Paul that he was to come with his lorry.

The previous example is ambiguous in the sense that, in the absence of context, you do not know whether **il** (**devait venir**) was the original speaker or not, that is, whether he or Paul said: **'Je viendrais avec mon camion.'** (I'll come with my lorry.)

When transferring from direct to indirect speech, other changes have to be made when you are referring to time and place:

Le directeur a annoncé: 'Le rapport sera prêt demain/ dans une semaine.'

The manager announced, 'The report will be ready tomorrow/in a week.'

If this is part of a narrative, and the speech is reported, then it becomes:

Le directeur a annoncé que le rapport serait prêt le lendemain/ une semaine plus tard. (See 40.1)

The manager announced that the report would be ready the next day/a week later.

Adverbs of time vary, naturally, according to the timing of the original statement and the information given:

Il a annoncé hier que le rapport serait prêt aujourd'hui/ dans une semaine.

He announced yesterday that the report would be ready today/in a week.

Il a annoncé l'autre jour que le rapport serait prêt le lendemain/ une semaine plus tard.

He announced the other day that the report would be ready the next day/a week later.

Le 19 juin, lendemain du crime, vous avez déclaré dans votre déposition, et je cite: 'Je suis chez ma sœur depuis avant-hier soir.' Pouvez-vous confirmer aujourd'hui que le jour du crime, vous vous trouviez bien 8, rue du Lac chez votre sœur, et ce, depuis la veille au soir?

On the 19th of June, the day after the crime, you stated in your evidence, and I quote: 'I have been at my sister's since the evening before last.' Can you confirm today that on the day of the crime you were in fact at 8, rue du Lac at your sister's, and had been since the night before?

Similarly, changes are required with place:

Elle m'avait promis: 'Je te retrouve ici dans deux heures', je ne l'ai jamais revue.

She'd promised me, 'I'll meet you back here in two hours', I never saw her again.

Two and a half hours after the direct speech actually occurred:

J'étais avec cette fille . . . , je ne sais pas ce qu'elle fait. Elle m'avait promis de me retrouver là à quatre heures/il y a une demi-heure.

I was with the girl . . . , I don't know what she's doing. She'd promised me that she would meet me back there at four o'clock/half an hour ago.

A week later:

Ce jour-là, j'ai rencontré cette fille, mais je ne l'ai jamais revue alors qu'elle m'avait promis de me retrouver deux heures après là-bas/ devant la Mairie.

That day, I met the girl, but I never saw her again although she'd promised to meet me two hours later there/in front of the Town Hall.

(c) Various ways of reporting – especially reporting what was *said* – are often found in minutes of meetings. Many transitive verbs are used to write minutes – compare the tenses in French and English:

En ouvrant la séance, Mme Dupuis souhaite la bienvenue aux délégués présents et énonce l'ordre du jour.

Opening the meeting, Mme Dupuis welcomed the delegates and set out the agenda.

M. Courreau relève des anomalies dans le bilan présenté.

M. Courreau noted anomalies in the balance sheet.

Many verbs are followed by **que**, which has to be repeated with three or more clauses:

M. C. rappelle qu'au 1er janvier 1994, nous avons une réserve de 23500000 F.

M. C. recalled that on 1st January 1994, we had reserves of 23,500,000 francs.

M. F. souligne que nous avons voté un budget en déséquilibre et que nous n'avons pas d'autre solution que de rappeler nos difficultés.

M. F. stressed that we had approved a deficit budget and all we could do was note our difficulties.

Sometimes, **c'est** or **cela** have to be used with indirect speech:

Il ajoute que ce sont les ressources propres qui sont touchées.

He added that it was the shareholders' equity that was affected.

Mme G. lui répond que cela n'est pas prévu.

Mme. G. replied that that had not been expected.

Passive forms are also frequently used in minutes (see 48, 48.1):

Après discussion, la rédaction du mémorandum est reportée à la fin de la séance.

Following discussion, the drafting of the memorandum was postponed till the end of the meeting.

La proposition est soutenue par M. C. . . . , rejetée par Mme B. . . . , elle est finalement votée à l'unanimité.

The proposal was supported by M. C. . . . rejected by Mme B. . . . , and eventually passed unanimously.

Questions are reported using verbs and verb phrases:

M. E. demande à Mme G. si elle ira au Rectorat défendre les problèmes de la section d'anglais.

M. E. asked Mme G. whether she would go to the university administration to put the case for the English department.

M. N. veut savoir s'il y a une ventilation précise des dépenses pour chaque section.

M. N. wanted to know whether there was a detailed breakdown of spending for each department.

Expressions in apposition, with the second, or subsequent ones, containing a response are also used in minutes. These very compact structures are useful for combining question(s) and answer(s), and they also provide stylistic variation:

Invité à commenter les 20000 F de frais divers enregistrés en 1990, M. T. présente une facture de la Société Duchemin.

Asked to comment on the 20,000 F miscellaneous expenditure in 1990, M. T. presented an invoice from the Société Duchemin.

***En réponse à une question de Mme V. sur la meilleure façon de réaliser des économies, M. P. précise que ses charges sont déjà compressées au maximum.* (See 48)**

In answer to a question from Mme V. on the best way of making savings, M. P. stated that his costs/expenses had already been reduced as far as possible.

Answers or explanations can also be provided using **comme** after the introductory verb:

M. V. cite comme raison profonde des mauvais résultats la chute des ventes de véhicules neufs ...

M. V. cited the fall in new car sales as the principal reason for the poor results ...

... il avance comme deuxième raison la conjoncture mondiale conséquente à la Guerre du Golfe.

... he added that a further reason was the world economic situation following the Gulf War.

59 Asking questions

- (a) A simple and informal way of asking questions consists of making a statement and using appropriate intonation when speaking, and adding a question mark when writing:

Vous venez, on y va?

Are you coming, shall we go?

Tu me prêtes ton vélo?

You'll lend me your bike?

T'en veux pas?

You don't want any?

- (b) Alternatively, you may introduce a question with **est-ce que?**. This expression is also fairly informal:

Est-ce que tu pourrais me garder les enfants vendredi soir? (See 57.4)

Can you look after the children for me on Thursday evening?

Est-ce que le magasin est ouvert le dimanche? (See 9.4c, 57.4)

Is the shop open on Sunday(s)?

- (c) Note that all of the questions in (a) and (b) require 'yes/no' answers. There is a more formal way of asking this type of question, using inversion of the verb and the subject – a pronoun subject is linked to the verb or the auxiliary verb by a hyphen, a noun or proper noun subject is *not*:

Etes-vous prête à répondre à la première question, Danielle?

Are you ready to answer the first question, Danielle?

Les gouvernements sauront-ils répondre à cet appel de détresse lancé par la Somalie?

Will the governments be able to respond to the appeal for help from Somalia?

Inversion usually occurs in writing but may also occur when speaking, in particular in polite conversation, and in discussion (see 23.3):

Puis-je fumer?

May I smoke?

Voulez-vous que je vous accompagne?

Would you like me to go with you?

- (d) When a question does not call for a 'yes/no' answer, it is focusing on one particular aspect of exposition, for example, location or ownership, and therefore on one particular part of the sentence such as the complement. Interrogative adjectives or pronouns (see 23.1) may be used in this case, as well as the forms presented above: intonation, **est-ce que?**, and inversion.

When you want to find out who or what is the subject of the verb, you usually use **qui?** 'who?' or **qu'est-ce qui?** 'what?':

Qui a fait ça?

Who did that?

Qu'est-ce qui lui permet d'être aussi arrogant?

What is it that allows him to be so arrogant?

Qui est-ce qui? 'who?' and particularly **c'est qui qui?** 'who?' are more colloquial forms:

Ah non! C'est qui qui a touché mon ordinateur?

Oh no! Who's been at my computer?

Note that you can be more precise and direct if you use **parmi**, **d'entre** 'of, among' + noun or pronoun after **qui**:

Qui parmi vous se porte volontaire pour cette mission?
Which of you will volunteer for this task?

and remember that in an indirect question **qu'est-ce qui?** becomes **ce qui**:

Je me demande ce qui lui permet d'être aussi arrogant.
I wonder what it is that allows him to be so arrogant.

In order to ask who or what is the direct object of the verb, use **qui?**, **que?**, **quois?**:

Que vois-tu par la fenêtre? Qu'est-ce que tu vois?
What can you see out the window? What can you see?

Qui vois-tu en ce moment? Qui est-ce que tu vois?
Who can you see at the moment? Who can you see?

And there is the very informal:

Tu vois quoi?/qui?
You can see what?/who?

Note that **quoi** or **que** are often used with an infinitive:

Je ne sais plus quoi (or que) dire ni quoi (or que) faire à son sujet.
I don't know what to say any more or what to do about
him/her/it.

Interrogative pronouns can be used to refer back or forward to a noun (see 23.5):

J'ai plusieurs variétés de pommes de terre: lesquelles voulez-vous?
(back)
I've several varieties of potato: which do you want?

Lequel choisirais-tu parmi tous ces manteaux? (forward)
Which of all these coats would you choose?

And less formally:

J'en ai plusieurs sortes, vous voulez lesquelles?
I've several kinds, which do you want?

Tu choisirais lequel, toi, de tous ces manteaux?
Which of all these coats would you choose?

To find out who or what is the *indirect* object, you need to use a preposition such as **à** or **de**. The preposition always precedes the interrogative term (see 23.2):

A qui/A quoi faites-vous allusion quand vous dites cela?

Who/What are you referring to when you say that?

De qui se moque-t-on?

Who are you making fun of?

and less formally:

A qui/A quoi est-ce que vous faites allusion quand vous dites cela?

Who/What are you referring to when you say that?

and definitely informal:

Tu fais allusion à quoi exactement?

You're talking about what exactly?

When you want to know about location, time, cause, manner, quantity, etc., use interrogative pronouns and adjectives on their own:

Où et quand aura lieu la prochaine réunion? (See 23.7)

Where and when is the next meeting?

Cela arrive tous les combien?

That happens how often?

Pourquoi cette société a-t-elle licencié tant de personnel? (See

23.8)

Why has this company made so many staff redundant?

Tu comptes y aller comment si ta voiture est en panne?

How do you intend to get there if your car has broken down?

and following prepositions:

Avec qui est-ce qu'ils partent?

Who are they leaving-going with?

Tu vas monter sur quoi pour peindre le plafond?

What are you going to stand on to paint the ceiling?

Finally, interrogative adjectives (see 23.6) and pronouns may be used as determiners – with or without a preposition:

Quel formulaire est-ce que je dois remplir pour effectuer un versement?

What form must I fill in in order to make a payment?

Quelles villes voulez-vous visiter pendant votre séjour?

What cities do you want to visit during your stay?

C'est le manteau de qui, là par terre?

Whose coat is it on the ground?

Dans laquelle de ces pièces voulez-vous faire installer le double vitrage?

Which of these rooms do you want to have the double glazing in?

- (e) Sometimes, the question does not call for an answer but is simply a way of creating a particular effect or conveying a particular feeling:

Il a fait quoi? Il t'a dit ça? ... Je n'en reviens pas! (surprise)
He did what? He said that to you? ... I'm amazed!

Comment voulez-vous que je m'en sorte avec tout ça? (complaint,
call for sympathy)
How on earth can I manage with all that (to do)?

Note that some questions, especially with **pouvoir**, which in terms of form are of the 'yes/no' type, are in fact aimed at eliciting a fuller answer:

Pouvez-vous me donner l'heure, s'il vous plaît?
Can you give me the time, please?

Est-ce que vous pourriez nous exposer la position de votre parti sur cette question?
Can you give us your party's position on this issue?

Finally, there is the question tag which you can add to any statement when you are seeking someone's agreement with your question – **n'est-ce pas?** This little expression is unique. It can be used formally or informally. It never varies in its form and it is equivalent to every single question tag in English 'isn't he/she/it?, can't you?, didn't we?, won't I?, shouldn't they?'. Sometimes, it is used simply to end a sentence and has no real interrogative function. Sometimes it is used to reinforce a statement. Sometimes, it is merely the equivalent of a nervous tic!

Vous aimez la grammaire française, n'est-ce pas?
You like French grammar, don't you?

La question, n'est-ce pas, reste ouverte.
The question, of course, remains open.

60 Negating (see 54.12–54.24)

As in asking questions (see 59d), you have to distinguish between negation applied to the *whole* sentence or clause – full negation, and negation applied to only one *part* of the sentence or clause – partial negation.

- (a) The most obvious way to apply full negation is to use **ne ... pas** (see 54.16):

Si les Dupont *ne sont pas* là maintenant, c'est qu'ils *ne viendront pas*.

If the Duponts are not here now, it's because they won't be coming.

Ne is often omitted in informal speech (see 54.19):

Elle est pas venue, Jacqueline, je sais pas pourquoi.

Jacqueline hasn't come. I don't know why.

When speaking, other shortcuts may be taken and only **pas** is used, for example, with an adverb, in answer to a question:

Non, merci, *pas* tout de suite. (= Je ne veux pas prendre un verre (de vin) tout de suite.)

No, thanks, not right away.

Pas is replaced by **ni... ni...** (see 54.17) when there are two elements in the negation, for example, two nouns or two verbs:

Pauvre petite, elle n'a ni père ni mère. (Note the omission of the article.)

Poor little thing, she has neither a father nor a mother.

Je crois que nous n'avons ni le droit d'ignorer ce conflit, ni celui de ne pas condamner les responsables des massacres.

I believe we do not have the right to ignore this conflict, nor the right not to condemn those responsible for the massacres.

(Note the double negation: **nous n'avons pas le droit de ne pas condamner-nous devons condamner**. This usage is for emphasis.)

Il ne parle ni ne rit (plus) depuis longtemps.

He has not said a word or laughed in a long time.

Note that the previous structure is rarely used when speaking informally. On the other hand, when speaking informally, it is possible to avoid **ne... ni... ne...** 'neither... nor... nor...':

Voilà Docteur, il ne mange plus, (et/ni) ne dort plus.

Well, Doctor, he won't eat or sleep.

Pas is sometimes omitted, in a more formal context, after the verbs **cesser, oser, pouvoir, savoir** (see 54.19):

Il ne sait où aller.

He doesn't know where to go.

Instead of **ne ... pas**, you can use the negative form of a noun or adjective (see 54.24):

Ce n'est pas possible! = **C'est impossible!**
It's impossible!

or a preposition:

Elle est sans domicile fixe. (see 11.4) = **Elle n'a pas de domicile.**
(See 11.1)
She has no fixed abode.

(b) The negation may apply to one part of the sentence only, such as the subject (see 54.16):

Personne n'est venu.
Nobody came.

Rien au monde ne me fera changer d'avis.
Nothing in the world will make me change my mind.

Aucun de vous n'est qualifié pour faire ce travail.
Not one of you is qualified to do this work.

Il n'y a aucune raison de s'énerver.
There's no need to get excited.

or the negation may focus on the verb:

Tu ne viens jamais me voir.
You never come to see me.

Elle n'en a rien voulu savoir.
She didn't want to know anything about it.

Nous ne voulons plus vous voir.
We don't want to see you again.

Adverbs expressing full negation replace **pas** in the negative structures **ne ... jamais**, **ne ... rien**, **ne ... plus**. This is not the case when less powerful adverbs are involved:

Tu ne viens pas souvent me voir.
You don't come to see me very often.

Elle n'a pas voulu en savoir davantage.
She didn't want to know any more about it.

Nous ne voulons pas vous voir constamment.
We don't want to see you all the time.

- (c) Finally, note that a question or a command may also be negative:

Pourquoi n'est-il pas encore arrivé?

Why hasn't he/it arrived yet?

N'oublie pas de faire tes devoirs!

Don't forget to do your homework!

and don't forget that when it is a question of the 'yes/no' type, the answer is **si/non**:

N'êtes-vous pas convaincu de son innocence? Moi, si.

Are you not convinced of his innocence? I am.

Be careful when there is a double negation:

Tu ne crois pas qu'il ne faut pas réveiller les enfants maintenant?

Si, tu as raison, laissons-les dormir./Non, on a assez attendu maintenant!

Don't you think we shouldn't wake the children now? Yes, you're right, let's leave them asleep./No, we've waited long enough!

V Attitude

61 Greeting and leave-taking

61.1

Greeting

The verb *aller* is often used after introductory terms such as **salut** (informal) 'hi' or **bonjour** 'good morning/afternoon':

Salut, les mecs, ça va?

Hi there, you guys! OK?

Monsieur Duverger, bonjour, comment allez-vous?

M. Duverger, good morning. How are you?

The reply may be modulated with intonation or using verbs or adverbs, and it is quite common to thank someone at the same time:

Ouais, ça peut aller, et toi?

Yeah, OK, you?

Très bien, merci, et vous-même?

Very well, thank you. And yourself?

The term of greeting is often combined with a title, which precedes or follows it:

Bonsoir, Messieurs Dames!

Good evening, ladies and gentlemen!

Chers amis, bonjour!

Friends/Colleagues, good morning!

Bonjour Docteur!

Good morning, Doctor!

When introduced to a person for the first time, you can use the above terms (**bonjour**, **bonsoir**, **salut** ...) and/or adjectives or past participles, such as **heureux**, **enchanté** + de + infinitive, or simply on their own:

Bonjour Mademoiselle, très heureux de faire votre connaissance.

Good morning, Miss Smith, very pleased to meet you.

Enchantée!

Delighted!

Salut Danielle, je suis content de te rencontrer; on m'a beaucoup parlé de toi.

Hello Danielle, I'm pleased to meet you. I've heard a lot about you.

The standard opening formula in correspondence, when you do not know the person you are writing to, is:

Madame/Monsieur,

Dear Madam/Sir,

You add the definite article and title in a very formal letter:

Monsieur le Directeur, (under the title/name and address)

Dear Sir,

Madame le Maire, (under the title/name and address)

Dear Madam,

The use of **cher** indicates that you know the person quite well – very well if you add a possessive adjective – or wish to be informal:

Chers amis,

Dear Mr and Mrs Smith,/My dear friends,

Chère Madame,

Dear Mrs Smith,

Mon cher Jean,

My dear John,

61.2 — Leave-taking

Note that some of the terms of greeting: **salut**, **bonsoir** . . . may also be used for leave-taking. **Bonjour** is used as a term of greeting *only*:

Allez salut, à demain!

OK! Bye! See you tomorrow.

Bonsoir; Messieurs Dames et bonne fin de soirée!

Goodnight, ladies and gentlemen. Enjoy the rest of the evening!

It is fairly common to use phrases introduced by the preposition **à** in order to refer to a future meeting, such as **à demain** above:

Au revoir Docteur, à la semaine prochaine!

Goodbye, Doctor. Till next week!

Salut Martin, à plus tard!

Bye, Martin. See you later!

Au plaisir (de vous revoir)!

Till the next time!

It is not uncommon to express some form of best wishes when taking leave, and

this often involves using **bon**, as in **bonne fin de soirée** above:

Au revoir les enfants, bon voyage!

Bye kids! Have a good journey!

Salut Anne, bonne chance pour tes examens!

Bye, Anne! Good luck for your exams!

In correspondence, informal leave-taking may be expressed using short phrases with adverbs or adjectives:

Bien amicalement.

With best regards,

(Grosses) bises et à bientôt.

Lots of love, see you soon,

Bien des choses à toute la famille.

Best wishes to all the family,

or verbs:

Je t'embrasse bien fort.

Lots of love,

In a more formal register, you would use the imperative (see 51.3):

Croyez, Monsieur, à l'expression de mes sentiments les meilleurs.

Yours faithfully,

Veuillez agréer, Madame le Maire, mes salutations distinguées.

Yours faithfully, (or Yours sincerely, if you use the name of the person you are writing to.)

Recevez, je vous prie, nos meilleures amitiés.

With best regards,

or a verb with the pronoun **vous**:

Je vous prie de croire à l'assurance de mes sentiments distingués.

Yours faithfully,

Je vous adresse mon très amical souvenir.

Regards,

62

Expressing congratulations and appreciation

Congratulations

Single terms may be used with appropriate intonation or punctuation:

Bravo!

Well done!

Chapeau!

Well done!

Nouns may be used on their own or reinforced by **tout** and a possessive adjective:

Compliments!

Toutes mes félicitations! (See
18.1a)

Well done!

Congratulations!

In order to compliment someone with various degrees of emphasis, you can use **c'est + adverb or adjective** (see 13.5b):

Mais dis donc, c'est pas mal du tout ce que tu as fait!

Hey! It's not bad at all what you've done!

Votre exposition, c'est formidable, bravo!

Your exhibition, it's wonderful, well done!

More formally, when writing and for social contexts, e.g. birth, marriage, new job, you can use a phrase with a preposition such as **à, pour, avec** and no verb:

A Paul et Virginie, avec toutes nos félicitations pour votre mariage.
(on a card)

For Paul and Virginie, with our warmest congratulations on your wedding.

or a transitive verb such as **présenter, adresser, souhaiter**:

Je vous présente les félicitations du jury pour votre performance à cet examen.

Congratulations from the board of examiners on your performance in this exam.

Nous vous adressons tous nos vœux de bonheur et de prospérité.
We wish you every happiness and prosperity.

or a verb followed by the preposition **de** + noun or infinitive:

Je me réjouis avec vous de la naissance de Catherine.
I congratulate you on the birth of your daughter Catherine.

Nous te félicitons d'avoir obtenu ton permis de conduire du premier coup.

Congratulations on passing your (driving) test at the first attempt.

or **être + adjective + de + infinitive**:

J'ai été très heureuse d'apprendre la naissance de Patrick.
I was very pleased to learn of the birth of your son Patrick.

Jean-Claude et moi sommes ravis d'apprendre que tu as été admis à Sciences Po.

Jean-Claude and I are delighted to hear that you've been accepted by Sciences Po (Institute of Political Science).

or c'est avec ... que:

C'est avec une grande joie que nous avons appris le mariage de votre fils avec Carole Maillou.

It is with great pleasure that we have learned of the marriage of your son to Carole Maillou.

62.2

Appreciation

The simplest form of appreciation is of course **merci**. This can be emphasized with an adverb:

Merci beaucoup.

Thank you very much.

Merci encore.

Thanks again.

or a short phrase:

Merci pour tout.

Thanks for everything

Merci mille fois.

Thanks a million.

Merci takes the preposition **de** when it is followed by a verb:

Merci d'avoir pensé à moi.

Thank you for thinking about me.

Note that **merci** is sometimes used to refuse politely:

Encore un verre? Merci.

Another glass? Thanks, but no thanks. (or No, thank you.)

When accepting an invitation or a suggestion, you can use short expressions such as

Avec plaisir! or Volontiers!

With pleasure!

OK! or D'accord!

Right!

Excellent idée!

An excellent idea!

or verb phrases:

Je veux bien!

Yes, love to!

C'est une bonne idée!

That's a good idea!

In a more formal context, you may first of all acknowledge the invitation with verbs or verb phrases such as **remercier de** + noun or infinitive 'to thank for', **c'est très gentil... de** + infinitive 'it's very kind (of you) to ...', **faire plaisir à** 'to give pleasure to':

Nous vous remercions de votre aimable invitation.

Thank you for your kind invitation.

C'est très gentil à vous de m'inviter.

It's very kind of you to invite me.

C'est très aimable de votre part de nous avoir invités tous les deux.

(See 49.4)

It's very kind of you to have invited both of us.

Votre invitation nous a fait grand plaisir.

We were delighted to receive your invitation.

and then accept the invitation with verbs or verb phrases such as **accepter avec plaisir de + infinitive** 'to accept with pleasure', **se réjouir de + infinitive** 'to be delighted to', **c'est avec plaisir que ...** 'I am pleased to ...':

Nous acceptons avec plaisir de nous rendre au vin d'honneur.

We will be delighted to come to the reception.

Je me réjouis d'être des vôtres. (See 15.1c)

I am delighted to join you.

C'est avec le plus grand plaisir que je vous accompagnerai.

I shall be delighted to come with you.

Naturally, both are often combined, using a relative clause:

Claude Lambert remercie M. et Mme Duforestel de leur aimable invitation à laquelle il se rendra avec grand plaisir le 18 décembre à 21 heures.

Claude Lambert is delighted to accept the kind invitation of M. and Mme Duforestel on 18th December at 9 o'clock.

Je vous remercie de votre cordiale invitation que j'accepte avec grand plaisir.

Thank you for your kind invitation which I am delighted to accept.

63 Expressing apologies and sympathy

63.1

Apologies

The simplest form is **pardon** 'sorry/pardon', – if you bump into someone, for example – used on its own or in various verb phrases such as **demander pardon**:

Je vous demande pardon.

I beg your pardon.

Imperative forms are also used:

Pardonne-moi!

Pardon me!

Excusez-nous!

Excuse us!

and verb forms and verb phrases such as **regretter** 'to regret', **être désolé mais ...** 'to be sorry but ...':

Je m'excuse.

I'm sorry.

Nous ne pouvons pas venir et nous le regrettons.

We are sorry but we cannot come.

D'après le message que nous avons reçu, elle est désolée mais son fils est malade et elle n'a pas pu se libérer.

According to the message we've received, she is sorry but her son is ill and she is not able to get away.

You may apologize more profusely using polite forms or adverbs:

Je vous prie de m'excuser.

I ask you to forgive me.

Veuillez me pardonner.

Please accept my apologies./Please forgive me.

Nous sommes terriblement désolés.

We are dreadfully sorry.

**Avec toutes nos excuses, veuillez agréer, Monsieur
(Madame/Mademoiselle), nos salutations distinguées.**

Please accept our sincere apologies. Yours faithfully,

When explaining what you are apologizing for, you can use **pour + noun**, **de + infinitive or noun**, **verb + que + subjunctive** (see 46.3), or the relatives **ce qui/que/dont**:

Je m'excuse pour le retard mais j'ai crevé sur l'autoroute!

I'm sorry for the delay, but I had a puncture on the motorway.

Je regrette d'arriver si tard mais il y avait des bouchons sur le périph!

I'm sorry for arriving so late, but there were tailbacks on the ring road.

Nous sommes désolés que vous n'ayez pas été prévenu à temps.

We are sorry you weren't informed in time.

The following examples are taken from official or business contexts:

La Direction vous prie d'accepter toutes ses excuses pour cette erreur de facturation.

The management hopes you will accept its apologies for the error in the invoice.

Nous regretons de ne pouvoir donner suite à votre appel. (See 54.19)

The number you have dialled has not been recognized. Please check and try again.

Nous sommes navrés de ce malentendu et regrettons vivement les complications qu'il a entraînées.

We are very sorry about this misunderstanding and we sincerely regret the difficulties it has caused.

Cette facture vous a en effet été adressée par erreur, ce dont nous vous prions de bien vouloir nous excuser. (excuser de > ce dont)
The invoice was in fact sent to you by mistake, and we hope you will accept our apologies.

When suggesting an explanation, the expression of apology may be followed by a verb in the imperfect or pluperfect tenses:

Excusez-moi, je ne voulais pas vous déranger.

I'm sorry, I didn't want to disturb you.

Excusez-moi, j'avais cru bien faire.

I'm sorry, I thought I was doing the right thing.

Excusez-moi, j'essayais simplement de vous aider.

Excuse me, I was only trying to help.

by the verb **pouvoir** or an impersonal phrase such as **il est impossible de + infinitive**:

Je regrette infiniment, mais je ne pouvais pas faire autrement.

I'm terribly sorry, but there was nothing else I could do.

Malheureusement, il m'est impossible de vous recevoir aujourd'hui.

Unfortunately, I cannot see you today.

The verb **devoir** is also used to give an explanation or express regret, and when it does express regret, the perfect or conditional perfect tenses are used:

Excusez-moi, mais j'ai dû prendre des dispositions en votre absence.

I'm sorry, I had to make arrangements in your absence.

Pardonne-moi, je n'aurais pas dû te parler comme ça!

Forgive me, I shouldn't have spoken to you like that!

If you have to apologize, you may also want to give assurances about the future, using the future tense:

Je le jure, je ne le ferai plus!

I swear, I'll never do it again.

Soyez assuré que cela ne se reproduira pas.

Rest assured it will never happen again.

Nous ferons tout notre possible pour éviter ces erreurs à l'avenir.

We'll do everything possible to avoid these errors in future.

63.2

Sympathy

In order to express sympathy when speaking, you can use an exclamation, involving the adjective **pauvre**, sometimes with the definite article or a possessive adjective:

Pauvre vieux! Je le voyais tous les jours en sortant du bureau.

Poor old chap! I used to see him every day when I left the office.

La pauvre ... , elle n'en a plus pour très longtemps!

Poor thing! She hasn't long to go.

Mon pauvre cher! Tu n'as vraiment pas de chance!

My poor darling, you certainly don't have much luck!

Alternatively, you may use an adjective such as **quel** with a noun, or an adverb such as **comme** with a verb:

Quelle tristesse dans les yeux de ces enfants!

What sadness in these children's eyes!

Comme je les plains!

How I pity them!

In writing, elliptical forms are used and often include **tout + noun** or the preposition **avec + noun**:

Toutes mes condoléances.

All my sympathy,

Avec notre profonde sympathie.

With our deepest sympathy,

Also in writing, a number of verbs may be used with nouns such as **condoléances** or **sympathie** and the cause of grief may be introduced with terms such as **à l'occasion de** or **en**:

Nous vous adressons nos plus sincères condoléances à l'occasion de la disparition tragique de votre fils.

We send you our deepest sympathy on the tragic death of your son.

Je vous fais toutes mes condoléances en ces moments difficiles.

I extend to you my deepest sympathy at this difficult time.

Imperative forms, which are much more formal, can also be used (see 61.2):

Crois bien, chère Anne, à l'expression de ma profonde sympathie.
Please accept, (my) dear Anne, my deepest sympathy.

Croyez que nous sommes de tout cœur avec vous et soyez assurés de notre sincère sympathie.
Our hearts go out to you and we send you our deepest sympathy.

Alternatively, you may use the emphatic form *c'est ... que*:

C'est avec une immense tristesse *que* nous avons appris le décès de Victor.
It is with immense sadness that we have learned of Victor's death.

64 Expressing surprise and disgust

64.1

Surprise

When speaking, surprise is often conveyed by intonation alone, and marked in writing by punctuation:

Elle a pris le verre de bière et... elle lui a versé sur la tête!
She took the glass of beer and... poured it over his head!

Interjections such as **oh!** and **ah!** may be used, to express surprise and admiration:

Oh! quel beau bleu!
Oh, what a beautiful blue!

Ah! voilà Claire! Je me demande ce qui l'amène.
Oh, there's Claire! I wonder what brings her here.

Ouah! C'est vraiment cool chez toi!
Wow! It's really cool/brilliant at your place!

And there are many short expressions, which are used to express surprise or disbelief: **ça alors!** **ah bon?!** **pas possible!** **sans blague!** **non! ...**

Ça alors, Jean-Pascal, ça fait une paille!
Well, Jean-Pascal, long time no see!

Tiens, il a neigé!
Well now! It's been snowing!

C'est/ce n'est pas + adjective are also frequently used (see 13.5a, 13.5b):

Ah bon, c'est vrai?!

Really? Is that true?!

Non, c'est incroyable!

No! That's unbelievable!

Sans blague, ce n'est pas possible!

No kidding! That's not possible!

And verbs such as **plaisanter** 'to joke', some including **en**, are also used to express surprise:

Tu plaisantes?!

Are you joking?

Je n'en reviens pas.

I can't get over it.

Quand elle lui a dit ça, il en est resté babal

When she told him that, he was flabbergasted!

An adjective such as **quel** may be used to introduce a noun phrase:

Vous ici, quelle surprise!

You here! What a surprise!

or an adverb such as **comme** introducing a clause:

C'est ton fils? Comme il a grandi!

That's your son? Hasn't he grown!

In a more formal register, you can use expressions in apposition:

A mon étonnement, il n'a rien répondu.

To my surprise, he didn't answer.

A notre grande surprise, les sanctions ont été levées.

To our great surprise, the sanctions were lifted.

or **être + past participle** expressing surprise:

Nous avons été très surpris par ce changement d'attitude.

We were very surprised by this change of attitude.

Je suis sidérée par sa réaction.

I'm astonished at his reaction.

Elle a été très étonnée de constater qu'on avait augmenté son salaire.

She was amazed to find that her/his salary had been increased.

or avoir + noun expressing surprise:

Nous avons eu la surprise de le voir arriver en pleine nuit.

We were surprised to see him/it arriving in the middle of the night.

or verbs expressing surprise such as s'attendre à 'to expect', surprendre 'to surprise':

J'avoue que je ne m'y attendais pas.

I admit I didn't expect that.

Je dois dire que cette décision m'a surprise.

I must say that decision surprised me.

64.2

Disgust

Again, interjections are available:

Pouah, ça pue ici!

Ugh! It stinks here!

Berk!

Yuk!

or c'est + adjective expressing disgust (see 13.5b):

C'est horrible!

It's horrible!

C'est dégueulasse!

That's disgusting!

C'est révoltant!

It's revolting!

or c'est + noun expressing disgust:

C'est une honte!

It's a disgrace!

C'est vraiment un scandale!

That's a real scandal!

And there is the adjective quel + noun expressing disgust – used as an interjection:

Quelle horreur!

That's horrible!

Quelle puanteur ici!

What a stink here!

or ce + noun + être + adjective, sometimes reinforced by an adverb (see 12.1):

Ce steak est absolument immangeable!

This steak is inedible!

Cet appartement est indescriptible!

This flat is indescribable!

or c'est + adjective + de + verb:

C'est tout de même écoeurant d'avoir à payer les honoraires de la famille royale avec nos impôts!

It's disgusting to have to pay the expenses of the royal family with all our taxes!

or verb + adjective + **que** + subjunctive (see 46.3):

Je trouve scandaleux que l'on puisse ainsi mettre les gens à la porte!

I find it scandalous that one can throw people out in this way!

When explaining what you are disgusted about, you can use a passive form + preposition + explanation (see 48):

Je suis révoltée par le traitement qui est réservé aux SDF (sans domicile fixe).

I'm disgusted by the treatment given to people with no fixed abode.

Indignés de l'accueil qu'on leur avait fait, ils sont partis sans dire au revoir.

Annoyed by the reception they got, they left without saying goodbye.

or you can offer the explanation followed by a verb or noun expressing disgust:

L'attitude des hommes politiques me révolte.

The attitude of the politicians disgusts me.

Le prix des légumes est un scandale!

The price of vegetables is a disgrace.

65 Expressing contrasting attitudes, emotions, feelings

Likes and dislikes

To express likes and dislikes, you can use a variety of verbs and verb phrases such as **aimer** 'to like, love', **agacer** 'to annoy', a verb such as **aimer** + noun:

Tu aimes la littérature anglaise?

You like English literature?

sometimes used with **bien**:

J'aime bien les œufs à la coque.

I really like soft-boiled eggs.

Tu l'aimes bien Jean-Pierre? — Non, ce type m'agace!

Do you like that Jean-Pierre? — No, that guy annoys me.

noun + a verb such as **plaire** 'to please' or **déplaire** 'to displease':

Ce film m'a plu, et (à) toi?

I liked the film, did you?

Non, moi je n'ai pas tellement aimé.

No, I didn't like it very much.

a verb expressing liking/disliking + infinitive, or frequently, + **que** + subjunctive (see 46.3):

Je n'aime pas faire la cuisine.

I don't like cooking.

Elle aime qu'on lui fasse des cadeaux.

She loves getting presents.

L'institutrice n'aime pas qu'on lui dise des gros mots.

The teacher doesn't like people using bad language.

and phrases introduced by **c'est** or **ça** (see 13.5b, 13.5d):

Ça t'a plu 'Les Visiteurs'? — Oui, c'est très bien!

Did you like 'The Visitors'? — Yes, it's very good!

Impersonal verbs can also be used (see 53):

Il lui était pénible d'avoir à effectuer toujours les mêmes tâches.

It was boring for him/her always doing the same jobs.

and the structures used for emphasis, **ce qui/ce que ... c'est** or **c'est que/qu'** 'what ... is that' (see 22.16):

Ce qui me déplaît chez cet auteur, c'est qu'il donne toujours l'impression de prendre ses lecteurs pour des imbéciles.

What I don't like about this writer is that he always gives the impression of taking his readers for fools.

Ce que j'aime quand je suis en vacances, c'est le soleil, c'est qu'il n'y a pas d'heure, c'est rester au lit jusqu'à midi et les longues soirées passées dehors sur la terrasse.

What I love when I'm on holiday is the sun, the fact that you don't have to watch the clock, you can stay in bed till lunchtime and spend long evenings out on the terrace.

Other introductory verbs may be used, such as **éprouver**, **trouver** + noun + **à** + infinitive, and **être** + adjective or noun + **de**, with no definite article:

J'éprouve du plaisir à me promener seule en forêt.

I enjoy walking alone in the forest.

Il trouve de la satisfaction à écouter de la musique.

He enjoys listening to music.

Les enfants sont friands de bonbons.

The children love sweets.

Il est amateur de jazz.

He's a jazz enthusiast.

Preference

To express preference there are a number of verbs and verb phrases available, including **préférer x à y** 'to prefer x to y':

Je préfère le vin rouge au vin blanc.

I prefer red wine to white wine.

and the construction **préférer + infinitive + plutôt que + infinitive**:

Nous préférons sortir tous les deux plutôt que rencontrer des tas de gens.

We prefer to go out just the two of us rather than meeting crowds of people.

Preference can of course be expressed in an elliptical way, for example in a dialogue:

Tu aimes l'écharpe jaune? Non, plutôt la verte.

You like the yellow scarf? No, (I prefer) the green one.

Avoir + noun expressing preference + pour is an alternative:

J'aime certains morceaux modernes mais j'ai une préférence pour la musique classique.

I like some modern pieces but I prefer classical music.

Si ça ne vous ennuie pas, nous avons une préférence pour le samedi plutôt que le vendredi.

If it doesn't bother you, we prefer Saturday rather than Friday.

Impersonal forms are also used: **il vaut mieux que + subjunctive** 'it would be better to ...' (see 46.3), **il paraît/est préférable de + infinitive** 'it seems/is preferable to ...':

Il me paraît préférable de garder l'ancien système, le nouveau est trop compliqué.

It seems to me to be preferable to keep the old system, the new one is too complicated.

Il vaudrait mieux que ce soit vendredi soir puisque nous ne travaillons pas le lendemain.

It would be better for it to be Friday evening because we don't work the day after.

Note the use of the conditional tense in the previous example. This is quite frequent for expressing preference politely: verb (in the conditional) + **que** + subjunctive (see 46.3):

J'aimerais mieux que tu viennes me chercher à la gare, ça m'évitera de prendre un taxi.

I'd prefer it if you came to get me at the station, then I won't have to take a taxi.

Sa mère préférerait qu'il aille la voir plus de deux fois par an.

His mother would prefer it if he went to see her more than twice a year.

or **cela/ce** + verb (in the conditional) + **mieux**:

A neuf heures? Cela m'arrangerait mieux à huit heures.

Nine o'clock? It would suit me better at eight.

or a noun phrase + verb (in the conditional):

Dix-huit heures me conviendrait mieux/davantage.

Six o'clock would suit me better.

66 Love and hate

In order to reinforce expressions of liking and disliking, you can use adverbs:

J'aime énormément la cuisine chinoise, et vous?

I love Chinese food, do you?

Ah non, moi pas du tout!

Oh no, I don't like it at all!

Il éprouve beaucoup de plaisir à se moquer des autres.

He loves making fun of other people.

La robe qu'elle a choisie ne me plaît pas du tout.

I don't like the dress she has chosen at all.

Ce que j'aime plus que tout, c'est avoir le temps de lire un bon roman policier.

What I like more than anything is having the time to read a good thriller.

or adjectives:

On dirait qu'il trouve un plaisir intense à créer des conflits.

You would think he gets immense pleasure from creating trouble.

Je n'éprouve aucune satisfaction à effectuer des tâches répétitives.

'I get no pleasure from doing repetitive tasks.'

Naturally, there are specific verbs expressing love and hate such as **adorer**, **détester**:

J'adore le chocolat blanc mais je déteste le noir.

I love white chocolate but I hate dark chocolate.

Elle le haïssait autant qu'il l'adorait.

She hated him as much as he adored her. (**le**, **il** and **l'** are ambiguous)

These verbs may also be followed directly by infinitives (see 52.5):

Il adore se promener sous la pluie.

He loves walking in the rain.

Je déteste voir souffrir des enfants.

I hate seeing children suffer.

These and other verbs may also be followed by **que** + subjunctive (see 46.3):

Brigitte Bardot ne supporte pas que l'on fasse du mal aux animaux.

Brigitte Bardot cannot tolerate people hurting animals.

Rien as the subject is an alternative for expressing love and hate (see 54.16):

Pour moi, rien ne vaut une soirée entre amis au coin du feu.

For me there's nothing better than an evening by the fire among friends.

Tu sais bien que pour lui, rien n'est pire que le mensonge.

You know very well that for him nothing is worse than telling lies.

67 Enthusiasm and indifference

Some of the expressions used for like/love may, of course, be used to express enthusiasm. In addition to these, spontaneous enthusiasm can be expressed, in particular when speaking, with short phrases such as:

Super!

Excellent idée!

Super!

An excellent idea!

or **c'est** + adjective or noun:

C'est génial comme idée!

It's a brilliant idea!

C'est une excellente suggestion!

It's an excellent suggestion!

In more formal contexts, you can use reflexive verbs such as **s'enthousiasmer pour** 'to be enthusiastic about':

Il s'est immédiatement enthousiasmé pour ce projet.

He was immediately enthusiastic about the project.

Au cours des prochains mois, je vais me donner à fond dans la rédaction de ce manuscrit.

Over the next few months I'm going to devote myself to writing/drafting this manuscript.

or passive forms such as **être enthousiasmé par** + noun, **être ravi de** + infinitive:

Nous sommes enthousiasmés par la perspective de travailler avec vous.

We are delighted at the prospect of working with you.

Je serais ravie de prendre mes fonctions dès que possible.

I would be delighted to take up my post as soon as possible.

A number of short phrases are also available for expressing indifference:

Bof! Not so hot!

Comme tu veux! If you like!

Ça m'est égal! I don't care!

Peu importe. Doesn't matter!

and phrases introduced by **ça**, **cela**, **c'est** (see 13.5c, 13.5d):

Ça n'a pas vraiment d'importance.

It really isn't very important.

Cela ne change rien.

That doesn't make any difference.

C'est comme tu veux.

As you wish.

and when you want to place emphasis on your own indifference, stating that you really don't mind:

Je n'ai aucune préférence. Toi, tu décides. (See 21.2d)

I don't mind. You can decide.

68 Hopes and fears

There are many ways of expressing hopes and fears. You can express hope using verbs such as **souhaiter** + infinitive 'to wish', **compter bien** + infinitive 'to count on doing something', **espérer** + infinitive 'to hope' or + **que** 'to hope that':

Il souhaite nous rejoindre en Italie.

He wants to meet/join us in Italy.

Je compte bien ne pas avoir à attendre la retraite pour profiter de la vie.

I'm counting on not having to wait for retirement in order to enjoy life.

Le secrétaire général du parti espère que les adhérents sauront se mobiliser pour les prochaines élections.

The Secretary General of the party hopes that members will be able to mobilize themselves for the next election.

or verb + noun:

Nous te souhaitons beaucoup de bonheur et de succès.

We wish you every happiness and success.

Emphatic forms such as **ce que/ce qui ... c'est que** are also available:

Ce que j'espère plus que tout, c'est que nous pourrons nous revoir bientôt.

What I hope more than anything is that we can see each other again soon.

Verbs such as **vouloir** – with its various constructions – may be used. Note the nuances in the present tense, which is used to express a strong hope, and note the use of **que** + subjunctive when the subjects of the two clauses are different (see 46.3):

Avant tout, je veux que tu sois heureux dans la vie.

More than anything I want you to be happy (in your life).

Toi, tu voudrais la lune!

You'd ask for the moon.

Alternatively, you can use an expression such as **si seulement je** + imperfect:

Si seulement je pouvais un jour faire ce grand voyage ...

If only I could make this great journey one day ...

Fears in various contexts can be expressed with short phrases or interjections, such as **Ah! Ah!**, **Oh non!** 'Oh no!', **Au secours!** 'Help!', **Mon Dieu!** 'My God!'. There

are also verb phrases such as **avoir peur + de + noun** or infinitive, or + **que + subjunctive**, **croire que + ne + subjunctive** 'to fear' (see 46.3):

Maman, j'ai peur du loup dans ma chambre.

Mum, I'm frightened of the wolf in my room.

Avec ce qui s'est passé ici, nous avons très peur de laisser sortir nos enfants.

After what's happened here, we are very frightened to allow our children out.

Elle croit que les intrus qui ont forcé sa porte ne reviennent.

She is afraid the intruders who broke open her/his door may come back.

Expressions such as **pourvu que + subjunctive** or **espérons que + subjunctive** may express both hopes and fears:

Pourvu qu'il n'aille pas le répéter à tout le monde!

Let's hope he doesn't repeat it to everybody!

Espérons que le temps se mette au beau d'ici samedi!

Let's hope the weather has turned better by Saturday.

69 Approval and disapproval

You can express approval or disapproval of something or someone with verbs: **approuver** 'to approve of', **désapprouver** 'to disapprove of'. Note that the French verbs are directly transitive, whereas the English verbs have an indirect object:

J'ai décidé de me mettre en disponibilité pendant un an et mes collègues m'approuvent.

I've decided to take leave of absence for a year and my colleagues are in agreement.

Vos professeurs désapprouvent votre comportement.

Your teachers disapprove of your behaviour.

or the passive form can be used (see 48):

La décision a été approuvée par tous.

The decision has been approved by everyone.

Alternatively, **être + adjective** or **past participle + à** may be used:

Le directeur est favorable au redéploiement des ressources que vous avez suggéré.

The manager is in agreement with the redeployment of resources that you have suggested.

Ton père et moi sommes entièrement opposés à ce mariage.
Your father and I are entirely opposed to this marriage.

Avoir features in a number of verb phrases which may be used, such as **avoir bien fait de** + infinitive 'to have done well to, done the right thing to', **avoir raison de** + infinitive 'to be right', **avoir tort de** + infinitive 'to be wrong':

Vous avez bien fait de m'envoyer les documents avant de venir me voir.

You were right to send me the documents before coming to see me.

Il a raison de ne pas se laisser faire!

He's right not to let himself be pushed around.

A mon avis, tu auraient tort de le quitter pour ça.

In my opinion, you would be wrong to leave him/it for that.

Note that expressing approval or disapproval is often an opportunity to give an opinion (**à mon avis** in the previous example) and is related to agreeing and disagreeing (see 70.1c).

You can also use adverbial expressions introduced by prepositions such as **à**, **avec**:

Vous vous êtes plaint à juste titre auprès de vos supérieurs.

You were right to complain to your superiors.

Il a évité avec raison de parler de ses précédents accidents de voiture.

He was right not to speak about his previous car accidents.

and there is a variety of other ways of expressing approval and disapproval:

Tu pars en vacances? Très bien, il était grand temps que tu penses un peu à toi!

You're going on holiday? Excellent. It's time you thought about yourself a bit.

Enfin quelqu'un de compétent qui sait de quoi il parle!

At last someone competent who knows what he's talking about.

Je n'aime pas la façon dont vous organisez ces réunions.

I don't like the way in which you organize these meetings.

Je ne comprends pas comment il a pu faire une chose pareille!

I don't understand how he could do such a thing.

Cela me déplaît que tu traînes dehors jusqu'à des heures impossibles.

I don't like you hanging around outside till all hours.

ptiergnah hñn gaing

bonne chose que tu n'as pas à faire de mal à tes amis. Mais si tu as envie de faire quelque chose pour elle, alors je veux que tu la fasses pour elle et pas pour moi. Tu as le temps de faire ce que tu veux, mais je veux que tu fasses ce que tu veux pour moi.

les deux	que tu es	que tu es
Apprendre	que tu es	que tu es
tu es bien	que tu es	que tu es
dire	que tu es (ceci n'est) nécessaire	que tu es

Il est important de se rappeler que nous ne devons pas être dans la même situation que les autres. Nous devons nous adapter à nos propres besoins et à nos propres circonstances.

ce sont peut-être d'autres personnes qui ont des besoins et des circonstances différentes de celles de nous.	M. M.
Il est important de se rappeler que nous devons nous adapter à nos propres besoins et à nos propres circonstances.	M. M.
ce sont peut-être d'autres personnes qui ont des besoins et des circonstances différentes de celles de nous.	M. M.
Il est important de se rappeler que nous devons nous adapter à nos propres besoins et à nos propres circonstances.	M. M.
ce sont peut-être d'autres personnes qui ont des besoins et des circonstances différentes de celles de nous.	M. M.

Il est important de se rappeler que nous devons nous adapter à nos propres besoins et à nos propres circonstances.

que tu es
que tu es
que tu es
que tu es

VII Argumentation

70 Agreeing and disagreeing

70.1

Agreeing

- (a) There are many different ways of indicating that you agree with somebody or something. Here are some ways of saying that you agree totally with a statement:

Bien sûr!

C'est sûr!

Exactement!

Vous avez (or tu as) raison!

Oui, c'est ça!

Absolument!

Tout à fait!

C'est vrai!

The following examples were used in an exchange in the French National Assembly (5.4.94), but they could equally have occurred in informal conversation:

M. M. BERSON

Ce sont bien les députés [...] qui ont refusé tous les amendements que nous avions déposés [...]

M. J-P. BRARD

Oui!
[...] En un an, le gouvernement a commis beaucoup d'erreurs.

M. M. BERSON

C'est vrai!

M. J. DRAY

M. M. BERSON

But it was the deputies (in the National Assembly) who rejected all the amendments we'd proposed . . .

Yes.

M. J-P. BRARD

In one year the government has made many mistakes.

M. M. BERSON

That's right.

M. J. DRAY

Frequently, the forms are combined:

Oui, d'accord.

Voilà, exactement.

T'as raison, c'est ça. (informal)

- (b) If you want to be a little more formal when you are talking, once again you have a choice of expressions, which are equally appropriate in writing. In response to a statement or suggestion such as:

Elle croit que les aiguilleurs du ciel accepteront les nouvelles conditions d'emploi.

She thinks the air traffic controllers will accept the new conditions of work.

you can say or write:

Je suis entièrement d'accord avec elle sur ce point/ce qu'elle vient de dire.

I agree with her totally about that/with what she has just said.

and responding with a question to the same statement:

Les syndicats seront-ils, cette fois, d'accord avec le gouvernement?

Will the unions agree with the government this time?

- (c) Here are some other ways of agreeing with a statement or suggestion. Remember: you need to know not just the verbs and verb phrases, but also the constructions that follow them.

Elle partage notre avis sur qch	She shares our opinion on ...
--	----------------------------------

Vous avez raison de + infinitive	You are right to ...
---	----------------------

Nous convenons que + indicative	We agree that ...
--	-------------------

Je suis d'avis que + indicative	I think that ...
--	------------------

Elle le soutient sur qch	She supports him on ...
---------------------------------	-------------------------

Il a exprimé son soutien à qn	He has expressed his support for ...
--------------------------------------	--------------------------------------

Nous avons accepté qch	We have accepted ...
-------------------------------	----------------------

Ils ont donné leur accord à qch	They agree that ...
--	---------------------

- (d) Note the following example in which the speaker expresses an opinion with **je suis d'avis que**, but it becomes agreement because of the addition of **comme vous**.

Comme vous, je suis d'avis qu'il faut signer la Charte sociale européenne.

I agree we must sign the Social Charter.

- (e) Sometimes, to distance themselves from what someone says, the French use an impersonal phrase (see 53).

Il est juste de dénoncer les injustices du monde moderne.
 It is right to condemn the injustices of the modern world.

Il est vrai que le monde moderne est plein d'injustices.
 It is true that today's world is full of injustices.

(f) Agreeing to do something:

Les syndicats accepteront d'intervenir cette fois.
 The unions will agree to intervene this time.

70.2

Disagreeing

(a) Spontaneous and total disagreement with a statement can be expressed (as in agreement) through the use of an exclamation such as:

(Mais) non!
Absolument pas!

C'est faux!
Certainement pas!

Various nuances are conveyed in what follows the exclamation, for example there is a clear protest in:

Mais non, je n'ai jamais dit ça!
 No! I never said that!

(b) When full disagreement with a proposal is expressed, a number of idiomatic expressions can be used:

Statement: **Il faut supprimer toutes les prestations sociales.**
 We must end social security benefits.

Responses: **Certainement pas!**
 Certainly not!

C'est hors de question!
 Out of the question.

Vous plaisantez!
 You must be joking!

(c) For disagreement followed by a statement of what is disagreed with, the verbs and verb phrases previously identified in 70.1 can simply be made negative:

Pourquoi n'êtes-vous pas d'accord avec moi sur ce point?
 Why don't you agree with me about this?

Quant à ce nouveau projet de loi, il est évident que l'opposition ne partage pas l'opinion du gouvernement.
 As far as the new bill is concerned, it is clear that the opposition does not share the government's views.

Positive expressions can also be used, for example verb + noun:

Prenez l'habitude de contester systématiquement mon analyse et vous développerez votre esprit critique. (See 32.5, 51.3)

Get into the habit of automatically disagreeing with my analysis and you will develop your critical faculties.

- (d) In order to state clearly what is being disagreed with, it is often necessary to refer back to or repeat a statement or proposal:

Je différe de M. Lambert qui, lui, estime que nous devrions ajourner cette réunion. (See 22.1)

I do not agree with M. Lambert who thinks that we should adjourn the meeting.

Le public n'accepte pas l'idée selon laquelle il faut de plus en plus avoir recours à des services privés. (See 22.5)

The public does not accept that we will have to move increasingly towards private sector services.

Le dernier orateur a réfuté tout ce qui avait été dit avant lui. (See 22.15, 38)

The last speaker rejected everything that had been said.

- (e) You can also refer back to the person/organization that has made the statement or proposal (see 74f):

Contrairement à M. Pasqua, je ne crois pas qu'il soit nécessaire ou même souhaitable d'emprisonner tous les jeunes délinquants.

Contrary to the view of M. Pasqua I do not believe it is necessary or even desirable to put every young offender in prison.

A la différence des autres pays européens, le Royaume-Uni a rejeté la Charte sociale.

Unlike other countries in Europe the UK has rejected the Social Charter.

- (f) Disagreement can also be expressed using a noun (as subject of the verb) or an impersonal form + infinitive:

- disagreement with a statement

Vos explications sont dépourvues de toute vraisemblance et ne peuvent pas être retenues par le Conseil de discipline. (See 48)

Your explanations are quite improbable and cannot be accepted by the disciplinary board.

A mon avis, il est inadmissible de s'adresser en ces termes à un professeur. (See 53)

In my opinion, it is unacceptable to talk in such a way to a teacher.

(In the previous example, note the use of **à mon avis** to reinforce the expression of disagreement as a personal opinion.)

- disagreement with a proposal

Pour l'instant, il n'est pas envisageable de satisfaire les consommateurs en ouvrant les supermarchés le dimanche. (See 53)

For the time being we simply cannot consider keeping customers happy by opening supermarkets on Sundays.

La décision de fermer indéfiniment les locaux scolaires après l'apparition de quelques cas de méningite paraît inacceptable. (See 52.10)

The decision to close the schools indefinitely following the outbreak of meningitis seems unacceptable.

And note the following example taken from a debate in the European Parliament in which members object to the views of JM. Le Pen:

[...] C'est pourquoi, Monsieur le Président, Mesdames et Messieurs, je serai contre cette proposition, en soulignant qu'encore une fois elle est établie par un consensus sournois qui ne s'est exprimé par aucun courrier. Nous n'avons pas été invités à faire partie de ... (Exclamation: *Ce n'est pas vrai!*) ... c'est absolument vrai, je suis le président de ce groupe, j'ai tout ignoré de cette initiative.

*(Journal Officiel des Communautés Européennes:
Débat du Parlement européen – Séance du 15.2.90)*

That's why, Mr Chairman, Ladies and Gentlemen, I would be against the proposal, and I stress that once again a decision was taken behind my back and it was not put in writing. We were not asked to participate ... (That is not true!) ... it is absolutely true, I am the chairman of the group and I knew nothing about what was going on. (See 70.1)

(g) Note the following range of negative responses – from informal spoken to formal written examples:

Situation:	Une marchandise défectueuse vous a été livrée. Vous demandez réparation aux frais de la Société. La secrétaire vous annonce au téléphone que vous devez participer aux frais.
------------	--

Faulty goods have been delivered to you. You ask for compensation from the company. The secretary telephones to say you must contribute.

Responses:

Certainement pas! Vous plaisantez ou quoi?

Passez-moi le directeur. (spoken, informal)

Certainly not! Are you joking? Put me on to the manager.

Je ne suis pas d'accord pour payer alors que je n'en suis pas responsable. (spoken/written, informal/formal)

I cannot agree to pay since I am not responsible (for this).

Ecoutez, je regrette mais je ne peux pas accepter étant donné que ... (spoken, formal) (see 49.1)
Look, I regret that I cannot agree because ...

La proposition de la direction selon laquelle je devrais assumer une partie des frais ne peut être retenue ... (written, formal) (see 54.19)

The management's suggestion that I should meet part of the cost is unacceptable ...

70.3

Agreeing to differ

When both sides of an argument have been expressed and no compromise reached, the participants might simply agree to differ before breaking off. Statements of agreement to differ often use personal pronouns, sometimes combined with idiomatic expressions such as **rester sur ses positions** or **avoir des idées bien arrêtées/des points de vue divergents**:

Chacun de nous reste sur ses positions: vous avez votre opinion, moi la mienne. (See 15.1, 21.2)

We are each sure/convinced we are right: you have your views and I have mine.

Soit, vous, vous prenez à gauche, nous à droite et nous verrons bien quelle équipe arrivera en premier au sommet. (See 21.2)
Right. You go on the left. We'll go on the right and we'll see which team gets to the top first.

In the second example, note how the second **nous** is different from the first one in that it includes everyone: **vous + nous** representing the two teams.

71 Asserting and confirming

71.1

Asserting

- (a) There are many direct ways for someone to assert something in speech. When people wish to declare/state/assert something, they simply utter whatever it is they want to declare/state/assert. Occasionally, however, the function is made more explicit in the utterance itself, as in the following examples:

En tant que président de l'association, je déclare la conférence ouverte.

As President/Chairman of the Association, I declare the conference open.

Vous devrez certifier sur l'honneur l'exactitude des informations contenues dans ce document.

You must swear on your honour that the information contained in the document is accurate.

Les condamnés qui ont enfin été libérés proclamaient leur innocence depuis de nombreuses années. (See 33.2)

The men who have finally been released had been proclaiming their innocence for many years.

- (b) The previous examples involve the structure verb + noun and all of them contain a statement of an official nature. The passive form of the verb, or the structure noun + past participle can also be used in such a context:

Le discours sur le rôle des femmes dans la société sera-t-il prononcé par le Ministre de la condition féminine? (see 48)

Will the speech on the role of women in society be given by the Minister for Women's Affairs?

Les journaux ne parlent que des déclarations faites hier, lors de la conférence de presse à Paris. (See 49.1)

The papers are full of the declaration/statements made yesterday at the press conference in Paris.

- (c) In a detailed report of an exchange, such as the following example from a police report, statements are introduced by a colon and transcribed between inverted commas:

14h35 – Le suspect déclare: 'J'ai passé la soirée du 2 novembre au cinéma.'

14.35 The suspect stated: I spent the evening of the 2nd of November at the cinema.

Remember that the rules governing indirect speech (see 58) have to be taken into account in other instances:

Le suspect déclare avoir passé la soirée au cinéma.

The suspect stated he had spent the evening at the cinema.

An example of minutes taken at a meeting:

Le comptable a affirmé que la situation financière de la société était satisfaisante.

The accountant confirmed that the financial situation of the company was satisfactory.

(d) In speech, it is not unusual to state your intention to make an assertion:

Laissez-moi parler, je voudrais dire quelque chose. (See 40.4)
Allow me to speak, I want to say something.

Si vous le permettez et au nom de tous mes collègues, je dirai ceci:
If you will allow me, and on behalf of all my colleagues, I will say this ...

71.2

Confirming

Usually, an arrangement, or a statement, is made and then confirmed.

(a) Confirmation of an arrangement:

A la suite de notre conversation téléphonique du 3.10.94, veuillez confirmer ma réservation par retour du courrier.

Further to our telephone conversation of 3.10.94, please confirm my reservation by return.

Il devrait être arrivé maintenant, il a bien pris le train à 8h00 comme prévu.

He should have arrived now. He *did* take the 8 o'clock train as planned.

(b) Confirmation of a statement:

Depuis notre bulletin de la matinée, les autorités maritimes ont attesté la présence de 950 personnes à bord du ferry au moment de l'accident.

Since our morning bulletin/announcement, the maritime authorities have confirmed that 950 people were on board the ferry at the time of the accident.

Mesdames et messieurs les jurés, notez bien que selon le témoignage de son épouse, l'accusé se trouvait en effet à son

domicile ce soir-là, et que les voisins *confirment* également ses déclarations quant aux déplacements de la journée.

Ladies and gentlemen of the jury, please note that according to the evidence of his wife, the accused was in fact at home that night, and the neighbours also confirm his statement concerning his movements during the day.

- (c) So, in fact, assertion often precedes confirmation, and confirmation can be achieved through the use of verbs such as **corroborer, confirmer, vérifier, attester** and through the use of adverbs such as **bien, en effet, effectivement**. Confirmation can be implied when specific 'negative' verbs are used with negative adverbs, as in **ne pas démentir, ne pas nier**:

Interrogé lors d'une conférence de presse tenue ce matin, l'athlète français *n'a pas démenti* les allégations faites contre lui dans les journaux sportifs.

Questioned at a press conference this morning, the French athlete did not deny the allegations made against him in the sports papers.

- (d) A statement can also be confirmed through repetition, as in the following exchange:

On peut vous joindre à quel numéro? Au 447 2239 poste 357. Je répète: 447 2239 poste 357.

We can contact you at what number? 447 2239 Ext. 357. I'll repeat that: 447 2239 Ext. 357.

72 Admitting and conceding

72.1

Admitting

Admission is a mild form of agreement in the sense that it is assumed, despite initial reluctance, that a person has come round to the opinions of his/her interlocutor upon reflection. For example, one might say **c'est vrai, certain, exact, évident, incontestable**, but the intonation will be different from that of similar expressions listed in 70.1a and 70.1b: when you are admitting something a note of doubt will probably be added to the words.

- (a) In most cases, admission is explicitly recognized through using one of the following verbs: **(en) convenir, reconnaître, admettre** . . .

Vous avez raison, j'en conviens.

You are right, I (have to) admit/agree.

- (b) So, a person may admit or agree to a statement or an idea in a discussion.

The same verbs can be used to admit mistakes or failures:

Il est temps que la communauté internationale reconnaîsse ses erreurs en matière de protection de l'environnement.

It is high time (that) the international community admitted its errors concerning the protection of the environment.

La directrice de l'établissement devra admettre, devant le Conseil de parents d'élèves, que cet interne a été accusé à tort.

The headmistress will have to admit to the Parents' Association that the accusations made against the boarder were wrong.

72.2 Conceding

(a) Within the framework of argumentation, admitting is in fact often conceding, that is, agreeing in part with the interlocutor's point of view in order to disagree afterwards – in other words going some of his/her way before taking a different path. A concession, therefore, can be identified in relation to what follows, and the general structure involved has three distinct stages:

- 1 The *concession* itself, which can be introduced by a verbal form such as *je dois l'admettre, si vous voulez, je vous concède ce point, je vous accorde que* 'I have to admit, if you like, I'll accept that point, I agree with you that', by an adverb such as *certes, en effet, effectivement, soit* 'that's true, yes indeed', by an impersonal form such as *il est vrai/exact/certain que* 'it is true that'.
- 2 The *transition* through a cohesive device marking opposition (see 80d): *mais, n'empêche que, cependant, reconnaissiez-le, cela dit, il n'en reste pas moins vrai que, en revanche, vous concéderez bien que, admettez tout de même que* 'but, nevertheless, yet, you must admit that, having said that, it is nonetheless true that, on the other hand, you will admit that, you have to admit nevertheless that'.
- 3 The *disagreement*, that is, the expression of a different point of view (see 70.2c, 70.2d) which is, of course, open to concession on the part of the interlocutor.

(b) Concession is important in a debating or negotiating situation, in order to have civilized exchanges and to send the ball back into the interlocutor's court. Note the three stages in the following examples:

Je reconnais qu'il y a beaucoup de circulation à cette heure-ci, mais tout de même, cela fait une semaine que vous arrivez en retard tous les matins, ça ne peut plus durer.

I admit that there is heavy traffic at this time of day, but (nevertheless) you have been late every morning this week. That/This can't go on.

Certes, il y a des cas d'utilisateurs de drogues dures qui sont aussi consommateurs de drogues douces. Cela dit, reconnaisez-le, on n'a jamais prouvé que l'usage de cannabis conduisait automatiquement à l'usage d'héroïne.

Certainly, there are people who use both soft and hard drugs. Having said this, you must admit that it has never been proved that the use of cannabis automatically led to the use of heroin.

En effet, nous admettons tous que la livraison correspondant au bon n° 235B a été effectuée avec trois jours de retard. En revanche, les marchandises étaient en parfait état au moment de l'expédition et par conséquent nous ne pouvons vous verser qu'une partie du montant exigé en dommages et intérêts.

We admit that the delivery of order No. 235B was in fact three days late. However, the goods were in perfect condition when they were despatched. We will/can therefore pay only half of the amount you are seeking.

73 Correcting and protesting

These functions are used when the speaker wants to correct a statement previously made by himself/herself or by previous speakers – perhaps because of accuracy. It is also used in relation to texts or documents which require to be amended.

- (a) If a speaker realizes that incorrect information has been conveyed, then apologies are often in order (see 63.1):

Attendez, excusez-moi, je reprends. Ce que je voulais dire, c'est qu'il y a 3 millions de chômeurs inscrits mais 5 millions de sans-emploi d'après les estimations.

Wait a moment, I'm sorry, I'll start again. What I meant was that there are 3 million registered unemployed but 5 million out of work according to estimates. (and not the contrary as previously stated, for example)

- (b) There is a tendency, when we are correcting, to deny the wrong statement or definition first, and then introduce the corrected one. This involves negative structures + **mais**. The following example is a kind of protest, in a case of misunderstanding:

Attention, vous m'avez mal comprise, je n'ai pas dit qu'il ne fallait pas accorder de congés de paternité mais que l'on ne pouvait pas se le permettre pour le moment.

Careful, you have misunderstood me. I did not say that paternity leave should not be granted, but that it could not be afforded for the time being.

Note how the conjunction **que** has to be repeated after **mais** to introduce the second clause. The next example involves clarification of a definition:

Je ne sais pas si j'ai été très clair, quand je dis Europe, j'entends non pas la CE (Communauté européenne) mais la grande Europe, y compris toutes les nouvelles nations existant aujourd'hui.

I don't know if I've made myself very clear. When I say Europe I don't mean the EC (European Community) but a wider Europe including all the new (emerging) countries/nations.

- (c) In most cases, the speaker will announce his/her intention to rephrase or to clarify a statement that he/she has made by using one or a combination of the following expressions:

Permettez-moi d'apporter une précision:

Allow me to add a point:

Ce que je voulais dire, c'est ceci:

What I meant was this:

Je devrais peut-être m'exprimer autrement:

Perhaps I should express myself differently:

Je m'explique:

Let me explain:

En d'autres termes, . . . :

In other words, . . . :

- (d) Many corrective statements are introduced by **j'aurais dû + infinitive** (see 40.5):

En évoquant les problèmes de la femme, j'aurais dû préciser que je voulais parler de la femme active. (See 50.6)

When I raised the problems of women, I should have made it clear that I was referring to working women.

- (e) Similar expressions can of course be used when correcting someone else. In this case, there may first be an expression of disbelief or disagreement such as **vraiment?** 'really?', **d'après mes renseignements** 'as far as I am aware', **ce n'est pas le cas** 'that's not the case', followed by a negative structure + **mais**:

Non, vous faites erreur; en réalité, l'inflation n'a pas atteint 3% mais 2% cette année-là.

No, you're wrong. Inflation did not, in fact, reach 3% but 2% that year.

(f) Sometimes, you may wish to correct other people, not because you think that they are totally wrong but because you want to go further, and build on what they have said. You will be correcting very directly if you use an imperative form, such as **précisons** 'to be specific/let's be specific' or **disons plutôt que** 'or rather', or **je + verb** in the conditional as in **j'irais même plus loin/jusqu'à dire que** 'I would go further/as far as to say', and much less direct, of course, if you use an impersonal form or **on**:

On pourrait même aller plus loin et préciser que cela s'applique aussi à tous les autres pays du monde.

One could go even further and say that this/that is also true of all other countries.

(g) In previous examples, the object of the correction was refuted first and then corrected or replaced through using structures such as **non pas ... mais**. In the following example, the object is not refuted but included and extended with **non seulement ... mais aussi**:

J'ajouterais que ce phénomène existe non seulement en France mais également dans toute l'Europe.

I would add that this phenomenon exists not only in France but also in the rest of/throughout Europe.

(h) There are many instances of documents or texts being corrected with addenda, amendments or simply because successive versions undergo a revision process. When dealing with written documents such as statutes or laws, absolute accuracy and attention to detail are essential. The following examples are drawn from debates on Articles at the French National Assembly:

Par l'amendement n° 2, je propose de rédiger l'article 1er de la façon suivante:

In Amendment No. 2, I propose that Article 1 should read as follows:

Vous nous proposez, quant à vous, la rédaction suivante à l'article 2:

You propose the following wording in Article 2:

(i) Amendments have to be submitted in writing by MPs and usually involve infinitives:

M. Béteille, rapporteur, a présenté un amendement, n° 3, rédigé comme suit: 'supprimer les sept premiers alinéas de l'article 2'.

M. Béteille, the rapporteur, has tabled an amendment, No. 3, which reads as follows: delete the first seven paragraphs of Article 2.

Après l'article 3, insérer l'article suivant:

After Article 3, insert the following Article:

These are examples of correction where something is taken out of or added to the initial document. When the existing text is *modified*, then both the original and the new proposed texts have to be inserted in inverted commas:

... il convient de lire: 'l'Institut d'Alsace-Moselle' et *non* 'd'Alsace'.
 ... for 'Alsace', read 'the Alsace-Moselle Institute'.

Dans le premier alinéa de l'article 2, substituer aux mots: 'les enfants à charge', les mots: 'les enfants nés des différentes unions'.

In the 1st paragraph of Article 2 replace 'dependent children' with 'children of different relationships'.

- (j) The following expressions are also possible:

Remplacer X par Y.

For X substitute Y.

Lire Y à la place/ au lieu de X.

For X read Y.

74 Contradicting and criticizing

Contradicting someone or contradicting a statement is adopting the opposite view. In that sense, it is like an extreme form of disagreement and is the opposite of confirming.

- (a) The simplest and most direct expression of contradiction is **non** as a reply to a positive statement and **si** to a negative statement – here reinforced by **au contraire**:

Tu n'as pas le choix! — Mais si, au contraire. (See 54.14)

You have no choice! — But I do!

- (b) In argumentation, for example in a debate or discussion, you can contradict by telling your interlocutor directly that his/her views are wrong:

Vous vous trompez. or Vous êtes dans l'erreur.

You're wrong/mistaken.

Vos arguments sont inadmissibles.

Your arguments are unacceptable.

- (c) Alternatively, you can use **je** with various verbal forms which state that you

are contradicting something. You can make it clearly and firmly your own personal conviction:

Je rejette catégoriquement ces arguments fallacieux.

I categorically reject these unfounded/fallacious arguments.

Je m'élève tout particulièrement contre la dernière théorie avancée.

I am particularly opposed to the last theory that was put forward.

In the previous two examples, note how adverbs can play an important role in contradiction.

(d) You can also use impersonal forms beginning with **il** or **ce**, to refer to the statement you want to contradict, as in the following example (see 19.2c, 19.2d):

Vous prétendez que la pauvreté a disparu en France, or il n'en est rien/mais c'est tout à fait faux.

You claim that poverty has been eradicated in France, but that is utterly wrong.

Note how the opposition (see 80d) is introduced by cohesive devices **or** 'now' and **mais**, and also how **rien** and **tout à fait** contribute to the categorical nature of the opposition in this function. This is also true of **aucun** and **tout** in the following examples:

Rien n'est moins sûr! (See 54.16)

Nothing could be further from the truth!

La réalité est tout autre! (See 18.1c)

That is quite untrue!

Il n'y a aucune raison de le croire! (See 54.16)

There is absolutely no reason to believe it!

(e) Having made it clear that you totally disagree with your interlocutor, you would then probably go on to explain/prove the contrary. When you state your intention to do this, imperative forms or **je vais** + infinitive are useful:

Laissez-moi vous démontrer le contraire. (See 51.3)

Let me demonstrate the opposite.

Je vais vous le prouver. (See 32.8)

I shall prove it to you.

(f) In order to emphasize the opposition, you might start the sentence with a clause introduced by **contrairement à** 'contrary to', **à la différence de** 'unlike' ... (see 70.2e):

Contrairement à ce que vous insinuez, je n'ai pas triché. (See 22.14)
 Contrary to what you are suggesting/implying, I did not cheat.

- (g) In exposition, when denial is expressed, the verb **démentir** 'to deny' and its related forms can be used:

La famille royale a formellement démenti la rumeur selon laquelle la reine était sur le point d'abdiquer. (See 22.5)

The royal family has formally denied the rumour that the queen was about to abdicate.

Le témoignage de l'automobiliste reste sans démenti.
 The driver's evidence remains unchallenged.

75 Suggesting and persuading

Suggesting is used to recommend a particular course of action or line of thought to someone else. Therefore, it is perhaps similar to a first or mild stage of persuasion. It is used to recommend that someone does, or does not, do something. You may also want to influence other people, so that they come round to your idea/belief or so that they follow the right course of action and/or reject the wrong one. Examples of context where there is an attempt to influence people so that they believe, think or do something are legal pleas, evangelistic activities or debates. In such instances, one often attempts to persuade through the presentation of valid arguments. This is achieved in many different ways – and with many different grammatical forms, some of which are illustrated in 75.4.

75.1

Suggesting

- (a) A number of verbs can be used: **recommander, suggérer, conseiller, proposer** followed by either **à qn de faire qch** or **que qn fasse** (subjunctive) **qch:**

Si les conditions changent durant la nuit, les forces de police recommanderont aux automobilistes d'équiper leurs véhicules de pneus-neige. (See 40.2)

If the conditions change during the night, the police will recommend that drivers put snow tyres on their cars.

Quand j'ai appelé le cabinet ce matin, votre secrétaire a suggéré que je prenne rendez-vous directement avec vous. (See 46.3)

When I called the office this morning, your secretary suggested I make an appointment to see you personally.

- (b) The same verbs can be used with a little adjustment to the structure:

Vu la force du vent, je te conseille de ne pas sortir ta planche à voile aujourd'hui. (See 49.1, 54.16)

Because of the high wind, I suggest you don't go windsurfing today.

Le conseil municipal a recommandé que le public n'ait plus accès gratuitement aux musées de la ville. (See 46.3)

The municipal council has suggested/recommended that the public should no longer have free entry to museums and galleries.

In this negative sense, the function is often used to warn someone *against* something, through verbs such as: **déconseiller à qn de faire qch, déconseiller qch à qn, mettre qn en garde contre qch, avertir qn de ne pas faire qch:**

Il est fortement déconseillé aux techniciens de se tenir dans la zone de déchargement sans vêtements de protection. (See 53)

Technical staff must not enter the unloading area without protective clothing.

Avertissez-le de ne pas oublier de faire sa demande de visa avant d'entreprendre ce voyage. (See 21.3b, 54.16)

Remind/Warn him not to forget to apply for a visa before leaving on the journey.

- (c) In speech, the fact that you intend to make a suggestion is often announced as a form of politeness, so as not to create the impression of giving an order, with expressions such as **permettez-moi, puis-je:**

Permettez-moi de vous suggérer un plan d'action.

May I suggest a plan of action?

Puis-je faire une proposition?

May I make a proposal?

J'ai une idée à proposer:

I have a suggestion to make:

- (d) The conditional tense (also a form of politeness) (see 40.4) is often used, sometimes in combination with **peut-être:**

Peut-être serait-il bon de soumettre cette question au vote, étant donné qu'un consensus ne semble pas pouvoir être atteint? (See 49.1, 53)

Would it not be a good idea to put the question to the vote since there seems to be no possibility of reaching a consensus?

Puisqu'ils ne veulent rien savoir à la mairie, tu pourrais peut-être t'adresser à la préfecture?

Since the (local) council doesn't want to know, maybe you could ask at the Préfecture (Regional Council).

- (e) In the previous example, it is the interrogative form (achieved through intonation) which helps to perform the function of suggestion. Other examples of this use of the interrogative, including negative forms, are the following:

Que dirais-tu de passer à la maison ce soir vers 8h00?

Would you like to come round tonight about eight?

Ne conviendrait-il pas de rajouter ce point à l'ordre du jour? (See 53.2)

Would it not be a good idea to add this to the agenda?

- (f) Suggestions can also be made through the use of impersonal verb phrases, in particular **il faut**/**il faudrait** + infinitive or + **que** + subjunctive (see 53.2):

Le directeur du personnel pense qu'il faudrait que les ouvriers soient tenus au courant de la nouvelle réglementation sur les conditions de travail.

The personnel manager thinks the work force should be kept informed of the new regulations on working conditions.

75.2

Persuading someone to think the way you do

- (a) This can be achieved using verbs such as **persuader**/**convaincre qn de** + noun:

Il s'agit de convaincre les autorités de l'intérêt de ce projet. (See 53.2)

It is a matter of persuading/convincing the authorities of the importance of the project.

or using the following, in complex sentences: **persuader**/**convaincre qn que** + indicative, **faire admettre**/**reconnaitre à qn que** + indicative, **faire changer d'avis**/**d'idée à qn**:

L'avocat de la défense tentera de convaincre les jurés que le meurtre était non prémedité.

The defending counsel will try to convince the jury that the murder was not premeditated.

Il est difficile de faire admettre aux adolescents que leurs parents ont autrefois connu les mêmes difficultés. (See 52.6)

It is difficult to convince young people that their parents had the same problems.

Leurs arguments ont été si convaincants qu'ils m'ont fait changer d'avis. (See 52.6)

Their arguments were so convincing/persuasive that they made me change my mind/convinced me.

- (b) Other verb constructions which are similar in terms of meaning are also available, for example **démontrer/prouver par A + B à qn que. Faire croire qch à qn** is in a slightly different league as it implies that the person aimed at is somehow being tricked into believing something:

Le gouvernement nous fait croire qu'il y a moins de chômeurs en manipulant les statistiques. (See 52.6)

By manipulating the figures, the government would have us believe that there are fewer unemployed.

- (c) You may want to state that you *are* persuaded, using passive expressions with **avoir** and **être**:

Ce témoignage m'avait convaincue: il était innocent, j'en avais désormais la conviction. (See 19.6b)

The/This evidence persuaded me: he was innocent, I was (totally) convinced of it from that moment/point.

J'avoue que je suis désormais persuadée que les pratiques de ce fournisseur sont honnêtes.

I admit that I am now convinced that this supplier's business dealings are in order.

These expressions, and others such as **j'en mettrais ma main au feu** 'I'd swear to it' or **j'en donnerais ma tête à couper** 'I'd put my head on the block' can also be used to express certainty (see 78.1).

- (d) The verb **croire en/à** 'to believe, be convinced', can be used to express persuasion:

Depuis qu'il va au catéchisme, cet enfant croit en Dieu comme il croit au Père Noël.

Since he was taught his catechism, the child believes in God like he believes in Santa Claus.

Vu les résultats obtenus, de plus en plus de gens croiront aux vertus de l'homéopathie. (See 49.1)

Because of its positive results, more and more people will believe in homeopathy.

75.3

Persuading someone to do/not to do something

- (a) To persuade someone to do something, you can again use verbs such as **persuader/convaincre qn de faire qch, amener/décider qn à faire qch:**

La tâche du conseiller d'orientation consistera à persuader cet élève de poursuivre ses études.

The job of the careers adviser will be to persuade this pupil to continue his/her studies.

J'ai eu un mal fou à le décider à venir avec nous. (See 21.4a)

I've had terrible trouble persuading him to come with us.

- (b) However, if you want to get someone to renounce a particular course of action, you can use one of the following: **dissuader qn de faire qch, déconseiller à qn de faire qch, persuader/convaincre qn de ne pas faire qch, détourner qn de qch:**

Les délégués syndicaux arriveront-ils à dissuader les grévistes d'occuper les locaux? (See 59c)

Will the union representatives manage to persuade the strikers not to occupy the buildings?

Le médecin a réussi à le persuader de ne pas se faire opérer pour le moment. (See 21.4a, 54.16)

The doctor managed to persuade him not to have an operation for the time being.

Dites ce que vous voulez, vous n'arriverez pas à me détourner de cette entreprise. (See 22.14, 51.3)

Say what you want, you'll never put me off (this).

75.4

Other ways of persuading and dissuading

These are numerous and varied but there seems to be an overall tendency to insist on or emphasize the arguments put forward to persuade or dissuade.

- (a) by introducing the argument with verbs such as **savoir 'to know', voir 'to see', ignorer 'to be ignorant of', croire 'to believe, think':**

Vous voyez bien que c'est la seule solution possible.

You can see it's the only possible solution.

Vous n'ignorez quand même pas que toutes les autres solutions envisagées ont été appliquées sans succès.

You know very well that every other solution has been tried without success.

Note how **la seule** and **toutes les autres** as well as the adverbs **bien** and **quand même**

contribute to reinforcing the appeal to common sense contained in the two examples.

- (b) by using (rhetorical) questions, which can be positive:

Crois-tu vraiment qu'en écrivant une lettre d'insultes tu seras pris au sérieux?

Do you really believe that by writing a rude letter you will be taken seriously?

or negative:

Ne pensez-vous pas que si les hommes étaient moins stupides, il y aurait moins de guerres?

Don't you think that if men were not so stupid, there would be fewer wars?

La vraie justice, ne consisterait-elle pas plutôt à présumer de leur innocence (et non pas de leur culpabilité)?

Should (true) justice not consist of presuming someone innocent rather than guilty?

Again, note how **vraiment** and **vraie** reinforce the statement, and how in the second example the initial position of **la vraie justice** creates maximum impact.

- (c) by using specific structures to demonstrate that a particular course of action X is either the right one (persuasion) or the wrong one (dissuasion):

to persuade someone to do X	to dissuade someone from doing X
-----------------------------	----------------------------------

en faisant X, tu obtiens ...

or si tu fais X, tu obtiens ...

en ne faisant pas X, tu risques de ...

or si tu ne fais pas X, tu risques de ...

en faisant X, tu risques de ...

or si tu fais X, tu risques de ...

en ne faisant pas X, tu obtiens ...

...

or si tu ne fais pas X, tu obtiens ...

En refusant de te présenter au poste de police, tu attires les soupçons sur toi.

If you refuse to go to the police station, you will (just) make them suspicious of you.

Si vous commandez 1 000 bouteilles ou davantage, nous vous accorderons une remise de 15%.

If you order 1,000 bottles or more, we will give you a 15% discount.

This process, which establishes relations of cause/effect, threat/reward,

disadvantage/benefits, is central to negotiating. The 'paired' structures involved express an essential link between the two arguments:

Tu devrais te présenter au poste de police, sinon tu risques d'attirer les soupçons sur toi.

You should go to the police station, otherwise you run the risk of making/may make them suspect you.

Nous vous accorderons une remise de 15%, à condition que vous commandiez 1 000 bouteilles ou plus.

We will give you a 15% discount provided you order 1,000 bottles or more.

Other useful paired structures which establish a link between two clauses include *ce n'est pas parce que... que, ce n'est pas en... que, tu devrais... auquel cas tu pourras, tu as tout intérêt à... et tu obtiendras*:

Ce n'est pas en restant chez toi à broyer du noir que tu te sortiras de cette dépression.

It won't be by staying at home brooding that you'll get out of that depression.

À ce prix, vous avez tout intérêt à en acheter deux, et vous doublez la durée d'utilisation.

At that price you would do well to buy two of them, and you'll double the time you can use them.

(d) by using the imperative in very direct – and usually spoken – statements (see 51.3):

Oh si! Allez, viens avec nous, tu ne le regretteras pas!

Oh yes, come on, come with us. You won't regret it!

Soyez raisonnable, laissez-moi vous aider, vous ne vous en tirerez pas autrement.

Be reasonable and let me help you. You won't manage otherwise.

Other imperatives commonly used include *sache/sachez que, écoute-moi, croyez-moi*. Note that the first person plural imperative is also used, usually as an exclamation: *voyons! allons! soyons sérieux!* (see 51.4) and its English equivalent would come from a range of expressions such as 'There we are! Let's go! Be serious!'.

(e) by using expressions in apposition; a wide range of short phrases such as ***je t'assure***, including the imperatives given above, can be used – and sometimes combined – to bring about a particular course of action:

Encore une fois, je te le répète, tu n'as pas le choix, c'est la seule solution!

I tell you once again, you have no choice, it's the only solution/way.

Croyez-moi, je vous en prie, c'est la seule solution, vous verrez!

Believe me, please, it's the only way, you'll see!

- (f) by using the conditional tense – offering advice and a measure of persuasion – reinforced by an expression of personal opinion, which you can use when you know that your interlocutor respects your opinion:

Je crois que vous devriez vraiment réfléchir avant de vous lancer dans cette affaire qui présente de nombreux risques. (See 22.1, 46.7)

I think you really should give the matter some thought before getting involved in this/the business because it's very risky.

A mon avis, tu ferais bien d'intenter un procès pour dommages et intérêts avant qu'il ne soit trop tard. (See 46.4)

In my opinion, you'd be right to start proceedings for compensation before it's too late.

76 Expressing volition

When using this function you may definitely want (to do) something (see 76.1), state your intention or wish (see 76.2) or ask what someone else intends or wants (see 76.3). When you want someone else to do something, then it usually becomes a request (see 76.4), which in turn generates a particular response (see 76.5). Volition also deals with the deliberate or spontaneous nature of an action (see 76.6) and finally, you may, of course, state what you do not want (see 76.7).

76.1

Verbs expressing volition

Verbs are frequently used to express volition: e.g. **vouloir, désirer, aimer, souhaiter, décider**. They may be followed by:

- (a) a noun (direct object of a transitive verb):

Je veux ton bonheur et rien d'autre.

All I want is your happiness.

Les peuples du monde désirent la paix.

People all over the world want peace.

- (b) one, or two, infinitives (with or without a preposition) (see 52.5, 52.8, 52.9):

Le directeur de l'établissement a annoncé qu'il voulait voir augmenter les effectifs d'ici l'an prochain.

The head of the company has announced that he wants to see staffing levels increased by next year.

Pas d'interruption pendant un quart d'heure, s'il vous plaît; je souhaite être seul avec ma cliente.

No interruptions for fifteen minutes please. I want to be alone with my client.

Ma fille a décidé d'étudier l'italien à l'université.

My daughter has decided to study/read Italian at university.

(c) **que + subjunctive** (see 46.3):

Nous voulons que cette soirée soit réussie.

We want this evening to be a success.

Ils avaient toujours désiré que leur fils fasse carrière dans la marine.

They had always wanted their son to make his career in the navy.

(d) In the conditional tense the same verbs, or verb phrases, can be used to express a wish (see 40.4):

J'aimerais changer d'emploi avant la fin de l'année.

I'd like to change my job before the end of the year.

Le comité d'organisation souhaiterait être informé des résultats de cette étude.

The organizing committee would like to be informed of the results of the study.

Note that any verb in the conditional followed by **bien** indicates a wish. When spoken, the intonation would often be interrogative, as in 'I'd like to do this... (what do you think?)':

Puisqu'il nous reste un peu de temps, j'irais bien voir cette exposition.

Since we've got a little time left, I'd like to have a look at the exhibition.

Je téléphonerais bien aux renseignements pour avoir le numéro.

I'd be happy to phone directory enquiries to get the number.

(e) Some nouns or noun phrases can also be used – as subjects or complements:

La volonté du peuple est que règne la paix.

The people want peace.

Les pouvoirs ont pris la résolution d'entreprendre une campagne de protection de l'environnement.

The government has decided to embark on a campaign for the protection of the environment.

Si seulement je pouvais prendre des vacances, j'ai envie de mer et de soleil.

If only I could take a holiday: I want some sea and sunshine.

Note how the previous example combines expressions of wishing, one emphatic (**si seulement je pouvais**) and one much milder (**j'ai envie de**) which is given as a reason for the first one.

(f) Some verb phrases such as **je tiens à ce que** + subjunctive 'I insist', or adverbs such as **bien, résolument, absolument** can be used, or combined to express strong will:

Je tiens absolument à ce qu'ils sachent que nous sommes bien arrivés.

(See 46.3)

I'm absolutely determined that they (should) know we have arrived.

Cette fois, il est bien résolu à la renvoyer.

This time he is determined to dismiss her.

76.2

Wishing and intending

When the wish to do something is expressed as an intention, a number of verbs and verb phrases are available.

(a) Verbs and verb phrases such as **prévoir, envisager, se proposer, avoir l'intention, former le projet** all followed by **de** + infinitive, and **songer à** + infinitive (see 52.9):

J'ai prévu de partir tôt alors soyez prêts à 6h00.

I intend to leave early so be ready at six.

La direction envisage de licencier une partie du personnel.

The management intends to make some staff redundant.

(b) Some verbs such as **compter/penser, aller**, and sometimes **devoir**, require no preposition before the infinitive (see 52.5):

Elle pensait arriver avant midi mais c'est impossible en raison de la grève des trains. (See 13.5b)

Her intention was to arrive before noon, but that's impossible because of the rail strike.

En guise de conclusion, je vais vous faire part de mes impressions sur les différentes séances de travail tenues pendant le séminaire. (See 49.1)

To conclude, I shall give you my impressions of the various workshops held during the seminar.

Il devait m'accompagner mais de toute évidence, il a changé d'avis.
He was to come with me but clearly he has changed his mind.

- (c) Nouns or noun phrases, in various positions in the sentence, can also be used: **dans l'intention, le/son but est** followed by **de + infinitive** (see 52.10):

Je suppose qu'il m'a convoquée dans l'intention de me féliciter.
I assume he has sent for me to congratulate me.

Son but est de redresser la situation financière de la société avant la fin de l'exercice.

His aim is to straighten out the company's financial situation before the end of the fiscal year.

76.3 Asking what someone intends

In order to ask what someone intends or wants, you can simply resort to questions (see 59). The forms used depend on how specific the options provided by the question are.

- (a) In the case of totally open choice, **que? qu'est-ce que? quoi?** can be used (see 23.1–23.3):

Que désirez-vous?

What do you want?

Qu'est-ce que je peux faire pour vous?

What can I do for you?

Vous avez l'intention de faire quoi après le cinéma?

What are you going to do after the cinema?

- (b) When the options are 'yes' or 'no', the focus is on the verb:

Comptez-vous venir à la réception ce soir?

Do you intend to come to the reception this evening?

Vous prendrez bien un verre?

Will you have something to drink?

- (c) When the options fall within a specific and restricted range, interrogative adjectives + nouns or interrogative pronouns are usually used:

Quel fromage désirez-vous? (See 23.6)

Which cheese would you like?

Parmi toutes ces écharpes, laquelle te plairait? (See 23.5)

Which of all of these scarves would you like?

- (d) When there are specific options, the interrogative adjectives and pronouns are frequently combined with structures such as *ou* or *soit... soit*:

Lesquelles voulez-vous, les Golden ou les Reinette? (See 23.5)
Which would you prefer, the Golden Delicious or the Reinettes?

Quelle table préférez-vous? Vous pouvez vous installer soit en terrasse, soit à l'intérieur. (See 23.6)
Which table would you prefer? You can sit on the terrace, or inside.

- (e) All the examples above are direct questions which may or may not involve an inversion of the verb. (See 58c, 59) Questions can also be indirect and again, the structures vary depending on how specific the options are:

J'aimerais bien savoir ce que tu comptes faire dans la vie! (See 58b)
I'd like to know what kind of career you intend to follow!

Le plombier voudrait savoir si nous voulons qu'il commence les travaux demain. (See 46.3)
The plumber wanted to know if we want him to start (the) work tomorrow.

Les partis politiques se demandent quelles sont les mesures souhaitées par l'opinion en matière de sécurité. (See 23.6, 49.1)
The political parties are wondering what security measures the public wants.

Aide-moi! Je ne sais pas laquelle des deux je devrais choisir! (See 23.5)
Help me! I don't know which of the two to choose!

Asking someone for something

- (a) When you request something from someone else, you can, of course, use some of the verbs and verb phrases identified in 76.1 – with the appropriate personal pronoun.

Je veux que vous soyez prêts à partir à 8h00 et j'aimerais que vous passiez me prendre tout de suite après. (See 46.3)
I want you to be ready to leave at eight, and I'd like you to come and pick me up right away.

- (b) In the previous example, note how the use of the conditional tense 'softens' the request. This tense is often used to ask someone (politely) to do something – sometimes in interrogative forms for even more indirect requests (see 40.4):

Est-ce que tu pourrais me rejoindre au Bar de la Place après la séance?
Could you meet me in the Bar de la Place after the meeting?

Ça vous ennuierait de me prêter votre voiture demain matin? La mienne est en panne.

Could you possibly lend me your car tomorrow morning? Mine has broken down.

Note the use of **si** in an alternative form for the previous example:

Ça m'arrangerait beaucoup si vous me prêtiez votre voiture demain matin. (See 40.2)

It would help me a lot if you could lend me your car tomorrow morning.

- (c) The conditional is used for a more formal request – in commercial correspondence – in the following example:

Auriez-vous l'amabilité de me faire savoir quels sont vos tarifs et conditions pour cet article?

Please let me have your prices and terms for that item.

- (d) Naturally, for a more categorical request, you can use the imperative (see 51.3):

Prends mon porte-monnaie et ramène-moi deux baguettes (s'il te plaît).

Take my purse and get me two baguettes (please).

- (e) The imperative **veuillez** + infinitive or the expression **je vous prie de** + infinitive can be used to introduce requests, for example to make enquiries or place orders in commercial correspondence:

Veuillez m'envoyer les deux derniers numéros de votre publication.
(See 51.1)

Please send me the last (latest) two issues of your publication.

Je vous prie de me faire parvenir la commande avant le 30 mars.
Please send me the order before 30th March.

- (f) As demonstrated in the previous example, set expressions used in correspondence are often followed by one, or several, verbs in the infinitive, and particular attention has to be given to pronouns and their place in the clause (see 21.3):

Nous vous serions reconnaissants de bien vouloir nous confirmer l'heure d'arrivée de votre délégation à l'aéroport.

We would be grateful if you will confirm the time of arrival of your delegation at the airport.

Je vous serais obligée de me répondre par retour du courrier. (See 11.4)

I would appreciate it if you will reply by return.

Other similar phrases include: *je vous saurais gré, veuillez avoir l'obligeance*, both followed by **de** (*bien vouloir*) faire.

(g) For more pressing or insistent requests, the appropriate verbs (+ infinitive or subjunctive) and (sometimes) adverbs can be used:

Je compte sur vous pour venir dimanche.

I am counting on you to come on Sunday.

Tu dois insister auprès de la gendarmerie pour que tes papiers te soient rendus immédiatement. (See 46.4)

You must insist that the police return your papers to you immediately.

Vos professeurs souhaitent instamment que vous vous présentiez à cet examen. (See 46.3)

Your teachers insist that you sit the exam.

76.5

Expressing (un)willingness to act upon request

The simplest expression of this is, of course, to use **oui** or **non** but in many cases, in particular when negative, the response is qualified.

(a) Short positive answers include: **Oui, d'accord!** 'Yes, of course', **Pas de problème!** 'No problem!', **C'est comme si c'était fait!** 'Take it as done!' (see 70.1a).

(b) Negative answers often include some sort of justification such as: **Je ne peux pas ...** 'I simply can't ...' **C'est impossible ...** 'It's impossible ...' (see 70.2a, 70.2b):

Malheureusement, c'est impossible, nos stocks sont épuisés.

Unfortunately, it's out of the question, we have run out of stock.

(c) A fuller response to a request can be given using the future tense (see 32.5):

Pas de problème, je te donnerai un coup de main pour ta terrasse.
No problem, I'll give you a hand with the terrace.

Sachez que nous ne livrerons pas les ordinateurs que vous avez commandés (car notre dernière facture n'a pas encore été réglée).
(See 22.2, 75.4d)

We are unable to deliver the computers you ordered (because our last invoice has not yet been paid).

or verbs, in particular **vouloir**, **pouvoir** + infinitive or **accepter de**, **refuser de** + infinitive:

Oui, les bénévoles de notre organisation veulent bien assurer l'animation dans votre club du troisième âge. (See 52.5)

Yes, the helpers in our organization are happy/willing to organize the entertainment in your old folks' club.

La direction a refusé d'accorder aux vendeurs l'augmentation qu'ils demandaient. (See 22.2, 52.9)

The management has refused the pay rise the shop assistants were seeking.

or other verb phrases of the type **être** + adjective or past participle + **à** + infinitive (see 52.10):

Le tribunal est (tout) prêt à vous accorder la remise de peine dont vous avez fait la demande. (See 22.8–22.11)

The court is ready/prepared to agree to your request for remission.

Non, (vu l'état dans lequel vous avez mis l'appartement,) nous ne sommes pas disposés à renouveler votre contrat de location. (See 22.5, 49.1)

No, (because of the state the flat has been left in,) we are not prepared to renew your lease.

(d) There are also more indirect ways of accepting or refusing to act upon a request, with impersonal forms:

Aucun problème pour samedi, il nous est possible de livrer même les week-ends. (See 53)

No problem for Saturday, we can deliver even at the weekend.

J'suis désolée, moi et Jean, on (ne) pourra pas venir à tes quarante ans. (informal) (see 18.9)

Sorry, me and John, we can't come to your fortieth birthday bash.

In the previous example, note the colloquial 'abuse' of **on**, used in fact instead of **nous**.

76.6 Deliberate or non-deliberate actions

A number of terms and expressions convey the idea that something was done on purpose, or not. When it is a controversial issue, the statements often include **c'est/ce n'est pas ... (que de + infinitive)**:

(a) with a noun:

Non, je n'ai pas voulu ça, c'était un accident! (See 13.5b)

No, I didn't want that to happen, it was an accident!

C'était bien son intention que de t'obliger à partir. (See 13.5b)

He intended to force you to leave.

Note that with nouns such as **volonté** or **intention**, the more formal **tel** can also be used:

Je vois que vous êtes surpris de constater que telle était sa volonté.

(See 18.11a)

I see you're surprised that that was what he wanted.

(b) with an adjective:

Si je vous ai offendé, croyez bien que ce n'était pas intentionnel.

C'était même tout à fait involontaire. (See 13.5b)

If I have offended you, believe me I did not mean to. It was completely unintentional.

(c) A number of verb phrases are also available, sometimes reinforced by adverbs or idioms:

Je t'assure qu'ils ne l'ont pas fait exprès.

I assure you they did not do it deliberately.

Au contraire, je dirais qu'ils ont agi volontairement et en toute connaissance de cause.

On the contrary, I would say that they acted deliberately (*or it was deliberate*) and they knew exactly what they were doing.

(d) The notion of volition is, of course, central to the field of criminal law which provides numerous examples of use of the relevant terms, and in particular of structures involving the pair **avec, sans** + noun such as **intention, préméditation**:

Mesdames et messieurs les jurés, je vous rappelle qu'il s'agit d'un crime prémédité, mais sans intention de tuer. (See 11.4, 49.1, 53.2)

Ladies and gentlemen of the jury, I remind you that this was a premeditated crime, but (that) there was no intention to kill.

Saying what you do not want

Finally, volition is also concerned with expressing what a person does not want. Most of the examples given in previous sections could, of course, be made negative, and 76.5 deals with what a person does not want to do.

(a) However, taking an earlier example, note the difference, because of the shift of the negative in the sentence, between:

Ma fille n'a pas décidé d'étudier l'italien à l'université. (See 54.16)
 My daughter has not made up her mind to study Italian at university.

and

Ma fille a décidé de ne pas étudier l'italien à l'université. (See 54.16)
 My daughter has decided not to study Italian at university.

In the first case, she has not yet made up her mind whereas in the latter, she is definitely not going to study Italian. So the difference lies in the degree of determination about what will/might actually occur and the location of the negative. Note the difference in the following pair:

Je ne souhaite pas qu'il vienne. (See 46.3, 54.16)
 I do not want him to come.

Je souhaite qu'il ne vienne pas.
 I hope he will not come.

(b) When the expression of volition in the first clause is positive, the subject has more control and makes a more deliberate stance on what he/she wants or intends:

Le ministre a l'intention de ne pas démissionner. (he definitely intends not to) (see 54.16)
 The minister intends not to resign.

Le ministre n'a pas l'intention de démissionner. (at this stage)
 The minister does not intend to resign.

Such pairs could be identified for most expressions of volition although there are some exceptions where only one structure is desirable:

Je préférerais que vous ne soyez pas trop en retard ce soir. (See 46.3)
 I would rather you were not too late tonight.

(c) When both clauses have the same subject, the verb in the negative clause is followed by an infinitive:

Nous n'envisageons pas d'augmenter le capital social pour le moment.
 We do not intend to increase share capital for the time being.

When there are two clauses with two different subjects, the negative verb is usually followed by **que + subjunctive**:

Les chômeurs ne souhaitent pas qu'on leur fasse la charité.
The unemployed do not want handouts.

- (d) However, sometimes there are alternative structures, in particular with verbs such as **vouloir**, **savoir**:

Je ne veux pas que tu échoues au baccalauréat./Je ne veux pas te voir échouer au baccalauréat. (See 46.3, 46.7)

I don't want you to fail your bac (school-leaving certificate exam).

Ses parents n'ont pas envie qu'elle se perde dans cette grande ville./Ses parents n'ont pas envie de la savoir perdue dans cette grande ville.

Her parents don't want her to get lost in that huge city.

- (e) Adjectives or adverbs can be used to vary the degree of emphasis:

Les grévistes n'ont pas la moindre intention d'annuler leur manifestation. (See 17.13c, 52.10)

The strikers have no intention/haven't the least intention of calling off their demonstration.

Croyez-moi, je n'avais absolument pas l'intention de vous blesser. (See 52.10)

Believe me, I had absolutely no intention of hurting you.

77

Expressing permission and obligation

It is appropriate to look at expressing permission and obligation together as these functions entail giving (see 77.1) or denying rights (see 77.2) and imposing (see 77.3) or exempting from duties (see 77.4). You will see how, sometimes, these sub-functions overlap.

Permission

- (a) Permission or rights can be granted using verb phrases such as **accorder**, **donner + la permission**, **l'autorisation**, **le droit de ... à qn**:

On a accordé le droit de vote aux Françaises après la deuxième guerre mondiale.

French women were given the vote after the Second World War.

Mes parents m'ont donné l'autorisation de sortir jusqu'à minuit.
My parents have given me permission to be out until midnight.

- (b) Verbs expressing permission can also be used: e.g. **permettre à qn de faire qch**, **autoriser qn à faire qch**, **permettre/autoriser que qn fasse** (subjunctive) **qch**:

Le proviseur a autorisé que les cours soient annulés pour permettre aux élèves d'assister à une pièce de théâtre. (See 46.3)
 The headmaster has given permission for classes to be cancelled to allow pupils to go to see a play.

- (c) When negative, all of the above structures are used to deny permission or right:

Le chef de rayon n'autorise pas les vendeurs à s'asseoir et ne permet pas qu'ils prennent plus de cinq minutes de pause. (See 46.3)

The department supervisor will not allow the shop assistants to sit down or take more than five minutes' break.

- (d) The verb **pouvoir** also plays an important role, for example, when asking for permission:

Puis-je fumer? — Oui, vous pouvez, mais dans le coin fumeurs.
 May I smoke? — Yes, you may, but in the smoking area.

An alternative would be:

Vous permettez que je fume? (See 46.3)
 May I smoke?

- (e) There are numerous phrases combining **avoir** or **être** with a noun to express nuances of entitlement or permission to do something. Here are a few with **droit** (+ à + noun, + **de** + verb) as the noun:

Si je m'inscris dans cette filière de troisième cycle, aurai-je droit à une bourse? (See 40.2)
 If I register for this postgraduate course, will I be entitled to a grant?

En France, les femmes attendant des jumeaux sont en droit de prendre des congés maternité supplémentaires. (See 50.5)
 In France women expecting twins are entitled to additional maternity leave.

Tu n'as pas le droit de me juger!
 You have no right to criticize me!

Droit is also central to many noun phrases, particularly in the legal field: e.g. **droit de grève**, 'right to strike', **droit de passage**, 'right of way', **droit de poursuite**, 'right of action', **droit de recours**, 'right of appeal', **droits d'auteurs** 'royalties'.

- (f) Impersonal verbs or **on** can also be used to grant or deny permission in a more indirect way:

Il est permis de consulter un dictionnaire pendant l'examen. (See 53)

Dictionaries are allowed in exams.

Est-ce qu'on a le droit de poser des questions? (See 18.9)

Are we allowed to ask questions?

77.2

Prohibition

(a) Verbs expressing prohibition include **interdire, défendre à qn de faire qch, empêcher qn de faire qch, and interdire, défendre, empêcher que qn fasse** (subjunctive) **qch.**

(b) These are sometimes reinforced by adverbs:

Je vous interdis formellement de me parler sur ce ton!

I categorically forbid you to speak to me in that tone of voice.

La règle de l'ordre défendait absolument que les moines se parlent pendant les repas. (See 46.3, 47.5)

The rule of the Order totally forbade the monks to speak during meals.

Verbs expressing prohibition have corresponding impersonal forms, followed by infinitives, and sometimes used with pronouns:

Il est interdit de sortir de l'enceinte du bâtiment avant que la sonnerie n'ait retenti. (See 46.4, 53)

It is forbidden to leave the grounds before the bell has rung.

Comme il m'est défendu de vous parler, je vous envoie ce mot en secret. (See 53)

Since I am forbidden to speak to you, I am sending you this note in secret.

(c) The passive form **être + past participle** is usually used in the negative, on notices, for example:

Les chiens ne sont pas admis dans le magasin. (See 48.1)

Dogs are not allowed in the shop.

Les chèques ne sont pas acceptés. (See 48.1)

Cheques are not accepted.

(d) Prohibitive notices can be even more direct and simply feature a noun (without an article) + infinitive or adjective:

Défense de stationner
Interdiction d'afficher

No parking
No posters

Pelouse interdite	Keep off the grass
Alcool prohibé	No alcohol

or both forms can be combined:

Propriété privée, défense d'entrer.
Private property, keep out.

Note: other ways of prohibiting an action include negative forms of the expressions given in 77.1, 77.3.

77.3

Obligation

(a) A number of verbs and verb phrases are available to express obligation, for example **obliger**, **forcer**, **contraindre qn à faire qch**, **mettre qn dans l'obligation/en demeure de faire qch** and some verbs of volition + subjunctive (see 46.3) which are used when a duty is imposed on someone:

Les accidents toujours plus nombreux dus à l'excès d'alcool contraignent les autorités à multiplier les mesures de répression.
(See 52.9)

The growing number of accidents caused by drink is forcing the government to introduce additional restrictive measures.

La facture ayant été expédiée il y a six mois, nous vous mettons en demeure de nous régler dans les huit jours.

The invoice was sent six months ago so we request that you settle the bill within a week.

La loi exige que vous consultiez un conseiller juridique indépendant. (See 46.3)

The law demands that you consult an independent legal adviser.

(b) **Etre** + past participle, in the structure **être tenu/forcé/contraint/obligé de faire qch**, can be used to show that a person has, or does not have, to do something (see 48):

Le contrat stipule que nous ne sommes pas responsables et par conséquent nous ne sommes pas tenus de vous dédommager.

The contract states that we are not responsible and are not therefore obliged to pay (you) compensation.

Rapporte-le puisqu'il y a un trou: la vendeuse sera obligée de te l'échanger. (See 21.3b, 21.4)

Take it back because there's a hole in it: the assistant will have to change it for you.

In the first of these two examples, note how the obligation – or absence of it – stems from a contract: **le contrat stipule que...** This is often the case because

any code, dogma, legal text, etc. creates a number of obligations and consequently is often referred to with expressions in apposition such as **selon le règlement, d'après les statuts, conformément à l'article 10, (vous êtes tenu de ...)**:

D'après les statuts de notre réseau régional, les nouveaux membres sont tenus de soumettre leur demande d'adhésion à l'organisation nationale dans les deux ans qui suivent leur inscription. (See 11.4, 22.1)

In accordance with the regulations of our regional network, new members have to apply for membership of the national organization within the two years following their registration.

- (c) The verb or noun **devoir** + infinitive or + **de** + infinitive is central to this function and features in several expressions such as **se devoir de, il est de mon devoir de, se faire un devoir de:**

Pour obtenir votre carte de séjour, vous devrez remplir ces deux formulaires avec soin.

To obtain your residence permit you must complete these two forms carefully.

Un bon chef d'équipe se doit parfois d'être autoritaire.

It is the duty of a good team leader to be authoritarian/show his authority at times.

Devoir + noun is used when something is owed to somebody:

Tu te souviens que tu me dois de l'argent? (See 11)

You remember you owe me some money?

Beaucoup de gens pensent que les enfants doivent le respect à leurs parents. (See 28, 29.4)

Many people think that children owe their parents some respect.

- (d) **Avoir à** + infinitive also conveys obligation, with or without a complement:

Dites à votre patron que j'ai à lui parler. (See 51.3)

Tell your boss that I have something to say to him.

Les étudiants de première année ont plusieurs feuillets d'inscription à remplir. (See 18.3, 52.9)

First year students have to fill in several registration forms.

- (e) Impersonal verbs can also be used, in particular **il faut** with a noun:

Pour vous inscrire, il me faut un extrait d'acte de naissance et deux photos. (See 53.2)

To complete your registration I need a copy of your birth certificate and two photographs.

or alternatively followed by an infinitive (same subject in both clauses) or **que + subjunctive**:

Pour poser sa candidature, il faut envoyer un CV. (See 53.2)

You have to send a CV when you submit an application.

Il faut absolument que tu sois rentrée pour 10h00 car nous partirons aussitôt. (See 46.3, 53.2)

You must be back at ten because we're leaving on the dot.

Other impersonal verbs include **il est indispensable/nécessaire/obligatoire de + infinitive** (same subject in both clauses) or **que + subjunctive** (see 53.2).

(f) When used in the negative, the above expressions do not usually convey the absence of obligation but rather the obligation *not to do something*:

Vous ne devez pas toucher cette porte, elle vient d'être peinte. (See 31.7)

You must not touch this door. It has just been painted. (*not You do not have to touch ...*)

Il ne faut pas ouvrir les paquets avant Noël. (See 53.2)

You must not open the parcels before Christmas.

and compare

Tu n'as pas à remplir ce formulaire (mais celui-là). (See 52.9)

You don't have to fill in this form (but that one).

with **ne pas avoir qch à + infinitive**:

Tu n'as pas de formulaire à remplir.

You don't have a form to fill in.

(g) The verb **pouvoir** can also convey obligation, in particular when combined with **ne ... que**:

Il a tellement insisté que finalement, ses parents n'ont pu que s'incliner.

He insisted (on it) so much that finally his parents had to agree.

A mon avis, tu ne peux pas faire autrement que d'accepter cette offre.

In my opinion, you can't do anything but accept the offer.

(h) There are various ways of ordering someone to do something (obligation) or not to do something (prohibition) (see 51.3–51.5):

- by using an imperative for a very direct order or instruction:

Préitez armes!	Present arms!
Tenez votre droite.	Keep to the right.
Attachez vos ceintures.	Fasten your seatbelts.
N'entrez pas!	Don't go in!
Ne refais jamais ça!	Never do that again!
Va-t'en! Vas-y! (See 21.3b, 51)	Clear off!/Get on with it!

- by using the future tense:

Puisque vous êtes si insolents, vous irez voir la directrice et lui remettrez cette note de ma part.

Since you are so insolent, you will go to the headmistress and give her this note from me.

Tu ne tueras point.

Thou shalt not kill.

- the order or instruction can be given more politely with **veuillez** or a passive form:

Veuillez attacher vos ceintures et éteindre vos cigarettes.

Please fasten your seat belts and put out your cigarettes.

Les passagers sont priés de ne pas fumer pendant toute la durée du vol. (See 48)

Passengers are asked not to smoke during the flight.

- instructions on notices or recipes, for example, are usually given in infinitives (see 52.2):

Sonner avant d'entrer.

Ring before entering.

Assaisonner et servir immédiatement.

Add seasoning and serve immediately.

- or nouns + adjectives or past participles:

Port du casque obligatoire (dans la zone de déchargement).

Hard hats must be worn (in the unloading area).

Tenue de soirée exigée.

Dress formal.

77.4

Exemption

- (a) A number of verbs and verb phrases are available to denote that someone does not have to do something, e.g. **dispenser de** + infinitive:

Cet entretien vous dispense de venir à la réunion d'information où les mêmes renseignements seront communiqués. (See 22.12)

This conversation means that you do not need to come to the information session which will deal with the same information.

- (b) Passive forms are used frequently:

Il a été exempté de service militaire pour des raisons médicales.

(See 48.2)

He has been exempted from military service for medical reasons.

- (c) In the same context and to indicate that the obligation has been fulfilled, a Frenchman would indicate in his CV:

Dégagé des obligations militaires. (See 49.1)

Military service completed.

- (d) Other verbs include **décharger**, **épargner**, **exonérer**, **soustraire** and, of course, negative forms such as **ne pas être tenu/forcé/obligé/contraint/dans l'obligation + de faire qch**, including many variations with verbs such as **se sentir**, **se croire**:

Surtout, ne vous sentez pas obligé de faire ça pour moi!

Above all, don't feel obliged to do that for me!

Elle ne se croyait pas tenue de répondre à ses lettres puisqu'il ne lui rendait jamais ses appels téléphoniques.

She did not feel obliged to reply to his letters because he never returned her telephone calls.

- (e) **Sans** + infinitives such as **avoir à** or **devoir** may also be used:

Les banques peuvent désormais opérer dans tous les pays de la Communauté sans avoir à établir de filiales à l'extérieur de leur pays d'origine. (See 52.9)

Banks can now operate in all the countries of the EC without having to establish branches outside their country of origin.

- (f) Impersonal verbs, either positive or negative, can also be used (see 53, 53.2):

Il est inutile d'écrire; nous vous enverrons automatiquement le dossier d'inscription.

You do not have to write; we shall automatically send you the registration form.

Il ne sera pas obligatoire d'assister à la réunion d'inauguration pour adhérer à l'association.

It is not essential to attend the inaugural meeting to become a member of the association.

- (g) Impersonal forms introduced by **ce n'est pas** (see 13.5) provide alternatives, with or without a complement:

Une pièce d'identité? — Non, ce ne sera pas nécessaire.

An identity card? — No, it won't be necessary.

Tu avais dit que tu le ferais mais ce n'est pas une obligation. (See 58b)

You said you would do it but it's not compulsory.

Ce n'est tout de même pas à toi de prendre cette décision.

It's not up to you anyway to take the decision.

Exceptionnellement, ce n'est pas la peine de composter car les machines sont en panne.

There's no point in punching your ticket today – the machines have broken down.

- (h) And **ne pas avoir besoin de** + infinitive can be used with any personal pronouns, including **on**:

On n'a pas besoin de couper l'électricité si on ne s'absente qu'un week-end. (See 18.9, 40.2)

There is no need to switch off the electricity if we're only away for a weekend.

Les médecins n'ont même pas eu besoin de me prévenir; j'ai couru à l'hôpital car je savais qu'il était au plus mal.

The doctors did not even need to call me; I rushed to the hospital because I knew he was dying.

Note that some of these impersonal forms tend to be shortened in spoken exchanges:

Pas besoin de venir me chercher, je prendrai un taxi.

No need to pick me up; I'll take a taxi.

Inutile de m'expédier le document, mon secrétaire passera le prendre cet après-midi.

No point sending me the document, my secretary will come and get it this afternoon.

Reminder: in order to avoid ambiguity, any of the above (see 77.4a–77.4h) are

preferable to **ne pas devoir** + infinitive, **ne pas avoir à** + infinitive, **il ne faut pas que** + subjunctive to express exemption, unless the context makes it absolutely clear that it is *not* a case of obligation not to do something (see 77.3f).

78 Expressing doubt and certainty

Doubt and certainty (see 78.1) are at opposite ends of a continuum where possibility and probability (see 78.2) as well as condition and hypothesis (see 78.3) are also to be found. Many different grammatical forms are used to express all the nuances of meaning involved, some of which are reviewed in this section with occasional emphasis on specific contexts such as expression of reservation in debate or in an economic forecast.

78.1

Doubt and certainty

These may be expressed simply through the meaning of individual verb or noun phrases.

- (a) Verbs such as **douter que** + subjunctive, **ne pas douter que** + indicative, **douter de** + noun, **ne pas douter de** + noun:

Je doute que le colis ait été livré car il n'a été posté qu'hier matin.
(See 46.3, 54.21)

I doubt that the parcel will have been delivered because it was only posted yesterday morning.

Après avoir entendu ce témoignage, tu ne douteras plus une seconde de son innocence.

Having heard this evidence you will no longer have any doubts about his/her innocence.

The meaning of the verbs used may allow you to convey specific nuances of doubt and certainty; for example **savoir** for expressing certainty or uncertainty of knowledge, **se demander** 'to wonder':

Je sais (avec certitude) qu'il ne me laissera pas tomber.
I know he will not let me down.

Nous ne savons pas encore ce que nous réserve l'avenir. (See 22.14)
We do not know what the future holds for us.

Je te parle que nos concurrents se demandent bien ce que nous allons faire, et surtout si nous allons lancer le nouveau produit avant l'été. (See 32.8)

I am sure our competitors are wondering what we are going to do and especially whether we are going to launch the new product before summer.

- (b) Nouns: in the following examples with a noun subject, note the structure noun + verb + **quant à**:

Le doute persiste quant au nombre exact de personnes à bord de l'appareil au moment de l'accident.

Doubt remains as to the exact number of people aboard the plane at the time of the accident.

Le doute n'est plus permis quant à la responsabilité du conducteur d'autobus dans cet accident.

There is no doubt that the driver of the bus was responsible for the accident.

Nouns also occur in phrases such as **de toute évidence, en toute certitude, sans aucun doute, sans le moindre doute** used as adverbs or in apposition:

De toute évidence, cette loi qui est approuvée par tous les partis sera promulguée dans les mois à venir. (See 48.1)

Obviously, the legislation which is approved by all the political parties will be promulgated in the next few months.

Le projet de tunnel tenant compte des considérations écologiques sera sans aucun doute préféré à tout autre. (See 48.1, 50.5)

The tunnel project which takes ecological considerations into account will without any doubt be the one selected.

The same forms can be used to express certainty (if positive) or doubt (if negative), for example, verb phrases with **être** or **avoir**:

Es-tu sûr que la porte de l'appartement est fermée à clef?
Are you sure that the door of the flat is locked?

Oui, j'ai la certitude de l'avoir fermée à clef avant de partir.
Yes, I am certain I locked it before we left.

Non, je n'en suis pas certain. (See 19.6b)
No, I'm not sure.

Je ne suis pas persuadé que Patrick l'ait fermée à clef avant de me les rendre. (See 46.3, 46.7)
I'm not convinced Patrick locked it before giving me back the keys.

Note that expressions of certainty + **que** are followed by the indicative whereas expressions of doubt + **que** are followed by the subjunctive (see 46.3).

- (c) There are many impersonal forms available to express doubt or certainty:
- an adjective:

La police retrouvera-t-elle les marchandises volées?

Will the police find the stolen goods?

certainty

(without a complement)

C'est évident. (See 13.5b)

Yes, they will.

certainty

(with a complement)

Il est certain qu'elle fera de son mieux. (See 13.5b)

They'll certainly do their best.

doubt

(without a complement)

Ce serait étonnant. (See 13.5b)

It would be surprising (if they did).

doubt

(with a complement)

Il est douteux qu'elle puisse tout retrouver. (See 46.3)

It is doubtful that they'll get everything back.

- verb and noun phrases, in particular for expressing certainty:

D'après les journaux de ce matin, il ne fait aucun doute que la maîtresse du ministre espionnait à l'époque pour le compte des Russes. (See 11.4, 46.3)

According to this morning's papers, there is no doubt that the minister's mistress was spying at the time for the Russians.

Les journaux ne nous apprennent rien, c'était l'évidence même! (See 13.5b)

The papers haven't told us anything, it was common knowledge!

D'accord, on la soupçonnait, mais désormais c'est une certitude. (See 13.5b)

Right, we suspected it, but now we know.

En tout cas, avec tout ça, il va sans dire que ses mémoires qui sont sur le point de paraître se vendront très bien. (See 48.4, 53.2, 57.3)

Anyway, with all this fuss, there is no doubt that her memoirs which are just about to come out will sell very well.

(d) Certainty or doubt can be expressed with terms such as **rien + ne**, **personne + ne**, **tout** used as subjects:

Personne ne peut nier l'existence de ces documents. (See 54.16)

Nobody can deny the existence of these documents.

Rien ne prouve que ces documents existent. (See 54.16)

There is nothing to prove that these documents exist.

Tout me porte à croire qu'il dit la vérité. (See 18.1b)

Everything leads me to believe that he is telling the truth.

- (e) The conditional tense can be used to express uncertainty about a fact. It is, for example, very commonly used in press articles when a particular piece of information has not been verified (see 40.6):

Selon les rumeurs, le banquier incriminé dans cette affaire de fraude aurait déjà quitté le pays. (See 49.1)

Rumour has it that the banker involved in the fraud case has already left the country.

D'après des sources proches du ministre, il serait sur le point de présenter sa démission. (See 11.4, 57.3b)

According to sources close to the minister, he is about to tender his resignation.

- (f) You may wish to express reservation or doubts about another person's statement in a debating situation. In order to do so, you can use adverbs such as **vraiment?**, **pas forcément!**, **pas nécessairement!**:

Selon les statistiques, l'économie de la France est en bon état.

Vraiment?

According to statistics, the French economy is in good health.

Really?

or adjectives such as **sceptique**, **perplexe**:

Vous dites qu'il n'y a que 8% de chômage dans cette région; j'avoue que je suis sceptique. (See 54.21)

You say/claim that there is only 8% unemployment in this area; I have to say I find that hard to believe.

Vous me voyez perplexe; je ne suis pas convaincu que ce soit vrai.

You can see I'm confused; I'm not convinced that that's true.

or verbs such as **douter de**:

Vous prétendez que notre service n'a pas répondu à vos lettres mais, franchement, j'en doute. (See 19.6b)

You claim/state/say that our department has not replied to your letters but, frankly, I doubt that/have my doubts about that.

and questions expressing reservation or doubt:

Etes-vous sûr que ces chiffres soient (or sont) exacts? (See 46.3)

Are you sure these figures are accurate?

Croyez-vous vraiment que ce soit le cas? (See 46.3)

Do you really believe that's true/this to be the case?

- (g) In a debating situation, intention to express reservation is often introduced using polite openings such as **permettez-moi de** + infinitive (same subject in both clauses) or **je voudrais** + infinitive or **que** + subjunctive:

Permettez-moi d'émettre certaines réserves quant à la validité de cet argument. (See 78.1b)

Allow me to express certain reservations about the validity of their argument.

Je voudrais faire part au premier orateur de ma perplexité à l'égard des statistiques qu'il a mentionnées. (See 22.2, 49.4)

I would like to say to the first speaker that I have reservations about the statistics he gave/referred to.

or the conditional tense of verbs expressing reservation:

80% de participation aux prochaines élections? Cela m'étonnerait!
80% turnout at the next elections? I'd be surprised!

J'en serais bien étonnée! (see 19.6b)

I'd be very surprised!/That would really surprise me!

Je n'en mettrais pas ma main au feu, si j'étais vous! (See 40.2)

I wouldn't count on it, if I were you!

or impersonal phrases referring *back* to what is in doubt using **ce que**, **ce qui**, **cela**:

Ce que vous venez d'avancer est problématique et discutable. (See 22.14)

What you have just said/The point you have just put forward is problematic and debatable.

Vous nous avez tracé une courbe parfaite mais cela ne reflète pas forcément la réalité.

You have sketched/drawn a perfect curve/picture for us, but it does not necessarily reflect reality.

or impersonal phrases referring *forward* to what is in doubt using **il semble** + adjective + **que** + subjunctive, **il y a lieu de** + verb expressing reservation:

Il semble très étonnant qu'une si faible proportion de l'échantillon ait répondu à cette question. (See 46.3, 53.3)

It is very surprising that such a low proportion of the people in the sample survey replied to the question.

Il y a lieu de s'interroger sur la marge d'erreur tolérée dans les relevés de données que vous mentionnez. (See 22.2, 49.1, 53)

There is reason to doubt the margin of error in the data you refer to.

78.2

Possibility and probability

These notions can be seen as representing two intermediate stages on a spectrum from doubt to certainty (see 78.1).

- (a) Some expressions can be used to express both with slight variations, e.g. **il y a des chances/une chance**. Note the different constructions which follow these impersonal phrases (see 46.3):

Il y a des chances pour que le directeur des ventes parte en voyage d'étude la semaine prochaine. (possibility)

It is possible that the sales director will leave on a study tour next week.

Il y a de fortes chances qu'il prenne l'avion lundi. (probability)

It's likely that he will fly (out)/take the plane on Monday.

Il y a peu de chances de pouvoir le contacter avant son départ. (improbability)

There's not much chance of being able to contact him before he leaves.

Il n'y a aucune chance de terminer le rapport à temps pour le lui confier. (impossibility)

There's no possibility/chance of finishing the report in time to give it to him.

- (b) **Peut-être** is very commonly used to express possibility:

- either on its own as a response:

Comptes-tu garder cette vieille armoire? — Peut-être (bien), on verra.

Are you going to keep this/that old cupboard/wardrobe? — Yes, maybe, we'll see.

Alternatives include **ça se peut**, **ça se pourrait** (both informal, spoken) (see 13.5d), **(c'est) possible**, **(ce n'est) pas impossible** (see 13.5b).

- or within a sentence and in various positions:

Peut-être est-elle déjà partie. (note the inversion)
Perhaps she has already gone/left.

Peut-être qu'elle voudra bien venir. (informal, spoken)
Perhaps she'd like to come.

Elle est peut-être déjà partie. (no inversion)
Perhaps she has already gone/left.

- (c) The verb **pouvoir** is central to a number of expressions indicating possibility. It can be followed by an infinitive:

Un accident peut arriver à tout moment.

An accident could happen at any time.

Attention! Un train peut en cacher un autre. (See 19.6b)

Warning! Another train may be following.

or used in an impersonal expression such as **il se peut que** + subjunctive (see 46.3):

Il se peut que les rues soient très encombrées à cette heure-ci.

The streets may be full of traffic just now.

Il peut arriver que je sois en retard mais c'est vraiment très rare.

(See 13.5b)

I may be late from time to time but it's most unusual.

and **pouvoir** and the other expressions can be used in the conditional tense (see 40.6):

Vite, allume le poste, les premiers coureurs pourraient déjà avoir franchi la ligne d'arrivée. (See 52)

Quick/Hurry up, put on the TV, the first runners may/might have crossed the finishing line already.

Vu les protestations, il se pourrait que le gouvernement fasse marche arrière. (See 49.1)

In view of the protests the government may do a U-turn.

Dans cette enquête, nous avons toujours recherché deux suspects, or il pourrait s'agir de la même personne!

During this investigation we have always been looking for two suspects, but it might be (just) one person!

(d) Finally, adjectives such as **possible**, **impossible**, **éventuel** occur in various contexts and can be used to express possibility and impossibility:

- in impersonal expressions:

Il n'est pas impossible qu'ils aillent en France pendant les vacances. (See 46.3, 53)

It's not impossible/It's possible that they'll go to France during the holidays.

Il m'est impossible de vous rencontrer aujourd'hui. (same subject in both clauses, so use **de** + infinitive)

I can't meet you today.

- in verb phrases, for example **rendre possible** 'to make possible':

Ce changement d'attitude de la part du gouvernement israélien rend possible une amélioration des relations diplomatiques entre les deux pays.

This change of attitude by the Israeli government will make possible an improvement in diplomatic relations between the two countries.

- or with nouns:

Malheureusement, vous devez envisager une *aggravation éventuelle de la maladie de votre père au cours des mois à venir.*
Regrettably, you will have to consider that your father's illness may possibly get worse in the coming months.

- (e) The corresponding nouns, or adverbs, are also used:

Les événements survenus dans l'ex-Yougoslavie prouvent que la possibilité d'une guerre ne peut jamais être totalement exclue. (See 48.3, 49.1)

Events in the former Yugoslavia demonstrate that the possibility of (a) war can never be totally excluded.

Pour l'encadrement du tableau, je ferai *éventuellement* appel à un spécialiste.

I'll probably get an expert to frame the picture.

- (f) Sometimes, the line between possibility and probability is easily crossed, for example simply by using an adverb of reinforcement such as **bien**:

Regarde le ciel! Il semble *bien* que le temps va changer. (See 53.3)
Look at the sky! It looks like the weather's going to change.

Il se pourrait bien, il est bien possible que + subjunctive are two possible alternatives as well as **on dirait bien que** for more informal language:

Ça alors! On dirait bien que quelqu'un a essayé de forcer la porte!
Blow me! You'd think someone had tried to break down the door!

- (g) Other adverbial forms, such as **sans doute**, **certainement**, may be used to express probability (*not* certainty). Note the inversion in the first example:

Sans doute a-t-elle été obligée de quitter cette pièce momentanément pour aller répondre au téléphone. (See 32.8)
She must have left the room for a moment to answer the telephone.

Comme tu n'as pas encore réglé ta facture, ils vont certainement vouloir te faire payer des intérêts. (See 32.8, 52.6)

Since you haven't paid the bill yet, they'll probably want you to pay interest.

- (h) And, of course, terms whose meaning suggests probability or improbability may be used, in various positions in a sentence, as impersonal expressions (see 46.3):

Il est très vraisemblable qu'un nouveau secrétaire général sera nommé d'ici quelques jours. (See 48, 57.4.e)

It is very likely that a new general secretary will be appointed in a few days.

Il est peu probable que le directeur licencié soit remplacé avant janvier. (See 48)

It is unlikely that the manager who has been made redundant will be replaced before January.

- (i) Note that negative forms of these impersonal verbs have to be followed by a verb in the subjunctive and also that there is a tendency to use **peu or guère vraisemblable/probable** rather than **invraisemblable/improbable**. However, the latter may be found in some cases:

C'est plus qu'improbable, c'est carrément impossible!

It's more than unlikely/improbable, it's frankly impossible!

Terms whose meaning suggests probability or improbability may also be used as adverbs:

Les négociations ont vraisemblablement échoué en raison de l'intransigeance des parties en présence. (See 55.4)

The negotiations have probably broken down because of the intransigence of the (two) sides/parties (involved).

as adjectives:

La tension croissante qui se fait jour laisse augurer un échec probable des négociations. (See 50.3, 52.7)

The increasing tension makes a breakdown in negotiations look likely.

as nouns:

Selon toute probabilité, le tunnel ne sera pas ouvert au public à la date prévue.

It is quite likely that the tunnel will not be open to the public on the date scheduled.

(j) Verbs play an important part in expressing probability, in particular the verb **devoir**:

Tiens, il n'y a plus d'échafaudage, les ouvriers ont dû le démonter pendant le week-end! (See 53.2)

Look! The scaffolding's gone. The workmen must have taken it down/dismantled it during the weekend.

Notre représentant devrait passer vous voir avec les échantillons en début de semaine prochaine. (See 57.4b)

Our representative should call on you with samples at the beginning of next week.

(k) Some verbs are used specifically to express the probability of a negative occurrence, for example, **risquer de** + infinitive or **craindre (fort) que/avoir (bien) peur que** + ne + subjunctive:

Les dépenses occasionnées par le congrès risquent fort de déstabiliser les comptes de l'organisation pour l'exercice en cours. (See 49.1, 54.4)

The expenses incurred by the conference may/might well upset the organization's budget for the present financial year.

Je crains qu'il ne soit trop tard pour le cinéma car c'est samedi et il y a de fortes chances pour que ce soit déjà complet. (See 46.3)

I'm afraid that it may be too late for the cinema because it's Saturday and it's quite likely that it's already full.

In the previous double example, note the insertion of **ne** in the first part of the sentence following **je crains que** (see 54.23).

(l) In a previous example (see 78.2i), the use of **laisser + augurer** expressing probability was highlighted:

La tension croissante qui se fait jour laisse augurer un échec probable des négociations.

Similar combinations are available with **permet de + infinitive** or **est à + infinitive** (see 52.9):

La baisse des taux d'intérêt permet d'envisager une reprise du marché (de l')immobilier.

The drop in interest rates suggests a recovery in the property market.

A la suite des pluies torrentielles de la nuit dernière, des inondations sont à prévoir dans certaines régions.

After last night's torrential rain, flooding is likely in some areas.

- (m) Other verbs in the conditional tense may be used to express probability (see 40.6):

Je parierais qu'il ne viendra pas.

I bet he won't come.

***Cela m'étonnerait que le problème de l'Irlande du Nord puisse être entièrement résolu d'ici la fin de l'année.* (See 46.3, 48, 57.4e)**

It would surprise me if the Northern Ireland problem can be fully resolved by the end of the year.

The conditional tense is often used for forecasting, as in the following examples (economic forecast) from *Capital* (August 1994):

Après avoir reculé de 0,9% en 1993, le PIB (Produit Intérieur Brut) devrait progresser cette année de 1,8%, selon l'OCDE (Organisation de Coopération et de Développement Economiques). (See 52.4)
 Having dropped 0.9% in 1993, the GDP (gross domestic product) should rise this year by 1.8%, according to the OECD (Organization for Economic Cooperation and Development).

Les exportations seraient le moteur auxiliaire de cette reprise.... Elles progresseraient de 4,3%.... Mais nos succès à l'étranger seraient insuffisants.... Résultat: notre excédent commercial diminuerait sensiblement en 1995.

The recovery will be export-led.... Exports should rise by 4.3%.... But our results abroad will not be sufficient.... Our balance of payments surplus will consequently suffer a considerable decline in 1995.

78.3

Condition and hypothesis

Although different in meaning, these two notions are close in terms of the structures used. Broadly, when the realization of one fact (usually in the main clause) depends on the realization of another (hypothesis or condition in the dependent clause), then we have a hypothetical sentence.

- (a) **Si** is commonly used in a complex sentence of this type (see 40.2):

***Si le témoin parle, l'accusé sera condamné.* (See 48)**

If the witness talks, the accused will be found guilty.

Dis-le tout de suite, si tu ne veux pas y aller.

Say now, if you don't want to go.

The hypothesis can be set in the present, in the past, or, as in the following example, in the future. Particular attention has to be paid to the use of tenses (see 40.2):

Si le grand-père venait à disparaître, les petits-enfants hériterait d'une grosse fortune.

If their grandfather were to die, the grandchildren would inherit a vast fortune.

Quand + appropriate tense (future or future perfect) is an alternative (see 37):

Tu pourras sortir quand tu auras terminé ton travail.

You can go out/leave when you have finished your work. (note the English tense)

(b) In all the above examples with **si**, note that the condition/hypothesis may become a reality. In the following cases, however, the implication is that it cannot be realized (see 40.2):

Si j'avais joué ma combinaison ce jour-là, je serais riche aujourd'hui.

If I had used my combination of numbers that day, I'd be rich now.

Si je n'avais pas freiné à temps, je l'aurais renversée!

If I hadn't braked in time, I would have knocked her down!

(c) The following example illustrates an abstract principle. In this case, structures of the type **supposons que/si ... alors/dans ce cas** are often used (with the indicative):

Si x + 2 est égal à 6, alors x = 4.

If $x + 2$ equals 6, then $x = 4$.

and note the hypothesis in the following example:

Supposons qu'il a pris le train de 8h00, dans ce cas il arrivera à Nantes à 12h30.

If he caught the 8 o'clock train, he will arrive in Nantes at 12.30.

(d) Other ways of expressing condition include:

- using clauses with the conditional tenses

Au cas où vous ne seriez pas satisfait de ce produit, veuillez nous le renvoyer dans son emballage d'origine.

If the item does not meet with your approval, please return it to us in the original packing.

Cet ordinateur est muni d'une mémoire auxiliaire *dans l'hypothèse où la mémoire disponible serait insuffisante pour une application spécifique.* (See 48)

This computer has expandable capacity should the memory prove inadequate for specific applications.

Sometimes, the condition is implied rather than explicit, especially in spoken, or colloquial, language:

Tu l'aurais vue leur crier après comme ça . . . une vraie demeurée!
(Si tu l'avais vue, tu l'aurais prise comme moi pour une demeurée.)

If you'd seen her shouting at them like that . . . a real half-wit!

J'aurais l'argent, je te le rendrais tout de suite, crois-moi, mais je suis fauchée!

If I had the money, I'd give it back to you right away, believe me, but I'm broke!

- using clauses with the subjunctive

Ce logiciel est très simple à utiliser, à condition que vous observiez bien les premières consignes de manipulation. (See 46.4)

This software package is very easy to use, provided you follow the instructions at the beginning.

La délégation arrivera à l'hôtel dans quelques minutes, à moins que l'autobus n'ait pris du retard. (note the insertion of ne (see 54.23)) (see 46.4)

The delegation will arrive at the hotel in a few minutes, unless the bus is late.

Dieu te pardonnera, pourvu que tu ailles te confesser. (See 46.4)
 God will forgive you, if you go to confession.

and less directly:

Que je vous trouve (subjunctive) **encore à traîner dans le quartier, et j'appelle les flics!** (see 46.1)

If I find you hanging about in the area any more, I'll call the police!

- using clauses with the indicative

Tu devras envisager différentes possibilités pour l'été prochain, selon que tu auras obtenu ou non ton permis de conduire en juin. (See 18.2, 37)

You'll have to think about the different possibilities for next

summer, depending on whether or not you get your driving licence in June.

Le tarif est différent, suivant que vous faites votre réservation au comptoir ou par téléphone.

The rate is different according to whether you make your reservation at reception or over the telephone.

- using relative clauses or gerunds

Toute personne qui entrerait sans badge d'identification serait immédiatement repérée par la caméra. (See 11.4, 22.1, 48)

Anyone entering (*or who may/might enter*) without identification would be picked up immediately by the camera.

En signant cette pétition, il aurait prouvé qu'il est vraiment opposé au nucléaire. (See 40.6, 50.6)

By signing/*If he signed* the petition he would have proved he really is against nuclear power.

- using phrases such as **à condition de** or **à moins de** followed by an infinitive (see 46.7)

Vous pouvez tous venir prendre un verre chez moi à condition de ne pas faire trop de bruit car les enfants dorment. (See 54.16)

You can all come and have a drink in my house provided you don't make too much noise because the children are asleep.

Ce problème scientifique est si complexe qu'à moins de s'unir, les équipes de recherche ne pourront jamais en découvrir la solution. (See 19.6)

This scientific problem is so complicated that unless they work together the research teams will never (be able to) find the solution.

- using a complement of condition introduced by **en cas de**, **sans**, **avec**, etc.

En cas de panne, les véhicules s'immobilisent sur la bande d'arrêt d'urgence et l'équipe de mécaniciens intervient aussitôt.

If there is a breakdown the cars stop in the emergency lane and the mechanics get to work immediately.

Sans chaînes, vous n'avez aucun espoir de franchir le col.

Without wheel-chains you've no hope of getting through the pass.

- using forms where the condition is implied, for example imperatives or forms in apposition

Demande-lui, tu verras, il te donnera exactement la même réponse!

Ask him and you'll see, he'll give you exactly the same answer!

Une fois débarrassés de leur dette, les pays du tiers-monde pourraient enfin organiser leur propre développement.

If they were free of their debt, third world countries could at last organize their own development planning.

- (e) Finally, it is interesting to look more closely at the verb **supposer** to see how different forms convey different nuances of meaning. **Supposer que** (or equivalent expressions) + indicative is used to make or to check an assumption. This is an alternative way of expressing probability (see 78.2):

Il est maintenant 10h00, je suppose que le facteur est passé.

It's 10 o'clock. I suppose the postman has been.

Je suppose que tu restes diner?

I suppose/assume you're staying to eat/for dinner?

Jacqueline Pernet, je présume? ... Louis Legrand, enchanté.

Jacqueline Pernet, I presume? ... Louis Legrand, delighted to meet you.

However, with **supposons que, en supposant que, à supposer que**, you can indicate a hypothesis and you use the subjunctive:

Supposons que des élections aient lieu en juin, quelles sont vos prédictions? (See 46.4, 78.3c)

Suppose the elections take place/are held in June, what is your forecast on the result?

With **supposer** (or **croire**) + adjective, you can indicate an assumption:

Il est parti avec une autre alors qu'elle l'avait toujours supposé fidèle.

He has left with somebody else and she had always thought he was faithful (to her).

and with **supposer** + noun, you can express a condition:

Tout crime suppose un coupable.

If there's a crime there's a guilty person.

- (f) To summarize, the following example from *Capital* (August 1994) contains several forms contained in this section under condition, certainty, probability and possibility:

La hausse des taux longs, si elle persiste, viendra alourdir le financement des déficits publics. Si ces derniers se creusent (c'est fort probable à l'approche des échéances électorales), les banques centrales pourront difficilement continuer à réduire les taux courts, ce qui risque de freiner la reprise.

If the rise in long-term interest rates persists, it will cause difficulties in the public sector borrowing requirement. If public spending increases (which is highly likely as the next election approaches), the central banks will find it difficult to reduce short-term interest rates, and this will slow down the recovery.

79 Expressing logical relations

Cause (see 79.1, 79.2) and consequence (see 79.3, 79.4) are inseparable notions and both are often present, explicitly or implicitly, in the same sentence.

Particular emphasis can be given to either. In this section we will also see how, although distinct in meaning, aim (see 79.5) can be fairly close to consequence in terms of means of expression.

79.1

Cause – explicit

The emphasis may be *explicitly* on cause through:

- (a) The meaning of individual words, either nouns:

La raison de son échec est simple: elle n'a rien fait cette année.
 The reason for her failure/she failed is simple: she has done nothing this year.

Cette circulaire ministérielle représente la cause de tous nos problèmes.

This government (ministerial) circular is at the root of all our problems.

or verbs expressing cause:

Le nouvel engouement pour l'opéra s'explique par la notoriété de Pavarotti pendant la coupe du monde de football.

The/This new craze for opera is because of Pavarotti's reputation during the World Cup (football) series.

or passive forms:

Le déséquilibre de la balance commerciale est causé par (or est dû à) un excès d'importations. (See 48)

The deficit in the balance of trade is a result of excessive imports.

or adjectives:

D'après les experts, la recrudescence de certaines maladies serait imputable à la pollution atmosphérique. (See 11.4, 40.6)

According to the experts, the renewed outbreak of some diseases is due to air pollution.

(b) Prepositional phrases used with a noun (see 55.4):

Les agriculteurs se plaignent à cause du mauvais temps.

Farmers are complaining about/because of the bad weather.

Les rendements agricoles ont augmenté grâce aux bonnes conditions météorologiques.

The harvests have improved as a result of favourable weather conditions.

Note that **à cause de** and **grâce à**, respectively, introduce a negative and positive cause or reason. **En raison de** is usually neutral and could therefore be used as an alternative to either.

When the cause is the absence of something, you can use **faute de**:

Faute d'autres moyens de transport, nous allons être obligés de faire du stop.

Because there is no other kind of transport, we are going to have to hitch-hike.

When the cause is connected to time or duration, use **sous l'effet de** or **à force de**:

La température devrait baisser sous l'effet de l'aspirine.

His/Her temperature should go down with (or because of) the aspirin.

A force de persévérance, il finira bien par décrocher son diplôme.

(See 52.8)

If he perseveres, he will get his diploma.

Single prepositions such as **de**, **par**, **à**, **pour** may also be used, with nouns:

Il est malade de chagrin.

He is sick with disappointment.

Cet homme a quitté son travail et sa famille par amour du voyage.

The man left his job and his family because of his love of travel.

or with infinitives:

Tu te ruines la santé à fumer autant!

You'll ruin your health if you smoke so much/with all that smoking.

Cet employé a été licencié pour avoir provoqué une bagarre dans les vestiaires.

The employee was sacked for causing a disturbance in the cloakroom/changing room.

(c) Conjunctions:

For a straightforward explanation, you can use **parce que**:

N'est-il pas en situation d'échec parce que personne ne l'encourage?

Is he not underachieving because nobody is giving him any encouragement?

In order to state categorically (rather than explain), use **car**:

Le professeur ne viendra pas ce matin car il est malade.

The teacher won't be here this morning because he is ill.

Note that a clause introduced by **car** is *never* used *first* in the complex sentence.

Puisque is emphatic as well as causal. In the following example, the cause is shown to be the decisive factor for the resignation and known both by you and the person you are speaking to.

Puisque vous ne voulez pas m'augmenter, je démissionne.

Since you will not increase my pay/salary, I am resigning.

Note that when there is more than one cause, **que** introduces the other causes:

Les femmes vivent plus longtemps que les hommes parce qu'elles se préoccupent davantage de leur santé et qu'elles sont moins sujettes à certains accidents.

Women live longer than men because they are more concerned about their health and (because) they are less prone to certain types of accident.

To express a logical connection between two facts, you can use **comme**:

Comme il refusait de manger, sa mère a fait venir le médecin. (See 52.6, 52.9)

Because he was refusing to eat, his mother called the doctor.

and to reinforce a statement expressing cause, use **d'autant que** (see 56.9c):

Tu pourrais prendre froid, d'autant que tu n'as presque rien sur le dos! (see 40.6)

You'll catch cold, because you've hardly any clothes on!

When you want to cast some doubt on a given cause, you can use **sous prétexte que** + indicative or **de** + infinitive:

Bon nombre d'étudiants n'étaient pas en cours ce matin, sous prétexte que les routes sont enneigées. (See 29.3, 29.4)

A lot of students were not in class this morning, supposedly because of the snow on the roads.

When speaking and/or for emphasis, **si ... c'est que** or **c'est ... que** may be used:

S'ils ne sont pas encore là, c'est qu'ils ont raté l'autobus.

If they're not here/there yet, it's because they've missed the bus.

C'est à cause de lui que tu pleures?

Are you crying because of him?

J'espère que ce n'est pas parce que nous arrivons que vous partez!

I hope it's not because we're arriving that you're leaving!

When the cause is denied, **non que** or **ce n'est pas que** may be used with the subjunctive (see 46.4). This is a particularly useful device in argumentation:

Je ne suis pas d'accord avec vous, non que vos chiffres soient inexacts, mais parce que votre interprétation me paraît fausse. (See 70.2c)

I don't agree with you, not because your figures/statistics are inaccurate, but because your interpretation of them seems wrong to me.

(d) Adverbs such as **en effet** or **tant**:

Use **en effet** to emphasize your point:

On peut dire que les jeunes représentent une catégorie vulnérable sur le marché du travail. En effet, comme l'indique ce tableau, leurs emplois sont souvent précaires.

One can/could say young people are a vulnerable group in the labour market. Indeed, as this table indicates, they often work in casual jobs.

and **tant** to put emphasis on the cause:

Il fait le vide autour de lui tant il est agressif.

He drives everyone away (from him) he's so aggressive!

79.2

Cause - implicit

Cause may be conveyed *implicitly* in various ways:

- (a) in apposition:

En voyant tout ce sang, la passante s'est évanouie. (See 49.3, 50.6)
When she saw all the blood the passer-by fainted.

Découragés par des méthodes policières violentes, les jeunes adhérents du parti ne pouvaient plus se mobiliser. (See 49.1)
Repelled by the violent methods of the police, young party supporters withdrew their support.

Crevé comme tu l'es, tu ne pourras jamais rouler de nuit. (See 49.1)
You're so exhausted you'll never be able to drive at night.

Furieux devant un tel déploiement de CRS (Compagnie Républicaine de Sécurité), les manifestants ont commencé à jeter des pierres dans leur direction.

Outraged by the sheer numbers of CRS (riot police) the demonstrators began to stone them.

- (b) in separate clauses:

La voiture étant tombée en panne à l'entrée du village, nous avons dû faire le reste du chemin à pied. (See 50.5)
Because the car broke down as we were entering the village we had to go the rest of the way on foot.

Les voitures, qui menacent la vie urbaine, doivent être éliminées du centre de Paris. (See 22.1)

Cars, which are threatening (the quality of life in) the city, must be banned from the centre of Paris.

Je refuse d'adopter une proposition qui n'a aucun sens. (See 22.1, 54.16)

I refuse to adopt a meaningless proposal.

- (c) Sometimes, in particular when speaking, the causal relation might be simply suggested by context, intonation or, when writing, by punctuation:

Il ne va pas venir aujourd'hui, il est malade.
He is not coming today, he is ill.

and in a newspaper report:

Tempête en Bretagne: cinq pêcheurs portés disparus.
Storm in Brittany: five fishermen reported lost.

If you consider the first of the two examples, the man's absence (the context) would be the cause of this explanation. By adding appropriate intonation (indicating pleasure, sadness, regret, indifference ...) to the second clause **il est malade**, and an appropriate Gallic shrug, you can convey the cause, and what you think about it.

— 79.3 —

Consequence – explicit

When the emphasis is *explicitly* on consequence:

- (a) If you want to indicate in a neutral way the logical result of a fact or an action, use clauses introduced by **si bien que** or **de sorte que**:

C'est un cercle vicieux: les jeunes sans domicile n'ont par définition pas d'adresse *si bien qu'on ne leur confie pas d'emploi.*
 It's a vicious circle: if young people are homeless they have no address so they can't get a job. (consequence)

Les colis ont été postés ce matin *de sorte qu'ils arriveront en France avant Noël.* (See 46.4)
 The parcels were posted this morning so they will arrive in France before Christmas. (result)

- (b) In order to stress the importance of the consequence, you may use **au point que** (see 46.4):

La maladie l'a défigurée, *au point qu'elle en est devenue méconnaissable.*
 The disease disfigured her to such an extent that she is unrecognizable.

or structures such as **tant de, si, tant, tellement ... que** with nouns (see 28):

Tant d'années ont passé depuis l'accident *que je ne m'en rappelle plus la date exacte.*
 It's so long since the accident that I can't remember the exact date any more.

or with adjectives or adverbs (see 17.11):

Ce conflit est *si complexe et dure depuis si longtemps qu'il semble que personne ne trouvera de solution.*
 The conflict is so complex and has gone on for so long that it looks like no-one will find a solution to it.

or with verbs:

Votre fils *a tellement progressé depuis l'an dernier qu'il se retrouve en tête de classe.*

Your son has made so much progress since last year that he is at the top of the class.

In a sense, such double structures put emphasis on both cause and consequence:

Le gouvernement est tellement corrompu (cause) *qu'il n'inspire plus confiance à quiconque* (consequence).

The government is so corrupt that it no longer inspires confidence in anyone.

Note that you have to use the subjunctive when the sentence is negative or interrogative:

Il n'est tout de même pas si tard que vous deviez déjà partir!
But it's not so late that you have to leave (already).

Leur fils a-t-il vraiment tant de travail qu'il ne puisse même pas leur rendre visite à Noël?

Has their son really so much work that he can't visit them at Christmas?

- (c) Prepositions such as **pour** and **à** may also be used to express consequence. **Pour** may be combined with adverbs such as **trop** or **assez** in constructions such as

trop/assez + adjective + pour + infinitive

trop/assez + adjective + pour que + subjunctive

or with impersonal verbs such as

il suffit de + infinitive (or noun) + pour + infinitive (or pour que + subjunctive)

il faut que + subjunctive + pour + infinitive (or pour que + subjunctive)

Mes collègues sont assez jaloux pour avoir essayé de me faire licencier.

My colleagues are jealous enough to have tried to have me sacked.

Certains pensent que cet écrivain affiche trop d'excentricité pour qu'on le prenne au sérieux. (See 46.4)

Some people think that this/the writer is too eccentric to be taken seriously.

Il suffit d'un bon café pour se redonner du tonus.

A good coffee is enough to get your energy back.

Il faut toujours graisser le moule pour que le gâteau n'attache pas.

Always grease the tin so that the cake does not stick.

A and au point de are also followed by an infinitive:

Je vais vous annoncer une nouvelle à vous couper le souffle!

I'm going to announce some news which will take your breath away.

Les chômeurs de longue durée peuvent être déprimés au point de

ne plus faire le moindre effort pour trouver du travail. (See 54.16)

The long-term unemployed can be so depressed that they will not make any effort to find work.

(d) Conjunctions or adverbs may also be used to express consequence. Some always *introduce* the clause containing the consequence, for example *c'est pourquoi, aussi, aussi, d'où*, while others can *move* within the sentence, for example *donc, par conséquent, en conséquence, ainsi, dès lors*:

Les ouvriers ont saccagé l'usine; c'est pourquoi ils ont été licenciés.

(See 48.2)

The workers vandalized the factory; that's why they have been sacked.

Notre VRP (Voyageur Représentant Placier) parcourt une région de fortes chaleurs estivales. Aussi avons-nous muni son véhicule de fonction d'un système de climatisation.

Our representative covers an area/region which can become very hot in summer. So, we have installed air-conditioning in his company car.

Vous m'avez remboursé, je retire donc ma plainte. or Vous m'avez remboursé et donc je retire ma plainte.

You have repaid me so I'm withdrawing my complaint.

La délégation japonaise a eu un empêchement de dernière minute. En conséquence, nous prions tous les services concernés d'annuler les réservations et autres arrangements initialement prévus pour la journée de demain. (See 9.3)

The Japanese delegation were delayed at the last minute.

Therefore, we are asking all the departments concerned to cancel bookings/reservations and other arrangements originally made for tomorrow.

Mesdames et messieurs les jurés, vous avez désormais entendu tous les témoins ayant exposé leur version des faits. (See 50.5)
Vous disposez ainsi de toutes les informations nécessaires à vos délibérations.

Ladies and gentlemen of the jury, you have now heard all the witnesses (give their version of the events). You therefore have all the information necessary to help you reach a verdict.

Les forces de police ont toléré, voire participé au trafic d'ivoire. Dès lors, on ne peut s'étonner que des troupeaux entiers d'éléphants aient été décimés dans cette région. (See 46.3, 48.2)

The police have turned a blind eye to, and have even participated in, the ivory trade. So, it is no surprise that entire herds of elephants have been destroyed in the area.

Note the various nuances: **c'est pourquoi, aussi** (with inversion of the verb), **donc, dès lors** stress the undeniable logic of the consequence, **en conséquence** is often used in a formal administrative context, and **ainsi** can allow you to sum up and draw a conclusion from an argument.

- (e) Like cause, consequence may be conveyed simply through the meaning of individual nouns:

Les effets de la récession se font particulièrement sentir dans certains secteurs. (See 47.2, 52.6)

The effects of the recession are being felt particularly in certain sectors.

Tu ne te rends pas compte des conséquences de tes actes!
 You aren't aware of the consequences of your actions.

or verbs:

Les crues ont entraîné d'énormes problèmes aux Etats-Unis. (See 11.2)

The flooding has caused enormous problems in the USA.

L'utilisation croissante des matières plastiques se traduit par une dégradation de l'environnement. (See 48.4)

Increasing use of plastics has led to/resulted in damage to the environment.

Consequence - implicit

- (a) Just as in the case of cause, sometimes there is no explicit cohesive device between two independent clauses. Consequence is *implied* by context, intonation or punctuation (see 79.2c):

Vous êtes rentrés tout à l'heure avec des chaussures pleines de boue, la moquette est couverte de taches!

You came in a few moments ago with your shoes covered in mud, and the carpet is covered in marks.

Note the use of the pronoun *en* in the following example. It refers back to the cause in the clause containing the consequence:

Cet exercice est beaucoup trop compliqué, j'en perds mon latin.
(See 19.6c)

This exercise is much too difficult, I can't make head or tail of it.

(b) In some cases, in particular when speaking, *et* is used but the context indicates that there is in fact a cause/consequence relation:

J'ai senti que quelqu'un me suivait et je me suis mise à courir.
I sensed someone was following me and I began to run.

(c) Relative clauses may also be used:

Le camion a heurté la voiture qui a fait deux tonneaux avant de s'immobiliser. (See 22.1, 46.7)

The lorry hit the car which somersaulted twice before it came to a halt.

79.5

Aim

(a) The same conjunctions (see 79.3a) may be used to express both consequence and aim. For instance, in the following example there is not enough context to indicate whether the result was intended (aim) or not (consequence):

Il s'est mal conduit de sorte que ses voisins ne viennent plus le voir.

He behaved badly to stop his neighbours coming to see him.
(aim)

or He behaved badly so his neighbours don't come to see him any more. (consequence)

If aim is intended, *viennent* is subjunctive. If it is consequence that is meant, *viennent* is in fact the present indicative (See 46.4). In the following example, the distinction is clearer:

J'entretiens ma voiture de sorte qu'elle soit encore en bon état dans dix ans. (aim)

I look after my car so that it will still be in good condition in ten years' time.

J'entretiens ma voiture ***de sorte qu'elle est encore en bon état (malgré son âge).*** (consequence)

I look after my car so that it is still in good condition (despite its age).

Similarly, ***pour que*** can introduce an aim (***pour que*** is *always* followed by the subjunctive so the distinction between aim and consequence is often clear only because of context):

Cette école impose l'uniforme pour que les élèves soient tous sur un pied d'égalité.

The school insists on uniforms so that the pupils are all equal.
(aim)

and compare:

Tu es maintenant assez grand pour que je te fasse certaines confidences sur ma vie.

You are adult/old enough now for me to tell you some of my secrets.

If in doubt about the difference between aim and consequence, try adding the emphatic ***c'est ... que***. If it works, it is aim, if not, it is consequence. Let us test this with the previous examples:

C'est pour que les élèves soient tous sur un pied d'égalité que cette école impose l'uniforme. (This makes sense, it works: so = aim)
It's to make all the pupils equal that the school insists on uniforms.

C'est pour que je te fasse certaines confidences sur ma vie que tu es maintenant assez grand. (This does not make sense, it does not work: so the original statement expressed is not an aim but a consequence)

Sometimes, in particular after an imperative, ***pour que*** is abbreviated to ***que***:

Tourne un peu, que je voie la coupe de ce manteau.

Turn round a bit so that I can see the cut of this coat.

Other conjunctions will allow you to express the notion of an objective to be reached, for example ***afin que***, ***de façon que*** + subjunctive ... (see 46.4):

J'ai convoqué tout le personnel ce matin afin que le calendrier de l'année à venir puisse être établi.

I've called all the staff together this morning so that the planning/schedule for the year can be organized.

Il faudrait raccourcir le voile *de façon qu'il ne tombe pas* plus bas que la taille de votre robe.

You'd/I'd have to shorten the veil so that it doesn't fall below the waist of your dress.

or what you aim to *avoid*, for example **de peur que**, **de crainte que + ne + subjunctive** (see 46.4):

Cette femme a caché l'existence de son enfant *de peur que* les services sociaux *ne lui en retirent* la garde.

The woman concealed her child's existence to avoid the social services taking him/her away from her.

Le PDG (Président-Directeur Général) veut former lui-même son jeune collaborateur *de crainte qu'il ne soit pas* à la hauteur des nouvelles responsabilités *qui lui incombent*.

The chairman/managing director wants to train his young assistant himself to ensure he is up to his new responsibilities.
(in case he is not up to them)

Be careful to distinguish between the expletive **ne** following **de peur que** (in the first example above) (see 54.23) and the negation **ne ... pas** (in the second one).

(b) Prepositions may also be used when you are aiming at something, with nouns:

Cette promotion, tu la veux *pour la gloire ou pour l'argent?*
Do you want this promotion for the prestige or the money?

De nombreux ménages font des économies *en vue d'une escapade estivale.* (See 11.2)

Many families save up for a summer jaunt.

or infinitives:

Afin d'éviter à l'avenir ces problèmes de cash-flow, nous devrons exiger de nos clients qu'ils règlementent leurs factures rapidement. (See 46.3, 46.7)

To avoid cash-flow problems in future, we must request that our customers settle their invoices quickly.

Elle prend des cours du soir *dans l'intention de passer un concours le mois prochain.*

She is taking evening classes in order to sit an exam next month.

or when you are aiming at *avoiding* something:

Il s'est levé à 5h00 du matin *de peur d'être* en retard à son entretien. (See 46.7)

He got up at five in the morning because he was scared he might be late for his interview.

Par crainte des incendies, les propriétaires désireux de louer des chambres d'étudiants doivent installer des détecteurs de fumée. (See 46.7)

Because of increased fire risk, householders wishing to rent rooms to students must install smoke detectors.

- (c) A relative clause will allow you to be more specific about the aim. In the following example note the use of the subjunctive casting doubt on the existence of the office in question (see 46.5):

Pour établir notre siège dans cette ville, nous sommes à la recherche d'un bureau *qui soit assez proche du centre.*

To set up our headquarters in this city, we are looking for an office near the centre.

- (d) Finally, you may express aim through the meaning of nouns and noun phrases:

Les starlettes déambulaient sur la Croisette *dans le but/à seule fin de se faire remarquer* par les cinéastes. (See 46.7)

Starlets wandered along the Croisette (in order) to be noticed by directors.

or verbs and verb phrases:

C'est un artiste provocateur qui *cherche à faire réagir* son public.

He's a provocative performer in that he tries to make the audience react.

or a combination of verbs and nouns:

Grâce à d'habiles manœuvres dans l'entreprise, il a pu *atteindre les objectifs qu'il visitait.* (See 22.2, 55.4)

By clever/skilled manœuvring in the company he managed to achieve his aims.

80 Expressing opposition

Naturally, opposition is related to disagreement (see 70.2), concession (see 72.2), protest (see 73), lack of volition (see 76.5) and prohibition (see 77.2). However, it is appropriate to bring together in this section some of the many forms which

allow you to express the absence of logical relations (see 79) and to associate independent facts set against one another. Although there are explicit ways of associating opposing ideas – especially through the use of concessive forms such as **bien que** 'although', **si** 'although', **qui que** 'whoever' – opposing or contrasting ideas are very often linked by apposition, or by implication.

- (a) Prepositions such as **malgré**, **avec**, **sans** may be used with nouns:

Le bâtiment a été partiellement détruit par l'incendie malgré l'intervention rapide des pompiers.

The building was partially destroyed by fire despite the swift intervention of the firemen.

En dépit du succès obtenu par la Communauté, toutes les réalisations espérées au moment de sa fondation n'ont pas été concrétisées. (See 48, 49.1)

In spite of the success of the Community, not all of the results envisaged when it was created have been achieved.

In some cases, for example with **avec** or **sans**, opposition is less explicit:

Avec son air innocent, elle est capable des actes les plus diaboliques.

Despite her innocent appearance, she is capable of the most diabolical actions.

When reality is different from what might have been expected, you can use **au lieu de** or **loin de** if the emphasis is on what did *not* take place. These prepositional phrases are followed by infinitives:

Contre toute attente, le chauffeur s'est engagé dans une ruelle au lieu de prendre l'artère principale.

Contrary to all expectations, the driver went down a small street instead of taking the main road.

Loin d'apaiser le débat, les propos de l'évêque ont provoqué un tollé général.

Instead of calming the discussion, the bishop's words provoked general uproar.

Note the reinforcement of opposition in the first example by the use of **contre toute attente** (see 80c).

- (b) If you wish to say that part of something is excluded from the whole, use **sauf**, **excepté**, **à part**, **si ce n'est**, **hormis** . . . , and **sinon** following a negative clause:

Tous les cours, sauf un, sont assurés le matin.

All the classes except one take place in the morning.

Tous les cours sont assurés le matin, excepté l'anglais qui a lieu le même jour à 18h00.

All the classes take place in the morning, except English which is at 6 p.m. on the same day.

Aucun livre ne les intéresse, sinon les bandes dessinées.

They are not interested in any books except comics/comic strips.

- (c) Clauses may be introduced by or contain adverbs, or adverbial phrases such as **au contraire**, **par contre** – usually referring back to a previous statement/sentence:

La France semble être très favorable à l'Union Economique et Monétaire; le Royaume-Uni, *au contraire*, ne cache pas sa réticence.

France seems to be very much in favour of Economic and Monetary Union; the UK, on the other hand, is clearly reluctant.

Une dépression très active arrive sur le nord. *Par contre*, l'anticyclone des Açores continuera à protéger le bassin méditerranéen. (See 52.8)

A deep depression is approaching northern areas. But the anticyclone over the Azores will ensure calm weather over the Mediterranean.

Note that **contre** features in many set phrases, e.g. **nager à contre courant** 'to swim against the current', **être contre nature** 'to be unnatural', without a definite article (see 11.4).

The following are examples where opposition is suggested rather than expressed in the use of **en vain**, **finalemement**... (emphasized by *c'est*...*que* in the second example):

Les médecins ont tenté en vain (or ont vainement tenté) de le ranimer. (See 52.9)

The doctors have tried without success to revive him.

Berlusconi avait annoncé qu'il viendrait tête haute; *c'est finalement* profil bas *qu'il s'est présenté devant les juges.* (See 38, 47.2)

Berlusconi had announced that he would come with his head held high; in the end he kept a low profile in front of the judges.

Note how the adjective **seul** implies a contrast in the following example:

L'ensemble de la CEI (Communauté des Etats Indépendants) sera sous la pluie. Seules Moscou et St Pétersbourg auront le plaisir de quelques éclaircies.

Rain will affect most of the CIS (the former USSR). Moscow and St Petersburg will have some sunny spells.

(d) Cohesive devices such as **mais**, **néanmoins**, **quand même**, **pourtant**, **n'en ... pas moins**, are very useful for expressing opposition. They also refer back to a previous sentence or clause, or to an expression in apposition (see 72.2a,b). Note that two of the devices occur in the first example:

Il neigera sur l'ensemble de l'Ecosse mais le soleil fera néanmoins son apparition sur la partie est du pays.

There will be snow throughout Scotland but with some sunny spells in the east (of the country).

Appelés à manifester, les Milanais sont pourtant venus moins nombreux que les journalistes.

The Milanese had been called on to demonstrate publicly but there were fewer demonstrators than journalists.

Acculé à la faillite, il n'en est pas moins décidé à acquérir une deuxième entreprise.

Despite his bankruptcy, he was determined to acquire another business.

(e) Clauses may be introduced by conjunctions such as **alors que** or **tandis que** to express opposition and simultaneity, with the indicative:

Alors que des millions d'emplois se perdaient encore dans la première moitié des années 80, des millions d'emplois nouveaux ont depuis lors été créés. (See 33.1, 48)

Millions of jobs were still being lost in the early 1980s; subsequently millions of new jobs have been created.

L'aile droite du parti socialiste soutient la proposition tandis que l'extrême gauche la dénonce avec vigueur.

The right wing of the socialist party is backing the proposal whereas it is being condemned strongly by the far left.

and by conjunctions such as **bien que**, **quoique**, **malgré que** 'although', with the subjunctive (see 46.4):

Bien qu'il soit de nature essentiellement économique, le programme de mesures prend en compte la protection de l'environnement et du consommateur.

Although it is essentially an economic plan, the measures take into account environmental and consumer protection.

Si is frequently used to express opposition (here reinforced by **immanquablement**) or concession. It does not introduce a condition in the following example, and, therefore, is not restricted to the sequence of tenses used for expressing conditions:

Si les problèmes de Bernard Tapie ne touchent pas directement les socialistes, ils vont immanquablement affaiblir l'électorat de gauche. (See 32.8)

Although Bernard Tapie's problems do not affect the socialists directly, they will inevitably weaken the socialist vote.

And there are conjunctions such as **quand bien même, même si** 'even if' with the conditional in the main clause:

Quand bien même il m'offrirait la lune, je ne l'épouserais pas.
Even if he offered me the moon, I wouldn't marry him.

Même si les forces de l'ONU (Organisation des Nations Unies) intervenaient rapidement, tous les civils ne pourraient pas être sauvés du massacre.

Even if the UN forces were to intervene quickly, not all the civilians could be rescued from the massacre.

(f) Sometimes emphasis is placed on particular elements in the sentence expressing opposition, for example, on the noun. Note the wide range of concessive constructions such as **quel que** (adjective) 'whatever', **quelque** (adjective) + noun + **que** 'whatever', **quelque ... que, aussi ... que, tout ... que, si ... que** 'however' (adverb) + subjunctive which imply opposition (see 46.4), and focus on an element in the sentence – in the following examples on nouns:

Quels que soient les exercices donnés, cet élève refuse de les faire.
Whatever exercises are set, this pupil refuses to do them.

Quelques avertissements que l'on communique (subjunctive), ***il y a toujours des gens qui skient hors-piste et s'exposent aux risques d'avalanche.*** (See 18.12a)

Whatever warnings are given, there are always people who ski off-piste and expose themselves to risk of avalanche.

and in the following examples on past participles and adjectives, and in the last one on an adverb:

Quelque déterminées qu'elles soient, ces deux étudiantes n'obtiendront pas d'être inscrites dans le même groupe de travaux dirigés. (See 18.12b)

However determined they are, these two students won't succeed in getting into the same tutorial group.

Note that in this case **quelque** is an adverb, and is therefore invariable, whereas in the previous example **quelques (avertissements)** is an adjective. An alternative way of saying the same thing would be:

Aussi déterminées qu'elles soient, ces deux étudiantes n'obtiendront pas d'être inscrites dans le même groupe de travaux dirigés.

Similarly, note in the following example how *tout* can be adverb (*tout chrétiens*) or adjective (*toutes pieuses*) (see 18.1d), with the indicative:

Tout chrétiens qu'ils sont, ils ne font preuve d'aucune compassion et toutes pieuses qu'elles paraissent, la générosité leur est inconnue.

However Christian they may be, they show no compassion, and however pious they seem, they do not know the meaning of generosity.

Finally, an example with *si* 'despite the fact that, however', focusing on an adverb:

Si mal qu'il lise, le Conseil de classe a décidé de l'autoriser à passer dans la classe supérieure.

Despite the fact that he is not a good reader, the staff meeting has decided to allow him to proceed to the next year.

(g) Concessive relative pronouns *qui que* 'whoever', *où que* 'wherever', *quoi que* 'whatever', with the subjunctive, can be used (see 46.1):

Qui que ce soit, je ne suis pas là!
Whoever it is, I'm not here!

Où que vous vous cachiez, vous ne m'échapperez pas.
Wherever you hide, you won't get away from me.

Ils ne seront pas d'accord, quoi que tu dises.
They won't agree, whatever you say.

And sometimes opposition is *implicit* in relative clauses (with the indicative):

Imaginez-vous que ce texte, qui comporte plusieurs erreurs, a été sélectionné pour l'épreuve de français! (See 22.1, 48.1)
Can you imagine, this text, which has several errors in it, has been chosen for the French exam!

(h) Of course, there are other implicit ways of expressing opposition; for example, by using apposition or simply in the meaning of verb phrases:

Tu peux dire tout ce que tu voudras, je ne changerai pas d'avis. (See 22.14)
You can say anything you want, I won't change my mind.

On a beau placer des poubelles sur les parkings, les gens continuent à jeter leurs ordures n'importe où. (See 18.14c, 52.8)
 Even though there are litter bins in car parks, people will continue to throw their rubbish anywhere.

or through the use of different parts of the verb such as the imperative or the conditional tense – especially when speaking (see also 79.2, 79.4):

Crie si ça te défoule, je ne te donnerai pas ce livre!
 Make as much noise as you like, I won't give you the book!

On me donnerait tout l'or du monde que ça ne changerait rien à ma décision!
 Even if they gave me all the money in the world, I wouldn't change my mind.

(i) Finally, it is well worth noting the use of antithesis, which is often used for stylistic reasons in literature, and exploited fully in advertising because it allows you to express everything and its opposite. Examples of these short sharp symmetrical formulae or slogans abound in advertising:

Minimir, miniprix mais il fait le maximum. (washing powder)
 Minimir (= Persil, Daz), miniprice maxijob!

Un petit clic vaut mieux qu'un grand choc! (safety belt)
 A little click is better than a big bang!/Clunk-click: every trip!

81 Structuring

Whether you want to make a speech, send a memo, write a report or intervene in a meeting, what you say or write will have more impact if it is structured. Broadly, you will need an introduction, a middle section, and a conclusion. In this section, you will find a number of useful forms under three headings: Beginning (introduction) (see 81.1); Continuing (middle section) (see 81.2); Ending (conclusion) (see 81.3).

Beginning

(a) The very beginning

Before getting to the topic itself, it is advisable to use polite formulae, especially when you take the floor (formal spoken context), sometimes emphasized by **c'est ... que**:

C'est avec grand plaisir que nous nous trouvons parmi vous aujourd'hui à l'occasion de ce congrès.

It is a great pleasure for us to be here with you today at this conference.

C'est pour moi un grand honneur que de pouvoir m'adresser à un public d'éminents experts.

It is a great honour for me to be able to address an audience of eminent experts.

Alternatively, you can use **je/nous + verb phrase or verb + infinitive:**

Je suis très heureux de pouvoir prononcer l'allocution de bienvenue dans un cadre aussi magnifique. (same subject in both clauses, so use **de + infinitive**)

I am very pleased to be able to give the welcoming address in such magnificent surroundings.

Nous apprécions d'avoir été invités à vous présenter les résultats de nos études. (See 48.3)

We are pleased to have been invited to present our research findings to you.

At the very beginning it is quite usual to refer *back* to an event/a fact. Noun phrases may be used for this:

En réponse à votre lettre du 2 janvier, nous sommes heureux de vous soumettre une offre pour les articles suivants:

In reply to your letter of 2nd January, we are pleased to make you an offer for the following articles:

A l'occasion de ce 21ème congrès de l'Organisation, je souhaite la bienvenue aux membres présents parmi nous pour la première fois.

On the occasion of this 21st conference of the Organization, I extend a (warm) welcome to those members who are with us for the first time.

(b) Introducing the topic

In writing a letter or report, the topic may simply be announced with a noun followed by a colon:

Objet: demande d'offre (in commercial correspondence)

Re: request for quotation

Motif: organisation des équipes de nuit (in a report)

Re: night shift schedule/roster

The topic may also be contained in the title or introductory sentence, after phrases such as **au sujet de**, **à propos de**, **sur**, **concernant**, **relatif à ...** 'concerning ...':

Rapport du contremaître au sujet de l'accident survenu le 13 mars 1992 à Evry sur le chantier n° 2. (See 49.1)

Foreman's report on the accident at construction site No. 2 at Evry on 13th March 1992.

Proposition de résolution des députés Ernst de la Graete et autres, au nom du groupe des Verts au Parlement européen, sur la cohésion économique et sociale.

Motion for a resolution tabled by MPs Ernst de la Graete and others, on behalf of the Green Group in the European Parliament, on economic and social cohesion.

In verb phrases, you should use the conditional tense (see 40.4):

Je voudrais parler de la contraception.

I should like to speak about contraception.

J'aimerais aborder le thème de l'éducation pré-scolaire.

I should like to tackle the subject of pre-school education.

or in a relative clause following the topic:

Telle est la question à laquelle je voudrais répondre. (See 22.6)

That is the question I should like to answer.

Voilà ce dont je voudrais vous entretenir. (See 22.14)

That is what I would like to talk to you about.

For a more direct or powerful introduction, use the present or future tense:

Je tiens à évoquer le problème suivant:

I wish to raise the following matter:

Dans mon exposé, je traiterai la question de l'autonomie des régions.

In my paper, I shall deal with the question of regional autonomy.

A noun + relative clause may precede the topic:

La question qui nous intéresse concerne le développement des autoroutes de l'information. (See 22.1)

The question which interests us is the development of information superhighways.

Le thème qui me préoccupe a trait au rôle des femmes dans les sociétés actuelles. (See 22.1)

My concern today is the role of women in contemporary society.

Le problème que nous allons analyser porte sur le recyclage des déchets nucléaires. (See 22.2)

The problem we are going to analyse concerns the recycling of nuclear waste.

(c) Announcing an outline

The future tense is often used to introduce the outline of a text:

Je traiterai la question en trois points: premièrement ..., deuxièmement ... (See 54.1)

I shall deal with the question in three parts: first ..., second ...

In the following example, note the use of the future tense, followed by **avant que + ne + subjunctive or avant de + infinitive** (see 46.4, 46.7) to announce the outline of a book:

C'est pourquoi un premier chapitre *rappellera* les grands traits du peuplement de la France depuis ses origines *avant que* le deuxième *ne traite* plus en détail des facteurs de son évolution. Par ailleurs, la population française n'est pas la simple juxtaposition d'individus indifférenciés et *il nous faudra* encore insister au chapitre III sur sa diversité et les inégalités qui la traversent avant d'aborder enfin au chapitre IV les principaux enjeux démographiques.

(Vallin, J. (1989) *La Population française*, Paris: La Découverte) Thus the first chapter will provide a broad outline of the population of France from its origins, and the second will provide a more detailed account of its evolution. However, the population of France is not simply a collection of undifferentiated individuals, and we will focus again in the third chapter on its diversity and its disparities. Finally, in the fourth chapter we will deal with (the) major demographic issues.

In the following spoken interventions, the speech is introduced by **je voudrais ...**, and followed by some of the numerous cohesive devices available for presenting an outline: **d'une part ... d'autre part, durant la première partie, dans un deuxième temps:**

Madame la Présidente, mes chers collègues, je voudrais essentiellement dans mon intervention aborder deux aspects du programme législatif et je le ferai brièvement. D'une part l'énergie et d'autre part la recherche développement et ses implications en matière de politique industrielle.

(Débat du Parlement européen – Séance du 10.3.93)
Madam President, colleagues, I should like to concentrate in my presentation on two aspects of the legislative programme and I

shall do so briefly. First of all, energy, and second, research and development and their implications in terms of industrial policy.

Je voudrais si vous le permettez, diviser cette causerie en deux temps séparés par une pause. Durant la première partie, j'aborderai la question de l'évolution de la science [...]. Dans un deuxième temps, j'aborderai la question de la responsabilité des hommes de science [...].

(Poots, M. (1990) *La Science moderne, progrès ou péril?*, Heriot-Watt University, Edinburgh)

I should like to divide my talk into two parts with a break in between. In the first part I shall deal with the evolution of science. In the second I shall deal with the responsibility of scientists.

When breaking down an outline into its various components, corresponding, for example, to the various sections or chapters of a book, the following forms may occur:

Noun (relating to the section or chapter) + verb announcing the topic:

La seconde partie porte, elle, sur les politiques d'emploi. (See 24.11)

The second part deals with employment policies.

Le chapitre 7 vise à situer la place de la politique de l'emploi dans les enjeux des années quatre-vingts.

Chapter 7 aims to establish employment policy among the major issues of the 1980s.

Once the topic is announced, subsequent sentences are frequently introduced by *c'est* which is often followed by a relative clause:

C'est le thème des deux derniers chapitres.
This is the topic of the final two chapters.

C'est de tout cela dont il est question dans la première partie de cet ouvrage.

(Barou, Y. et Rigaudiat, J. (1985) *Le Marché du travail*, Paris: Hatier)

That is the subject matter of the first part of this work.

C'est l'objet des deux premiers chapitres de ce livre que de répondre à ces questions.

(Chassard, Y. et Concialdi, P. (1989) *Les Revenus en France*, Paris: La Découverte)

The purpose of the first two chapters of this book is to answer these questions.

An adverb + **il faut** + infinitive may also be used:

Ensuite, il faut rappeler les principales évolutions concernant l'évolution des revenus. Enfin, il faut s'interroger sur la manière dont s'opère la répartition des revenus en France.

(Chassard, Y. et Concialdi, P. (1989) *Les Revenus en France*, Paris: La Découverte)

Then we shall touch on the major developments concerning the pattern of income distribution. Finally, we shall examine the way income differentials operate in France.

Finally, it is worth noting the use of punctuation (especially the use of brackets) when giving the outline of a book:

Les chapitres correspondent chacun à un poste budgétaire et ont été ordonnés selon l'évolution de leur croissance. L'alimentation (chapitre 2) et l'habillement (chapitre 3) connaissent un déclin relatif... L'habitation (chapitre 4) et les transports (chapitre 5) après avoir beaucoup augmenté, semblent peu éloignés de leur état stationnaire. Le relais dans la progression des dépenses a déjà été pris par la culture et les loisirs (chapitre 6), d'une part, et, d'autre part, par la santé (chapitre 7).

(Herpin, N. et Verger, D. (1991) *La Consommation des Français*, Paris: La Découverte)

Each chapter deals with an individual household budget item and these are arranged in terms of their relative increase over time. The cost of food (chapter 2) and cost of clothing (chapter 3) have declined slightly... Housing (chapter 4) and transport (chapter 5) having experienced a substantial increase, now appear to have stabilized. Spending on culture and leisure on the one hand has increased (chapter 6) as has spending on health (chapter 7).

— 81.2 —

Continuing

(a) Adverbs are often used to indicate a transition, that is, a move from one topic or idea to another. Adverbs of opposition (see 80c–80d), for example, may introduce the second part of a for-and-against type of argumentation:

Pour toutes ces raisons, la réduction du temps de travail apparaît comme la solution du chômage. Cependant, il importe aussi d'en évoquer les inconvénients.

For all of these reasons, a reduction in working hours seems to be the solution to the problem of unemployment. However, it is just as important to consider the disadvantages (of such a policy).

Adverbs and adverbial phrases may introduce the various points which contribute to argumentation within the text:

Il faut fournir aux femmes qui travaillent des structures adéquates pour la garde de leurs enfants, *d'abord* parce qu'elles ont comme tout citoyen le droit de travailler, *en second lieu* parce qu'il y a une demande importante de main d'œuvre qualifiée. *D'ailleurs* dans certains des secteurs concernés, les femmes nouvellement qualifiées sont plus nombreuses que leurs homologues masculins; *et d'un autre côté*, parce que leurs performances au travail sont meilleures lorsqu'elles jouissent d'une sécurité d'esprit par rapport à leurs enfants.

We must provide working women with adequate structures (assistance) in caring for their children; first because, like every member of society, they have a right to work, and second because there is a substantial demand for a qualified labour force. Moreover, in certain of the sectors in question there is a greater number of recently qualified women than men; also, their performance is better when they have peace of mind with regard to their children's welfare.

- (b) Impersonal verbs followed by expressions indicating that the discussion is to continue are useful means of structuring what you want to say or write (see 53):

Il y a un autre problème à résoudre avant de clore les débats:
There is another problem to be resolved before the discussion ends:

Il faut maintenant aborder le premier point de l'ordre du jour:
We must now turn to the first item on the agenda:

Il convient d'évoquer un deuxième aspect de ce programme qui pourrait nous être utile.

It is appropriate at this point to raise another aspect of the programme which might be useful to us.

- (c) **Pour + infinitive** may also be used, for example, to introduce a response:

Pour répondre à votre question, je ferai deux remarques:
In answer to your question, I shall make two comments:

or to return to a point, perhaps after a digression:

Pour en revenir au problème qui nous préoccupe, je voudrais proposer la solution suivante:
To return to the problem under discussion, I should like to propose the following solution:

- (d) Finally, first person plural imperatives are often used to change the subject (see 51.3):

Si vous le voulez bien, passons au point suivant car le temps passe.
If you have no objection, let us turn to the following point because time is pressing.

Vous avez évoqué vos qualifications; venons-en maintenant à votre expérience professionnelle.

You have discussed your qualifications; can we turn now to your professional experience.

or to return to the point:

Excusez-moi de cette interruption ... maintenant, revenons à nos moutons.

I apologize for interrupting ... now, could we return to the matter in hand.

Cette remarque sur les immigrés est intéressante mais ne perdons pas de vue notre sujet qui est la population active dans son ensemble.

That comment on immigrants is interesting, but let's not lose sight of our topic – the working population as a whole.

— 81.3 —

Ending

- (a) When concluding a speech or a written text, it is often necessary – indeed advisable – to sum up the main points covered. In order to announce your intention to do so, you may ask direct questions:

Quelle vue d'ensemble peut-on maintenant dégager de la structure de la Communauté européenne et de son ordre juridique?

What then is the general conclusion concerning the structure of the European Community and its legal system(s)?

In conclusions, direct questions are also used to open up the debate and suggest further points to be explored:

Le revenu minimum d'insertion. Quelle va être son efficacité?
Income support? How effective will it be?

Dans les cinquante ans qui viennent, la pression à l'émigration du Sud va être extrêmement forte: est-ce une menace ou une chance à saisir? Les deux à la fois probablement.

During the next fifty years, emigration pressure from the South will be immense: does this pose a threat or is it an opportunity? Probably both.

- (b) It is not uncommon to find a noun followed by a colon. In the following example, **certitudes** . . . is used to indicate a summing up of the various points in the conclusion:

**Deux certitudes pour la population française au siècle prochain:
elle sera plus âgée et sa part dans la population mondiale sera
réduite.**

Two facts about population (trends) in France in the next century: the number of elderly people will be greater, and in terms of numbers it will form a smaller proportion of the world population.

- (c) The conditional tense is often used in the conclusion:

**Plutôt que de l'emploi, il faudrait, on l'a vu tout au long de ce livre,
parler des emplois.**

As we have seen throughout the book it would be better to talk of jobs rather than employment.

and sometimes the conditional is used in combination with structures referring back to preceding argumentation, for example, **dans ces conditions, pour ces motifs:**

**Dans ces conditions, il conviendrait/il y aurait lieu d'entamer des
poursuites contre le transporteur des marchandises.**

In the circumstances, it would be appropriate/there are grounds for taking legal action against the carrier.

The impersonal form **il serait** (or equivalent) + adjectives such as **opportun, utile, nécessaire, indispensable, souhaitable de** + infinitive is also useful here, in particular for making recommendations:

**Pour toutes ces raisons, il serait opportun de ne pas porter un
jugement trop hâtif sur la question.**

For all of these reasons it would be advisable not to pass too hasty a judgment on the matter.

- (d) In a written report, you can use dashes, with noun phrases or infinitives, in order to recap and/or make recommendations as clearly as possible:

Cet accident met en évidence la nécessité:

- d'un effort de sensibilisation aux risques du personnel employé**
- d'une révision des consignes de sécurité**
- d'un contrôle accru du personnel au moment du relèvement des équipes.**

Note the changes when changing from noun phrases to infinitives:

Cet accident met en évidence la nécessité:

- de mieux sensibiliser le personnel employé aux risques
- de réviser les consignes de sécurité
- de mieux contrôler le personnel au moment du relèvement des équipes.

The English equivalent would probably use infinitives:

The accident highlights the need to

- improve safety-consciousness among personnel
- keep safety instructions up-to-date
- improve supervision of personnel during shift changeovers.

The following is another example of the use of dashes to structure the information:

Ainsi, sans porter l'affaire devant un service de contentieux, et compte tenu

- d'une part de la qualité des services de M. Dupuis
- d'autre part du cas social présenté par la famille dont il assurait la subsistance

il semblerait équitable de donner une suite favorable à la demande de la famille.

So, to avoid legal proceedings, and taking into account

- the quality of service given by M. Dupuis
- and the case made by the family, for whose welfare he was responsible

it would seem fair to give a sympathetic hearing to the family's request.

(e) Naturally, when drawing conclusions, you will often have recourse to adverbs expressing consequence (see 79.3d):

La politique de l'emploi est *ainsi* nécessairement plurielle et mixte. Le plus urgent est *donc* de nous préparer à cette évolution, d'aménager notre société et ses rapports avec le monde extérieur en fonction de cette nouvelle donne démographique.

Employment policy is therefore necessarily pluralistic.

Preparation for these changes is urgently needed, and we must adapt our society and its relations with the outside world in terms of this new demographic order.

But you may also want to dismiss *wrong* conclusions with structures such as **non pas que** + subjunctive (see 46.4):

Mais c'est bien sûr du côté de la fécondité que se joue le jeu essentiel. *Non pas qu'il faille* craindre de voir vieillir la pyramide des âges ou les populations du Nord perdre du poids par rapport à

celles du Sud, mais simplement pour que la population française continue d'exister.

But the crucial matter is of course the fertility rate. Our concern should not be that there is a higher proportion of elderly people nor that there is a decline in the Northern populations relative to the South, but simply that the population of France should continue to exist.

Cela ne veut pas dire pour autant qu'il faille se désintéresser de l'évolution des variables démographiques.

That does not mean however that we can ignore demographic changes.

(f) The meaning of individual words and phrases may of course indicate that they are part of a concluding remark:

- en + noun or noun phrase: **en résumé, en définitive, en fin de compte, en somme, en guise de conclusion ...**
- pour + infinitive: **pour en finir/en terminer/conclure ...**
- specific verbs in the future tense: **terminer ...**

Je terminerai en disant que nous courons au désastre si nous n'agissons pas rapidement.

I will conclude by saying that we are courting disaster if we do not act quickly.

And there are various devices, such as the framing structure **c'est ... que**, or the use of phrases in apposition, available to focus on the conclusion:

Et c'est sur ce terrain – la capacité à mobiliser le potentiel humain d'un pays – que se jouera inévitablement la bataille mondiale de la compétitivité.

And it is here on this ground – the ability of a country to mobilize its human resources – that global competition will be fought.

Enfin, et ce sera ma conclusion, il est évident que ces problèmes ne sont pas près de disparaître.

Finally, and this will be my conclusion, it is obvious that these problems are not about to disappear.

(g) At the *very* end, punctuation or direct questions (see 81.3a) may be used for 'finishing effect':

A ce jeu, la majorité des Français pourraient bien se retrouver floués ...

In this, the majority of French people could well find themselves to be the losers ...

Ne conviendrait-il pas d'inverser le propos et d'essayer de savoir pourquoi les couples aujourd'hui font encore des enfants afin de comprendre ce qui peut les motiver à en faire encore demain?

Would it not be better to look at the matter the other way round and try to establish why couples today continue to have children in order to understand what will motivate them to have children in the future?

And in speech, thanking is often in order, in particular with **remercier de + infinitive or noun:**

Je vous remercie d'avoir répondu à mes questions.

Thank you for answering my questions.

Nous remercions le public de sa participation active.

We would like to thank everyone present for their active participation.

Merci de votre attention.

Thank you for your attention.

Enfin! Merci!

Verb tables

82

The following tables contain a selection of verbs from the four main conjugations (-er, -ir, -re and -oir infinitives) and some of the irregular verbs in frequent use. The principal parts of the verb included are: the present infinitive, the participles, the present, future, imperfect, past historic, perfect and conditional tenses, the imperatives, and the present tense of the subjunctive. The six parts of each of the tenses correspond to the first, second and third persons singular (*je, tu, il/elle/on*) and plural (*nous, vous, ils/elles*). The reflexive verb *s'asseoir* is given with its reflexive pronouns, and both the positive and negative forms of its imperative are included. The first and third persons of the imperfect subjunctive and the first person singular of the perfect and pluperfect subjunctive are given.

Guidelines on the formation of simple tenses are given in sections 31.2, 32, 33, 34, and for the formation of compound tenses, refer to the guidelines on the auxiliary verbs *avoir* (see 35.1) and *être* (see 35.3). Remember, once you know the simple tenses of *avoir* and *être* and the past participle of the verb you want to use, you can form any of the compound tenses. The perfect infinitive is formed by using the present infinitive of the auxiliary verb and the past participle (see 52).

Three important points to remember:

- 1 Most French verbs are regular. They conform to the guidelines on formation of tenses. Nevertheless, irregular verbs are in frequent use and verb tables are provided so that students have easy access to a checklist. Most of the irregular verbs are in groups too: when you know *mettre*, for example, you also know its compounds, and knowing what happens with verbs ending in *-indre* (see *craindre*, for example, in the verb tables), means that you have all the verbs with infinitives ending in *-indre* at your fingertips.
- 2 Formation of the third person singular of the interrogative – and its negative forms – for all forms ending in a vowel: remember you *must* add *-t-* before *il, elle* and *on*, or use *est-ce que?*

A-t-il donné?	Has he given?	N'a-t-elle pas écrit?	Hasn't she written?
Va-t-on?	Are we/you/they going?	Ne parle-t-il plus?	Doesn't he speak any more?

Chante-t-elle?

Is she singing?

Ne va-t-elle pas?

Isn't she going?

Finira-t-il?

Will he finish?

Ne répondra-t-on

Won't we ever
reply?

or

Est-ce qu'il donne?

Est-ce qu'il ne donne pas?

If the verb doesn't end in a vowel, then the interrogative is formed in the usual way: **prend-il?**, **n'aurait-elle pas?**, **reçoit-on?** The only exception to this is **vaincre** 'to conquer' and its more useful compound **convaincre** 'to convince': **convainc-t-il/elle/on?**

- 3 There are various ways of asking questions with the first person singular. You can simply make a statement and add the intonation of a question, or you can start your question with **Est-ce que?**, **Qu'est-ce que?**, **Que?**, **Où?**... But it is possible with a very few verbs to use inversion with **je**: **ai-je**, **dis-je**, **dois-je**, **sais-je**, **suis-je**, **vais-je**, and note the interrogative form for **pouvoir**: **puis-je**?

4 For formation of the future perfect, conditional perfect, pluperfect and past anterior tenses, see 35.1.

Index of grammar structures and functions

References are to sections. Sections from 56 onwards refer to functions. Where items are followed by several references, these are generally ranked in terms of numbers of examples of the item in a section. In some cases, specific functions have been identified – in addition to a list of references – in order to indicate the range of functions for which a grammar structure may be used.

- a**
- with articles 9
 - with infinitives 52.8–9, 75.3
 - noun + **à** + infinitive 52.10
 - adjective + **à** + infinitive 52.10
 - with towns, cities, countries 9.4e, 56.11e

expressing (un)willingness to act upon request 76.5
indicating whether something was done on purpose or not 76.6
stating what someone does not want 76.7
emphasizing what someone wants 76.7e

Modern French Grammar: A Practical Guide is an innovative reference guide to French, combining traditional and function-based grammar in a single volume.

The *Grammar* is divided into two parts. The shorter section covers traditional grammatical categories such as word order, nouns, verbs and adjectives. The larger section is carefully organized around language functions and notions such as:

- **giving and seeking information**
- **putting actions into context**
- **expressing likes, dislikes and preferences**
- **comparing objects and actions**

All grammar points and functions are richly illustrated and information is provided on register and relevant cultural background. Written by experienced teachers and academics, the *Grammar* has a strong emphasis on contemporary usage. Particular attention is paid to indexing and cross-referencing across the two sections.

This is the ideal reference grammar for intermediate and advanced learners at A-level and above. It will prove invaluable to those with little experience of formal grammar, as no prior knowledge of grammatical terminology is assumed and a glossary of terms is provided. The book will also be useful to teachers seeking back-up to functional syllabuses and designers of French courses.

Margaret Lang is Senior Lecturer and **Isabelle Perez** is Lecturer in French at Heriot-Watt University, Edinburgh.
